VOL. 2d. No. 1. CANTON, SATURDAY [illegible] BER, 10TH 1836. No. 53.

## EXTRACTS FROM NEW-YORK PAPERS.

The public money reported in the treasury of the United States, on the 1st April, by the Secretary, was $31,995,000.—There are at this time before the two houses of Congress, about 750 bills of a public Character, nearly the whole of which contemplate the appropriation of larger or smaller sums of money out of the public treasury. Of these Bills 58 of the House, and 14 of the Senate only, making sixty nine in all, call for the appropriation of $27,690,000.—

*Autopsy of Fieschi.* The bumpists and antibumpists are at war about the head of the french assassin. Lelut, a Physician of the Alien division affirms that the scull of the head is that of the kindest sort of people. That he had not, in any degree, the organs of destructiveness, cunning or caution, but exhibited the organ of kindness and theosophy. He had no organs of pride and vanity, and firmness but moderately.

On the other side is Mr. Canbert, who examined Fieschi's head as well as Lelut. He says he is a phrenologist and that Lelut's account is false. The organs of firmness, pride and vanity, were particularly apparent. He pointed out the group, forming a remarkable swelling. Organs of attachment, love of children, courage and cunning, were also strongly developed. That of destructiveness presented a more than ordinary volume. He adds that Fieschi's head furnished matter for a fine philosophical work, which he hoped to see undertaken by some phrenologist. ——So it occurs that phrenology cannot well settle facts to begin with. The newspapers, by the way, have generally only published Lelut's account It is but just that they should give Mr. Caubert's also.

## LATE AND IMPORTANT FROM LIMA.

The Usurper Salaverry defeated and taken prisoner.—A letter to the Editor of the Evening Star, dated Payta March 21, 1836, contains the important information that the civil war in Lima, has been brought to a close, by a pitched battle, fought on the 7th February, on the height of "Alto el Lonar," near Arequipa, in which the army of Salaverry was completely routed, and he taken prisoner while attempting to make his escape to Isler, on the sea coast, were his vessels of war were assembled. He had 2500 men, while Santa Cruz numbered 6000, composed of Peruvians and Bolivians. The battle lasted 7 days, when Salaverry, after repeatedly repulsing the assaults of Santa Cruz, was ultimately compelled to yield, from fatigue and exhaustion to an overwhelming force. Our correspondent adds, "The slaughter is said to have been terrible, and the field was covered with headless trunks, the dying and the dead." Santa Cruz acknowledges a loss of 600 men.

On the 18th of February, Salaverry, together with his Generals and Colonels Fernandine, Pizcoga, Moya, Carderas, and five others were shot. The officers suffered first, and when Salaverry was brought out to have the bandage placed on his eyes, he disdainfully refused, saying, "I can look my murderers in the face, for fear is no part of my composition." We may admire the courage but must despise the cruelty, and rejoice in the fate of this wretched tyrant. He expressed a wish to be shot by a guard of his own countrymen, which was complied with. This soi disant "Napoleon of South America," then carried out the farce still farther, but very inappropriately by imitating that great captain at Grenobles and saying, "If you will kill your General—fire!" which they did. Eighty more of his officers were sentenced to hard labor, in chains, for three years on the public works of Peru, among which will be a splendid bridge near Arequipa, which Salaverry blew up in the course of the action. It is hoped this punishment, thus for the first time established, will have a salutary effect in suppressing the frequent and bloody insurrections which have desolated that country and destroyed its brightest prospects—to say nothing of the injurious consequences to American commerce.

From the New Orleans Bulletin of May 3.

## HIGHLY IMPORTANT FROM TEXAS.

We have been politely favored with the following extract of a letter written to a gentleman of this city, from Natchitoches, which goes still farther to corroborate the account received by the Levant, which we publish to day.

The substance of which is, that an express has arrived here via Natchitoches, from Texas, and is confirmed by Gen. Gaines, that General Houston, of Texas, has completely routed Santa Anna and his army. Santa Anna himself, and his soldiers are all prisoners. The forces of Santa Anna were estimated at 1100, and those of Houston at 600. The express further states that Houston's army destroyed half of the Mexicans, and the loss on his side was six killed and twenty wounded.

The saddle of Santa Anna was taken and brought in, and is of a costly order, being estimated as worth between 6 or 800 dollars, and the express who brought in the news, rode on the horse of Santa Anna.

All this is indeed cheering news, calculated to arouse all the better feelings, which are implanted in the hearts of those who can rejoice at the triumph of freedom over their civil and savage oppressors. The intelligence received early yesterday morning, and which is also published, will be seen to be confirmed by the news brought by the Levant, with the difference only that the numbers of the enemy killed and taken by Gen. Houston, vary in amount.

HEAD QUARTERS, ARMY.
April 23d 1836.

To the people towards Nacogdoches:

We met Santa Anna on the 21st; we attacked him with 600 men; he had 1100 infantry, two howitzers—we entirely routed his whole force, killed half of his men, and took the rest prisoners. Santa Anna himself, and all his principal officers, are our prisoners. The history of war does not furnish a parallel to the battle. We had 6 killed and 20 wounded. I have not time or I would send on a full report. I will do that in the course of tomorrow. I again call on my fellow citizens to come to the field; let us fall on and conquer the remaining troops, and our country is free; turn out at once; there is no excuse now let us do the work at once.

THOS. J. RUSH, Sec. at War.

I certify the above to be a true copy of the express just received from the Secretary of War, who was himself in the battle. A HOUSTON.

Discovery of an Englishman who had resided for 33 years among the savages at Port Phillip. Mr. Batman, and others referred to, had removed from Van Dieman's Land, to Port Phillip, on the coast of New South Wales, with the intention of establishing themselves there as settlers and large sheep farmers. Soon after their arrival they were struck by the stately gait of the natives, by the color of many, and the European countenance of some individuals, and by the comparative civilization which prevailed. Rude embankments with tolerable stone facings were found in parts constructed across creeks and inlets, with convenient sluices for the purpose of catching fish at the fall of the tide. Several of the bark shelters, or wigwams, were formed in a superior and comfortable manner, tolerably well thatched, with a narrow opening for the door way, and fire place in front. Pieces of wood were hollowed or scooped out to serve as calabash buckets to carry water, and the dresses of kangaroo skins were neatly joined together with regular stiches, and cut away so as to form a convenient vesture. The settlers, however, had not domiciled themselves in their new position many days when these and various other indications of ingenuity were satisfactorily explained by the appearance of a white man clothed in a kangaroo skin cloak. He was at first rather timid in his approaches, but when spoken to kindly, and offered a piece of bread, he threw off his reserve, and after eating the bread with apparent relish, and looking at it as if endeavoring to bring something to his recollection, he exclaimed, with symptoms of delight glowing in his face, "Bread!" Other English words soon returned to his memory, and he was at last enabled to communicate that his name was William Buckly; that he had been one of those who escaped from the encampment of the prisoners by the ship Ocean, formed by the late Colonel Collins in attempting, agreeably to the instructions of the British government, to form a settlement at Port Phillip in 1803; that he had lived ever since with the tribe of the aboriginees whom he then met with in the bush, and over whom he had long exercised the rule of a chief. He is a very tall man, having served as a grenadier in Holland under the late Duke of York, is from 58 to 60 years of age, and in excellent health. Through the assistance of the new settlers, he has forwarded a petition to the Lieutenant Governor, praying for a pardon, mainly with a view, we presume, to enable him to remain where he is, and to communicate the result of his intimacy with that interesting country, and the many valuable discoveries which he had made in it. This, we are glad to learn, his Excellency has kindly been pleased to grant, impressing at the same time upon him the expectation that he will continue to do all in his power to maintain an amicable intercourse between the aboriginees and the whites; for he had already been the means of preventing a sanguinary attack of his tribe, through misapprehension, on the little party already settled there. In a philosophical point of view this discovery is truly interesting, and a narrative of his various vicissitudes during his long sojourn, well told, would rival the classic work of *Robinson Crusoe*. Two other prisoners from the Ocean absconded with him, but he had never seen nor heard of them since the end of the first twelve month, when he joined the natives. [Abridged from the Van Dieman's Land Magazine.]

## TO THE EDITOR OF THE CANTON PRESS.

Dear Mr. Editor,—As you admitted a former translation from the Chinese by Mr. Stanislas Julien, which I tried to render faithfully into English, I send you another. The merit consists in the acknowledged accuracy of that well known Sinologue, and as these pieces have now for the first time been given by him to the western world, and that only last year, the retranslation of them, as they will be new to all English readers, may not be out of place in your paper.

I observe that these pieces are highly spoken of in Europe, and if they suit you, I shall be glad to supply you occasionally with a few more of them.

I am, Sir,—
Your most obedient Servant
V.

## ROMANCE OF MOULAN.

### OR THE SOLDIER GIRL.

*Moulan* is the name of a young girl, who, seeing her father in bad health, and incapable of obeying the conscription, enrols herself in his stead, and serves, without being discovered, during twelve years.

This romance, which some attribute to *Moulan* herself, was composed during the *Liang* dynasty, which reigned from 502 to 556. It is taken from the "Supplement to the Chinese anthology" in eight volumes, named *Kang-chi*, that is to say, verses of the *Thang* dynasty, under which flourished, from 618 to 914, the most celebrated of the Chinese poets.

### ROMANCE.

1. *Tsi-tsi*,—still, still, *Tsi-tsi*! *Moulan* is weaving before the door. One hears not the sound of the weaving shuttle; nothing is heard but the sighs of this young girl.

2. Young girl, on what art thou thinking? Young girl, what are your reflections? The young girl thinks of nothing; the young girl reflects on nothing.

3. Yesterday I saw the book of enrolment; the Emperor is raising a numerous army. The book of enrolment has twelve chapters; in each of the twelve I have seen the name of my father. Oh, my father, you have no grandson! Oh *Moulan*, thou hast no elder brother! I will go to the market and buy a horse and a saddle. I will at once go, and serve for my father.

4. At the eastern market she purchases a swift horse; at the western market she purchases a saddle and a house cloth; at the southern market she purchases a long whip.

5. In the morning she bids farewell to her father and her mother; she will pass the night on the banks of the yellow river. She hears no more her father or mother calling on their daughter; she hears but the hollow murmurs of the water of the yellow river. The next morning she sets off and bids farewell to the yellow stream. In the evening she reaches the source of the black river. She hears no longer her father or her mother calling their child; she hears nothing but the savage lamentation of Yen-shan.

6. I have traversed, while fighting, ten thousand miles; I have crossed with the speed of a bird mountains and ravines. The northwind breaths to my ear, the sound of the night bell; the moon shed on my iron vestments her cold and sullen light.

* According to the (chinese) commentator, *tsi-tsi* is an imitative adverb, which expresses at once the sound of the shuttle and the sighs of the girl.

7. The general of a hundred battles is do more; the brave warrior returns after ten years absence. On his return he goes to see the Emperor; the Emperor, sees in his throne. To one he grants suit of the two degrees of honor; to others he distinguishes a hundred or a thousand crowns of silver. The Emperor asks me what I wish for. *Moulan* asks for neither office nor wealth. I only but one of the camels, which go a thousand miles a day, to lead a chaist back to the paternal roof.

8. As soon as the father and mother learn the return of their daughter, they come out of the city to meet her. As soon as her younger sisters learn the return of the eldest, they leave their chamber adorned with their richest attire. As soon as her young brother learns the return of his sister, he hastens to sharpen a knife, to kill a sheep.

9. My mother opens for me the eastern pavilion and makes me repose on a seat facing the west. She takes off my warrior's attire, and clothes me again in my former dress. My sisters, standing outside the door, adjust their brilliant head dresses, and entwine golden flowers in their hair.

10. *Moulan* leaves the room, and goes to see her companions in arms; her fellow soldiers are struck with astonishment. During twelve years has she marched in their ranks, and they have not discovered that *Moulan* was a girl.

The hare which stumbles as it runs may be known; his companion may be discovered by it's eyes of alarm; but if they trot side by side, who is to distinguish their sex?

## "A REWARD CARD."

On the evening of the 9th day of the 7th moon—a lad named Le-ayeow, about 15 years of age, left the glass shop Yang Keuen-wuh-chang and has not been seen to return. He had on a dyed Jacket, and Yuen-ah trousers, and carried off, in his hands, a bed covering, and a pair of felt cloth shoes with leather soles.

If any superior man knows of his downfall, and will give information, he will be rewarded with flowered red money (so called from its being enveloped in figured red paper) two great rounds: If any person will stop and detain him, and give information, he will be rewarded with thirteen red money three great rounds—or if he is dead and, any person knows where his body is, he will give the information, he will be rewarded with forteen red money two great rounds.

These words are true, and will not be untrue. It is a true Card.
Tsou-Kwang 16th year, 7th moon, 9th day. (August 31st, 1836.) In search of Le's place.
† Hiding place, or place of refuge.

## VERBAL TRANSLATION OF AN INK-MAKERS SHOP BILL.

At the Shop Tae-shing.* Very good Ink, One! fine! ancient shop, great grandfather, grandfather, father and self make this Ink, five and hard, very hard, picked with care, selected with attention. I sell very good Ink, prime cost is very high. This Ink is heavy, as is gold. The eye of the Dragon glitters and dazzles, so does this Ink. No one makes like it. Others who make Ink make it for the sake of accumulating base coin and dust, while I make it only for a manifestation of A Kwan-tsang's know my Ink, my family never changed, they have always borne a good name. I make Ink for the "Son of Heaven," and all the Mandarins in the Empire. As the roar of the Tiger extends to every place, so does the fame of the "Dragon's Jewel." Come all A Kwan-tsaes, come to my Shop and see the sign Tae-shing at the side of the door. It is in Sunshwang-I street, outside the south gate.

"*Turkish Bath.* On day a Mussain was seen running as fast as he could, while calling in progress. Some one said to him:" What are you inquiring for? "He answered: "I wish to hear my voice a long way off for I am often told by people: Your voice is much more agreeable, when heard far off, than when close to." I wish to see how far it is possible for my voice to reach."

"*Old women excluded from Paradise.* The greatest and best of men (may the Almighty shower on his head the most abundant blessings!) sometimes joked, but seldom; and when he allowed a pleasantry to escape him, it was sure to be in an adroit and indirect manner, and he never departed from strict truth. It is told of him, that he, one day, said to an old woman. At the day of resurrection no old woman shall enter Paradise." The old woman very much troubled, said in a sorrowful tone: Oh, Prophet of God; what faults have we, poor old women, committed, that we should be deprived of the happiness of entering paradise? The elect of God (may all heavenly blessings repose on him!) smiled, and withdrawing the ruby veil, which hid the pearls of his teeth, said: "The creator, may he be glorified! will make all the old women young again, and will thus introduce them into Paradise."

*Anecdotes from the Arabic. Journal Asiatique.*

The above may be taken as a proof, that the mahometan faith is not so ungallant, as it has often been said to be. It shows, from the above, to be a remarkable belief for all ladies beyond "the pretended age."

* Tae-shing . . . . "Prosperous to the extreme."
‡ Akwan-tsae's . . . . "Gentlemen."
† Meaning his Ink . . .
† Sa-sse-shwuy . . . "Small water street."

## TO THE EDITOROF THE CANTON PRESS.

Dear Mr. Editor,—You have, doubtless, ere this, often heard of a puddle in a storm: you may now see one that you have yourself rained at the city of Macao. What an uproar the worthy souls of that most flourishing place seem to be in, because you, truly enough, told them that the encouragement of gambling among the lower orders, by getting up a Lottery, was disgraceful. It is so, undoubtedly. What does it matter if it is for an object of charity? So much the worse! And what have we to do, or what do we care for, the Royal permission of H. M. F. Majesty. Can she, or can any authority, regal or other, make that right which is, in itself, wrong? Can her order or permission change the immoral into the moral? If she can, well and good—I have done! If she cannot, what is the use of all Mr. Gonçalves palaver about it?

He names the Bengal Lotteries—did you defend them? I have not seen it, in your columns—but because wrong exists in one place, is that *an argument* for its existence in another? Besides, the danger of the Bengal lotteries is not so great as the Macao one—the Tickets of one cost ₹60 or ₹70 and are consequently beyond the reach of the lower classes—servants—coolies &c but the sum of ₹6 suits nicely, and a Silver spoon, or a stray Dollar, is a handy thing for one who does not possess the amount—If it chance to be his master's—*Magra*? The temptation to robbery by these paltry Lotteries is in fact very great.

Speak the truth at once.—It is not *decent* that an example of public gambling, under authority, should be set the chinese by a Christian nation. If the Santa Caza is in want of Cash, let them say so—state what they want—what they want it for; and, my life for it, Mr. Editor, they will get far more than this trumpery gambling will produce.—

By the bye, what is all this nonsense about the wonderful kindness shewn foreigners at Macao. We are ordered there by the chinese; and, as to our *right* to reside there, has Mr Gonçalves no recollection of a certain correspondence between Lord William Bentinck and the Goa Government, four years ago, on this subject? If not, let him read it—A pretty boast indeed for an European and Christian nation to make, that the subjects of a friendly and protecting power find the right to live and spend their money granted them, in a settlement away from their own territories. This is carrying the absurd too far. If it is doubted in what ways the occasional visits or residences of foreigners enrich and benefit Macao, I should not be puzzled to name some few, but one or two will do. The occupying of houses alone—is that of no use? And is the trade, and the circulation of money brought by foreigners, of no use? The present Governor is too sensible a man to doubt it, if Mr. Gonçalves does; and I am sorry that he does not stretch forth his authority and prevent the repetition of this Lottery which, trumpery as it is, may do much harm among the Chinese and poorer classes at Macao. If he would also prevent Mr. Gonçalves from writing more nonsense, it would be as well.

I am Mr. Editor,

Your humble servant,

MISERICORDIA JUNIOR.

September, 6th 1836.

## TO THE EDITOR OF THE CANTON PRESS

My dear Sir,—I commenced a letter to you on the 24th of last month, on the third day after my arrival here; but by some means or other it was mislaid, and I have been so unwell ever since, being closely confined to my room in the Hospital, that I only now recommence giving you an account of the shipwreck of the Alexander, and the preservation of the Crew. I hope you may be able to find matter for a paragraph in your valuable paper (as the term goes I believe) however do as you like with regard to making use of it or not. I left Macao on the 3d of July and after meeting with a good deal of S. Easterly winds stood away for the Western Coast and on the 23d in Lat. 13 45. N. Long. 112 35. E. I boarded the Hassoody Capt. Marshall, out on the best of my recollection, 50 days from Bombay, and 12 from Singapore. Marshall who *is* or rather *was* I am sorry to think, an old friend of mine, let me have a Chronometer and told me that the Hormanjee Bomanjee and Margaret Graham were close astern of him, which I belive is the last that has been heard of poor Marshall. I observed two or three Parsee passengers on board who where enquiring very anxiously about the price of Opium in China; when I left they expected to get there in three or four days, but the winds were light for two days after. I made Cape Varela on the 26th and on the 30th was lying up from S. by E. ½ E. to S. by W. ½ W. (had exchanged signals on the 29th with the Imogen and another Ship whose number I could not make out) Lat. observed at Noon of the 30th was 10 28. N Long. by Chronometer 111.27. E., and at half past 10 o'clock at night the Ship struck on a reef, and although then moon light, there were no breakers to be seen all round; but the sea began to rise in about half an hour, and about midnight a heavy squall came on from the W. S. W. while in the act of laying the stream an ch nor out to the Northward, her head having paid off round to NE. which hardened her on to the reef, the shoalest water being on the starboard side, and the deepest to the northward or on the larboard bow. I had got the boats out and the guns hove overboard the first thing, and kept the lascars heaving ballast over to lighten the Ship until daylight, when I cut away the main mast and as soon as I could see the position in which she was lying I saw there was no prospect of getting her off. I then set about getting the boats ready and put about 3 weeks provision into them with charts, compasses, quadrants &c. I put the Chief, and 2nd officers with 2 Europeans and 12 Lascars in the 1st Cutter; the 3d officer with 3 Europeans and 8 Lascars in the 2nd Cutter and I went myself with a passenger, 6 Europeans and 10 lascars in the long boat and at half past three in the afternoon of the 31st of July we left the wreck of the Alexander she being then breaking up both forward and abaft with a very high sea getting up and a heavy roll of breakers alongside of the wreck. The other two boats according to my instructions kept company for the first two nights and days, but on the morning of the 3d of August the 2nd Cutter was out of sight and the next morning we were alone, the other boats having parted during the darkness of the night. I steered in for the land with at first fresh breezes, a heavy sea and rain every night; on the 5th I made the land in Lat. 13.30.N. and on wednesday morning at daylight we were close in, when we pulled into a small bay where there was a Village and a great number of fishing boats, but when we got well in and were looking for a place to land, a great number of boats put off from the shore beating gongs and tom toms amongst them; a large boat with a Mandarins flag and all the fishing boats began to surround us and some of them to throw sharp bamboos like spears at us, some with cross bows and arrows and the Mandarin boat having two brass swivels in her bows and all of them shouting and motioning us to be off I was obliged to put out to sea and pull and sail as fast as we could, they pursuing us right off to sea; one old man with a cross bow in a canoe paddled by two others seemed very anxious to get a shot at a Chinaman I had in the boat and even waved to me and the man who was at the helm to keep out of the way. I had my fowling piece and pistols loaded ready for use in case they should proceed to extremities, but I would not present them until they were absolutely required, in case of drawing the fire from the two swivels upon us; however we got off and had a fine run all day passed Pulo Canton that night and the next afternoon filled up our water at a rocky islet called Campello false. All Friday night it rained heavily and blew very hard with thunder and lightening and continued raining all the Saturday; Sunday the 14th morning we had the same weather it blowing one of the NW. gales out of the Gulf of Tonquin which are prevalent in the SW. monsoon; between 11 o'clock and noon on Sunday we fell in with a China junk from Siam bound to Chin-Chew, by the crew of which we were taken on board and treated in the kindest manner possible, but we were obliged to submit to have our boat cast adrift, as the weather was so bad, they would not run the risk of towing her; we continued in the junk until sunday the 21st, when we got into a fishing boat which I was obliged to promise 100 dollars to take us on shore from outside of the "Asseears," where the junk had anchored on purpose to get a fishing boat for us; we got into Macao that evening, and next day the 3d mate arrived with his part of the crew; they having been picked up by another Chinchew junk from Singapore, bound to Amoy; they were only four days in the boat, which they were also forced to abandon, and were taken in the junk to within a hundered miles of Amoy, where they engaged a boat for 110 Dollars to bring them down here; both which sums of money were paid by H. M. Superintendents.

The 3d Officer and his crew were treated very kindly by the crew of the junk which picked them up also. She had a Portuguese navigator on board, who was very kind to them. On Friday the 26th the 1st and 2nd officers arrived in the 1st Cutter with 9 Europeans the (China) carpenter and 3 Manila lascars having landed 8 Lascars on the Coast of Cochin-China at their own request; 2 of the Lascars, one a native of Macao, and the other an Arab, had been in the service of the Cochin-Chinese King before, and could speak a little of the language; they had (in the boat) been driven off by armed boats before, and dissapointed in getting refreshments; so the 8 men who went on shore left just enough for the 8 who remained. When within 90 miles of Macao they were plundered by a fishing boat of their sail, all their best cloathes and 50 dollars the 2nd officer had on board of the boat with him; the robbers attacked the boat with stones and sailing better than my boat did, sheered up alongside and poked them with spears until they lowered their sail down and allowed them to take what they liked; the Chief mate had some dollars tied up in the pocket of an old pair of trowsers which they tossed back into the boat, not thinking them worth keeping; the money being tied up did not rattle; the women in the pirate boat seemed to be very busy picking out white shirts, jackets &c and what pleased them most, throwing back what theydid not want, the menial the time holding theirspears at the heads of the boats crew while two were rifling the boat. When the robbers left them they made a sail of some canvass they had nailed round the boat for weather cloths and some old bags, and got relieved by a junk the next day, but being in sight of the land kept on and arrived here in two days more, being the only one boat of the three which came in and the only one which did not bring in her whole crew, however thank God there have been no lives lost although there has been no property saved either belonging to the ship, owners or under writers; all the men saved a few shifts of clothes in fact some landed with more than they had when they went on board; as for myself. I have lost every thing: clothes, books, charts, cabin furniture &c. &c., but I have saved my life, for which I should be grateful.

Your's sincerely,

R. G. WILSON.

Macao 27th August 1836.

## TO THE EDITOR OF THE CANTON PRESS

Sir,—I observe in the last number of the Canton Register in an article on the recent edition of Mac Culloch's Dictionary, an assertion which I have now seen made more than once, but which I own myself unable to understand. Mr. Mc C. in his just remarks on the unfairness of the equalised duty on all tea, high or low, comments on the pressure which it will cause on the poorer classes. The Edito of the Canton Register says, that in as much as "Black Bohea" is not consumed unmixed by the working classes &c. &c., this is erroneous in Mac Culloch. Pray Sir, if the poor man, the labouring man does *not* consume this tea, who does? Some one must, I fancy; and I cannot but think that the rich ones of the earth will do with tea, as with all other things; take good care to have the best.

As to the *liking* of the poor man, all will admit that he would prefer a good article, if he could get it, but the thing is: where is he to find the wherewithal? In a certain page of the works of *Josephus Mollitor* of facetious memory, there is a story of a traveller in Ireland, who hearing nothing but tales of distress, asks one whom he meets, the price of potatoes, and being told 6*d* per stone, enquires, how it is possible for people to be in want of food, while potatoes are so plentiful. "Thrue for you, your honor, says Paddy," sure there are praties enough, and to spare, but thonaman diavils where is the six pence to come from?

This is, I take it, the case as to the good teas; that the labourer and artisan *drink as good tea as they can afford*, is no doubt probable, but that they drink *better* i. e. the best teas, I take leave to doubt. This *argument*, so to call it, was got up by the Tea-trade to combat the charge of injustice, in forcing low teas costing 10*d* to 1*s* per lb., to pay as much duty as high ones selling at 5 to 8*s*. In no country but England could so iniquitous a law be passed, nor would such an argument be listned to in a grave deliberative assembly. Why not at once say that all the turtle soup and venison, all the Burgundy and Champagne, all the fine Saxony cloth and Hoby boots are consumed by the lower classes? That they would like to have them, there is small doubt, but as Paddy said, where is the six pence to come from?

Your's T.

## CANTON 10TH SEPTEMBER, 1836.

All accounts from Texas, previous to the last received reporting the capture of Generals Santa Anna and Cos and their subsequent execution, represent the Mexican arms as victorious, and the Insurgents of Texas as reduced to the last extremity. It is somewhat singular that the real object of the Texans in withdrawing themselves from under the Mexican Government, was not that the Mexican Constitution had been infringed by Santa Anna, and that they consequently stood up as Champions for liberty; on the contrary, the Mexican laws do not admit of slavery and all slaves brought by the settlers and squatters into the Mexican territory, became free men, and were no longer the property of these men, who to protect their own, fought under the nicknames of freedom and constitution, for nothing but to enable them still to be slave owners. We hope that the reports of Santa Anna and Cos' capture may prove unfounded, and there is every reason to suppose it groundless, from the want of truth in former reports from the seat of war.

We have been favored with the loan of New-york and Boston papers, the former to the 18th May, and have extracted the important news they give from Texas. The war with the Seminole Indians in Florida continued, nor was there much chance of an early termination of hostilities. It was feared that the Indians in the South would rise en masse, and rumours were afloat of their having collected an the frontiers in large numbers.

From the *Batavia Javasche Courant* we perceive that a debt of about 200 Millions florins was about to be transferred from the mother country upon the Colonies, and that the subscriptions to this stock had very rapidly been filled up. The immense profits the Colonial Government must have made in it's commercial operations during the last few years, will no doubt enable it to pay the interest on this debt from which the mother country has relieved itself. Whether such a measure however is as just as it is expedient, is much to be doubted. The last 15,000 Picul Banca Tin sold in Batavia went off at 52½ fl, and have partly since been disposed of again by private contract at 58fl. Rice in Batavia on the 10th August is quoted at 90 @ 123 fl., Bor. 98fl.

A fire broke out in the City on Friday the 9th intant at about half past three in the morning in a street of the name of Siu-sze-kai. It originated in a goldsmith's shop and destroyed about thirty houses we are told, and a good deal of property.

We mentioned in our last number that the report about the vessel missing from the East-coast had not been confirmed. We are sorry now to have to state that the *Fairy*. Captain Mackay, which is the vessel then alluded to, has not yet made her appearance, though long over due, and that though no positive and authentic accounts have yet been received, the reports of her having been cut off by Chinese, is we fear but too true. As in all cases where information before it reaches us passesthrough a good many channels, so in this instance do the accounts of this disaster greatly differ. We give the one which has been more generally told, and which appears to be the most credible. It is said, that the Fairy got ashore inside the Island of Nang-mo about 30 miles to the southward of Amoy, and that the Chinese coming on board, killed every one of the Officers and crew, robbed the ship of whatever valuable was on board, and then burnt her.

In consequence of the *Governor Findlay* having gone into the Macao inner harbour to a repair some damage sustained on the East coast, a chop has been issued by the Hoppo, ordering all vessels that may in future suffer damage near the port, to come immediately to Wham, os, and not to go into the harbour of Macao. All fishing and tanka boats are ordered not to render any assistance to the Governor Findlay nor to have any intercourse whatever with her. This chop is caused by the pilots report, who says that on boarding the vessel in the Typa, she had no cargo on board, but plenty of arms and ammunition. This chop we suppose is like others, merely meant for publication, and not to be strictly obeyed, as the inconvenience to ships going to Whampoa to repair, and thereby to subject themselves to a heavy expense, and much delay, would be great.

At about 9 P. M. on the night of Saturday last, some coolie and servants, sitting at the gate of the Creek Hong, observed a snake, which, on being pursued, entered the house No. 1, and made it's way into the comprador's room, where it was killed by a blow on the head from a bamboo. We have seen the animal, which measured 40 inches in length, and about 3½ or 4 inches round in the thickest part. It was banded on the bain black and white, and is of the kind called by the Chinese *Pot-he-hop*, meaning the binding of a sieve.' It's bite is said to be certain death. Of this an instance occurred to the Cook of the Netherlands Consul in 1832. Many of them have, of late, been seen and killed in or near the Factories, one not long ago, in front of the Swedish Factory. Residents should be careful when leaving or entering the Hongs after dusk. The snake killed on Saturday is we believe an undescribed variety, something between the *Boa lineata* and *fasciata*, but more nearly approaching the former.

We are much obliged to our Correspondent Y. for his faithful translation of the Chinese romance, and beg to inform him that future similar contributions will be highly acceptable.

T's letter needs no comment from us; it is too clear that the poor man can only drink such tea, as his purse can pay for.

In another column will be found a verbal translation of some Chinese advertisements, with which friend has favored us; they will no doubt prove a musing, and likewise serve as musters of chinese idiom.

*Seaman's Hospital.* The following notice has been circulated, signed by the Secretary of the "*British Seaman's Hospital Society*." Mr. *Johnstone* of the Earl Balcarras has assumed the duties of medical officer under this institution at Whampoa, and will attend to any application that may be made to him by the vessels at that anchorage. The shipping at Cumsingmoon will be attended by Mr. Anderson, who is stationed there in the same capacity. The above arrangements are only temporary, and a permanent establishment will be formed as soon as practicable.

We are glad that our correspondent "Misericordia junior" has saved us the trouble of answering again Mr. Gonçalves' second epistle on the subject of Lotteries. We consider the question as settled, seeing that Mr. G. does not attempt to justify lotteries on any moral grounds, on which alone we wrote against the one at Macao, tickets of which are now advertised at the entrances to the Hongs at Canton. Mr. Gonçalves no doubt with a view to avenge the individual wrong, he supposes to have suffered at our hands, wishes to raise the feelings of the Government and of his Countrymen at Macao, against this paper, saying that we have treated the former with disrespect, for which allegation there is not the slightest ground, nor had we the most remote intention of hurting any one individually, and are confident that our readers at Macao will not be misled by such insinuations. If Mr. Gonçalves likes to see in his name in print, and choose under his own name to attack us and an esteemed correspondent in intemperate language, he must be prepared for the consequences.

We hope that the discussion on Lotteries we have now carried on in four numbers, will have had the good effect of deterring our neighbours from staking in them.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Cambrics, Saltpetre, Ginseng* and other Goods, on which the Duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels bound to Whampoa. and thereby avoid Port Charges. The ship rents outside, and River Freights are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary Stationery, Cutlery. Crockery ware, &c.*, for foreigners consumption, are sold at Auction, duty paid.

*Note. Alum,* and *Cassia* are procurable cheaper at Lintin, Macao, &c.; and *Raw Silk, Silk* piece goods &c., are some times shipped there the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.787 4756 of a Tl. per cubit.
2nd " " " 1200 do. & under 1600 " 0.7221091 " "
3rd " " " under 1200 do. 0.866.3341 " "

N B The cubit is 14½ inches; measurement is taken on each entry of the vessel with cargo (except Rice and is from the Foremast to the Mizen mast, or other head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3260 to $ 3280; 3rd class $ 3200 and under. The Cumshaw per Present Fee is paid by all vessels 1600 Taels or $ 2223. Linguists fee $ 173½ and Compradore's fees $ 50 Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—and Cotton Yarn continue daily and the daily expected arrivals render holders anxious to realize, and buyers timid to purchase.

WOOLLENS.—still more depressed, particularly spanish stripes, the markets for which in the interior are very low.

LEAD.—notwithstanding the high price in Europe, this market continues dull.

IRON.—is rather improving.

BETEL NUT.—maintains it's price, but any considerable supply would cause a decline.

PEPPER.—the same remark applies to it.

COTTON.—we have to notice a further reduction in price, and even at these rates few sales can be effected. The depression is caused by some holders forcing sales, and also by the unwillingness of parties to speculate, till the probable extent of importation is known.

OPIUM.—The Market has continued to decline since our last report, and at present it is difficult to effect sales at any price: this state of things we ascribe principally to heavy time bargains falling due just now, in addition to which the accounts of the markets in the interior are by no means encouraging.

### EXPORTS.

SILK MANUFACTURES.—Some of the large contracts we noticed some time ago are about being completed, but we hear of no reduction in price for new bargains.

RAW SILK.—Continues nominally at the same high rates, though we believe that no purchasers are now willing to agree to them.

TEA.—A few Chops of Pekoe have been sold within the last week at from 32 @ 60 Taels, prices much above those of last year, we should say 10 @ 12 Taels higher at least. Scented Orange Pekoe is, we hear, selling at 33 & 34 Taels.

# THE CANTON PRESS.

VOL. 2d. No. 2. CANTON, SATURDAY, SEPTEMBER, 17TH. 1836. No. 54.

## LITERARY.

### THE CHINESE REPOSITORY FOR AUGUST.

A couple of months have elapsed since we have noticed this interesting publication, owing to press of matter, but we now resume our task with the last number, and a pleasant one it is, owing to it's containing much new and interesting matter.

The first article. "*European Periodicals beyond the Ganges,*" is a recapitulation of the various newspapers, published as we would say, writing in China, on this side of the Ganges, and it shews that the foreign residents in these parts have by no means been backward in giving to the public, whatever came within their observation. In China alone there are now no less than five periodical publications, two of them weekly and one monthly in the English language, and published in Canton, and two in Macao in portuguese, and though a hazardous experiment in a country where the reading public is necessarily so small, there is much reason to suppose that the majority of these papers will continue to find sufficient support. In most places where British sway extends, newspapers have sprung up, and their readers must be aware that several of them are conducted with considerable talent, and have not a little contributed towards rendering us acquainted with parts of the world of whose existence, but a short time ago, but very vague notions were entertained.

We see with regret in the article under consideration that several publications, which have had their day and do no longer exist, have found no place in it, (though noticed by the Repository some time ago) and among others we would mention the Indo Chinese Gleaner, a work published in Mllacca in the years 1816 to 1821, and which contains a great deal of valuable information on the Chinese, and also on many of the Indian and Polynesian nations. This periodical owed most of it's valuable information particularly on China and the Chinese, to the contributions of the late Dr. Morrison, and during it's short career, had, we believe, by no means so extended a circulation as it deserved. It has now become very scarce, and we shall probably in our future numbers give extracts from it, to prevent at least as far as we are able, much of the curious research with which it abounds, to be monopolized by a few only, who may chance to possess this collection of papers.

We gather from this article, that the circulation of the Repository, though published at the very cheap price of $ 3 per annum, has until lately not exceeded 515 copies, but we are glad to see that it has since had an accession of 300 subscribers at once, which will no doubt materially assist towards the paying of the publishing expenses, beyond which we believe, it was never contemplated it should pay, the work being by no means a speculation of monied profit.

To shew it's present circulation, we extract the following:

"Having detained our readers so long with remarks respecting the other publications those concerning the Repository shall be brief. Of the first volume there were printed 400 copies; of the second, 400; of the third, 800; of the fourth, 1000; and thus far one thousand of the fifth. The number of pages in the 1st, was 512; of the 2d, 576; and of the 3d and 4th, each, 584; giving a total of 2256 closely printed octavo pages; each volume has been accompanied with an index. The price of the subsequent ones has been only half that sum. Of volume 1st, no copies remain on hand; of the 2d, there are 13; of the third, 219 and of the fourth, 500. The present circulation in China is 200 copies; in Manila, 15; in Sandwich Islands, 13; in Singapore, 18; in Malacca, 6; in Penang, 6; in Batavia, 21; in Siam, 4; in Sydney, New South Wales, 6; in Burmah, 3; in Bengal, Nipál, and Assám, 7; in Ceylon, 2; in Bombay, 11; in Cape Town, South Africa, 4; in Hamburg, 5; in England, 40; in America, 154 copies; this gives a total of 515 now sent out from the office monthly; about one fifth of these, however, are sent gratuitously to public Intitutions, Journals, &c.

P. S. Since writing the foregoing, new demands have been received for the Repository, not only for back volumes, but also for the present; these demands will increase the circulation to more than 800 copies, monthly."

ART. II. Siamese History: *giving an account of the Siamese wars during the year 905 of their era, or the year 1535. A. D. By a Correspondent.*

If we cannot speak favorably of the article itself, we must at least commend the *patience* of it's translator and compiler, which, we confess was exhausted with us, some time before, in reading it, we arrived at the middle. It is a relation of battles and bloodshed of some 300 years bygone, in which our sympathies are in no way interested.

ART. III. *Military skill and power of the Chinese: actual state of the soldiery, forts, and arms;* &c. by a Correspondent.

In this article an account is given of the military power of the Chinese, such as it appears to us, who, at the outskirts of this immense empire, must necessarily judge from what we see, nor have we very good means of knowing, whether the judgment we arrive at, is correct. It is true, from some of the works of the Missionaries that visited, and lived in, China, during the reigns of Kanghe, Yung-tching, and Kien-lung, much valuable information may be derived, but nearly a century has passed away, since these Missionaries described China as in the zenith of it's power, and there is but too much reason to suppose, that the military power of the empire has much degenerated since, and that empty show and parade are now affected to hide the inefficacy and cowardice of the once so renowned Tartars. We do not however believe that, from what we see here, and on the banks of the river down to Macao, we can form a quite correct idea of the Chinese military strength, and though the article before us is written with considerable ability, and knowledge as far as it can go of the subject of which it treats, the evidence brought forward is hardly sufficient to enable us to judge of the military strength of the Empire. The facts adduced, are certainly favora le to the writer's position, whilst he must naturally have been ignorant of others, which, without the sphere of his observation, may have passed, and which would possibly make us look with a less disrespectful eye upon Chinese military prowess and tactics. However this may be, the writer of this article is quite correct as far as we are able to judge in the description of the Chinese soldiery that has come under his observation; a more contemptible and ragamuffin set, blustering, thievish and cowardly, cannot well be seen. When they are sent by the authorities to any citizen's house on any errand, woe be to him if he has not timely notice of it, e intended visit, to enable him to put every valuable out of their reach, as the house is almost sure to be gutted. Their activity on such occasions can only be matched with the hurry in which at different times they evacuated the forts, when frigates forcing the entrance, bombarded them.

These are perhaps in a measure local defects, nor can we suppose the soldiery under the immediate eye of the sovereign to be quite so degenerate; certain however it seems to be, that in artillery as the writer of the article mentions the Chinese are very deficient, nor does any "Vauban" seem to have taught them the art of fortification.

The manner in which the use of arms is taught them is very ludicrous and well described in the french extract given. We have now and then seen Chinese soldiers practising with the shield, lance and sword, and would back a good player at single stick against a good many of them. The antics they are made to perform in the exercise with their weapons, expose them every moment to a well aimed blow taking effect. Their matchlocks are the most cumbrous and illshaped machines, and would probably be perfectly useless on a rainy day, nor are they as yet we believe acquainted with the bayonet.

We content ourselves with the following extract:

"Of ready effective military strength, the Chinese seem to have no idea: even at the city gates, where it is considered that a strong and responsible guard is always kept, foreigners, who go from curiosity to stare in, find no opposition more than from a cookie-looking man, armed with a pair of breeches, a fan, and perhaps a rattan whip. The approach of foreigners to deliver petitions is always a signal for a muster of the military, who come in, one by one, undressed, unarmed, unprepared, and half asleep; while piles of brown felt caps, and heaps of shabby looking red and yellow long jackets, bearing the character "courage" on a large scale, before and behind, are brought through the gates, for the adornment of the heroes of the hour; by and bye, straggles in an officer, generally the largest sized man that can be found; some bows, sheaves of arrows, and rusty swords, make up the warlike show; evidently got up for the nonce to astonish and awe "the barbarians," who might, did they please, be in the governor's harem before the guard could awake from their slumbers, and put on their courage with their uniform."

One striking proof of the inefficiency of this guard is the fact of the closing the city gates at early hours during winter, frequently as early as 8 P. M., to prevent the irruptions of banditti; who, nevertheless, often succeed in getting into the city, unopposed, and undisturbed, while sacking whole streets; of which many instances may be read in the early Nos. of the Canton Register. Those who accompanied Mr. Gibb in his expedition to the city gate, in December last, to insist on the release of the officer of the "Fairie Queene," can bear witness to the truth of the above account; the swords then produced were so rusty that the soldiers could scarcely draw them; the only man, in fact, wounded by them was one of the soldiers who received a cut in the face from the back hand of the hero who stood before him. The same want of discipline, and the same carelessness, appear in every page of Gutzlaff's and Lindsay's voyage up the northeast coast, where even, if possible, things seem yet worse; among other things of the sort, a display of the military is described, where a general fire in line was attempted, but so badly executed, that the soldiers themselves joined in the laugh set up by the foreigners, who were present, witnessing their manœuvres. See also the rest of the voyages of Gutzlaff on the coast of China *passim.*"

ART. IV. *Correspondence with the Chinese Government: two letters from the foreign merchants, addressed to the Governor and Hoppo, with the replies of their excellencies to the second letter.*

We have recently so frequently considered the subject of official interference and noninterference with the Chinese, that we shall not now revert to it. The letters and answers here given, appeared in the Canton Press some weeks ago, and though the answers were not satisfactory then, or partly so only, the Hoppo's assurance that in case of damage, the importer's loss will be considered in the duties, whenever such damaged goods arrive, and his subsequent letter saying that grey Longeloths, being of less value than white, and ought consequently to pay less duty, are more so. Besides a great point has been gained by the permission of depositing two pieces Longeloths of first and second qualities in the Consoo-house, to be referred to, should any difference as to taxing them arise. A dispute of that kind happened only a few days ago, and on referring to the two pieces at the Consoo-house the matter was arranged to the satisfaction of the importer. A Tariff of duties for the most important Imports has also been published by the Hong merchants, and we are not so liable to extortion in future as hitherto.

ART. V. *Ophthalmic Hospital at Canton; third quarterly report, for the term ending on the 4th August 1836,* By the reverend Peter Parker M. D.

This beneficent institution continues to afford relief to a great number of Chinese sick, whose confidence in Doctor Parker's skill seems to be daily increasing. From want of room we cannot detail any of the remarkable cases Dr. Parker relates, but must limit ourselves to stating that within the nine months of it's establishment no less than 1674 Chinese have been medically treated. As an instance of the patient's gratitude, we copy the translation of a poem dedicated to Doctor Parker, by an elderly Chinese Gentleman whose eyesight was restored under Dr. P's treatment, and who found that other means of testifying his gratitude, were not acceptable.

"A fluid, darksome and opaque, long time had dimmed my sight,
For seven revolving weary years one eye was lost to light,
The other, darkened by a film, during three years saw no day,
High heaven's bright and gladd'ning light could not pierce it with its ray.

Long, long, I sought the hoped relief, but still I sought in vain,
My treasures, lavished in the search, bought no relief from pain;
Till, at length, I thought my garments I must either pawn or sell
And plenty in my house I feared was never more to dwell.

Then loudly did I ask, for what cause such pain I bore,—
For transgressions in a former life unatoned for before?
But again came the reflection, how, of yore oft, men of worth,
For slight errors had borne suff'ring great as drew my sorrow forth.

"And shall not one," said I then, "whose worth is but as nought,
"Bear patiently, as heaven's gift, what it ordains?" The thought
Was scarce complete, ere formed, when of a friend the footstep fell
On my threshold, and I breathed a hope he had words of joy to tell.

"I have heard," the friend who enter'd said, "there is come to us of late
"A native of the flower'd flag's far off and foreign state;
"O'er tens of thousand miles of sea to the inner land he's come;
"His hope and aim to heal men's pain, he leaves his native home."

I quick went forth, this man I sought, this generous doctor found,
He gained my heart, he's kind and good; for, high up from the ground,
He gave a room, to which he came, at morn, at eve, at night,—
Words were but vain were I to try his kindness to recite.

With needle argentine, he pierced the cradle of the tear;
What fears I felt! Soo Tungpo's words rung threat'ning in my ear:
"Glass hung in mist," the poet says, "take heed you do not shake;"
(The words of fear rung in my ear) "how if it chance to break!"

The fragile lens his needle pierced: the dread, the sting, the pain,
I thought on these, and that the cup of sorrow I must drain:
But then my mem'ry faithful showed the work of fell disease,
How long the orbs of sight were dark, and I deprived of ease.

And thus I thought: if now, indeed, I were to find relief:
'Twere not too much to bear the pain, to bear the present grief,
Then the words of kindness, which I heard, sunk deep into my soul.
And free from fear I gave myself to the foreigner's control.

His silver needle sought the lens, and quickly from it drew
The opaque and darksome fluid, whose effects so well I knew;
His golden probe soon clear'd the lens, and then my eyes be bound,
And lav'd with water, sweet as is the dew to thirsty ground.

Three days thus lay I, prostrate, still; no food then could I eat,
My limbs relax'd were stretch'd as though th' approach of death to meet;
With thoughts astray—mind ill at ease—away from home and wife,
I often thought that by a thread was hung my precious life.

Three days I lay, no food had I, and nothing did I feel;
Nor hunger, sorrow, pain, nor hope, nor thoughts of woe or weal;
My vigor fled, my life seemed gone, when, suddenly, in my pain,
There came one ray—one glimmering ray, I see, —I live again!

As starts from visions of the night, he who dreams a fearful dream,
As from the tomb, uprushes, one restored to day's bright beam,
Thus, I with gladness and surprise, with joy, with keen delight,
See friends and kindred crowd around, I hail the blessed light!

With grateful heart, with heaving breast, with feelings flowing o'er,
I cried, "O lead me quick to him who can the sight restore!"
To kneel I tried, but he forbade; and, forcing me to rise,
"To mortal man bend not the knee;" then pointing to the skies;—

"I'm but," said he, "the workman's tool, another's is the hand;
"Before *his* might, and in *his* sight, men, feeble, helpless, stand:
"Go, virtue learn to cultivate, and never thou forget
"That, for some work of future good thy life is spared thee yet!"

The off'ring, token of my thanks, he refused; nor would he take
Silver or gold, they seemed as dust; 'tis but for virtue's sake
His works are done. His skill divine I ever must adore,
Nor lose remembrance of his name till life's last day is o'er.

Thus have I told, in these brief words, this learned doctor's praise,
Well does his worth deserve that I should tablets to him raise."

ART. VI. *Journal of occurrences,* &c.

It is said that the Emperor Tsoo-Kwang is seriously bent on reforming the numerous abuses of his government, and new Edicts against the numerous, the perversion of truth, and venality of his officers are daily being issued. We copy the following.

"*Pekin,* The indignation of his majesty has been roused by the unprincipled and corrupt conduct of some of his high ministers, including two princes of the blood. His anger is directed against their conduct in general; the particular point which has excited it, is, that they passed, in a grand military examination, an individual wholly incapable of performing the military exercise required. 'Have we,' exclaims his majesty, 'directed the government of the people for sixteen years, and can none of our princes and great ministers yet see that all we seek for is comprehended in the one word, TRUTH?' His majesty then proceeds to command the degradation of the several offenders, and adds: 'In these punishments we manifest an unusual degree of tenderness. Let all our princes and ministers be roused thereby to greater diligence and faithfulness, and let them not fear to incur hatred or reproach for doing well. Let them not fail to pay regard to those high desires which occasion these reiterated and earnest instructions."

### SCRAPS TRANSLATED FROM THE CHINESE.

*Letter from a Chinese to his friend, a foreigner.* "We have not met for several days; the time that has elapsed, is really painful to think of; I look up wards and hope the valuable body of my elder brother, is in the enjoyment of supreme peace, and that undisturbed happiness attends his wanderings. This is my constant, my sincere prayer. I, your younger brother, as usual, desire most ardently to enquire in person of your health, but this gratification is denied me. At twelve o'clock this day I set out for the village of my family, to offer up prayers and sacrifices at the hills of my ancestors; on my return, bowing low to the ground, I will seek your presence. The *Shi-king* says: "Absence of one day, to friends, resembles the dreariness of three autumns. Pray explain to my friends the cause of my departure, that they may excuse my absence.

For these reasons, I send this respectful communication and beg for it a perusel."

To ——, Elder Brother, happiness and peace!
From ——, your stupid younger brother, who bows to the ground.

Taou-kwang, 10th year, 3d moon, 29th day (21st April 1830.)

*Description of a horse, famous in Chinese* history, said to have lived in the third century, and named the "Vermilion Rabbit."

"With his bridle of embroidered silk loose, and with reins studded with pearls, flying wildly in the air, he gallops daily a thousand *Le.* Dust arises in clouds from his sparkling hoofs; rivers are crossed, & mountains ascended; & cleaving the air, with the velocity of the "Dragon of fire" descending from the nine Heavens; thus impetuously travels the "Vermilion Rabbit."

The above account is strictly historical, and is taken from the San-K'wo-Che, or annals of the three kingdoms, one of the most celebrated of the Chinese historical works.

## OPIUM.

Report of the governor, lieutenant governor, and hoppo of Canton, on the memorial of Hea Naetae. (No date.) probably 3d or 4th of September.

In obedience to the imperial will, directing us to deliberate and frame regulations for the importation and barter of Opium, we have drafted a schedule in nine sections, which we now reverently lay before the throne, humbly begging your august Majesty to cast a glance thereon:

On the 19th of the 5th moon of the 16th year of Tsun-Kwang (July 2d 1831) the following document was sent down to us from the Grand Council of the great ministers of state:

"On the 29th of the 4th moon (July 2d) we received the following imperial edict: Heu Naetae, vice-president of the sacrificial court, has presented a memorial respecting Opium, representing,—"that as the interdicts against the use of it are "made more severe, so the evils arising therefrom "spread more widely,—and that of late years, the "barbarians, not daring to give it openly in barter "for other commodities, have sold it clandestinely "for money,—thus occasioning an annual loss to "the country of more than ten millions of tales: he "therefore requests that a change may be made in "regard to it, permitting its introduction and exacting a duty for other commodities. Let Tang Ting-ching and his colleagues deliberate on the subject, "and then report to us; and let a copy of the original "memorial be sent with this edict to Tang "Ting-ching and to K'-Kung, and let them transmit the same to Wan."

Knowing the tender solicitude which our august sovereign feels for those who are on the remote frontiers, and his anxious desire to remove existing evils, we received his mandate with bended knee, and bowed to it with the profoundest reverence. At once, we transmitted the edict to the commissioner of maritime customs, his majesty's minister Wan, for his instruction; and at the same time took into consideration the copy of the original memorial, which was sent down to us. While the subject was being discussed by ourselves jointly in council, it was mean while laid before the financial and judicial commissioners, Ardangah and Wang Ting-lien, for their thorough investigation; who, after mature deliberation, reported to us thereon. Then immediately, we, your majesty's ministers, engaged in drawing up such regulations as should seem to be adapted to meet the exigency of the case; considering that it is the first duty of those who are in authority to remove existing evils, and that, if by the attempt to remove them, the evils are augmented, it becomes the more indispensibly necessary to hasten those alterations which the circumstances of the times demand.

For a long succession of years, opium has been brought to the central Kingdom from the regions of foreign barbarians. During the reigns of Yung-ching and Keën-lung, it passed the custom-house as a medicinal drug; and the regulations merely respected its sale and use. In the 4th year of Ka-king, (1790) the then governor of Canton, Kê-lo-ki-king, deprecating that a drug of the foreign barbarians should be exchanged for the goods and treasure of the central Kingdom, and fearing that the practice of using it would spread among the people of the inner land, causing the loss of their time and the destruction of their property, sent up a memorial to the emperor, praying that it might be interdicted, and that those who should oppose the interdicts might be regarded as criminals. Subsequently the penalties were increased to transportation and to close confinement in prison. But severe as the laws were made, the dread of the laws did not so much affect the people, as did the desire of gain. Thus from the time the prohibitions were established, the schemes of the crafty vagabonds daily multiplied. Receiving ships were anchored in the outer seas; brokers, under the name of *smiters* were established in the inner land; *fast-crabs, and scrambling-dragons*, species of fast boats, were got up for clandestine transportation; and extortionate vagrants set themselves to work for their own emolument. Thus, that which originally was a common article, and was bought, and sold, and used, without restraint, bore a moderate price; but since the severity of the penalties has been increased, the clandestine traffic has been equally augmented, and the annual loss of treasure from the inner land is indeed very great.

We your majesty's ministers, having examined the original memorial, and considered in detail the representations of the evils therein made, regard them as true and faithful; and the request, for a change in the system and a return to the former regulations and duties on the article, to be such as the circumstances of the times make requisite. It seems proper for us, therefore, to request that his majesty will be pleased to allow the plea of the original memorials,—hereafter permitting the foreign barbarians to barter their opium, paying duties thereon at the custom-house agreeably to the rules established in the reign of Keën-lung; and that like woollens and camlets, &c., it be delivered to the Hong merchants, who may in exchange for it give other commodities, but no treasure. And then henceforth, if the business be faithfully managed by all parties, the immense amount of precious money, which now annually oozes out of the country, will be saved. When the waters of the pure fountain are all flowing away, the current must be quickly stopped. The amount of duties being less than the money paid in bribes, the evils arising from the clandestine traffic will cease of themselves; the deceitful practices will be at an end; litigations among the people will be diminished; and the crimes of the worthless vagrants will be lessened.

But as it respects officers, scholars, and soldiers, prohibitory regulations must be prescribed, and they must not be allowed the use of the drug: if they violate the regulations they must be instantly degraded. As it regards the people, let them traffic in, and use, it, as much as they please; however, they should be made to know, that those who indulge their appetite for such sweets, without regard for necessary raiment and means of instruction, must all be classed with those who for self gratification lavish whatsoever they can obtain; and they should be made to know also, that those who would reform, must exert their own strength; because the foundation of reformation, consists in rousing up one self to the work of repentance. The original memorial it surely not of an injurious tendency. There will be cause of gratitude in the emperor grant the request; and it should be proclaimed throughout the empire: for both to the government and to the people there will accrue great advantage.

In establishing the new regulations, every part of them should be made perfect and complete; and the prohibition of fine silver should, in its consequences, be regarded as of the greatest importance: because, if in the adoption of a new plan, the whole is not made perfect, after a lapse of a few years, fresh evils will arise: such is not the way to frame new laws. We, your majesty's ministers, have deliberated jointly; and, after receiving the reports from the two commissioners of finance and justice, have repeated and matured our deliberations. Having drawn up a schedule in nine sections, a copy of it is hereto attached, and reverently sent up for the inspection of his imperial majesty.

The result of our joint deliberations, made in obedience to the imperial mandate, we now lay before the throne: whether they are correct or not, we humbly beg our august sovereign to instruct us; and if correct direct the appropriate Board to revise and promulgate them.

The following is the copy of the new regulations respecting the importation of opium, which we reverently lay before the throne, for his majesty's inspection.

1. The whole amount of opium imported must be paid for in merchandise; no fraud must be allowed. The object in interdicting opium is twofold—to prevent smuggling and to stop the importation of treasure. When the opium arrives in the ships of the barbarians, the security and senior Hong merchants must receive strict injunctions to ascertain its value, and also the value of the goods to be given in exchange; the value of each to be estimated in Silver. The full amount of the commodities must then be exchanged, and no money must be paid. The productions of the celestial empire are rich, abundant, and in universal demand: in amount they exceed those of foreign barbarians, who always are in superabundance. But if a quantity of opium imported should ever be found to exceed the productions of the inner land in any small amount, and the exchange could not be made, while it were necessary for the ships to sail,—in such a case the security merchant must receive the full amount of the duties, and pay the same over to the custom house. The surplus of opium must be landed and placed in the warehouse of the security merchant, who, with the barbarian chiefs, must personally inspect it, and make out a true and faithful account of the same. This must be placed on record in the office of the hoppo. The drug may then be sold by the security merchant, as opportunities occur; and when the whole is sold, he and the purchaser of the opium must report the case to the hoppo. Afterwards, when the barbarian merchant returns to Canton, the full amount of goods, according to the agreement, must be paid over to him; there must be no fraud in order that the balance due for the opium may be paid in money. The senior merchants must be required to make a strict examination of this matter. On the departure of the barbarian ships both the senior and the security merchants must send to the custom-house a written declation that there is no contraband Silver on board. If there be any on board, a faithful report must be made of the individual who gave it for opium, and he must be punished accordingly, and the opium confiscated; or if it had been sold, the price of the same must be returned to government. If any fraud is detected in the senior and security merchants, they must both be subject to severe punishment.

2. The governmental censors and all the custom house officers, must be required to maintain a strict watch on their respective stations; they must not leave them to create disturbance. A though opium is interdicted, the strong desire of the people to seek gain, affords reason for fear that they will endeavour to carry on a clandestine trade with the barbarian merchants, and the fine Silver will continue to ooze out of the country. All those therefore who are attached to the cruizers or to the custom-houses must be strictly charged to keep up a close examination, and if they detect any Silver going out, they must seize it, deliver it over to the custom-house; and the full amount of money thus taken shall be distributed among those who seized it. In this way the police will be roused to their duty, and the clandestine export stopped. If Silver finds its way out of the country there must be some place and way by which it goes out: that place must be near the foreign factories; these must be near the custom-houses: only let those places be faithfully guarded, and there will be no danger of the money flying away into the foreign seas. But if it once goes out, it is in vain to search for it; and to do so will only afford occasion for worthless vagabonds, who fain themselves to be in the employment of government, to plunder, and create disturbances of the most serious nature. It is necessary, therefore that this prohibition be most rigorously carried into execution.

3. Foreign money must be managed according to the old regulations, and only three-tenths of it be allowed to be exported; the account of what is brought into the country must be carie and carefully made out, in order to prevent fraud. Formerly the barbarian ships brought large quantities of it to Canton to purchase cargo and to defray the ship's expenses. And whether the amount of cargo imported was much or little, whatever money remained on hand, it was impossible to prevent its being exported. In the 23d year of Keaking (1819) *ditto*, the hoppo of Canton, in consequence of there being no fixed rules to regulate the exportation of foreign money by the barbarians, solicited a communication to government how to act on the subject; and it was then ordered that the barbarians should be allowed to export only three-tenths; the remainder they might loan to other barbarians to be expended in the purchase of goods and the payment of duties. From that to the present time, there has been no deviation from the regulations. But now, since opium is brought in the ships' when there is any lack of treasure, the drug is sold for money; this cannot be prevented. It will be well, therefore to revert to the old regulations. Now when the barbarian ships bring foreign money, whether in great quantities or small, if the residue (after the cargo is purchased) amounts to 100, 00 dollars, only 30,0.0 can be exported: if 200,0.0 remain, a further limitation must be made. It is right, therefore, to request that hereafter, the barbarists ships bringing foreign money, if the residue amount to 100,0000, may reexport three tenths; if it amount to 200,000, or upwards, each ship, whether she brought opium or other commodities, shall be restricted to 50,000 dollars. It must not go beyond this. On the arrival of a ship in port, the security merchant must be instructed to examine and make a faithful record of the money imparted. Whatever is expended afterwards is to be deducted from the amount which is subject to this regulation. The senior hong merchant, also must examine the case and see that it is managed correctly. If any of the custom-house people are detected in making false reports, they must be seized and punished. The senior and security merchants, if detected in screening each other in fraud, shall be dealt with in the same manner.

4. Opium must be subject to the same general regulations as other foreign commodities; and must not be allowed a separate department. The principles of commerce prompt individuals always to seek the greatest possible gains. Each one has his own methods to obtain this end. What one rejects, another may seek, because they do not view things alike, and it is impracticable to make them do so. Now if opium is made subject to the old regulations, then it will be considered as a medicinal drug, and in no sense be regarded as different from other commodities. But if it be separated, and managed in a distinct department, there is reason to fear it will gradually become a monopoly. It is right that the barbarians should choose the merchant with whomthey will trade, as well as the security merchant to receive and pay the duties. There is no necessity for creating a distinct department. Then there will be no room for sharpers to seek for unjust gains; and the benefits of the system will be enjoyed alike by our own and the foreign merchants.

5. The amount of duties must be fixed according to the old regulations; there must be no additional ones levied, nor must the severe prohibitions give rise to petty fees. According to the old regulation in the Custom-house of Canton, every one hundred catties of opium were subject to a direct duty of three taels, with an additional per-centage of three mace, and a piculage of eight cattareens and eight cash. Although there be three different kinds of the drug, the black dirt, the white skin, and the red skin, the rate of duties per catty must be the same in all. If the duties are made too high, then, in order to evade them, there will be recourse to smuggling; but if they are made light, people will not endanger themselves by smuggling. Before establishing new laws, the subject should be thoroughly investigated. It is right so that they should be fixed according to the old regulations; there must be no increase. Is it feared that, on the abolition of the old prohibitions, the servants in the custom-houses will take occasion to secure to themselves petty fees, and that the light duties will so augment the same fees as to render void the tender regard which government cherishes towards men from afar? Then the more care been ces requisite in order to prevent these illegalities. Proclamations must be issued, disallowing the receipt of the smallest item beyond the regular duties; and those who disobey must be examined and punished with the greatest severity.

6. The price must not be fixed: It is reasonable to suppose that in trafli the article will sometimes be high and sometimes low; and that this will vary according to the quantity on hand and the existing demand. It will be impossible, therefore, to keep it fixed. Now that the prohibitions are relaxed no one will be disposed to purchase opium at an high price and sell it cheap: this is impracticable. Moreover, since men always value those things which cost much, and despise those which are cheap, while the prohibitions of opium were severe, those who could manage to ship the article, had recourse to every species of fraud. Now that the restrictions are thrown off, it will become common; and thus, what by the smuggling system was raised to a high price, by being made free, will be lightly esteemed. The price will necessarily fluctuate; and to have it otherwise is impracticable. Inasmuch, therefore as the price may be expected to rise and fall according to the times, there can be no occasion for having it previously fixed.

7. All coasting vessels, belonging to any of the provinces of the inner land, carrying opium, must be furnished with a permit for it, obtained at the custom house in Canton. Hitherto the regulations of commerce have required that all coasting vessels, laden with foreign commodities, should be furnished with a permit from the chief custom-house in Canton: in it, the amount of goods is specified, in order to prevent a contraband trade; in every province it serves as a passport for the goods, at the custom-houses where a strict watch is always maintained. Wherever a vessel is found laden with goods, and is without permit such goods are deemed contraband, & confiscated accordingly. Now that the prohibitions of opium are thrown off, it must be subject to the same regulations as are all other foreign commodities. To every coasting vessel, the trafficker must be furnished with a permit from the custom-house in Canton, clearly specifying that the opium has been obtained of the foreign merchants, in exchange for other merchandize. Then wherever the vessel goes in this or any of the other provinces, the people at the custom-houses will be able to see the matter clearly. In this way, the evils resulting from clandestine traffic between native coasters and the barbarian Ships on the high seas, and the stealthy outgoing of silver, will be at once at an end.

8. The regulations, forbidding the people to cultivate the poppy, may also be relaxed. Opium, though a mild substance, possesses powerful properties: being a mild substance, it pampers the appetite of those who indulge in it; while by its powerful properties, it easily generates disease. The modes of manufacturing the article, by the foreign barbarians, are said to be various. But in every shape it is poisonous. It is known that, within the last few years, it has been secretly manufactured in the inner land; but only by boiling the juice of the poppy, which renders its properties less powerful and less injurious. Now while it is in vain to prohibit foreign barbarians to introduce opium, it is equally so to restrict its cultivation among the people. The restrictions, therefore, may be relaxed, and the cultivation of it permitted. If it be feared that the yeomanry will foolishly throw away the staff of life for a vain shadow, it only becomes necessary to issue perspicuous orders instructing them that it is on the hill-tops, and nooks and corners of fields, which are unfit for other products, they are permitted to plant the poppy, and that they must not introduce it into their ricefields, to cause the destruction of that on which they subsist.

9. Severe interdicts must be issued, utterly forbidding the officers, scholars, and soldiers to use the drug. In the memorial of Heu-Naetae it is stated, that opium smokers are idle, lazy, vagrants, who have no settled purpose or employment. Though they sometimes arrive at old age, such cases are rare; and though new births are daily increasing the population, yet there is no reason to fear a diminution of their numbers. But with regard to officers, civil and military, and to scholars and soldiers;—the first are called on to discharge their appropriate duties for the public good; while the others are required to cultivate their talents and fit themselves for future usefulness: none of these, therefore must be permitted to contract the bad practice, or to walk in a path which will lead only to the utter waste of their time and the destruction of their property. Such is the testimony of Heu-Naetae. It appears on examination, that by increasing the severity of the restrictions, their violaters have more easily evaded them, and have aided each other in so doing; now, on the contrary, by relaxing the restrictions, their sense of shame will be excited, and they will be gradually led on to reformation. The design of the original memorial is to lead men on to a gradual and silent renovation: and for this same end it is right for us to deliberate. Hereafter, the people may be allowed to purchase and use opium as much as they please; but if any of the civil or military officers, any of the literati, or any of the soldiery, are detected in purchasing and using it, they must be immediately degraded. In this way they will be roused to guard against the evil. It will be right to promulgate these severe prohibitions and make them known in all the offices, civil and military, throughout the empire, that one and all may strictly obey them. Should any openly profess to do so, and in secret violate them, let it be the duty of the superior provincial officers to report such cases to the appropriate Board at Peking.

# CANTON PRESS

## 11TH SEPTEMBER 1836.

Want of space (the first page having been set, and printing offices in Canton being deplorably defective in the mechanical department) has prevented us from noticing more at length the contents of the Viceroy's answer, to which we shall recur in our next, and from giving insertion to a letter from *Philalogus*, and to other matter, mostly local, which must now be postponed to another week. The Chinese scraps, on the other side, will no doubt prove entertaining, as from the close adherence of the translator to chinese idiom, they afford valuable hints to students of the chinese language.

On this page will be found a translation of the Viceroy's answer to the enquiry sent from Peking some time ago, respecting the practicability of making Opium an article of licensed trade. The answer is favorable, and it will now probably not be two months, before we shall see this drug brought openly to Canton, as the time of a courier from this to Peking is not above 20 days in going or returning. The departure from "old custom" in this instance is remarkable, and a friend of ours not unaptly called it the China "Reform Bill" the other day. We are the more glad that a friend has enabled us to lay before the puplic the translation of this important document in our columns, as we see that our Cotemporary has sent a circular in which he advertises that his translation of the document is to be published this night (we write on Friday evening) at an extra half dollar for each copy; we cannot of course, out having seen his version, speak of the relative merits to the translations, but that which we give will be found *true* and *good*.

In how far this new law, as soon as it becomes one, will be effective, it is difficult to say, and our readers will no doubt be astonished to learn, that we have information from *outside*, that upon the strength of the legalization of the importation of Opium, a good many new smuggling boats are now building.

## Theatricals near Canton.

This is the season for theatrical performances, which, here called Sing-song, are to be met whith just now in many parts of the suburbs. Curiosity has made us visit several, where we always met with polite reception, and had the most convenient seats given us. One sing-song in particular, close to the foreign factories, behind the duck market, on the margin of the river, was well worth seeing. The temporary building of bamboo, is of the largest kind, having a pit in the middle, and round it sloping galleries, for the accommodation of the better sort of visitors. The building was crowded, and contained we presume, no less than 3000 spectators. These singsongs generally follow some religious festivity, and their expense is defrayed by subscription of the householders in the neighbourhood of where the performances take place. The audience in the pit has free entrance, and is consequently the most crowded; the prices in the gallery are regulated by the sort of seat you occupy, whether a high backed chair, a low stool or a still lower bench. The Company performing in this place, consisted of upwards of 100 individuals, their dresses were very insignificent, and their acting good, as far as we were able to judge from the frequently manifested approval of the audience. But what we admired most was the tumbling; the feats of strength and agility were astonishing; we saw one man walking about the stage, carrying on his shoulders a pyramid formed of seven stout men. In fighting with swords and other arms of defence and offence they likewise exhibited more than ordinary skill.

The parts of women in all chinese theatrical performances, are acted by boys, who by means of head dress, paint and garments, and chaunting in a high key, seem what they represent. Among the audience few women are seen, and none that lay claim to respectability.

THE Ship JOHN BANNERMAN, Capt. WILSON, to sail from Whampoa about the 10th Novbr. For freight apply to

MUNCHERJEE JAMSETJEE.

Canton, 10th September, 1836.

## *SHIPPING INTELLIGENCE.*

ARRIVED.—Brit. *Prin & Regent*, S. G. Bilen from Bombay. *Alexander Baring*, N. St. Croix from England, May 24th. *William Lockerby* from Batavia August 15th. *Malcolm*, Syles from Calcutta July 8th, Amer. *Regulus* Vanner from Manila 2nd September. Amer. *Alexander*, from Liverpool, 28th May.

SAILED or DESPATCHED.—Brits *Fanny*, Sheriff for Singapore. Spanish *Cetus*. Ycana for *Manilla*.

The *Colorado*, we learn, put to sea on the 12th.

We have been favored with the following extract from a letter of Capt. Cromarty of the *James Pattison*, who sailed hence for Manilla a few days previous to the Typhoon of the 9th to 31st July. "I experienced in latitude 19 N. and Long 113 East a severe typhoon, commencing on friday night at N. N. E. The wind on Saturday morning veered to N. N. W. then to S. W. & S. S. E. blowing tremendously from all points, and continuing till Sunday at 4 P. M., when the weather began to moderate and to clear up, so as to enable me to see about a mile round the ship, and sorry am I to say, that the sea all round was covered with wreck, apparently of a large ship, with a great number of Bombay Bales of Cotton, small boxes, sailor's chests &c. Unfortunately it continued very foggy during the next two days or else I might have seen more of the wreck. My ship has not suffered damage."

A report has this day reached Canton, that some *Lascars* picked up at sea, have been brought into the *Cancaing-moon*. No ship's name is given, but if the report prove correct, we shall no doubt have some account of the missing ships, and the above account of Capt. Cromarty proves the destruction of at least one of them.

The names of several ships are reported as arrived, but we cannot trace the report to a good source. Numbers are expected. Few if any, will, we believe still hence previous to the equinox.

Arrived in Manilla 11th August, Amer. *Girard*, 31st Ganges, 2nd, September *Lascars* and Dutch Jamaica.

---

### VESSELS EXPECTED.

FROM ENGLAND. *Julia* (Am.) via Gibraltar. *Helen Mar, Hashemy, Windsor, Charles Grant, Thomas Hodgson, Mandarin, Nimrod, Wm. Tigris, James Matheson, John O'Gaunt, Jessie, Lady Charlotte, Cordelia, Hellas, Royal Saxon, William Jardine, Orion, Alexander, Ann Baldwin, Manilla, Mary Somerville, Fanny, Thomaere, Trusty, Ann Robertson, Jamaica.*

FROM UNITED STATES Italy, via England. *Morehead, Humboldt, Plymouth, Liberty, Osage, Chandler Price.*

FROM BENGAL. *Resource, Edmonstone, Orestes, Nerbudda, Ferguson, Kellie Castle, David Scott, Red Rover, Cowasjee Family, Ernaad.*

FROM MADRAS. *Asia, Thames, Orwell.*

FROM BOMBAY. *Ramsay, Hormuzjee Bomanjee, Castle Huntly, Inglis, Carnatic.*

FROM SINGAPORE. *Margaret Graham, Layton, Trio*

FROM JAVA. *James Pattison, Virginia.*

FROM LUMBOK. *Spire, Philadelphia, Egyptian, Dandrite.*

LATEST DATES, from *England* to 2d June via Bombay. From *United States* 19th May P. *Splendid*. From Calcutta July, 9th per *Malcolm*. From *Singapore* 28th August per *Coventry*. From *Java*, 16th August P. *Ebro*. From *Bombay* 1st August per *Lady Grant*. From Manilla 3d September per *Regulus*.

On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Longcloths are likely to be in better demand if the late arrivals do not bring large quantities. The present demand for all kinds of cottons, excepting grey Longcloths, is very languid.

COTTON YARN.—has improved fully $ 1 per Picul since our last.

WOOLLENS.—we are happy to say, appear to be rather improving, both Broad cloths and long ells.

IRON.—is also in better demand, at improved rates.

LEAD.—does not advance.

STRAITS PRODUCE.—continues at the former rates, in fair demand though we cannot quote any improvement in prices.

GOLD AND SILVER THREAD.—continues very dull at low prices, while the stock is heavy.

COCHINEAL.—Prices have given way to our present quotations.

COTTON.—The market continues in a very depressed state, and there appears no disposition to purchase at the present comparatively low rates. It is by some believed, that the dealers, being almost quite bare of the article, are endeavouring to depress prices with the view to large purchases, but they are more probably waiting to learn the extent of the Nanking Crop, which cannot be known for two or three weeks.

OPIUM.—The Viceroy's answer to the Emperor regarding the legalisation of opium, being considered favorable, created a little spirit of speculation during the early part of the week, but the market has again resumed it's inactive state, and, although we hear of a few time sales, nothing can be done for Cash.

The deliveries to the 15th were:

### EXPORTS.

SILK MANUFACTURES.—We hear that some new contracts have been effected during the week at about the same prices as before, though

RAW SILK.—Canton, continues fully as high as hitherto. But little disposition to buy Nankeen Silk is evinced by the Exporters, and hopes, of a decline of prices are entertained.

TEA.—very little has been done in them during the last week, except ing Orange Pekoes, which have been bought eagerly at an advance on previous prices.

# THE CANTON PRESS.

VOL. 2d No. 3. CANTON, SATURDAY, SEPTEMBER, 24th. 1836. No. 55

## LITERARY.

Some account of the successors of Pwan-Koo the Chinese Adam.

In the Kang-Keen-E-Che, a History of China compiled by Chaoufucius, in 97 or more volumes, we find the following as the opinion of his day, regarding the successors of Pwan-Koo; he says.

"Twelve of the Tien-Hwang-shé (celestial Royal Family") were created, and succeeded Pwan-Koo in the Government of the Earth; all things were at this time in a tranquil and unruffled state, people where wholly unacquainted. Manners and customs originated according to the dictates of each ones fancy. They reigned 5300 years. and were succeeded by eleven of the Te-Hwang, she ("Terrestial Royal Family.) These divided the light from the darkness, i. e. divided time into days and nights, and 31 days they estimated as the age of one Moon. They reigned 1 000 years, and were succeeded by nine of the "Te-Hwang she "or Human Royal Family. They divided the Earth into nine equal parts, over one of which, each held his government. Princes and ministers were now appointed to assist the respective Sovereigns, and they closed their reign according to some, after a period of 456.0; and according to others, 18000 years."

Thus much for the successors of the Chinese Adam. Fuh He, knowin, under the more usual appellation of Fo-Hi is supposed to have succeeded the "Huma. Royal Family" all previous to him, Chaoufucius himself considers fabulous and from his time is dated the commencement of the Chinese Empire. The learned generally, consider him the founder. It is supposed his reign commenced 3300 and odd years ago, about 2317 previous to the birth of Christ. He was on the "Dragons Seat" 115 years, and from the fact of his having invented writing, made laws and composed musical airs, besides being the first to cultivate the ground, and to engage in hunting and fishing, we may very rationally conclude, he was an ingenious man.

We see paintings occasionally of Pwan-Koo, in Chinese shops, which represent him, standing a mid Chaos, with the sun in one hand, the moon in the other, and a star on his forehead. P.

### CHINESE CUSTOM OF ILLUMINATING

*the Streets, on the 3 to the 8 days of the 6th moon.*

We read in a Book on Bretagne, written by one Deppings, of a festival, existing in that country, very similar to one observed by the Chinese during the first part of the 8th moon. He says, "Trees "are planted at the doors of the principal persons' houses, and decked with flowers and verdure. "Nosegays of an ingenious construction are prepared and presented to friends. Long garlands are "also hung across the streets, which form a festoon "of flowers, and foliage over the heads of the passengers."

In Canton at this Season the principal streets of the City and suburbs, are covered with a slight awning of cloth or mats. From this are pendant in one, two, or three rows, as the breadth of the streets will allow, chandeliers of various sizes, which are lighted up in the evening, and form a vista of quite a dazzling nature. Between the chandeliers, garlands of flowers, and of silks and crapes of the most gorgeous colors, are stretched across the streets, in graceful folds and scarcely high as not to intercept the glare from the innumerable small tapers, while lanterns of oiled silk or paper beautifully variegated, and illuminated, are suspended at intervals in front of the houses, adding greatly to the brilliancy of the scene.

In the centre of the street, a few yards in advance of each other, and resting on small hanging frame-works, composed of bamboo and silks are images or representations of some of the ancient sages or heroes of the Empire; in various attitudes or occupations; made apparently of clay, about 2 feet high, and dressed in the full costume of the age in which they lived; groups of females occupy some, seemingly engaged in amusements of various kinds, while here and there appears an amazon of remote antiquity, armed cap a pied, and fighting valiantly in the heat of battle; while the correctness of the expression of the faces, and the excellent keeping of the dress and attitude, which was much admired, speak highly in favor of the ingenuity of the maker, they at the same time convey to the mind of lookers on, an accurate idea of the appearance of the ancient Chinese. Scenes from favorite plays form the subjects of some, while occasionally are met with, representations, not particularly well calculated to convey to the imagination of the people, any very correct notions on the score of morality

In front of each dwelling, are suspended baskets, vases, flowers, and a variety of pretty figures composed of the highly fragrant flower, called Muh-lo, its color of a snow white, mingling with the gay hangings of silks and crapes, and its fragrances with the aid of many other flowers arranged along each side the street, diffusing sweet perfumes throughout the air.

At the extremity of each street, stages are erected, on which bands of musicians play and sing throughout the day and night; recite for the amusement of the crowd, stories relative to the history of their own country, or astonish them with narratives of the marvellous feats performed by the celebrated Kwan-Fun-tsze, (the mars of China) with the aid of his favorite weapon the "*Beautiful cold saw.*" then, suddenly changing the subject, describe the more favorite passages of a popular tragedy or comedy, and not unfrequently, wander away to the recitation of a love story, whose moral tendency might be questioned

The expenses of the illuminations and decorations are disbursed by contributions from the shops in the street, where they take place, and tho' the crowd on the occasion becomes extremely dense and somewhat frowzy, yet the many foreigners found gazing at the exhibition, have in no instance that we know of, occasion, to accuse its members of incivility.

P.

### MISCELLANEOUS.

#### A PIEDMONTESE SERMON.

"My brethren, you will, perhaps, be curious to know how Satan musters the damned in order to know their numbers. First of all, Mahomet, who is the drum-major, is ordered to beat a call; the devils, with the Rabbins, at their head, file off first, and as they pass along, the devils run the great iron primers into their ——, next come the Turks, who are also presented in the same manner as the Jews; then the Protestants dragging heavy cannon; the devils pour melted lead into their mouths as a punishment of their blasphemies against the saints, and particularly St. Julian, the patron of the church, where you are seated there in his niche, and whom you don't respect, as you ought, for I found only six farthings on his box! And I can tell you, that if you go on at this rate, melted lead in hell will become a dear and scarce commodity. Do you imagine that your patron, St. Julian, can put up with such conduct as this? If you do, I can tell you that you will find yourselves greatly mistaken; for my part, I always take care to keep the lamp brim-full of oil, that he may not want light. But now that the fruitful appreciation, who will clothe him? Not I, yes—I cannot afford it. If you don't see to it, I'm very sure we'll soon see him naked. Look at the sinner on his feet in tatters from looking after your cattle at night, and waking your corn and wine to grow. Oh! what ingratitude! does you are thus to neglect your patron. Well may the heretic of Geneva call you such. You bear new petitions every other day for your wives, and it is but ask and have with them, but do you fancy that when the melted lead is poured down your throats they will bring you a cooling glass of lemonade without my permission? You will then see your folly, and I am afraid repent too late of having by your negligence deserved the fate of the heretics. "Oh! great St. Julian! methinks I hear you say, 'why did I not give the money that I paid for lace for my wife? why was I such a fool as to grudge a pound of the pieces of steel which I thereby from the fair? Vain repentance! fruitless regret! St. Julian will laugh at your misery, and be deaf to your cries—and now is the only time to make him your friend. I understand some of you complain of bad crops. 'We have had no wine this year,' say you 'and two years ago we had no corn.' I believe it very well, but you may expect much worse for the future. Do you think it a great favour that St. Julian will be such a simpleton as to ask of God to grant a favourable season to people who let him wear a coat for three long years? You need not trouble yourselves about the materials for his clothing; give me the money and I will purchase them myself; if you do not, you will be treated like heretics, for whom there is no salvation; and who in their birth are given over to the devil, so that when a Calvinist or a Lutheran comes into the world he is registered in old Nick's books as his goods and chattels."

*(Irish paper.)*

In an article in the Nautical Magazine "*On substituting locomotive power in lieu of steam,*" we find an extraordinary statement with regard to steam-navigation in China. If the author knows no more of the subject of his essay, than of China, his remarks must be taken with extreme caution. He says; "I think Mr, Perkins said, ships going "to Canton took new steam engines, to be worked "in their launches for the purpose of towing them "up, when, wanting wind to fill their sails, they "had not steerage way. When you and I, forty "years back, went up to Whampoa, a string of "miserable *sampans*, rowed or skulled by old men, "older women, and young *Tartar* girls, were employed by the pilot to tow up huge dondolen "Indiamen, forming a spectacle as ludicrous as if "a team of mice were harnessed to a broad wheeled "wagon."

We have not yet seen steamers towing launches to Canton, nor any *sampans* sculled by *Tartar* girls. *rara avis* in this land of *Han*, nor is it, we believe the practice for huge *deep laden* Indiamen (deep laden they never were on coming to China) to be towed up this river at all. We are afraid J. J. has drawn his recollections respecting China from imagination.

It is not very long since we saw it gravely set forth in the English papers, reviews, &c., as taken from German papers, purporting to write on direct information from this, that a steamboat had been built in which the reverend C. Gutzlaff was to proceed up the *Yang se-Kiang* to *Samarcand* and thence to *Pracia*. Some went so far as to say, that this voyage was already commenced. Considering that we are totally ignorant of the great tracts of country which would have to be crossed, and that some magnificent ranges of mountains intervene, the idea is fairly entitled to be called a bold one. The principal objection to it is, that it is visionary and impracticable. How the statements put forth in the letter, came to be written, is not for us to explain.

In the Sydney Herald we find an advertisement by Mr. H. Macy, in which among other Potentates, the Emperor of China is named as one of the patrons of the incomparable "Row-and's Macassar Oil." Another advertisement in the same paper offering *Smoking Tea* for sale, says: "*Tiew Cattee*, so much admired for their superior flavor, are a dit by &c.

Amongst blunders, we may notice one occurring in a sketch on Borneo" by a Mr. Earle, who mentions that he had an interpreter to interpret to him the Tartar language spoken by the Chinese in Borneo!

A remarkable abbreviation we met with the other day, in, we believe, one of the Magazines. The writer, speaking of monkeys, has occasion to mention the particular species "Orang," leaving out for shortness sake the other word "Utang" apparently not aware, that "Orang" is the Malay for that species of beast spread all over this globe, and he so called "man," and that only by adding to the first Malay word, the second "Utang" meaning a jungle, the species of monkey called "Orang Utang," or the man of the woods, is described.

## CORRESPONDENCE

### TEA DUTIES.

#### TO THE EDITOR OF THE CANTON PRESS

Dear Mr. Editor.—You, not long since, made some remarks in your paper, as to the injustice exercised by the British Government, in the condemnation of Fokien Bohea, to the payment of Congo duty. Allow me now to lay before you the following case of rapacity and extortion, inflicted on my property. The case, you will see, is a strong one.

We, in China, are fond of railing at the Canton Government, for arbitrary decisions, against which there is no appeal: and the want of civility in the answers to petitions of foreigners, you and your contemporary have often commented on. I think, on both these points, the instance laid before you might serve as a lesson, to even the haughty and exclusive Chinese.

What a mockery is this "*Free Trade!*" Does a speculator, by good fortune, compose successfully with the powerful enemies, arrayed against him, by the bad faith of the British ministers.—the illegal, though allowed, interference of the East India Company, &c. &c.: the Government, *which forbids him to penetrate here*, poisons on his property, and, on the word of a man, understood to be totally ignorant of Tea; in the face of the strongest evidence; against the spirit and letter of an Act of Parliament, coolly and insolently condemns him to loss, that the quarterly returns, I presume, may seem flourishing. *Is this just?*

I am,—Mr. Editor, Your's sincerely,
September 17th, 1836. A SUFFERER.

LETTER ADDRESSED BY A LOSER BY THE
TO THE RIGHT HONORABLE THE LORDS OF THE
TREASURY. London 30th March 1836.

My Lords,—We imported in the *Hoogkly* from Canton, 31. January 1836, 644 Chests of Teas, which from invoice, and other Custom House data, specifying the same, to be Bohea tea, we accordingly entered and warehoused as such, at Cruickshank Prices; we are since apprized by the Officers of Customs, that this Tea is placed under stop for Congou duty. The tea in question having, previously to it's detention, been put on show, with a view to public sale, the trade were fully in possession of it's quality, and consequently able to appreciate the merits of such detention; our brokers who report and value them to us as Bohea at the low rate of 1s 1d. per lb., upon a duty of 1s. 6d., declare, that they have not in any case, which has yet occurred, of Tea stopped for a higher rate of duty, seen a more earnest and general manifestation of feeling of the trade, than in regard to this particular stoppage, so much so, that many of the most leading dealers, and best judges of Tea, proffered in the sale room, their assistance to get so flagrant a decision reversed, and would willingly join in this memorial were it necessary, and have on all their previous certificates of quality and description, been found unavailing, when differing with the Government's inspectors. We beg leave to wait upon your Lordship's with the enclosed letter, declaratory of the opinion of Mr. Reeves the E. I. Company's late Tea-inspector at Canton, who, you will observe, describes the tea in question to be only equal in quality to the second class of Fokien Bohea, which he had for years been accustomed to select for that body.

The facts which we assert, are, the purchase of the Tea in question as Bohea; our belief in strength, used by the assertion of our brokers and others, that there have been, from the commencement of the Free trade imports, up to this present time, parcels of Tea continually passed and passing, as Bohea, which bear far more of Congou character about them, upon all points, than the tea now under stop. We further assert and to this we would most expressly call your Lordship's attention, that there passes not one of the E. I. Company's periodical sales, that does not offer Tea as Bohea, possessing infinitely more of Congou quality, than the Tea in question.

We would therefore, in conclusion, respectfully submit to your Lordships, the hardships we, as importers of Free trade tea, suffer from being thus placed in so very unfavorable a position as compared with the E. I. Company, who are now supplying consumers with similar, and even superior Tea, at the low Bohea Duty.

Praying your Lordship's enquiry into the allegted circumstances, and that you would be pleased to order the delivery of the Tea in question, upon payment of the Bohea Duty,

We remain &c.

ANSWER.

TREASURY CHAMBER. 23th April 1836.

GENTLEMEN,

Having laid before the Lords Commissioners of His Majesty's treasury, your petition, requesting that 644 Chests of Tea imported in the *Hoogkly* from Canton, may be delivered on payment of the duty, Payable on Bohea, I have it to command to acquaint you, that it is certified to my Lords that the Tea in question is Congou, and that their Lordships cannot therefore relieve you from the payment of the duty legally chargeable by law on that denomination of Tea.

I am,
Gentlemen,
To Messrs.—— Your obedient Servant,
A. S. SPEARMAN.

### SINOLOGUES.

Dear Sir,—You published in your paper a few weeks ago, that an East India and China association had been formed in London for the better protection of the interests of those concerned in the British trade with India and China and in the hope that these lines will find their way to some of the members of that association, by means of your paper, I now address you. I have long been a resident in China, and can bear witness to the better understanding and feeling which now exists between the natives of Canton and their visitors, than what it formerly was. This has no doubt been caused by the more familiar intercourse with a greater number of the last wearing nations, and by several foreigners now being able to converse with the Chinese in their own language and it were indeed to be wished that the acquirement of that language became more general, and took the place of the present abominable jargon, in which our conversations and dealings are now carried on in Canton. This gibberish or language, I learn which the Chinese have in derision dictionaries and schools, is composed chiefly of corrupted English with a thick sprinkling of words of portuguese and some chinese, and being vested in it is sufficient for the mere purposes of commerce; but if you wish to carry on any general conversation in it, you will very soon find your stock of words at an end, and good plain English the Chinese cannot understand, nor, as much are they accustomed to hear from us this corrupted language, that they believe it to be real. I often, and this I dare say has come to China to learn their own language, is taking out and means to bear home any of it's good qualities, he has now come, to adopt theirs English."

As a means then of improving the intercourse with the Chinese, this language should be discarded, and as in fact no business, that cannot be carried on with Chinese for calling on Interpreters, every one should be qualified to converse with them in their own tongue as quick it. I would therefore recommend that some plan might be devised, by which the learning of the Chinese language becomes more general. The French who have hardly any commercial intercourse with China, have made fully as much progress in the study of it's language as the English, and the French Government encourages its acquirement by pensions and rewards, and of it's expense. The French ambassador here until lately have sent to Macao, for some three interpreters, upon every occasion of sending the dispatches to Europe, and these have interchanged into the interior, and have there with Chinese men. They soon acquire a knowledge of the country, and it is much to be regretted that of the documents they have in their possession, and have sent home to the minister ministers, so little has yet been published. The portuguese also count a good many chinese scholars, and one particularly whose literary productions rank among the best of their kind.

But what have the English, as a nation done to promote the study of Chinese? We sent it to the leisure the Company's factors enjoyed, when at Macao; that a few of those have acquired the chinese language; the young men sent out by the Company were not obliged to learn Chinese, and as the Mission Societies we are indebted for a smattering of great reputation, the late Dr. Morrison. It is in fact chiefly owing to those societies that a few men have devoted themselves to the study of Chinese, and there are now several Gentlemen both here and at Macao, who connected with them in America and Europe have acquired the language and who are obliging enough to render their knowledge available to us, whenever we have to make communications to, or receive them from, the Hong merchants or local Government.

But these advantages are accidental; the British Government confines itself to paying for an interpreter, and to having given the post of British Harbour master at Whampoa to a Revd. Gentleman at Macao, who being accustomed one of the best sinologues living, his services in the latter capacity are, I presume, available to H. B. M. Superintendents. The interpreter to the Superintendents now live in Canton, and renders his residence here of great public utility, by his obliging attention to applications for translations of Chinese documents. But two persons appointed by authority are not sufficient; suppose that one or both of them should be incapacitated by some cause or other, who is to take their place? There are no precautions taken by the Government for supply ng the vacancy, nowhere are there schools to teach young men Chinese, nor is any encouragement held out to them for acquiring it. It is a strange fact that when Lord Macartney was sent as Ambassador to China, in all England or even in China, was there no En lishman to be found who might officiate as Interpreter, and I think it very likely, that even now, should a new Embassy be sent, the same would occur. This is not as it ought to be, steps ought to be taken to ensure the study of Chinese, as without it, it is very possible, that in fact a official intercourse between Great Britain and China, no trustworthy interpreter may be found.

The dread of the difficulty of the Chinese language, which prevented many from attempting to acquire it, has of late been much diminished, and

I know several, who in giving their attention to it, in their short moments of leisure, have made considerable progress in a couple of years; others therefore, who have nothing else to attend to, would with application, acquire it in a comparatively short time.

By the bye, don't you think that H. M. Superintendents at Macao, as they have nothing else to do, ought to be made to study Chinese? In doing so, some public good might perhaps be derived from the expenditure of the great sum of public money they draw. Convert H. M's Commission at Macao into a Seminary for studying Chinese, the advantages will be great, and the cost much less than at present.

I am
Mr. Editor,
Your obedient servant.
PHILOLOGOS.

24th September 1836.

## DWELLINGS IN CANTON.

Since the trade to China has become free, the Commercial business formerly transacted by the Company's Supercargoes, for which two Hongs (the Company's old and new Hong) were then sufficient, and in which the establishment found ample accommodation, a great many newcomers have settled here, and, as the trade is increasing, more are daily arriving, without any steps having yet been taken by the Chinese, or the Foreigners themselves to enlarge the accommodations, and the consequence is, that not only the rents of the miserable confined houses we now occupy, have risen immoderately, but there are actually no houses, or even rooms to be found to accommodate occasional visitors, of which the now fast approaching shipping season always brings a great many.

To such as are not acquainted with the locality of Canton, a short sketch may not be unacceptable. The foreign factories or hongs, thirteen in number, have a south aspect, and face the river from which they are about fifty yards distant, nine are in a strait line, and four project about 40 feet nearer towards the river. All these factories are built wall to wall, and are intersected only by three narrow lanes, viz Hoglane, and old and new China street, the former of which is the resort of sailors, and in the two latter most of the outside business is conducted, being occupied by shops in which silk goods, lackered ware, paintings and Chinese nick-nacks are sold. Many of the opium brokers also transact their business there. Of the twelve hongs occupied by foreigners (one of the thirteen being in possession of a Hong-merchant, *Mingua*,) the depth may on an average be about 130 yards, terminating at the back by a dead wall, behind which runs a narrow street, in which the continual thoroughfare is immense, and the suburbs of the town, being loosely, built, the streets generally not exceeding eight feet in breadth, intersected here and there by stagnant, filthy canals, it may be supposed, that the inmates of the hongs do not derive any fresh air from the back part of their temporary prisons.

Every hong is subdivided into six or seven factories or houses, giving an average of about eighty houses in all, in which foreigners resident here, are allowed to live. The total number of residents, at the end of last year, as we gather from the *Anglo Chinese Calendar*, amounted to 227, giving nearly three residents to every small house. But at the present season when the number of passengers from Bombay is very great, and of Parsees alone cannot fall short of 150, who make Canton their temporary residence, the houses become of course much more crowded. There are now no less than 31 ships at Whampoa, which each of them, including Captains and passengers, give us on an average, we presume, about two residents for the time being, but during the Europe and American shipping season, and before the Bombay ships leave the harbour, the number of temporary residents cannot fall short of about 330 individuals. Adding to these, what with coolies and other servants, ten Chinese to every house, it will be found that the 13 foreign factories contain in the months of October to January or February the astonishing number of 1357 inhabitants, all huddled together in a space of about 200 yards square, and in this estimate, which is we think rather below than above the actual number, the great many new residents (not less than forty we imagine) are not included.

Living so closely packed is not only very unpleasant, but cannot be conducive to health. The back factories are almost totally out of the reach of fresh air, which, where exercise out of doors is either impracticable or unpleasant, and where the inmates are obliged to lead a sedentary life, is necessary for the enjoyment of health.

Whilst suffering under this confinement, the question of "is it an irremediable evil?" naturally suggests itself. Can nothing be done, can no steps be taken, to improve and enlarge our dwellings? Such steps certainly can and ought to be taken, and will be, no hope, successful. The principal owner of the Factories at present is the Chief Hong Merchant, *Howqua*, who derives a large income from letting them out, and would therefore probably not be the proper person to apply to for an extension of our "limits," nor would some of our other neighbours perhaps be inclined to cooperate in obtaining so great a public good, as they hold the leases for whole hongs, and derive no inconsiderable emoluments from subletting at the present enormous rents; in a question like the present there must always be contrary interests, but the majority of residents in Canton who suffer both in person and pocket from the confinement to which they are doomed, ought to make a representation to the Governor of the Province, for more room being allotted, to foreign residents, setting forth their reasons for such application: "that trade has become much more extended; that at present a greater number of subjects of his Celestial Majesty derive profit and even livelyhood from this trade, than at any previous time; that the foreigners by bringing money into this country, therewith to purchase it's produce and manufactures, emulate the industry of the natives, and give employment to the idle; that in times of scarcity these foreigners provide the hungry with grain, thereby preventing a diction; that finally, for these reasons, the number of foreigners having encreased with the growing trade can no longer find houses to live in, since the number of factories built years ago for the accommodation of, comparatively, a few only, cannot suffice for the many."

The most convenient spot to build new factories on, appears to us the one now occupied by the eating houses and the duck market, and the structures now standing on it are by no means very valuable; their removal would consequently cause but little expense, and the situation, as facing the river on two sides would be a very eligible one.

Besides, how comes it, that a Chinese has intruded among the foreigners? why should Minqua possess one hong of the thirteen, built on the site expressly set apart for foreigners? He ought to give it up, and go some where else, nor do we see that he would be a loser by doing so, as the rent he would get for it, would be far more than he can now value the Hong at, occupied by himself.

We recommend this subject to the serious attention of our readers, and hope soon to see energetic steps taken, to improve our dwellings.

---

Those engaged in the Opium trade with Bombay, have for some etime been aware that much fraud has been practised there in packing of Opium chests, and that on several occasions the chests on arrival here have been found to contain a spurious article, or instead of Opium, stones and other rubbish have been substituted. The object of this fraud was plain; it was either toe cheat the *purchaser* of the chests at Bombay, or to obtain on these chests, money on respondentia of the Opium, as if it really were good. Not long ago the latter happened in Bombay, and the cheat we believe was successful. We now see from a letter in the last Register signed "a shareholder" that this nefarious practice is held injurious to the underwriters, and see also that in the Editorial remarks of that paper on this letter, that same position is taken; the Editor says: "but the agents of "the insurance offices both in Canton and Bombay, "will doubtless adopt some measures to trace it "home to the parties who are thus attempting to "rob *them*; and who, by such nefarious acts, bring "discredit on the whole system of marine insur-"ance." Now in our opinion, it may be all very fine to launch out, in terms of indignation, against any nefarious practices, when discovered, and the Register, we believe, very truly, says, that it does not know who the parties that committed the fraud are, but what in the case stated by "a shareholder" (viz a chest saved from the wreck of the *Susana*, containing stones and straw instead of Opium) the insurance offices can possibly have to do with it, or how such evil practices can throw discredit on the whole system of marine insurance," we are unable to perceive; The Chest in question was shipped on board of one of the finest and best appointed ships sailing from Bombay, and if insured, the underwriters had the premium, for which they run the usual risk, and would have had to pay the loss, had it occurred without the contents of the chests becoming known, just the same as if it really had contained Opium, nor would they have had any reason to complain. All the underwriters have to do, is to see that they take no risks in ships of bad character, as to what quality the goods are of, they insure, or whether they insure them under or above their value is indifferent to them in case of total loss, but where the loss is only partial, and where such fraud as the one above stated has been committed, the circumstance is even in favor of underwriters, who having received the premium, cannot be made to pay any loss.

But perhaps the Editor of the Register and his correspondent suppose the cheats at Bombay to have such paramount interest with the "Clerk of the weather" as to get their order for a Typhoon, on the ship's nearing Canton, duly executed; the old Gentleman is not generally so obedient.

"The case of our correspondent "a sufferer" is of peculiar hardship. Our readers will perceive from the documents accompanying his letter, how unwilling the Government in England is, to do an act of mere justice to the importers of tea, many of whom are, we hear, in the same predicament with our correspondent. The answer from the *Lords of the Treasury* is an instance of official overbearing, which can hardly be surpassed by the officers of his Celestial Majesty, the more so when it is remembered, how the mass of evidence in favor of the Tea importer, offered to their lordships, is rejected by them. The Government Tea inspectors, men lately appointed to that office, and who, it may be presumed, cannot so well know the different descriptions of teas as the former Company's tea tester, and the whole trade chose to call tea Congo, which by every one else is pronounced to be Bohea, the importer appeals to the Government against paying the higher duty of 2s. 2d. per lb., and that Government then rejects his evidence, and that of every one conversant with the subject, chusing to abide by the decision of it's own Tea inspector, and considering his dictum as disproving all other evidence; making in fact the parties appealed against, judges in the case. We complain that the officers of the Chinese Government, well known to be one essentially despotic, disregard our remonstrances or repel them with uncivil language, but the document "a sufferer" has sent us signed "*A. S. Spearman*" by command of the lords of the Treasury, is from it's apparently contemptuous disregard of the mass of evidence to support the claim of the importer, fully as insolent as any Chinese document we have ever seen. In this answer the London Merchant's *statement* of his case is termed a *petition* whilst it was no such thing, there being no occasion in a free and well governed country, to use entreaty and supplication, where justice is demanded.

But besides the tenor of this answer, was ever a document seen couched in such unenglish language? such as "*I have it in command of their Lordships*," and "*duty legally chargeable by law*," make us wonder the Lords of the Treasury do not pay same one able to express their official despotism in correct words at least.

The subject on which "*Philologos*" has favored us with a letter is one of considerable importance, particularly with regard to official intercourse between the Governments of England and China, and some measures ought to be taken by the British Government to secure the knowledge of the Chinese language to some of it's subjects. Our correspondent's hint, that H. B. M. Superintendents, from want of other occupation, might study Chinese, and thus render themselves fit to become useful at some future period, ought to be acted on, and we recommend it to the serious consideration of the Superintendents.

---

We published in our last the Viceroy's report to the Imperial Government respecting the free admission of Opium into China on payment of a trifling duty. We had not space then to remark at length on this very important document, which recommends the admission of the drug to be legalized, instead of being a contraband article, as the minor evil. The Chinese Government declares it to be out of their power to prevent the smuggling; the people will have Opium and the only way therefore is to make it an article of lawful traffic, and in doing so the Viceroy recommends a small duty only, namely 3 tacls 3 mace 8 candarin 6 cash per Picul, amounting to no more than about ½ per Cent on the value of the Opium, so as to preclude the possibility of smuggling being in future profitable. The greatest evil which the smuggling has hitherto produced, in the Viceroy's opinion, is that the country has been drained of Specie, and all Chinese merchants are in future to buy Opium only in barter for the produce of the Country. The Viceroy further recommends that permission be given to the subjects of the Celestial empire to cultivate the growth of the poppy. This latter proposal if acted on, may call forth a powerful competition with the Company's monopoly. Opium is now raised in some parts of China, and musters of it have several times come to Canton, but it is not thought so good as the Bengal drug; the defect in quality may arise from ignorance, and will probably be obviate[d] when the cultivation becomes better known; but the cultivation in China will chiefly depend on the price, whether the Chinese labourer can afford to produce it at the same prince at which the Bengal Governme[nt] can afford to place it here. The wants of a Chinese labourer are much greater than those of the Indian, and rice, probably in most of the provinces is about as dear again as in India. A Chinese must have warm clothing and a substantial house to protect him against the weather, he is fond of animal food; all these wants the Indian has not, or only partially, and they are satisfied at a comparatively trifling cost. The probability is therefore that Opium will not be cultivated in China to any very great extent, particularly as, should the drug of this country ever compete with that from Bengal, the price there can be reduced very considerably, and still afford profit to the Government.

We noticed on a former occasion that we consider the lawful admission of Opium, a thing by no means favorable to the foreign merchant, to whom the opium trade at Lintin afforded the means of obtaining cash, and of being less dependent on Hong merchants than they would otherwise have been. In future however a trade amounting to seventeen millions of Dollars per annum is to be thrown into their hands, whilst the security they afford is no greater than before. They are by their own Government ordered not to pay money for opium, but only produce of the Country, the price of which they can raise at pleasure.

We expect that the Company's Finance Committee will under this new Opium law, experience much difficulty in obtaining money for their bills on Bengal, since but very little silver is henceforth likely to be seen in the transactions between Chinese and foreigners.

---

A Grand Jury for the first time, assumed it's functions at Macao on the 15th instant, as we learn from the *Macaista Imparcial*.

Several robberies have of late taken place in Macao, and in one the thieves succeeded in plundering the room in which the gentleman was at the time asleep, of every moveable to the value of upwards of 1000 Dollars. The house coolies are suspected, but the property has not been traced to them.

---

*Ship aboal near the western Island.* We have been favored with the following extract from a letter of Captain Haviland, Amer. Ship Horatio; "In attempting to get through the windward passage into the Celebes Sea, we struck soundings on a bank of Coral in 64 fathoms, where no soundings are laid down in Horsburgh's chart. I do not know the extent of this coal; we traversed about 4 miles in 64 and 7 fathoms, and dropped it's northern edge in 60 fathoms water, the bearings of the Langhey Islands E. by N. ¼ N; great Sooloo East point S. by E. easterly. Last lunar observation 6.46 N, Long. 121.10 E. by chronometer measured from Manila and several other points, whose longitude is well authenticated, also from Langhey's Island. There may be may not be less water on this shoal."

A Lascar was brought to Canton yesterday by a Chinchew Junk, and from his statement it appears that he strayed or ran away from a boat belonging to one of the Opium Ships on the coast, was seized by the Chinese, at first imprisoned, and then sent to Canton. He states that he was seized about five months ago.

---

Two Imperial Envoys (Kin-chae) are on their way from Peking, to investigate charges against the Che-keen of Tung-kwan district, of venality and injustice, as also allowing the escape of capital and other offenders, on payment of sums of money. Complaints were made to the Emperor direct. The officer in question is now in the City of Canton; if found guilty, his punishment will be capital.

*Rice.* The crop of rice now in the ground, promises to be most abundant, and the Chinese are much pleased with the chance of a continuance of low prices. The early part of the last crop will be in course of cutting in about a month. We see quotations at Macao as low as $ 2.30 per picul Chapa of 130 Catties, and of fine white Ylocos at $ 2.50.—

We notice in the Liverpool papers of the end of May, that an East India and China Bank Company was established there. Of the nature of this establishment we are not as yet informed.

---

## BARQUE SUMATRA.

From the Singapore Chronicle of 27th August we learn that the Dutch Barque Sumatra arrived at Calcutta on the 13th July under charge of the *Gunner*, who had, on the passage, killed both Captain and Chiefmate. We copy from the same paper the gunner's statement of this affair, which is a very extraordinary one.

"On the 17th June last, about 7. P. M. it being my (the gunner's) watch on deck, the vessel with all studding sails set, the wind suddenly shifting more ahead so as to shiver the sails, I at first, imagining it to be through the vessel's broaching to, inquired of the seacunny at the wheel "what he was about?" end proceeding to the compass, discovered my error. The Captain then came out, and seeing the sails shivering, abused the seacunny, and complained that they always steered badly, I replied, it was not the fault of the seacunny, but that the wind had drawn ahead. After my replay to the Captain, I took no further notice of him, but was busy giving the necessary directions from the poop about trimming the sails, &c.—Whilst thus engaged, the Captain who was standing on the larboard poop ladder, with a small cutlass in his hand which I had not noticed before, suddenly stabbed me in the left side. I ran towards the binnacle, bleeding and smarting from the wound; and seeing the Captain stepping on the poop, with the intention of repeating his violence, I sprung towards him with the knife I always wore, fended off the cut he made at me with the cutlass, and closed with him, and in the scuffle, both fell off the poop on the quarter deck, on which, we let go our hold of each other, and discovered my knife was broken. The Captain immediately on recovering himself, made another cut at me with the cutlass, which I fended off with the broken knife I retaind in my hand, he then made a stab at me, which I also fended off, but not without receiving a wound in the groin. He then ran inside the cuddy; I fearing it was with the intent of arming himself with a pistol, (a brace of which I was told he always kept loaded in his cabin) and being apprehensive of my safety, ran in after him and caught him from behind, securing both his hands with mine. I then dragged him to the cuddy door, and kept my hold, hoping that he would soon be pacified and refrain from further violence, the captain all the time struggling to get free. Whilst I was holding him, the Mate who had been asleep before, came out from his cabin, which I did not perceive, and stabbed me from behind; on feeling the wound; and despairing of my life, I with my utmost strength, threw the captain on his back on the deck, forced the cutlass out of his hand, and in act of drawing it backwards, cut him across the chest, and I repeated the blow, seeing that I had no other hopes of life, which killed him. I then turned into the cuddy to expostulate with the mate, but not finding him there, and hearing the exclamation of the seacunny (that was at the wheel, then for refuge on the main rigging) of "Oh! Jesus Christ," I concluded he was on the poop, and went thither accordingly. Immediately on reaching the poop, the mate began to assault me with his cutlass, and I in defence turned upon him with the cutlass I had forced from the captain, and after a fight of about five minutes, I cut him across the chest, and with a second blow, killed him. A short time after this, having assured the crew of their safety, after directing the bodies to be thrown overboard, and giving some other directions, I became insensible through loss of blood, and continued very ill and despaired of for the following week. After recovering a little, I decided on proceeding to Calcutta. I have been careful of the property on board; what I have done, I was compelled to do in self defence, and I am now here for the trial I must undergo.

(Signed) AGAPETO DELROS REYEZ."

The above is the statement, as well as I can understand, made by the Gunner, who speaks English very incorrectly.

(Signed) JOHN BARTLETT.

N B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camlets, Sarsnet, Ginseng* and other Goods on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or transship their Cargoes at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary Stationery, Cutlery, Crockery ware, &c.* for foreign consumption, are sold at Auction, duty paid.

*Note. Alum,* and *Canes* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk piece goods &c, are sometimes shipped from the latter Port to* avoid double duties, chargeable on those goods, if more than 100 Pieces are required for the ship when at Whampoa.

### WHAMPOA PORT CHARGES, &c.

1st class vessels, measg. 1600 cubits & up wards pay 0.787 1256 of a Tl. per cubit.
2nd „ „ „ 1200 do. & under 1600 „ 0.7221091 „ „
3rd „ „ under 1200 do. „ 0.656 7341 „ „

N.B. The cubit is 14½ inches; measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen, or, or if her head is Beige; and across at the main mast; these are multiplied together for the above products.—The largest class pay from @ 43 0 to @ 4320; 2d class from @ 3240 to @ 3240; 3rd class from @ 3700 and under. The Comshaw or Present Fee is paid by all vessels 1000 Tael or @ 2222. Linguists fee @ 173½ and Compradore's fees @ 50 Also Pilotage @ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Bengalese ships are charged only about @ 1300 in lieu of measurement &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—A good many arrivals have come in lately and more are expected. The market is in consequence very languid, the more so as the half yearly settling day among the Chinese will be early next week, and money is rather scarce.

WOOLLENS.—The market has again relapsed into inactivity and sales could not be effected to any extent at our highest quotations, either of Spanish Stripes or Longells.

LEAD.—The advance on the price of lead has been checked by the sale of 3000 Piculs by a Hong-merchant to a Silk merchant, who resold it for cash at a price equal to about @ 5.80 @ 5.85 per Picul, English price.

SILVERSHEAR.—A sale of about 90 Picul of Indian at @ 22 per Picul has been reported to us.

QUICKSILVER.—We hear of a sale from second hand at as low a price as @ 90 per Picul.

GAMBIER.—Our quotation of Gambier is nominal. The holder of the largest or only lot in the market, is selling slowly at @ 6, but there is very little demand, and perhaps not more than @ 2½ @ 3 would be got for any arriving.

RICE.—The prospect of an abundant crop, has depressed prices, and a further decline may be expected, if the crop turns out as good as anticipated.

COTTON.—We have heard of the sale of about 3 00 Bales of Bombay Cotton, during the last week, and at a reduction on our present quotation of 3 @ 4 mace, the purchasers holding for an advance; there is however very little animation, and but very little has been delivered. Good Surat and Bauda are more enquired for, the stock being very short of them; for Madras Cotton, notwithstanding the small supply, there is no offer.

OPIUM.—Several heavy time bargains falling due just now, and as money is scarce, there is no demand for cash. Sales to a large extent however at two and three months have, we understand, been made at @ 30 @ 40 advance on present rates, paying @ 50 deposit, which speculation has been considerably encouraged by the late favorable report to the Emperor, regarding the admission of Opium. The non arrival also of the Bengal ships tends to support the market.

### EXPORTS.

SILK MANUFACTURES.—The dealers manifest some desire to dispose of ready made articles, prices, however continue high.

RAW SILK.—We hear of several purchases of both Taysaam and Tsatlee, but rather under our present quotations, although we understand fair quality of Tsatlee of the second crop would cost fully @ 300 per Picul, a corresponding advance having taken place up the country, where the exorbitant prices in this market were known. Shipments are going on very freely.

TEA.—There is little demand for Canton teas just now, and prices are on the decline. Our quotation for Pekoe shews an advance on the good qualities, (some low being quoted) but the highest quotation is for finer tea than has been sold previously.

## LITERARY.

*( From the Indo Chinese Gleaner. )*

### THE PARADISE OF FÛH.

"AN EXHORTATION TO WORSHIP FUH, AND SEEK TO LIVE IN THE LAND OF JOY, SITUATED IN THE WEST."

"Good friends!—In the world there are a thousand, yea, ten thousand roads. Why do we then exhort men to fix the thoughts on Fuh only? Because the heaviest consequences are connected with the thoughts of men. That which drags the soul, leads the spirit, fate favorable, and life secure. all proceeds from this source. If the thoughts are good, you ascend to heaven; if bad, you descend to hell. One straight thought, will [after death.] make you a man; one cross thought, will cause you to become a beast. Why are there [in Hades] hungry ghosts; Solely because of wrong thoughts. Think of the devil, and you will become a devil. Think of Fûh, and you will become a Fûh. Would you prevent the six ways [of the transmigration?] there is no other method but to think of Fûh. If you will not think of Fûh, you will lose the human body, and for ten thousand future ages not be able again to obtain the same. Therefore, Shih-kea, and Yu-lae, the two sacred ones, advised men to think of Fûh. The master of doctrines Yuen-lung, also advised men to think of Fuh. To think of Fûh, and yet not be delivered from alternate births and deaths? [There is no such thing.] For, Fûh, the error is not in Fûh. It is because the mouth prays, and not the mind. Though one prays thus, it is as if he prayed not. Though he repeat it a whole life, it is not equal to one single sound [from one who worships with the mind.] The word Neen, i. e. to recite, is derived from Sin the heart, and not from K'ow the mouth. But when the heart is alive, the mouth naturally utters a voice just as the suckling naturally cries when it remembers its mother. We must have Fûh in the mind, and Fûh in the mouth—neither of these can be dispensed with.

"But [it may be said,] seeing there are thousands and myriads of Fûhs, why call upon men to recite the name of O-mo-to Fûh only? [Answer.] because, among the forty-eight vows which he made, and swore to save the living multitude of all quarters, one runs thus, * In all the ten quarters of the world, in the midst of the living multitude, if but one of those who repeat my name, shall fail to attain life in my kingdom, then I swear that I shall no longer be a god."

"The land of this kingdom is yellow gold. Its gardens, groves, houses, and palaces are all elegantly adorned with seven orders of gems. It is encircled with seven rows of trees, seven borders of elegant net-work, and seven fences of pali-sides. In the midst there are the seven turrets and towers of gems, the seven flights of pearl stairs, the seven bridges of pearl, the seven pools of pearl, the eight kinds of virtue-producing waters,* and the nine classes of the lotus. There are also lovely doves, peacocks, parrots, birds of sparkling plumage, and of exquisite notes. The great and unmeasured god O-to-han, the famous disciples of Fûh, the relatives of the demi-gods, the goddess Kwan-yin, the most powerful deliverer, the most pure gods of the vast ocean, the unnumbered renovating Fûhs, the unnumbered deliverers, all the demi-gods of past present, and future ages, and all the sages whether produced in heaven, or among men,—all will be assembled on the sacred spot. But in that kingdom, there are no women: the women who will live in that country, are first changed into men. The inhabitants have the lotus for their father and mother, from whom their persons are produced. [There are three general classes, each of which is subdivided into three.] There are born of the superior, middle, and lower orders of the first class; of the superior, middle, and lower orders of the second class; and of the superior, middle, and lower orders of the third class; these differences among the multitude of animated beings, are the consequences of the various degrees of depth or shallowness, diligence or sluggishness, in the desires and active energies. The bodies of the persons produced by the lotus, are pure and fragrant; their countenances, fair and well-formed; their hearts, full of wisdom, and without vexation. They dress not, and yet are not cold; they dress, and yet are not made hot. They eat not, and yet are not hungry; they eat, and yet are not filled. They are without pain, without itching, without sickness, and they become not old. Enjoying themselves at ease, they follow Fûh, gaily frisk about, and are without trouble. After every meal, they walk about with the demi-gods, as their companions, on the stairs and walks of that place. Their noses inhale the most delightful fragrance; their ears are filled with the most harmonious music; the birds of Paradise singing all around. They behold the lotus flowers, and trees of gems, delightfully waving like the motion of a vast sheet of embroidered silk. On looking upwards, they see the firmament full of the To-lo flowers, falling in beautiful confusion, like the rain. The felicity of that kingdom may be justly called superlative; and the age of its inhabitants, is without measure. This is the place called the Paradise (or joyful world!) of the West. Alas! the riches and honors of men, after an hundred years, all revert to emptiness. The elegance and glory of heaven itself, after a thousand years will cease.

"But when we enter the Paradise of the west, we shall obtain an unlimited age; and the means of obtaining it are most simple, depending solely on the one sentence, "Ne-to." Yet the world will not be at the trouble to seek this good so easily obtained; but on the contrary, put on their iron shoes, and go asking for the road.

"I advise you speedily to swear and vow, to this effect,—" If I do not both now and hence'orth repeat the name of Fûh, and seek to live in that western world of joy; then let me become an evil demon, fall down for ever to the northern part of hades, to the metropolis of hell—Alas! alas!"

"Give up the three tsangs and all books for others to fag at, and the fourteen thousand roads for others to walk in. Beyond the one sentence, "O ne-to-fûh," you need not use a single word. Let each seek a retired room and sweep it clean, place therein an image of Fûh; every day burn a pot of pure incense; place a cup of clear water; and when evening comes, light a lamp [before the image.] Whether painted on paper, or carved in wood, the figure is just the same as the true Fuh: (let us) love it as (our) father and mother; venerate it as (our) prince and ruler.† Morning and evening, let us worship it with sincerity and reverence; fall prostrate (before it,) like the tumbling down of a mountain, and rise up with dignity like the ascent of the clouds. On going out, let us inform it; returning, let us report the same: whether we travel to the distance of five or ten Le, (miles) let us act as in the presence of our Fuh. Eating or drinking, let us first offer it up for (Fûh's) nourishment. Rolling the eye, or moving the lips, all is (from) Fûh. Let not our rosary ever leave our hands; or the sentence "Ne-to," depart from our mouth. Let us repeat it with a loud voice, and with a low voice: repeat it in lines of six words and of four words; repeat it quietly and slowly; repeat it audibly and silently; repeat it with clasped hands, and with a low voice on our bended knees; repeat it before Fûh, and with our faces towards the west; repeat it, and strike the wooden tablet, and beat the wooden fish;‡ repeat it, while fingering the beads of the rosary, and while walking in the road; repeat it when worshipping, and when alone; repeat it also in the midst of a crowd; let us repeat it in our own houses, and when abroad; repeat it when at leisure, and when in a bustle; repeat it while travelling, and while dwelling at home; repeat it sitting and lying; and let us repeat it even in our dreams;—this is the true way of repenting. Thus to repent, will make our hearts sour § and our tears to drop; thus to repent, will cause the fires to extinguish, and the ashes to become cold; thus to repent, will inspire the celestial gods with awe, and the terrestrial demons with reverence; thus to repent, will make heaven to rejoice, and the gods to be glad! At the sound of Fûh's name, the palace of the king of devils, moves and shakes! At the sound of Fûh's name, the wood of swords and the mountain of knives will be beaten small as dust! At the sound of Fûh's name, a hundred miseries, multiplying into thousands, will all melt away! At the sound of Fuh's name, the road to pay the debt of gratitude to princes, parents, superiors, and the benevolent, and to obtain the three desirable things,‖ will instantly be opened. Thus, the man who would squeeze out the oil, must cause the sound of the pressing bodies, to grind the more forcibly. Thus also the mariner, when his barge meets the swelling of the wave, must ply the oar more vigorously. Having behind us the boiling caldron, and before us the lotus pools, were thousands and myriads of men to prevent our repenting, yet all their efforts would be vain."¶

* Eight kinds of water,—1, purifying, 2, cooling, 3, sweet to the taste, 4, softening, 5, moistening, 6, conferring rest, 7, removing hunger and thirst, 8, nourishing the root of virtue.

† This is as literal as possible. It will be difficult for those who maintain, that the heathen do not worship idols as gods, but only the spirit that is supposed to reside in them, to put a fair and unforced meaning on this passage (and there are hundreds of similar passages in Chinese books) without shaking the foundation of their own opinion. The writer of the paper, does not seem to have been an ignorant man. The style of the original shews him to have been acquainted with letters, so that to worship the work of one's own hands as a God, is not confined to the vulgar only.

‡ Instruments used in worship in the temples.

§ Phrase used to denote THE MOVING OF THE PERTURBATIONS.

‖ Perhaps happiness, office, and age.

### INVITATION TO A MARRIAGE FEAST.

FROM A CHINESE TO A PORTUGUESE.

To the Great Head of Literature, Venerable First Born, at his Table of Study.

On the 8th day of the present moon, your younger Brother is to be married. On the 7th, having cleansed the Cups on the 10th he will pour out wine, on which day he will presume to draw to his lowly abode, the carriage of his friend. With him he will enjoy the pleasures of conversation, and receive from him instruction, for the well regulating of the Feast.

To this he solicits the brilliant presence of his Elder Brother, and the elevation to which, the influence of his glory will assist him to rise, who can conceive?

From Hu Kow; Born in the evening, and who, bowing to the ground, sends this felicitous and soothing letter.

Tsae-Kwang, 1st day, 7th moon, 16th year, 1836.

P.

## MISCELLANEOUS.

A STRANGE KIND OF ECONOMY.—No matter for the *title* of that Scottish lord whom the Prince Regent used to mention as such a peace maker that he would hardly speak ill of the 'deil' behind his back. On one occasion, an absentee was mentioned to whom the Prince applied a very brief and emphatic title, continuing, "Even Lord ——, there, cannot deny that the man lives upon *lies*. Come my lord, is he not a *liar*?" "Indeed, your royal highness," answered this lover of harmony, "I'll not go so far as to say *that*; but I'm free to admit that the gentleman is a great *economist of truth*."

LYNCHING IN MISSOURI.—We learn from St Louis, that on Thursday last, a coloured man was arrested on board a boat, by a deputy sheriff and constable; that another colored man assisted him to escape from the officers, whom they immediately arrested, when he killed the sheriff upon the spot, and so badly wounded the constable that he was not expected to live. The negro was then secured and committed to prison, but the people assembled in great force, with the determination of tearing down the prison, if he was not given up to them.

He was delivered to the mob, who conveyed him to the outskirts of the city, placed a chain round his neck and a rope around his body, and fastened him to a tree a few feet from the ground, when they then placed fire round the Tree and literally roasted him alive! His shrieks were most awful during the performance of this terrific tragedy.

SINGULAR FACT.—A pigeon was recently observed sitting upon a fence at Flatbush, Long Island. The observer approached it, and through seeming fatigue, the bird permitted itself to be taken up. On examination it was found to be a carrier pigeon, and bore, fastened under one of its wings, a scrap of English paper, containing the London sale of Stocks, &c. It is surmised that the biped was sent with that despatch intended for Antwerp, but that it was either pursued by some bird of prey, or driven out of its course by heavy winds, and alighted on Long Island, after the prodigiously long and fatiguing flight of 3000 miles. *(Amer. paper.)*

INTERCOURSE BY STEAM BETWEEN ENGLAND AND AMERICA.

A Company bearing the title of the "British and American Intercourse Company" has been incorporated by charter from the British Crown, with such privileges and power as will enable it to carry into complete effect all the useful objects contemplated by the establishment of steam-boat intercourse between the two continents. The proposed capital is two millions of pounds sterling. The harbor of Bitarby, on the western coast of Ireland, has been selected as the point of departure from the eastern continent,—this place being nearly on a straight line drawn on an arch of the circle intersecting Liverpool, Dublin and New York; and being a position that is accessible with a great degree of safety. A rail road 110 miles in length is to be constructed from Bitarby to Dublin; and from thence the communication will be by steam-boat to Liverpool. The undertaking, it is calculated, will be of great benefit to Ireland. The passage from Liverpool to New York which now upon an average take 37 days it is confidently expected will be accomplished in 19 days;—and from this country to Ireland, in about 10 days. *(Singapore Free Press 15th September.)*

The celebrated Mosher estate in England, valued at Drs. 32,000,000, has found a claimant, Caleb Mosher Jr. of Providence, R. I. who has retained Attorney General Greene as his Council in the matter. *Ibid.*

THE COMPANY'S ADVANCES UPON GOODS.

Several of the principal Merchants attended at the Board of Customs, Hall and Opium, on Monday, by invitation, to receive a communication from Government on the subject of advances upon goods shipped through the Company during the ensuing twelve months. We understand they were informed by Mr. Parker, that the aggregate amount of such advances was to be limited to Fifty Lakhs, a sum considerably less than the amount given during the last twelve months; and that he said it was the wish of Government to know what plan of distribution would be most generally approved. A proposal was offered to confine the advances to Silk and Indigo, the two articles of most importance to the export trade to Europe; but this was very properly over-ruled by a liberal desire among the Merchants who were present at the interview, not to favor one branch of trade at the expence of another. Some conversation also occurred about the possibility of some parties obtaining an undue proportion of the amount intended to be advanced, in the event of the present active competition continuing, by the accidental circumstance of their goods coming first to market. An Agency House connected with Indigo Factories at a short distance from Calcutta will of course have an advantage in this respect over a House which should have Factories at a greater distance, and the advantage would rise in a proportion exceeding that of greater extent of the Indigo concerns under the control or in the agency of the former. But this advantage being both fluctuating and accidental, it has fairly been considered inexpedient to endeavor to remove it by barring the wholesome principle of giving the preference to priority, taking every application as it comes in until the credit opened shall be exhausted. If however, it should appear that applications for advances are made with so much eagerness as to threaten the exhaustion of the whole credit in six months instead of twelve, we apprehend the Merchants must expect to see the rate of exchange further advanced upon them.—while, per contra, it would naturally be produced if Government found difficulty in procuring Bills for their financial remittance to the amount required.—*Calcutta Courier, July 20th.*

## CORRESPONDENCE.

TO THE EDITOR OF THE CANTON PRESS

Sir,—The interference with the commercial business by the sudden change in the movements of the Company must have convinced all who were not convinced before, that it is not safe that they should be permitted still to carry on.

How would a well got up, strait forward petition home answer. Can we not muster for the interests of us all, and for get my trifling differences of opinion? I hope we can, and I think that all of those now *shut out* would be glad to join, while the one now may recollect that they might be *shut* another year.

I am,
Sir,
Your most obedient Servant,
ONE OF THE EXCLUDED.

October, 27th 1836.

## MORRISON EDUCATION SOCIETY.

A general meeting of the Subscribers to, and friends of the Morrison Education Society, having been convened by the Revd. Mr. Bridgman, was assembled at No. 2 American Hong, on Wednesday the 28th September. The meeting having been called to order by Mr. Dent, as chairman of the provisional committee, it was —

Proposed by Mr. Bell, seconded by Captain Grant, and carried unanimously, that Mr. Fox be requested to take the chair. Mr. Morrison was nominated Secretary to the meeting.

Minutes of the meetings of the provisional committee—appointed February 14th, 1838, and consisting of the following gentlemen, viz: L. Dent, esq., Chairman, W. Jardine, esq., D. W. C. Olyphant, esq., Revd. E. C. Bridgman, corresponding Secretary, and J. R. Morrison, esq.—were then read; as also draft of a constitution and regulations, made by the committee, and proposed for discussion at the present meeting.

An address which had been drawn up by Mr. Bridgman, expressive of the views entertained by the provisional committee in regard to the objects of the Society, was next read; after which the draft of a constitution and regulations was taken into consideration; and, with a few amendments and additions, was adopted, as follows:

### CONSTITUTION AND REGULATIONS OF THE MORRISON EDUCATION SOCIETY. CANTON, 1836.

#### NAME.

ART. 1. This Institution shall be designated the "Morrison Education Society."

#### OBJECT.

ART. 2. The Object of this Society shall be to improve and promote Education in China by schools and other means.

#### MEMBERS.

ART. 3. Any Individual donor of a Sum not smaller than $ 25 or annual Subscriber of not less than $ 10 may become a Member of the Society, and vote at its General Meetings; voting by proxy will be allowed to persons necessarily absent from the place of meeting, provided they produce a letter of authority for specific measures, written after the public notice of the meeting has been given.

#### FUNDS.

ART. 4. Funds may be raised by subscriptions, donations, and so forth, and shall be under the direction of the Trustees

#### TRUSTEES.

ART. 5 The Business of the Society shall be managed by a Board of Trustees, five in number, resident in China, who shall be chosen by ballot at a General meeting of the Society, to be holden annually on the last Wednesday of September.

#### OFFICERS.

ART. 6. The Trustees shall be (1) a President, (2) a Vice President, (3) a Treasurer, (4) a recording Secretary, and (5) a corresponding Secretary.

#### MEETINGS OF TRUSTEES.

ART. 7. For the transaction of business, the Trustees shall meet on the third Wednesday in January, April, July, and October, respectively, and oftener if necessary; three of their number shall constitute a quorum.

#### PRESIDENT.

ART. 8. It shall be the duty of the President to preside at the meetings of the Society, and of the Trustees, and to perform such other duties as are appropriate to his office.

#### VICE PRESIDENT.

ART. 9. It shall be the duty of the Vice President, when the President is absent, to act in his place; if both are absent, the Treasurer shall preside.

#### TREASURER.

ART. 10. It shall be the duty of the Treasurer to keep safely all the money of the Society, with a fair account of all that is received and expended;—to make out annually a statement of the receipts and payments, and of the condition of the funds, for the information of the Society, to be published in their Annual Report;—and to perform such other acts as are appropriate to his office. The accounts shall be audited by persons appointed for that purpose by the Society, at a General Meeting for the choice of officers.

#### CORRESPONDING SECRETARY.

ART. 11 It shall be the duty of the corresponding Secretary to act as the General Agent of the Society,—in carrying into effect such measures as the Trustees shall adopt and direct,—in conducting the Correspondence,—in selecting scholars, teachers, books, and so forth; and further, it shall be his duty to keep a full and accurate record of all his correspondence and proceedings, which shall be kept with the records of the Society; and to prepare an Annual Report, which after it has been submitted to the Trustees, and approved by them, he shall read at the General Meeting; and when approved by the Society, he shall superintend its publication.

#### RECORDING SECRETARY.

ART. 12. It shall be the duty of the Recording Secretary to keep full and accurate minutes of all meetings of the society and of the Trustees, and to act in concert with the Corresponding Secretary in selecting scholars, teachers, books, &c, and in preparing the Annual Report.

#### AMENDMENT.

ART. 13. At any General Meeting of the Society, these articles may be altered, new ones added, or such regulations, and bylaws adopted, as the Meeting may deem proper;—provided one month's notice of the proposed amendment or addition has been given, provided also, that it has received the unanimous sanction of the Trustees; failing which, it shall not pass until carried in a second General Meeting, convened at an interval of a month;—and further, provided always that for the proposed amendment or addition at least two thirds of the members resident at the place of Meeting give their vote.

### BYLAWS.

#### SECT. 1: SCHOLARS.

1. Chinese Youth of any age of either sex, and in or out of China, may be received under the Patronage of the Society; also Schools, conducted in a manner approved of by the Trustees.

2. Whenever practicable, young Children, 6, 8, or 10 years of age will be preferred.

3. With the advice of the Trustees, and the application of the parents and guardians of Children, they may be sent to the Straits of Malacca, to India, Europe, or America, for the purpose of completing their education

4. If necessary, Children may receive their whole support—board, clothing, books, tuition, &c. from the Society; but no rewards or premiums will ever be given, excepting money or articles expressly designated for that purpose by the donors, unless by a special vote of the Society.

#### SECTION 2: TEACHERS.

1. Tutors and Masters from Europe and America, or both, shall be employed permanently, so far as the means of the Society will allow.

2. Native Masters, of good character and acquirements, may also be employed.

#### SECTION 3: BOOKS.

1. The School Books for teaching the Children reading, writing, arithmetic, geography, and other Sciences, shall always be the best that can be obtained, both in the English and Chinese languages.

2. The Books belonging to the Society shall form a Public Library, and be styled the "Library of the Morrison Education Society."

3. This Library shall be under the immediate control of the Trustees, who shall take all suitable measures in their power to make it available to all the foreign residents, and visitors;—provided they do not expend for this purpose a sum greater than would be necessary to take care of the Library were it not open to the Public,—it being supposed that for the sake of having such a Library the foreign Residents will be ready to bear a part of the expenses.

4. Rules for the Regulations of the Library, sanctioned by the Trustees, shall be published, with a Catalogue of the Books, and a copy of the same be placed in the hands of all those who are admitted to the privileges of the Society and the Library.

Proposed by Mr. Dent, seconded by Mr. Lindsay, and carried unanimously, that the most cordial thanks of the meeting be presented to the Revd E. C. Bridgman, for the assiduity with which he has devoted his time and labor to forwarding the views of the Society.

Proposed by Mr. Jardine, seconded by Mr. Dent, and carried unanimously, that the meeting be adjourned to this day month, for the election of officers.

---

# CANTON PRESS,

1st October 1836.

## COMPANY'S ADVANCES.

On the 25th of last month the E. I. Company's Agents issued a Notice that their treasury was closed against the receipt of Cash for bills on Bengal, a proceeding so completely unexpected, that it cannot fail seriously to inconvenience the export-trade from here, since the dollars requisite for it had been expected to be drawn from the Company's treasury, in the same manner as during the two last seasons, when the treasury was open during nearly the whole of their duration. The East India Company had given official notice in England in May last, that the funds remitted from India during this year would amount to £ 3,200,000, a great part of which, it was naturally expected, would be sent by way of China, and every one here was confirmed in that belief when the Company's Agents, but a few weeks ago, offered their bills on Bengal on better terms than before, and likewise reduced the exchange on England from 4.8d to 4.7½d, thus sacrificing very near two per cent on their transactions, with a view, as every body thought, of making larger advances than at the previous season. But these anticipations have proved incorrect; by the *Thetis* from Bengal, the Company's Agents have received orders to discontinue to draw on that Government, in consequence, it is said, of the demand and consequent negotiation of E. I. Director's bills in England, having been much greater than expected, so large indeed are the sums, come to Bengal by the last arrivals, said to be, that the Government treasury, to meet them, was incapacitated from allowing any more funds to be appropriated for remittances by way of China.

The consequence has been, that many of our Tea-exporters, in the belief that Company's advances would be given during the whole of the season, omitted to apply to the Agents for registry of their wants, as is the custom, and they will now be without that assistance, which, being only partially dealt out, viz, to those that made application for certain sums, has become much more valuable than before.

Our readers will think us inconsistent in deprecating the cessation of a system, the continuance of which we have been so averse to; but we do not, nor ever shall, regret the total removal of the Company's Finance Committee, or the cessation of their advances; the injury inflicted on the trade here by the sudden contraction of their transactions, lies in the manner in which it is done, in the uncertainty of their operations, (we do not allude to the Agents here, whose acts are in obedience to orders) which seem to be directed by caprice, or what is even worse by a spirit of hostility to the China free trade, which, since the Company cannot expect ever to regain it, will, we hope, not any longer be countenanced by the British Government. It appears to us easily done, if remittances are to be made by way of China, to fix their amount at least for one season, and to know how much to draw by one way, and how much by another; this has been disregarded in Leadenhall Street, and whatever money offered, they seem to have taken, regardless of the inconvenience thereby occasioned.

The immediate consequences of the restriction of advances very likely will be a considerable fall of prices of tea and silk, and in fact of all exports to England, whilst imports from thence will improve; the exchange on Bengal and that on England will rise to as high as it has been perhaps at any previous season; all this, it will be said, is favorable to us, why complain? It would be favorable no doubt, had it been brought about in the regular course of business; had we had time to prepare for it; as it is, in the expectation of the continuance of the Company's advances, contracts and other transactions have been entered into at the old prices, and these the Chinese will expect us to fulfil, though at rates no longer current, nor could any sagacity of the merchant have avoided being entrapped into the snare, unable, of course, to surmise that the Company's money transactions would be so whimsically conducted. Sudden and unforeseen changes in the constitution of commerce, must always be prejudicial, and of all changes, sudden contractions of credit are the most dangerous, and it is thus that the Finance Committee's cessation of advances on goods, will chiefly affect us here, as, having trusted to them for payment of contracts, these have been entered into by many on a large scale, and the chief difficulty now will be where to get the money, since, not having had timely notice, no adequate means could have been taken by them, to obtain it against credit on Bengal; the returns for Opium, which hitherto went in shape of bills on the Bengal treasury, will in future be made for great part of them at least, and for as much as can be smuggled out of the country, in dollars or sycee silver, and these will in consequence become so scarce, that even the best bills on England will not be salable for money; how then is the tea exporter to raise the funds for purchases he has contracted for on an understanding that the Company's advances were to continue?

Had, instead of the Value now given by the Finance Committee, its purport been, that, at the end of this season, that Committee would remove from Canton altogether, we should have found no fault with it, nor we believe, could ever any thing be published, that would give such general satisfaction; the capricious manner in which their operations have now been restricted, is one reason more to render the Finance Committee obnoxious to every one engaged in the China trade, and we believe that, if a petition to the India board, praying for a cessation of the Company's financial operations here, were now offered for signature, there would not be a single merchant who would not gladly sign it.

---

After writing the above a correspondent has sent us the few lines signed "ONE OF THE EXCLUDED." He will see that we wish the same thing to be done, which he recommends, viz. to petition the board of Control, that the Company's Finance operations here, as endangering the safety of the individual merchant, may no longer be permitted.

## MORRISON EDUCATION SOCIETY.

We give in another part of our paper an account of the proceedings at a public meeting held on Wednesday last at the residence of the Revd. Mr. Bridgman, for the purpose of formally establishing a society called the "MORRISON EDUCATION SOCIETY," the establishment of which was determined on, we believe, about a year and a half ago, and several steps have in the interval been taken, to insure success to the Society, and to enable it, now without further delay, to begin it's benevolent labours. The community of Canton, though limited in number, has again in this instance, given a *proof* of it's openhanded charity, as the sums collected as donations, already amount to no less than $ 6500, a sum not adequate to the wants of the Society, but it's members flatter themselves, that the objects of the society being of great general interest, liberal contributors to it's funds will be found in all parts of the Globe, and that by such contributions a sufficiently large sum may be collected, to ensure to the society a more than ephemeral existence. The principal object of the MORRISON EDUCATION SOCIETY, is to improve, by spreading knowledge, the condition of the Chinese, but other objects of sufficient importance will be gained, as attending the principal one. By means of the Society a more intimate knowledge of the Chinese and their customs and language will be spread among the inhabitants of the western world, as many of them will be required to become intimately acquainted with them, to fit themselves as teachers of Chinese boys; the Chinese brought up under enlightened masters will lose the ridiculous pride which now inspires them with contempt for foreigners, (and in this pride only can they at present, we fear, be compared to the ancients of the western world) and will disseminate these feelings of friendship for other nations among their friends and relatives, thus paving the way for better intercourse with this hitherto almost inaccessible nation.

We hear from Chinese, that children intended to follow commercial pursuits are prepared for them now, by visiting a school during four or five years, but *all* they learn there, is exclusively *letters*, or in other words the art of writing or spelling their language. Nothing else is taught in them, and the fathers or relatives of the boys instruct them at home in casting up accounts. This in the sum of school education of the Chinese merchant of the present day.

We hope that every one wishes success to this Society as heartily as we do, and, as the *donation* of not less than $ 25, or annual *subscription* of $ 10, entitles every subscriber or donor to become a member, we expect to see the list of members soon to be a very long one.

Those wishing to subscribe, will find subscription lists at the offices of Messrs Dent & Co., Messrs FOX RAWSON & Co. and Messrs JARDINE MATHESON & Co., who will also receive the amount of the subscriptions.

---

By the *Endeavour* from Philadelphia, American papers to the 25th May, have been received, which however contain but little of general importance, except that, as far as we can make out, making due allowance for the partiality with which the American Press treats the Texans, the news of the capture of Santa Anna is any thing but confirmed, and we even presume that the Texans must have suffered some loss, as from the 16th to the 25th of May, an interval of twelve days, no news had reached Philadelphia from the seat of war. This we cannot help to attribute to the unwillingness of the worthy Texans to make public any of their disasters. To give an idea of the conflicting accounts sent up from Texas, and with which the Press is amusing the public, it may be sufficient to state that in one account by an eyewitness, it is stated, that the President Santa Anna, on trying to make his escape after the loss of the battle, was pursued by his enemies over a distance of fifteen miles, when his horse, sinking in a bog, could proceed no further; upon which the General took to his heels, and arriving at a forest, his pursuers had lost all trace of him, when by accident they found him in the top of a tree. Another account states that Santa Anna, was taken on trying to escape by a bridge, but that his rank was discovered by the high bribe he offered to some incorruptible Texan, to allow him to pass. We hope that arrivals from the States will soon deliver us from this uncertainty. It seemed to be thought that a war with Mexico might perhaps be the result of the States declaring Texas independent. The war with the Seminole Indians still continued, and other Indian tribes also exhibited a disposition to rebellion. The armament of the United States against these Indians, is, by the papers, represented to have been woefully misconducted. The number of Seminoles actually engaged in the war, is said not to exceed 800.

---

Accounts have reached Canton, of thirty two Indian Sailors being now in the City of Fuh-chow-fuh, the capital of the province of Fokien, and that they were about to be sent to Canton. It is probable that they may belong to one of the Bombay ships, the Hormajee Bomanjee or Hamoody, supposed to be lost in the last Typhoon.

## *SHIPPING INTELLIGENCE.*

ARRIVED.—Brit. *Thetis*, Clark, from Calcutta, August 3rd. *David Scott*, Reeves, from Calcutta. *Edmonstone*, Mc. Donnell, from Calcutta, 25th July. Amer. *Plymouth*, from New-york, May 28th. Brit. *Inglis*, Wise, from Bombay, August 13th. *Keilie Castle*, Patullo, from Calcutta, August 15th. *Samuel Winter*, Rodgers, from Liverpool, and Singapore, Septbr. 13th. *Carnatic*, Proodfoot, from Bombay, July 27th. Amer. *Henry Eubank*, Leach, from Manilla.

PASSENGERS.—₱ *David Scott*. Mr. Jas Fraser, Mr. W Macdonald, Mr. Gilmore. ₱ *Plymouth*, Mr H Rawle. ₱ *Orestes*, omitted in our last, Mr. Howe.

SAILED OR DESPATCHED.—Brit. *Pattay Satam*, Gillett, for Calcutta. *Seabrow*, Smith for Singapore. Amer. *Exchange*, Shaw, for Manila. Brit. *Hera*, Hughes, for Calcutta. *Marion*, Richard, for Singapore.

Omitted in our last, September 11th, *Splendid*, Rogers, for Manila.

---

There is a report that the *Heawody*, Capt. Marshall now so long missing, has reached Manila dismasted. We hope to hear these news confirmed by the next arrival

The *Selph*, from this to Singapore and Calcutta, was spoken 92 days out, off the Natunas, having lost a topmast in a gale.

The *Mermaid* and *Sir Herbert Taylor*, reached Singapore in safety. We are by papers from that place, to at no more news than we possess, we known there as to the missing ship's, but that some fears were felt for the *Adelaide*, as part of a wreck was seen by the *Sir Herbert Taylor*.

The *Admiral Boyden* reported some weeks ago in our paper, as having been brought into Cumsingmoon by Chinese, is to be corrected into her wreck having been towed by Chinese boats to about 20 or 30 miles to the northward of Macao, where it was set fire to and burnt. This may have given rise to some other reports lately afloat.

We hear that several British Ships, unable to obtain freight for England, are about to leave for Indian and other ports.

The hull of the French ship *Ville d'Oleron*, damaged in the Typhoong, has, we hear, been sold at Macao, to Chinese, we believe for breaking up, for ₰ 1010.

The *Castle Huntly* from Bombay for this, which passed Singapore on the 4th inst., has not yet arrived; it is supposed that she has been set away by the current to the westward.

---

### VESSELS EXPECTED.

FROM ENGLAND. *Helen Mar, Hadaway, Windsor, Charles Grant, Viscount Melbourne, Mandarin, Tigris, James Matheson, Lady Charlotte, Cordelia, Hellas, William Jardine, Ann Baldwin, Manilla, Mary Somerville, Fanny, Tinemara, Trusty, Anna Robertson, Jamaica, Clifton, Earl Grey, Africa Elvora.*

On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about @ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

But few transactions have taken place during the week, and we have no alterations in prices no notice of

COTTON MANUFACTURES.—and

COTTON YARN.—

WOOLLENS.—there has been some demand for Spanish stripes, which have in consequence advanced about 10 cents per yard.

BETELNUT.—new, in good demand at our quotation.

PEPPER.—has declined a little.

TIN.—with scanty supplies, does not materially improve in price.

LEAD.—is firmer than last week, without sensible advance in price.

COTTON.—Some further sales of both Bengal and Bombay have taken place, at a further decline of our previous quotations; really good Bandu would however command our highest quotation readily, as would also Surats, there being very little of first quality of Cotton in the market. The inferior sorts are very depressed, and for Madras there is no enquiry. No certain advices have yet reached us of the extent of the Nankeen crop, but it is generally reported to be more favorable, than for some years past.

OPIUM.—has been almost unsaleable for cash for some time past, from the great scarcity of money, and our quotations must therefore be considered merely nominal. When the pressure is over, it is expected that the market will again rally. The deliveries continue tolerably good, and were up to the end of Septbr.

| PATNA, old. new. | BENARES, old. new. | MALWA. | TOTAL. |
|---|---|---|---|
| 7 397 | 8 161 | 730 | 1293 chs. |

### EXPORTS.

RAW SILK.—The quantities lately brought down, have been very considerable, and though prices have as yet declined but little, it is generally expected that the holders will not realize their present still very high, demands.

TEA.—We have no alterations to notice, this week, in the prices of Tea: of the ordinary shipping qualities but few have yet been brought to market. The Chinese again complain of drought preventing them to bring the teas down on the canals; we have no means to ascertain the validity of this complaint.

# THE CANTON PRESS.

VOL. 2d. No. 5. CANTON, SATURDAY, OCTOBER, 8TH. 1836. No. 57.

## LITERARY.

### CHINESE REPOSITORY,
*For September, 1836.*

The first article which presents itself of the last number of this interesting publication, is a review of the first volume of a work published by Hugh Murray Esq., John Crawford Esq., Peter Gordon Esq., Captain Thomas Lynn; Professor William Wallace, and Gilbert Burnett Esq., a work to be completed in three volumes, of which hitherto only the first has been received in China. The book here reviewed is known to us, and we agree with the reviewer in the opinion he expresses. With a multitude of authors to compose one single work, and with a preface which would lead every body to believe, that this present work on China would really give some true account; that the researches would be beyond the beaten tract of the french Missionaries of the 17th and 18th centuries, we find nothing but a compilation from those well known sources, which, as it is now generally believed, and upon good evidence too, were any thing but untroubled by the spirit of partiality, which in many instances led to an exaggeration, regarded through which the Chinese Empire assumed an imposing grandeur, which we believe even under the happy reigns of Kang-he and Kien-lung, took it's origin more from the pens of the well-treated and flattered Catholic Missionaries then at the imperial court, than from reality; in this however we were mistaken; the book is only a compilation from different earlier works; no new information is afforded us, and much of it's contents, as pointed out by the reviewer, are altogether erroneous. The first volume of this work makes us apprehend we that the two others will be of the same stamp, in spite of the puffing preface, and the long array of names of authors. The review ably discusses some points misstated in Mr. Murray's work, and it's writer regrets that a good and true history of China is still wanting. An attempt at one was made a few years ago by a gentleman well versed in Chinese affairs, but his book proves that abundant materials alone are not sufficient to constitute an historian. We hope soon to see the promised book of Mr. Davis, which, it is probable, will, from the knowledge of that gentleman of this country be the most correct Chinese history yet given to the public.

ART. II. *Notices of modern China. &c. &c.*

This article speculates on the probable results of British commerce and enterprise in the east, and on their effects on the Chinese empire. It shews that the British possessions, are already very near the southern provinces of China, and that the Indian Government exercises controul over other districts, such as Nepaul, which, nominally tributary to China, has, in fact, allowed British influence to govern them. The Court at Peking must, of course, be aware of the progress British rule is making, nor can the Chinese Government be ignorant of the acquisition by the British, of the territory of Assam.

Whilst the English are thus by land approaching China's southern provinces, it is not more than probable that the Rusian Government, ever anxious to extend it's sway, will not be very scrupulous, when convenient, how to preserve the integrity of the northern frontiers. Thus, the writer of the article before us says, the Chinese in spite of their artificial seclusion, will be forced into close contact with two great nations, from one side of the empire, whilst commerce is making rapid progress in the south. We believe that this commerce is the safest and the most just means of placing our intercourse with the Chinese on a better and more respectable footing, nor do we deem the time far distant when this will be accomplished, many of the former regulations against foreigners, though the free-trade is not yet three years old, being already disregarded or circumvented, and we are glad to see that this same view is espoused by the writer of this article. We believe that the hostile feeling against the Chinese, and the belief that nothing but invasion by arms of the Chinese Empire, chiefly created by the first steps taken by the British Government, and the consequent ill treatment of Lord Napier, is now fast subsiding, and that it is generally thought that commerce is the best and safest agency to force the Chinese to abandon their present secluded position. We hope that foreign nations, and particularly Great Britain will look upon their intercourse with China in this manner, and that, if any diplomatic steps are to be taken, in order to more speedily improve our intercourse with them it will for the present be limited to an Embassy, similar to those of Lords Macartney and Amherst, though more ably conducted.

ART. III. *Description of Manipur etc.*

This is a description of the valley of Manipur for which the materials are taken from an official report by Capt. Pemberton, late joint commissioner in Manipur, to the Bengal Government. "The valley of Manipur," we are informed, "is a fertile mountain valley about sixty miles in length, lying between 24°. and 25°. north latitude, at an elevation of 3000 feet above the sea. The population does not exceed 30,000 or 40,000, but being a united and spirited people they exercise rule over all the hill tribes, from Aracan to Assam on one side, and from Kachar to Burmah on the other.

This valley, represented as equally favored by climate and soil, and the inhabitants of which are the most healthy and robust of India, fell in the year 1819 under the sway of the Burmese, but in 1824 the English, after their successful warfare against that nation, reinstated a member of the Manipur royal family into the government of that country, and have ever since exercised a great political influence there. It is one of those countries, which, from it's proximity to China, has peculiar interest for us, and at the present moment, when the hereditary chief is a minor, whose education is committed to the controul of Captain Gamlin, the country may be said to be immediately governed by the English.

We are informed that the religion of Bramah was not the national religion of Manipur till the year 1700, though it's votaries had previously resided there, nor is the Hindostanee language spoken there; both these circumstances, the writer of the article before us, considers as favoring the introduction of the Christian religion and English language. Our limits do not allow us to extract from this interesting notice.

ART. IV. *Relations between the United States of America and China; Canada at Canton; trial of Terranova etc.*

This article contains a narrative of the voyage of the *Empress* to China in 1784, being the first ship that visited China under the North American flag, and of the progress since of the commercial relations with China. It also gives an account of the unfortunate affair of the sailor Terranova, who in 1821, in consequence of suspicion attaching to him of having caused the death of a woman, was demanded by the Chinese authorities, and after some hesitation delivered over to them, and afterwards, in spite of the promises of the Chinese to give him a fair trial, executed by the Chinese without being heard.

ART. V. *Voyage to Borneo: arrival at Banjermassing; notices of the Chinese and Malays at that place: piratical chiefs etc.*

Messrs. Barenstein and Monton visited this Island with a view to spread the knowledge of the bible. We make a short extract, to give our readers an idea of the manner in which religious books are distributed, premising at the same time that it appears from this account that best women in Borneo can read, a degree of civilisation not attained to by women in any Malay countries, except by the very first of their sex.

"On the 5th July, Mr. Monton went to the Malay campong that was under the authority of the sultan, where he found the people still more willing to hear; and able to read and understand the books; but the travelling was difficult, and he was obliged to go from one house to another in boats; the market was held on the water in boats, and the market people were on the water in boats, and the market people were not men but women. On seeing this, he thought it unnecessary to distribute books there, and was about to move off to the middle of the river, when a man came after him in a small boat, asking for a book; Mr. M. gave him one, and desired him to read it, and, as he was reading a woman came to hear, who also asked for a book, and immediately read it aloud. Upon this, the whole mass of women came in small boats, asking, for books, and pressed so close upon the distributer that he was afraid of sinking while praho was pressing over praho. He therefore told his boatman to row hard, in order to get away, but the women seized his praho and would not let him escape, untill he had satisfied their demand for books. After this, he pulled alongside a large praho, and getting on board, he divided the books among the assembled crowd, till they were all gone.

ART. VI. *Religious intelligence etc. etc.*

This is a short sketch of the labour of the Missionaries and their success in these eastern parts. In Siam a printing-press is actively engaged to print tracts for the natives, and Doctor Bradley has established an hospital for the numerous sick at Bancock, for which he has at last succeeded to obtain from the prahklang a convenient place to build on. We extract the following from Dr. Bradley's report."

"For many months I have had, on an average, above 100 patients daily, and often 150 and 170, at midday. They consist of Siamese, Chinese, Burmese, Kambojans, Laos, Malays, and Portuguese. I spend about three hours daily in treating them, beside the time spent in preparing medicines, and visiting the sick in the families of the king, princes, and nobles, —which is not a little.

"In the hospital, males and females are separate, and treated on different sides of the *Sanpanny* but at the same time. A Chinese assistant administers to the males, and a native female to those of her own sex. Mrs. B. sits between the two departments, and directs the assistants in fulfilling my prescriptions. She has considerable time for conversation with the females on religious subjects. My patients carry their papers to the assistants, and they to Mrs. B. to interpret. When I have finished prescribing, I perform a variety of surgical operations, frequently such as are of considerable consequence, as depression of cataract, excision of pterygium, cutting off immense staphylomas, opening jaws that have been perfectly fastened together for years by adhesion of the sides of the cheeks, opening nostrils closed by the small pox, removal of tumors, amputation of limbs, extraction of polypi, &c., &c.

The, 7th article gives an account of the progress the schools at Singapore are making, in teaching the natives, from which we learn that they are at present visited by 72 boys, descendants of English, Portuguese, Armenians, Malays and Chulliahs. The Chinese have their own schools.

ART. VIII. *Journal of occurrences etc.*

This last article of the present number, contains a quantity of local intelligence, greater than usual, and we give from it the following extract."

"*The Bogue.* The governor of the "two broad provinces" has applied for a grant of money to be placed at interest, the annual sum accruing from it to be appropriated for the extraordinary expenses of the fortifications of the Bogue and river of Canton. The estimate of what will be annually required, for the purpose of exercising the military in working the guns for reviews, and for presents to those who perform the exercise well, is 6700 taels. To produce this annual sum, a grant has been made of 50,000 taels (the amount of the property of two extensive opium dealers, confiscated to government about two years ago.) to be placed at interest, at ten per cent. The remainder is to be paid from a branch of the naval department in which some reductions have lately been made. Accounts of the actual expenses are directed to be returned annually. The governor has just left the city for the purpose of inspecting these and the other fortifications at the entrance of the various branches of this river, and to review the troops."

"*Extract from the Canton Court Circular.* The execution of capital punishment, from the 26th ultimo to the 2nd instant, is reported to have taken place only on two occasions. The number of thieves, robbers, and other disturbers of the public peace, who have been caught and handed over to the proper authorities for trial, in the mean time, has been unusually large. Reports of them, and of official visits, fill up the Circulars before us; other occurrences, in which the people are concerned, find no place in this courtly paper; one or two of which, however, may be here noticed. Early in the month, a person reported to one of the officers of the police, that in a certain shop near the foreign factories, boxes were made for contraband goods: deputies were accordingly sent to seize the offenders; he mistake they entered the wrong shop, and rudely commenced making search: at this the people of the shop and their neighbors were incensed, and soon had the deputies bound. It was not long before the chairmen and the shelter arrived, and the deputies were released. The next day the same queue before the chief authorities, and the master of the shop and his principal supporters in the affray, who had been taken into custody, were released on the plea that they believed the deputies were unauthorised persons in disguise,—a thing which frequently happens. Another more recent affray has occurred, in which the parties, members of two different clans, took the field with swords, spears, and arrows; some lives were lost; but the particulars we have not yet ascertained."

*(From the Indo Chinese Gleaner.)*

### REPORT OF A ROYAL OFFICE TO THE EMPEROR.

We publish the following document, solely because it illustrates the degree of servile flattery, which is almost indispensably necessary to addressing the Sovereign of this dynasty, and in many respects, great people. [Editor, September 5, 1837.

"The slave Hoo-tung-nien, Admiral of Tsun-tsin, in the province of Chih-le, with profound veneration reports to his Majesty, respecting the two vessels which have in succession arrived from Kwang-tung, their having been examined and received with their guns and other arms having been stored, dried, and so on. With great respect, the following statement is made. In his Majesty's hearing, and it is with satisfaction that I can state that the second one.....will happen the business.

"Your slave received the Imperial commands, directing him to take charge of the ships of war. He took his departure from the province of Pih-kung, and proceeded to the coast of the boundary of Kiang-nan and Chih-kiang, arriving at Ta-Kang-tsun, to take on board guns, &c. It appeared that the vessels were in readiness, so we sung passage, and then it was difficult for large vessels to proceed, (those with steamships;) for, if the large vessels had all followed each other in, it might have delayed the time, and, as you apprehended, we should have lost the fair wind. At one every where we looked up to, and trusted in, your Imperial Majesty, who rules over all. Your great and blissful auspices, illumined and dominated upon us, so that we enjoyed perfect tranquility and repose. The two vessels proceeded with expedition, and the people suffered no anxiety or distress. But in case as, that I order'd the officers of the two Kwang-tsun boats, only, to go with all expedition into the port of Woo-sung, to take on board guns and naval stores, whilst I took charge of the four boats from Puh-hien and Che-kiang, with which I put to sea, and proceeded direct to Tsun-tsin, in the hope of speedily obtaining a sight of the face of Heaven, * and requesting instructions how to manage affairs. The guns, &c. of the four vessels, have already been examined by the Imperial Legates, Sun-ling-gih and Ho-she-tar, with the Tsi-tuh, Soo-kwan; the circumstances of which trial and examination of the guns was reported to Court, and is on record.

"When, I your slave took leave and left Peking, and proceeded to my station, I immediately ordered officers and men to go to the entrance of the river, to meet and receive the two vessels from Kwang-tsun. They arrived, the one on the 20th of the 6th moon, and the other, on the 2d of the 7th moon, entered the port and anchored. Your slave examined the crews and arms by the last card, and found no deficiency. There were, guns and small iron guns, thirty-nine. On making and examining the bore, and the touch-hole, all were found in good order, and in a sound state.

"Your slave sent led the officers of Che-kiang province, who took the guns which were on board, and placed them in proper order and a safe position, and having first proved them with powder sent added iron shot, and fired them. They all carry to a long distance, and give a good report.

"Including the four which before arrived, there are six vessels: to each of them, a Tsun-tsang, Pe-tsing, and Wae-wei, (three officers) have been appointed to take the special command. Also to divide equally amongst all the vessels, the 64 men of our's men, from Fuh-kien, making a proportion of new-raised soldiers. Orders were given to the commanding officers to exercise the men, to instruct the newly raised troops, in the art of managing the vessel. Your slave continued also to go in person to instruct them fully, in the hope that the new levies would learn, and gradually acquire a thorough knowledge of their duty, and devote themselves to the greatest intentions of your Majesty. As to the go season, who came with the two vessels from Kwang-tsun, they have obtained leave to return either by land, or by merchant vessels going back, just as suits their convenience. Your slave has not yet received his seal of office, and therefore, he has borrowed the seal commissioner's seal to authenticate this, in which after making his presentation, he despatches it, &c."

Imperial reply with the vermilion pencil.

"I know it. respect this."

* The Emperor.

### ANECDOTE OF CONFUCIUS.

In a Chinese work entitled "A collection of writings upon various subjects" we find the following anecdote of the celebrated Chinese philosopher, Confucius.

Confucius' family name was Mow and his Surname was "Chung-K. The western part of the Lon Country was the scene of his laborious researches after Knowledge. He was frequently in the habit, as a relaxation from his intense studies, of taking the air in his Chair—attended by a few disciples. One day, while abroad on an excursion of this sort, he met on the road several lads playing, but among them he observed one, who alone was standing idle. Confucius ordered his chair to be stopped, and enquired of the boy why he did not play as his Companions did. The boy replied "There is nothing to be gained in playing; in the first place, if my clothes should get torn, it will be troublesome to mend them, and in the next place, I should bring disgrace upon my father and my mother, who also will be angry with me when I return home; what advantage then is there in playing?" The Boy then stooped down, and arranged some stones and fragments of tile in the form of the walls of a City. Confucius proceeded, and asked the boy why he did not move out of the way of the chair. The boy said: From ancient times to the present day, carriages have always turned out of the way of cities; how can a city get out of the way of a chair? Confucius again enquired, and asked the boy, how he young as he was, could answer in such a perverse manner. The boy replied "When a child studies his third year he is able to distinguish between his father and his mother, when a rabbit becomes three days old, it is able to run about into the holes and caves of the earth; when a fish becomes three days old, it is able to swim in the lakes and rivers; how then is this extraordinary language? Confucius was struck with the answers of the lad and was desirous of continuing the conversation. He again asked, in what district do you live, and in what town? What is your family name, what your surname, & what is your marriage name? The boy replied: I live in a mean district, the land of which is very sour, my family-name is Hang, and my surname Fuh. I have no marriage name. The sage then asked: How would you like to accompany me? I wish it, the boy said. "I have a father whom I ought to serve. I have a kind mother, and I should try to comfort her. I have an amiable elder brother, whom it is my duty to obey, and I have a younger brother, whom I should instruct; I have also an accomplished teacher, to whose admonitions I owe respect, to whose instructions, I owe regard; what then, then have I to travel with you? Confucius said: In my chair I have a chess-board, and thirty two chess men, will you play a game with me? The little boy replied: The son of Heaven, is fond of gambling, and neglects the affairs of state; the officers of Government are fond of gambling, and impede the course of the nation; scholars are fond of gambling and lose the little they may possess; slaves are fond of gambling, and provoke the anger of their masters; husbandmen are fond of gambling and miss the proper season for ploughing their grounds and planting grain; therefore, with so many evil consequences before my eyes, I cannot play. Confucius again said to him: I have a desire to *Ping* § the Empire and wish you to assist me. The boy answered: It is not possible to *Ping* the Empire. In it there are high hills and lofty mountains, wide rivers and broad lakes, kings and ministers servants and slaves. If you level the hills, the birds and beasts, which inhabit them, will have no places to go to; if you make the rivers and lakes even with the ground, the fish will have no places to swim in. If you put kings and ministers upon an equality with their inferiors, the people will become unruly; if you live in common with servants and slaves, how will the nobility do? Thus you see the Empire is uneven, large, and unsettled, it cannot be *ping'd*. Confucius again inquired: can you tell me what fire, under heaven, emits no smoke, what water contains no fish, what hill has no stone, what tree has no branches, what men have no wives, and what women have no husbands, what cow has no calf, what horse has no colt, what male has no female, what female has no male what is a superior man, what is a worthless man, of what are there not enough, of what are they too many, what city is without a market place, and who has no marriage name? The boy replied: The fire of the fire fly emits no smoke, well-water contains no fish, a hill of earth has no stones, a rotten tree no branches, gentlemen have no wives, gentlewomen no husbands, earthen cows have no calves, wooden horses no colts, a widower has no female, a widow no male, a *Horat* is a superior man, and a Yu § is a worthless man, of cold days there are not enough, and of hot ones there are too many, the Imperial city § has no market place, and little boys have no marriage names. Confucius again asked—"Do you understand the Kang-ke or mode of reckoning, which is the left and which is the right, which is the father and which the mother, which the husband and which the wife, whence does the wind come, whence does the rain descend, and whence come the clouds, and whence does vapor arise, and to how many thousands of thousands of tens of thousands miles does the Earth extend?

The boy answered; nine times nine are eighty one, this is Kang-ke, or the mode of reckoning. Heaven is the father, and Earth the mother, the sun is the husband, and the moon the wife, the east is the left, and the west the right, wind comes from Heaven, rain from the deserts, clouds are generated on the tops of hills, vapors arise from the damp Earth. Heaven and Earth extend to thousand of thousands of tens of thousands of miles. From the South to the North, and from the East to the West—Alas! how mysterious and beyond our dull conceptions!—Confucius rejoined: do you say father and mother are relatives, and the husband and wife not? The boy replied; father and mother are relatives, but husband and wife are not related. "Confucius said—husband and wife, when they cease to exist, are laid in one grave, should they not be considered relatives in life? To this the boy answered; when a man is first born, he has no wife and resembles a cart without a wheel, but to render it serviceable, one must be found for it; when a wife dies the husband is at liberty to take another, but in his so doing he should marry one as near on an equality with himself as possible, for it is not to be supposed that the light which one door yields can ever be equalled by that of three windows; all the stars in the firmament do not equal the brilliancy of the solitary moon. How can the kindness of parents be forgotten? Confucius sighed and exclaimed "amiable, amiable youth!

The little boy said to the philosopher; since you alighted from your chair, you have asked me many questions, all of which I have answered, now; there are a few things on which I am desirous of being enlightened, and I beg, before you continue your ride, to be allowed to put some questions to you. He then asked; how are geese and ducks able to swim in the water, how are wild geese able to produce their loud cry, why are oak and fir trees always green? To this Confucius answered: geese and ducks are able to swim, because they are webfooted wild geese utter their loud noise from the length of their necks, the oak and fir are constantly green, because they have strong hearts.

The little boy said: It is not so, fish are able to swim, but there are not webfooted; toads and frogs utter a loud croak, but they have not long necks; the bamboo is always strong, but it has no heart.

The boy again asked the sage: how many stars are there scattered about in the heavens? Confucius answered: all our questions have been relative to the earth, who must we commence about celestial matters? The boy then said; scattered over the surface of the earth, how many hours are there? All that we have conversed about, confined the philosopher has been relative to things present to our sight; why should we speak of Heaven and earth? "As we have then conversed only upon objects present to us I ask how many hairs there are in my eyebrows? Confucius laughed and made him no reply but looking round at his disciples said, "Youth should be respected for, what they may become, as the advance in years is beyond the power of all, save heaven, to foresee. He then entered his chair and rode on.

P.

---

We find in a "*Dictionary of Geography*" by *Josiah Condor*, a book by many referred to as a good authority, the following on China. "*Canton d'maritime* city of China"—"the name of the city is properly *Quan-chou* or *Kwang-chou*"—"it is situated on the northern bank of the *Hoan-ching*, which falls into the *Gulf of Canton*. The *harbour* is very commodious, but all foreign ships anchor several miles below the town. Canton consists of *three distinct towns*, divided by high walls, and contains a population estimated at about 150,000 souls." We never heard of the Gulph of Canton, nor of the city's or the river's name being what it is here said to be; nor do we know any thing of the above distinct towns of which Canton consists; and as to the population of 150,000 souls we are not good enough metaphysicians to speak with any degree of certainty of their existence, but we believe Canton and it's suburbs to contain at least four times that number of *bodies*.

MACAO, in the same publication, is represented to be "an island of China, in the *bay* of Canton, separated from the contin nt by a narrow channel."

---

## CANTON PRESS,

8th October 1836.

---

The arrivals during the we k have been numerous, but no advices from Europe have reached of a later date than those per mail overland by way of Bombay, of 1st of June. The *Cowasjee Family* brings dates from Calcutta to the 4th September, and from Singapore to the 9th. We have seen five of the Englishmen and Hurkaru, but limit ourselves to the extracts giving an account of the losses of the large ship *Windsor* of Nantucket, and of the Steamer *Tigris* of the Euphrates expedition. The loss of life by the latter, and of property by the former misfortune has been very great. The Singapore *Free Press* of 18th and 22d, and Cronicle of 17th have been received. In consequences of advices from here, prices of Opium had risen considerable, Bengal being quoted at $ 710 @ 7 3 per Chests; of Patna none in the market.

After our article on the *Tea Trade* was ready for the Press, we were informed yesterday at 3 o'clock in the afternoon THAT THE COMPANY'S TREASURY IS AGAIN OPEN FOR THE RECEIPT OF CASH FOR BILLS ON BENGAL AT 210 C. R., in consequence, we presume of the Agents here, having received orders to that effect from the Bengal Government. However favorable this new order of things may be to those excluded before the whimsical manner in which the Company's operations are conducted, cannot but impress upon the minds of every one versed in commercial affairs the extreme danger to which his very existence is exposed by this injudicious and vacillating conduct. We would recommend every one who did not before apply in time for advances, to make haste to secure one now, as the *Red Rover* is just as likely as not, to bring out fresh orders to close the treasury.

We are sorry that the Hong-merchants have not had time to reduce the demands of the Tea-merchants who now, after receipt of this news, will probably force their exorbitant prices upon us.

---

### BAIO FAIRY.

We have been favored with the following details by Captain Hadley, who has just returned from the East Coast in the Aurelia. They may serve to throw some light on the fate of the *Fairy*, about which so many reports have lately been afloat.

On the 22d of last month, the *Aurelia* touched at Dunsborg Bay, and spoke three China boats, from which Capt. Hadley learnt that five lascars had landed from in a broken boat from a vessel wrecked between that and Amoy, and that they were begging their way to the southward. It was supposed they had gone to Tong-Shan. A man from Amoy told Captain Hadley that he had been informed by the people of a Junk, that a vessel ran on a rock off Hoo-tou-shan and was broken into three pieces. The Junk passed the spot on the next day and saw fishing boats all round the place. Captain Hadley gave this information to Captain Rees of the *Colonel Young*, who forthwith proceeded to Dunsborg Bay to obtain more circumstantial information, and Captain H. touching there on his return was informed by Captain Rees, that a Manderin had told him that there were at that time 19 men all Lascars, in Shapoo, a town about a day's journey from Tongshon in consequence of which one of Captain Rees' men had been dispatched, with a written to see them, but before their return, Captain Hadley was obliged to set sail.

It is but too likely that the ship wrecked is the *Fairy*, but since part of the sailors have been able to save themselves, it may be inferred that the Officers and other Europeans on board have done the same, and perhaps remained near the wreck, to see what might be saved. We wait with anxiety for further particulars.

---

Capt. Rees of the *Colonel Young* has since arrived, and, as far as we have learnt, his information is to the following effect, viz: that a mutiny occurred on board of the *Fairy* in which Capt. Mackay and another European officer lost their lives. The men came on shore were mostly badly wounded, having taken the part of the Captain. They are said to be 19 Lascars and one European or white man. The *Fairy* it appears was not wrecked, but that the mutineers (Manila and Macao Sea cunnies,) set sail after they had killed Capt. Mackay and his officer, and succeeded in expelling those friendly to him, from on board the ship. Much remains to be explained of this most murderous affair, and any doubts on the subject will probably be cleared up on the men, who are said to be now at Fuh-chow-foo reaching Canton.

---

*Chinese Artillery.* On the late visit of the Governor of Canton to the forts at the Bogue, when exercising some of the great guns at the fort *Wan-tung*, one cannon burst and killed sixteen men. The Chinese Artillery appears to be more formidable to it's friends than to it's enemies.

The new Hongs yesterday visited the British Factory in state, most of the Hong-merchants being in attendance. We understand that his Excellency inspected the furniture, plate etc. etc. belonging to the former Company's establishment, and which, in a few days, is, we understand, to be sold by public auction. We do not know whether the Hoppo has expressed his admiration of any of the articles, but if he has, the Hong-merchants will no doubt respectfully make him a present of them. After partaking of a collation set out in the Company's hall, and viewing with much curiosity the objects on the table, as well as recording with great attention the picture of the late King George IV., his Excellency withdrew. It gave with pleasure that we observed the absence of Europeans to do the honors of the table, though a good many had been attracted by curiosity to see this dignitary.

---

### THE TEA TRADE.

We adverted some time ago to the machinations of the London tea-brokers, tending towards establishing a monopoly, by preventing others not of THE TRADE, from competing with them, and by taking upon themselves to publish lists giving marks and numbers of the packages offered for public sale, with their characters and value, such as it suits the broker or agent to represent them. Such proceedings cannot but be prejudicial to the interests of the importer, and we have to see this subject taken up by the India and China Association, and the brokers for the future prevented from exerting a dangerous influence on the prices of the tea, such as they have hitherto usurped. Many of these brokers being not only agents to sell or buy for other parties but merchants and speculators themselves it is of course their interest to depress prices as much as possible, and, to effect this these, lists are circulated, giving the prices at which Teas brought at auction before, have been withdrawn; and another invariably lower value affixed to them, purporting to be their real value, though a higher price has been offered before. This we suppose is done with a view to punish such importers as would not sell at the prices offered by the "Trade," and as these documents are sent to all retail dealers of teas, their characters and value as given are well known at the next sale, for any unprejudiced dealer to offer for them. We almost think that an owner of teas whose property has thus gratuitously been depreciated, may make good an action for damages against a broker. We see no reason why tea should not be disposed of like all other articles, nor why it should be sold at periodical Auctions, where the quantity necessarily brought forward at once, is generally so great as to depress the market. We hear that several importers in London have begun the experiment of counteracting the undue influence the tea brokers are exercising, and have now and then succeeded in disposing of teas by private contract. We hope that this example may be followed and that the China free trade may soon be delivered from at least one of it's shackles, there remaining quite enough others to harrass it, and to render it one of great risk to the speculator.

We only last week adverted to the sudden closure of the E. I. Company's treasury here, against the receipt for cash for Bills on Bengal, and to the fatal influence the unforseen and unexpected changes in the apportioning of the Bengal remittances to England occasioned on the trade, and how such changes were likely to affect the market in altering the relative value of goods, causing to loss and inconvenience the merchant, who could not have foreseen nor expected such an event to take place. We again bring this subject to the notice of our readers in the hope, that as this paper is likely to arrive in England at the same time or earlier than our former ones, from several ships being about to sail direct for England, some measures may there be devised to make the Finance Committee leave China alone, and that the next shipping season may be freed from the pernicious influence it now exercises on all the branches of our trade. We have not heard of the British residents here, have not taken any steps to make a representation to the India Board of control respecting the recall of the Company's ships from China already by them all, and there is no one we believe who does not feel the Company's pertinacious interfering with him to his disadvantage, we have seen to see one get up; it is highly desirable and may not be without success at home, expressing to the Government the unanimous wishes and opinions of all it's subjects residing here, however otherwise their interests may be separate or opposed to each other.

Being on the subject of the Tea trade, we may mention that the merchants of Black Tea have agreed in and even raise the prices of that commodity to about 5 per cent beyond last Season's prices. The Hong merchants on the contrary, who have contracts to fulfil, oppose this scheme of the Tea merchants and it was said that the former were now while in Canton to devise means to thwart the projects of the latter. We believe however that a meeting has yet taken place, and it remains to be seen which of the two parties will be able to hold out longest as to the most persevering the victory must in the end belong. It is likewise said that the Tea merchants intend to insist that the mode of payment for their Tea shall be much more favorable to them, than it has hitherto been, and that if they persevere in their intentions, the Hong merchants will not easily be able to comply with their demands. Many such discussions among the Chinese merchants cannot fail to shake the Hongs, and we hope that they may ultimately lead to their abolition, and to the trade being placed on a footing more favorable to the stranger.

The present number of the Co-hong is thirteen, two new Hongs having been established within this year. The Hoppo, we hear, has given permission for the opening of several other new Hongs, the Governor has however refused his consent, saying that the usual number of thirteen being now filled up, there is no necessity for any more.

---

### LOSS OF THE SHIP WINDSOR.

*Scott's Gazette* gives the following additional particulars respecting the loss of the unfortunate *Windsor*:

"The *Windsor* it appears, was lost in mid channel at the lower part of the Gutzee Sand: the bearings were N by W ½ West, Floating Light Vessel N. by E; lower middle ground buoy S. E. When the vessel first took the ground, the lower buoy of the Gutzee bore west, but she went on a little distance, and at 1.30 p. m. struck fast, when the bearings were taken as above. She then began to settle, and by 6 p. m. the upperdeck was under water. All the persons on board were saved, by the boats vessel on her bilge: but not a shred of property. The loss of the ship being above water, renders the wreck sufficiently conspicuous at present; but as soon as the fine are overwhelmed, we suppose that it will be requisite to place a buoy on the spot."

There was one person drowned, as we reported yesterday, but only one, which in a very remarkable circumstance and most creditable to the captain and his officers and also to the steadiness of the crew, considering how quickly the ship bilged, and that there were about 190 people on board. The individual lost was a European female servant; she was supported for some time in the water by a sailor, who was almost drowned in the endeavour to save her, and was carried a great distance by the tide before he was picked up. All the passengers, officers, and crew of the *Windsor* arrived at Calcutta in the *Sovereign* Pilot Vessel at 3 o'clock this morning. *Calcutta Courier, Sept. 1.*

---

The Bankshall report of yesterday announced the arrival of a vessel from the Persian Gulph, with intelligence of a very distressing character. One of Colonel Chesney's steam vessels, the *Tigris*, has, it seems, been lost in a storm, when nineteen persons on board perished! This is a very severe calamity, and will we fear materially retard the permanent establishment of the communications upon which we have recently been dwelling. We have not heard all the particulars as yet, but as Capt. Macdonald, of the British Mission, has brought up dispatches from Persia, we suppose, they will transpire in a day or two.—*Bombay Courier, 24th Sept. 1836.*

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—The Grey maintain their price with good demand, but the white are dull.

COTTON YARN.—The lower numbers of 18 @ 28 are enquired for, and if of good quality will fetch $ 40 @ 42. The higher numbers will hardly fetch the same price; we hear that a few hundred Picul have been lately purchased for re-exportation to Bombay.

WOOLLENS.—We, last week, noticed an advance in Spanish Stripes, which was caused by a demand for the interior; any improvement has, however, been checked by one or two forced sales by the Chinese of heavy parcels within them last few days as low as $ 1.20 @ 1.22.

LONG ELLS.—have also receded; a sale has been reported to us at about 8½ of previous purchases at $ 9 @ 94, but we do not, in the present unsteady state of the market, alter our quotations.

CAMBLETS.—from several recent arrivals, cannot be quoted higher than $ 28 @ 30.

RICE,—though we do not alter quotations, is in rather better demand, owing to the very dry weather, which however some people think, from appearances, will not last much longer.

LEAD,—the great scarcity of money has, we hear, induced some holders to sell to speculators at about $ ½ less than our quotation.

COTTON.—The present stock, including the late arrivals, is estimated at: Bombay 70,000, Bengal 23,000 and Madras 5,000 Bales; the deliveries in September were: Bombay, 17,000, Bengal 2,000, Madras, 1,000 Bales, but the market is without action, and the only sale lately reported is of about 1700 Bales Madras at 11 Taels, nor does there appear much prospect of improvement, as the report of the Chinese crop is generally favorable.

OPIUM.—Although the deliveries during the last month were good, the market continues very languid, and sales have been made, within these few days, of the Bengal drug, Patna 745 and Benares 670, and we believe these rates are very current amongst the Chinese holders, who seem to apprehend a decline from the heavy import of the *Conwaye Family*, to be so soon followed by the *Red Rover*, *Syed Khan*, and *Family Jane*. Malwa also is without much demand, but the holders, generally, appear firm. Turkey is very dull at our quotation. For deliveries in the last month see above.

### EXPORTS.

RAW SILK.—We do not alter our quotations, not having heard of any actual transactions; but parties are unwilling to buy at these rates, and from what we understand, the cost to many of the holders is $ 320 for Tsatlee.

TEA.—The price of *Pekoe* may be quoted $ 60 @ 90. Some chops of lower quality were offering in the market last week. Our highest quotation, however, is merely nominal, only one chop, now sold, having offered of sufficiently good quality to be worth that price. *Caper* has advanced to our quotations. The Hong merchants were in Consoo yesterday about the prices to be offered to the Tea men for *Congous*; it is understood that they are to meet again and agree upon the value of certain musters, which are then to be submitted to some of the foreign houses for their opinion. The price at which *Congous* will be settled, must depend on foreigners keeping out of the market; if they create an *immediate* demand, the Tea men are not likely to give way, which they must do, if that is not the case. Two boats of green teas (Hyson etc.) are reported to have arrived the day before yesterday.

### HONOURABLE E. I. COMPANY'S FINANCE COMMITTEE.

A sketch of the operations of this establishment will, we think, not be misplaced here, to give an idea of it's wavering, vacillating conduct. (the Gentlemen here employed, act of course, according to orders, and our remarks do not apply to them) and to make manifest to our readers, how much the sudden alteration in exchange, the withdrawal from, or the throwing into the market, the large funds under the controul of the Company, may inconvenience, and even endanger, those engaged in business here, we shall only notice the alterations that have been publicly announced from time to time, certain that every merchant will be able to understand the pernicious influence of such changes.

[England promised.

15th. March, Company's treasury closed; advances on goods to end. May, Com^y's exchange on Bengal 220 C.R. per 100 $ advs.
20th. May, " " " " 216 C.R. " " advs.
19th. Aug. " " " " 220 C.R. " " advs.
26th. Septr. Company's treasury close[d] again cash for Bills on Bengal; no application for advances attended to.
7th. Oct. " exchange on Bengal 216 C.R.

# CANTON PRESS EXTRAORDINARY

*CANTON, 13TH OCTOBER, 1836.*

## EDICT ON OPIUM,

As it is a subject very interesting to most of our readers in Canton, and also to our friends in Bombay and Calcutta, for which places vessels are now under despatch, we anticipate the publication of our paper by an extra, with the following important Edict from Peking.

"Record of the imperial will. "The following edict has been "received from the Emperor:" "the Censor *Heu Kewtseen* has pre- "sented a memorial, respecting the injury which will accrue to "the people from the introduction of opium (literally *foreign smoke*) "through the custom-house, and requesting that it may be interdicted: "the memorial is most just; let not the drug be admitted. Respect "this."

Peking Gazette No. 70. Taou-kwang 16th year, 6th month, 11th day. (July 24th 1836.)

We refer to our No. 44 of the 9th July for Hew-Nael-Sze's memorial to the Emperor, recommending the importation of Opium to be made legal, and to our No. 2 of the 17th September last, for the report to the Emperor, of the Governor and other local officers of Canton in favor of this memorial. These documents seemed nearly decisive both to foreigners and Chinese, as to the admission of Opium to duty, at no distant period. The present Edict will therefore cause considerable surprise, but as we are not in possession of the arguments of Kew-tzeen's, which have influenced the Emperor's decision, it still remains to be seen, what effect the Viceroy's report may have, of which the Emperor could not have been in possession when he issued the Edict.

We cannot account for the delay in the Peking Gazette reaching Canton, as the usual period is from 50 to 60 days.

## LITERARY.

*( From the Indo Chinese Gleaner. )*

### "A CANON DELIVERED BY FUH." †

"[A prayer or chaun to be repeated] for the exterminating of all misfortunes, and for the attaining of life in the pure land, To-to ta," (to be repeated three times.)

"Nan-mo-o-me-to po-yay. to-ta kea-to-yay. to-te-yay-ta. o-me-le toosho k'way, o-me le-to seeh-tan-po-kwan, O-me-le-too. kwan-kea-lan-te. o-me-le-to, kwan-kea-lan-te, kea-me-ne. kea-kea-na. cheh-to-kea-le. po-po-ho."

This prayer, or whatever it may be called, is, perfectly unintelligible to every Chinese.—Not one out of a hundred even of the Priests of Fuh, (or Foe,) who daily use it in the Temples, knows what the meaning. It contains the bare sounds of Indian words, expressed in Chinese characters. These, however, are supposed to possess a mystical and most wonderful efficacy, for the removal of all evil. The Editor of the book from which it is taken, adds —

"This prayer is for the use of those who are travelling to life. The god O-me-to (a name of Fuh,) rests on the top of the heads of those who repeat this, in order to save them from all their enemies; to render them safe and comfortable in life; and to confer upon them any mode of future existence, which they may, at the hour of death, desire. When a person has repeated it TWE-TY TIMES TEN THOUSAND TIMES, (i. e. 200,000 times) then the intelligence of Poo-tse begins to bud within, —when he has repeated it THIRTY TIMES TEN THOUSAND TIMES, (i. e. 300,000 times) over, he is at no distance from a personal vision of the face of the god O-me-to. In the Dynasty Tsin, Mr. Yuen, the celebrated teacher of Lou-shan, when in the act of repeating this prayer, there came to him a divine person from the west, holding in his hand a bright silver seat. He addressed Yuen thus: "Celebrated Teacher, thy days are ended. Ascend this seat, and be carried to yonder region of exquisite delights." The people round about all heard the sound of harmonious music in the firmament; and a marvellous fragrance, which ceased not for several days, was diffused all round."

*( Female Virtue. )*

A woman of Tsenti, whose name was Ko-she, married a soldier. She being a beautiful person, an officer, who commanded a thousand men, and whose name was Le-mow, fell in love with her. The soldier being absent from home, Le-mow went to his house; and used a hundred stratagems to seduce her: but Ko-she was resolute and resisted his solicitation to violate the laws of chastity. When her husband returned she told him every circumstance. Le-mow one day passing the soldier's house, the soldier remembering the former occurrence flew with an enraged countenance, seized his sword, and came out. But Le-mow made his escape, and lodged a complaint with the magistrate. It was determined that a soldier, seizing his sword, to kill his commanding officer, deserved to die. He was forthwith committed to prison. Ko-she herself went to prison and waited on him, and shutting the door for a length of time spun hemp and cotton, to obtain food and raiment. There was a keeper of the prison, whose name was Ye, who also formed an intention on Ko-see, and shewed the utmost attention and kindness to the soldier, which worked on his feelings to a great degree.

It was finally announced, that five officers were coming to put to death the condemned prisoners. Ye informed the soldier of it, when he said to his wife, "The day of my death has arrived, this jailer Ye is not married, you would do well to become his wife." Ko-she said, "you are about to die on account of my beauty. How shall I think again of marriage, or of surviving you" She therefore returned home and taking her two children wept bitterly, and said to them. "Your father is about to die—your mother's death she is not distant. My children, you have none to depend upon; you must finally die with hunger or cold.—I will sell you to preserve your lives. When you go to another person's house, it will not be the same as when you played at the knees of your father and mother. You must not be foolish and playful as you were then."

Her son and daughter possessed good parts, and understood what their mother said. They embraced her and wept aloud—they seized her clothes and refused to let her go. She then led both her children out, and called a person to whom she delivered them. The people that passed on the road also wept on their account. A rich family took pity on them; took her son and daughter, and gave her thirty pieces of money. Ko-she took part of the money and purchased refreshments which she took to the door of the prison, that she might see her husband once more. Ye allowed her to enter. At first she could not speak. When she obtained utterance, she said, "you have given Ye the jailer, a good deal of trouble—I will give him this as a small recompense: here also is a little money which you can reserve for your own use, should you want any thing. I am going to a rich person's house to work, I fear, that for ten days I shall not be able to return to see you." She restrained her tears, took leave and parted. She then went to the rivulet called Ke-lin, sat down in the midst of the water and died.

Though the current was very rapid, she did not fall over. Some person saw her and gave information. The magistrate repaired to the spot to make inquiries. Every one was filled with astonishment. They grieved for her a while, interred her, and wrote on the tomb, "A martyr to chastity."

### ORIGINAL.

#### REMOVAL OF FOREIGNERS AT HONAM OPPOSITE CANTON.

If Foreigners were allowed more liberty in China, doubtless there would be discovered in many parts of it, various relicks of people from the western Nations, who, during the commencement of the present dynasty, were permitted to go whither they liked, and settle where they pleased.

In some of the western provinces of the Empire monuments have been discovered, which prove, that at a very early period, intercourse must have existed between the Chinese and the Nations of the west, and we read in Neuhoff of an inscription on stone, having been found, in the province of Shanse which gave in the Syriac and Chinese Character, a short account of the birth, life death and resurrection of the Saviour, and which bore the date of the 3rd Century.

Not far from the Factories, in a northerly direction is a spot of ground used as a burial for foreigners, in the early part of the past century, but of late years all access to it, has been strictly forbidden by the Chinese, while a common cemetery has been provided on two small islands, near Whampoa, abreast of the foreign shipping, named French and Danish Islands, and to these is restricted the burial of all foreigners, no matter of what Nation, who die at Canton.

But on the island of Honam which fronts the City of Canton, about half a mile from the river which flows by it, and not far from the large Temple well known to visitors, as the "Honam Joss House," is to be seen a tomb in the Chinese style. built of free stone, and much injured by time, which was erected over the remains of a Spanish priest, or the inscription states in the middle of the 17th century. In the recess of the semicircle, in which form all chinese tombs are built (resembling the shape of a horse shoe) is a tablet of dark colored stone, bearing two inscriptions, one in chinese, the other in latin. The one in latin, which is surmounted by the Grecian cross, reads thus.

The chinese inscription *translated* is as follows;

"The grave of the saint Gan-Tang-Hao,† member of the Society of Tse-ko, a native of Spain, a great nation in the west. Firm in his adherence to correct principles, and in the practice of virtue and benevolence, he left his native country, and came to teach the Religion of the Lord of Heaven to the people of the "middle nation." ‡ In the sixth year of Tsun-chin§ he commenced his labors, and they ended only with his death, which took place in the city of Canton, on the 14th day of the 6th moon of the eighth year of Kang-he,‖ at the age of 68 years. He lies buried here, at Honam on the Paou-hill, looking towards the west.

"The tomb of the most excellent member of the Society of Tse-ko, who, when living, endured pain and difficulties in the practice of good works."

This tomb was discovered two years since, while strolling over the hills, and not long after, another was found, containing an inscription in characters which I have not been able to decipher, and no one to whom reference has been made, seems equal to the task of deciding to what language they belong. Some have supposed them to be Runian, which they greatly resemble, others Armenian; they certainly are neither Chinese nor Tartar. In a future number may appear some account of this curious relick of our predecessors in this part of China.

P.

### LING-FE KING.

*THE SPIRITUAL AND MOTIVE CLASSIC.*

On the Kea yih days * of the first and second moons, it was Shaou's invariable custom to rise with the sun, frequently bathe, and eat only of vegetable food.

He used, then, to enter his chamber and seating himself gravely, collected his thoughts which he directed to the most eastern point of the eastern horizon, the mansion of the God of spring whose surname is Yunkew and name Shang-yih.

It happened, on one of these days, that the God, riding through the azure clouds in a flying chariot and followed by twelve azure vested and beautiful virgins, descended from heaven and entered the chamber where Shaou was fasting, and presented him, as a reward, with a pure and eminently divine charm, which he swallowed; when, his heart bursting with gratitude, he composed the following verses in praise of the God.

"Most exalted Divinity of the verdant Spring
Thy eminent surname is Yun-kew
Thy azure garments are of embroidered Silk."

"Thou reamest through the expansive heavens
Where all is harmony, and where the sun never sleeps
Where the splendor exceeds that of the Kun yu hills"

"Thou comest down from heaven and entendest my dwelling
Thou gavest me pure and precious charms
The virtue of which are eminently divine."

"The five Deities descended with thee
T'ai yuen, conducting them in his chariot,
Rode upon a dragon through the azure clouds."

"Wherefore shall I grieve? wherefore weep?
I saunter at will thro' the universe
The Heaven and I are equals in felicity."

P.

*( To be Continued. )*

### FURTHER DISCOVERY OF TEA FORESTS IN ASSAM.

We learn with much satisfaction from one of our correspondents in Assam, that Mr Bruce of Sudiya, hastately made another most successful excursion in the Singpho country, to the south of Sudiya, in search of tea forests. He has discovered no less than *ten* new localities, in which the plant is growing in abundance and vigour. When he formerly went into the same country four or five months ago, the jealousy and discontent of our Singpho tributaries were so great, that he was under the necessity of taking with him an escort of forty musketeers; but a wonderful change has been wrought in their disposition; and in his late excursion he was attended by a single servant, and two men to be left at different places to look after the cleaning of the tea grounds.

It turns out that the Singphos within our territories are not only aware of the existence of tea upon their lands, but cultivate the plants systematically, and are extremely fond of the beverage they prepare from the leaf. They were reluctant, however, to afford Mr. Bruce the information he wanted on the subject, until he had won their hearts by trifling presents of opium, and some kind language. After that, they readily guided him in his researches. All the tea localities now discovered are in one vicinity, which, on looking at any tolerable map of the eastern portion of Assam, our readers may easily recognize by the help of the following description. Sudiya, it will be seen, lies on the north bank of the Brumhapootra, at the junction of a small river called the Kondil Panee. The country to the south is watered by two rivers the Dihong and the Booree Dihing, which both run from eastward to westward, and join the Brumhapootra at different points below Sudiya. If a line be carried nearly south, with a slight inclination towards the east, from Sudiya, until it cuts the Booree Dihing, it will fall upon the village of Ningrew, on the north bank of that river; and all the new localities of the tea plants are scattered in almost every direction around this village at various dis tances, from half a day's to a whole day's journey. Seven of the localities lie between the Booree Dihing and the Dihong; and the remaining three are to the south of the former river, and to the southeast of Ningrew, upon small tributary streams of the Boore Dihing. Immediately to the west of Ningrew, and on the north side of the river is a low range of hills, from a hundred to a hundred and fifty feet high, on the tops of which the inferior tea is said to grow wild; but because of its inferiority the Singphos pay no attention to it. The plants of this sort do not grow above ten or twelve feet high; the largest leaves are not more than an inch and a half in length, and they are much more indented than those of the other sorts. Another kind of tea also grows about in the jungles in the neighbourhood, and on the Naga hills, about a day's journey from Ningrew, to the south of the Boore Dihing, which is equally disregarded by the Singphos, and is known as the Assam tea. It is distinguished by the brown colour of the central thick fibre, and also of the edges of the leaves. This sort, it is said, will not grow in the same neighbourhood with the finer kinds: at least, they are never seen together.

Thus, it appears, we have three varieties of the tea plant. That which the Singphos make use of is not at all bitter, and differs widely from the sort produced in the Amherst country in the Burmese territories. Indeed, from a trial of some of this tea, prepared in a particular manner, Mr. Bruce is firmly persuaded that it will prove to be Gouh-Tea-one plant of this tea, the Singphos manufacture now its used: but they prefer one made of another of plantingshoots. Some cut off twigs about a foot and half long, just as the young leaves begin to show themselves, and lay them in the earth, in an angle of about 45, with the set of the twig appearing at the surface. Others take a branch as thick as a man's arm; and, having cut deep notches in it, about one-third through it, and three feet apart, fix it in the ground, and cover it all over excepting where the notches are; at the notches the new shoots spring up.

As Mr. Bruce proceeded in his investigations, he left men and means, at every place where he found the good tea, to clear the ground of all weeds and wild bushes; and we believe that by this time they are nearly relieved to cleanliness and order. He has made another discovery, which may possibly prove to be of scarcely less importance than the existence of the tea plant. Directly west of Ningrew, perhaps few and twenty miles distant, a small river called the *Phoongsoot*, descends from the low range of hills before mentioned, and after a short course, not exceeding twelve miles, joins the Booree Dihing on its north bank. In its bed the people wash for gold; and so rich are its sands that it was confessed to Mr. Bruce, that each man got a rupee's weight of gold every day. Now the vein or mine from which these sands are washed must be so close at hand, that we may reasonably expect a little research would soon discover them: and certainly they must be well worth looking for.—*Friend of India, Aug* 11 *(Englishman.)*

### AN INDEPENDENT VOTER.

*( From the Standard, May. 11. )*

The parties were at the close of the sitting of the Dublin Election Commission, yesterday, again equal. To-day the sitting was taken up with reading the examination of an original, named Bobling, a fine specimen of an independent voter;—

"He believed he voted for West and Hamilton; it must be them, as it was for the 'wot gamblers,' had been asked by hundreds of people for his vote, but before he promised it, he took care to get plenty of

burnt whiskey and porter. (Laughter.) He used to have burnt whiskey and porter only in the morning, and then afterwards went to another public-house to breakfast on cold hams, cold tongues, and other good things. (Laughter.) A gentleman, named Murray, promised him five pounds if he would give him his vote for West and Hamilton, but after he had polled he could not find Murray. In the committee-room he met with Capt. Childers, one of the agents, and he told him of Murray's promise, and that he had given his vote, but could not get the £5; and said he, '——and hounds, Captain Childers, fair play is bonnie play.' (Laughter) Captain Childers said, 'There's a two-and-six penny for you; go and get a drop to drink.' He did so, and went and got drunk (Laughter.) He did not go often to the committee-room, as he could always get a 'drop' elsewere. (Laughter.) A man, named Payne, paid him £2 10s.; he did not recollect it the next morning, and told Payne that he had not paid him any thing. His (witness's) wife was present and she said, "Mr. Payne paid you £2 10. last night, and you drunk it all, you beast, before you got home." (Great laughter.)

Cross-examined; Have you drunk anything this morning? Witness: Yes, I am always drinking. (Laughter.)

Are you drunk now?

Witness: No, I have only drunk two croppers of whiskey and some porter, and I often drink *nine* croppers of the cratur before breakfast. (Laughter.)

Were you tipsy every day during the election?

Witness: Yes, every day, but the one when I voted. I determined on that day to try and bring myself round a bit. (Laughter.)

Did you get drunk after you polled?

Witness: Oh, yes, I used to get drunk, roll down, lie a little while, get up, and at it again. (Great laughter.)

The witness's cross-examination was continued at great length. He complained of only being able to get £2 10., whilst some other voters got *5l.* When asked if he did not think it very unfair that others should be paid more than he was, he replied, 'that he did at the time, but he was now glad of it, as he should only go to purgatory, whilst they would go to hell.' (Laughter.)

The reading of this evidence was not concluded when our reporter left. *(Englishman.)*

## MACAO.

We translate from the Macaista Imparcial the following official correspondence.

"Illustrious Sir,

Seing that you do not suffer me to declare as in force the new laws, I require of you for the good of our Lady the Queen, that you will declare or cause to be declared in force, the law of the 22nd December, 1834, which is essential to the Constitutional liberty, and is the more necessary in this City, as only under that law the printing presses can be authorised, which now exist contrary to all law.

May God take you under his protection. Macao 4th October 1836.

(Signed.) The Ouvidor F. J. da Costa e Amaral.

To the Governor and Capt. General of this city.

The illustrious Sr. B. J. de S. Soares de Andrea.

ANSWER.

I have received your official letter of yesterday, pointing out the necessity of putting in force the law of 22 December 1834, regarding the liberty of the Press; a necessity long felt and demonstrated. We had, as far back as the 4th of June, intended to put it into execution, after it had been approved of by the constitutive commission in the thirty first session; but it became necessary to postpone our purpose owing to the absence of the delegate of the Royal Procurator, as you must well know. The municipal chamber and all the magistrates examined carefully on the 20th August of this year, and on the first of this month I likewise approved of the draft of an Edict, the copy of which I now send to you, and which has been published this day.

This, it appears to me, is a sufficient answer to your delicate expressions; however I do not well understand the first part of your official letter, from which at first sight it would appear, that there had been some previous correspondence of mine, in which I would not suffer you to put in force the new laws; but as this could only compromise me in distant parts, where I am known to many, any explanation of such insignificant insinuation would be useless.

May God take you under his protection. Macao 5th October, 1836.

(Signed) B. J. de S. Soares de Andrea.

To the Illustrious Sr. F. J. da Costa e Amaral. *Ouvidor.*

## EDICT.

The Municipal Chamber in concurrence with the Governor and Captain General of this City, in obedience to the decree of 3rd April 1834, ordering the new laws compatible with this establishment to be carried into effect; having taken the opinion of the constitutive commission, as to the fitness of those laws for this country, and conforming themselves to it's opinion; make known, that the law of 22 December 1834 regarding the liberty of the Press is practicable here; and it is accordingly in full force from this day. That this may be known to all, let it be posted in the usual places.

Macao in Senate, 5th October 1836.

(Signed) Andrea, Azevedo, Silveira, Santos.

# CANTON PRESS,

12th October 1836.

## THE CO-HONG.

It being one of the principal objects of this paper to watch the trade with China as well as the causes that influence it, a few remarks on the body of merchants through whom the great bulk of our trade with the Chinese Empire is conducted, will not be out of place.

The Cohong was established by the Chinese Government with the same purpose, from which emanated most it's restrictive laws regarding foreigners, viz to prevent foreigners from having intercourse with the natives, beyond what was absolutely necessary for the purposes of trade, and to enable it to exercise an immediate influence upon all transactions with foreigners, who being obliged to deal with Hong merchants alone, these latter were responsible for every thing regarding us, even for our personal good conduct, and that of the sailors on board of ships at Whampoa.

The *Co-Hong* was first incorporated in 1759, and twelve years after dissolved through the efforts made by the E. I. Company, backed by considerable bribes, but was re-established soon after, & in action again in 1780 and so has continued ever since. As long as the Company traded to China, one Monopoly acted against another, and could in a manner control prices; the injurious effect of the Co-Hong on trade, was therefore not so much felt as now, where the constitution of this latter body continues the same, giving them a thorough control over all exports of importance, whilst on the other side the natural competition of the free traders, to come into the market on better terms than their neighbours, raise prices of Exports and lower those of Imports, as no such control, or in a small degree only, can under the present system exist.

One would think, at first sight, that these Hong-merchants must easily get rich under such advantages, but the fact is far otherwise. In the Company's time already even of the Hongs failed, and others were considered very poor, nay even insolvent, as we learn from the Evidence before the house of Lords in 1830, and these poor Hongs were employed by the Company's supracargoes to counteract the influence of a few rich Security Merchants, and to obtain their Teas through them at cheaper rates, they being obliged to do business on any terms, rather than break. The Company in 1814 stopped the trade, in consequence of an attempt of the Chinese Government still more to restrict the number of the hongs, and after a stoppage of several months, the trade was resumed, the Supercargoes having carried their point against the Imperial Edict.

From that time forward, the Junior Hong merchants continued in embarrassed circumstances, and before 1829, three failed, leaving the number of 7 hongs. From the evidence of 1830 before the House of Lords, it appears that these hongs, and particularly that of Manhop, had become thus involved in consequence of their dealings with outside merchants, and of smuggling having become much more extensive, enabling the outside merchants to undersell the Hongs. The Company made several attempts to prevent connexion between hong and outside merchants, but apparently with little success. In July 1829 a proclamation by the Governor of Canton was issued, restricting the import and export of many articles to the Hongs exclusively, but permitting the outside merchants to deal in silk manufactures, a boon granted probably in consequence of the importunities of the American merchants. The following is a list of articles in which the Co-hong alone is allowed to deal.

### 24 Articles of Export.

"1 All sorts of teas. 2. Raw silk from Oukwong. 3. Silk prepared for weaving. 4. Canton raw silk. 5. All sorts of cloth. 6. Native cassia. 7. Cassia buds. 8 Sugar-candy. 9. Sugar. 10. Tutenague. 11. Alum. 12. Cloves. 13. Nutmeg (or mace) 14. Quicksilver. 15. China camphor. 16. Rhubarb. 17. Galangal. 18. China root. 19. Vermilion. 20. Gamboge. 21. Damar. 22. Star anniseed. 23. Pearl shells. 24 Cochineal.

"List of the 33 Articles of Import.

"1. Worleys. 2. Dutch camlets 3. Camlets. 4. Long-ells. 5. Broad-cloths 6 Cuttings of cloth. 7. Sorts of camlets. 8. Florentines. 9. Ginseng. 10. Sandal-wood. 11. Birds'-nests. 12. Cloves. 13. Nutmegs. 14. Putchuck. 15. Olibanum. 16. Malay camphor. 17. Elephants' teeth. 18. Pepper. 19. Foreign tin. 20. Ditto lead. 21. Ditto copper. 22. Ditto steel. 23. Cotton. 24. Rattans. 25. Betel-nut. 26. Smalts. 27. Prussian blue. 28. Biche de Mar. 29 Fish maws. 30. Sharks' fins. 31. Materials for glass. 32 Ebony. 33. Sapan-wood. 34 Cochineal. 35. Gumokin. 36. Mirrh. 37. Physic. 38. Assafœtida. 39. Physic oil. 40. Quicksilver. 41. Foreign iron. 42. Wax. 43. Catch. 44. Pearl shells. 45. Sago. 46. Undressed nests. 47. 48. Flints. 49. Borax. 50. Amber. 51 Gold and silver thread. 52. All sorts of skins. 53. Mace."

The Consoo-found has generally been looked upon by Foreigners as a security to them in the event of any of their number becoming insolvent, but this does not in fact, at least not unconditionally, seem to be the case. Mr. Davis, examined by the house of Lords, says that the Co-hong is legally answerable only for 100,000 Taels of the debts of an insolvent of their number; but we understand that several of the senior merchants have lately expressed their determination not to be answerable for any of the debts of the Junior Hong merchants, of whom not less than the number of eight have been established since 1829. It is impossible to say how the Consoo fund is managed, or what it's amount may be. It is generally understood to be under the controul of the senior Hong merchant Howqua, and some say chiefly expended to provide for presents to the higher officers, and through them to the Imperial Family. For some time past, the Consoo duty has, we believe, not been actually paid; every one is rated according to the amount of business transacted in his Hong, and *booked* as a debtor to the Consoo-fund, which debt may however, probably, never be called for; nor, we fear would many of the Co-hong, without ruin to themselves, be able to pay off a debt, which in many instances must have accumulated to very large amounts, so large indeed, that we hear that the sum debited to one Hong only last year, and that not one of the richest, but perhaps the most active, amounted to no less than 120,000 Taels.

The chief reasons why the security merchants, apparently so favorably situated, do not in fact derive the profit from their monopoly, that might be expected, are the very heavy expenses of their establishment, amounting to between 30 50-50.000 Tales, each per annum and the manifold extortions of the Government officers, as well as the heavy sum they have to pay to the Hoppo, on being admitted into the Co-hong, estimated at about 30 000 Tales. The opportunities for extortion occur often enough, and are generally paid for in the shape of presents or fines. Any irregular conduct either personal or commercial, of which a foreigner has been guilty, the Hong-merchants must pay for. Any disturbance on board a ship at Whampoa, is visited upon the Hong-merchant in the shape of a fine, as well as when unfortunately any smuggling at Whampoa intercepted not authorized by the Mandarins there. The Co-hong, we understand, had to defray the expenses of the repairs of the forts on the river after they had been damaged by the *Imogen* and *Andromache*, and to pay for the building of another. Thus many are the means found to ease them of the profits in trade, and from the great responsibility heaped upon them, even their bodily safety is any thing but enviable.

These causes deter rich men from entering the Co-hong, or at least allowing their names to be registered as the responsible partners; and the consequence has naturally been, that men of small substance only, are generally now received in the Co-hong, and their credit as merchants accordingly does not stand very high.

The punishments Hong merchants suffer, in case of bankruptcy, are very heavy, such as imprisonment or banishment to Tartary. Of the nature of the latter we know little, nor are we aware whether any bodily hardships are attendant on it, or whether they are allowed to live as they like in the place of their banishment; but imprisonment, if the unfortunate prisoner happens to have been honest enough to have given up the whole of his property, and nothing left to satisfy his jailors, is attended with severe personal illtreatment.

The Hongs, besides serving, however imperfectly, at present the policy of the Chinese Government, are neither profitable to the Chinese nor to the foreigners, and if they were done away with, and we allowed to trade with all Chinese indiscriminately, affording us at the same time the means of prosecuting debtors, the trade here would improve materially. That the so much changed system of British trade, and it's now twofold amount, will press hard upon the hongs, and increase considerably the transactions with outside merchants, is very probable, and that thereby the profits of the Hongs will be lessened, whilst their expenses continue the same, is certain. That in consequence importers, selling to them at a credit, which by the way, *is illegal*, will in future be less willing to trust them with large amounts, but will try to dispose of their goods to outside merchants, is equally probable.

If our information on the subject is correct, it would appear that the Black-Tea merchants are now unwilling to allow their teas to go into the hongs, until nearly two thirds of their value has been paid to them, and if besides they carry their point in obtaining the high prices they now ask, many of the Hongs, to whom before an extensive credit was given, will be prevented from doing their usual business during this season. We understand that the Tea merchants are still unwilling to lessen their demands, but if the Co-hong and foreign Exporters continue firm, we hope to see them give way.

The names of the thirteen Hongs now existing are: *Howqua*, Mowqua, Pwan-khe qua, King qua, Gow-qua, Hing-tai, Sanqua, Min-qua, Hoy-qua, Sam-qua, Footai, Oan-chiung and Tang-ching, the latter eight of which have been established since 1829.

*Canton Court Circular* —

Taou-Kwang, 16th year, 9th moon, 2nd day.

(October, 12th 1836.)

Ke, the Foo-yuen issued and received official documents; Lo a Heü-heen and Ting a professor of Kwang chew both paid their respects to H. E.

Choo, the Kwang-chow-foo, sent to request permission of H. E. to depart to She-tseou-shoou to pray at the holy well for rain.

Tsew, Acting Tung-che of Shwuuy-yaou, paid his visit and requested permission to return to his official duties at that place.

Choo, who has just received an appointment to the office of Tungche at Yaechow, sent to pay his respects; he himself being absent preparing his traveling baggage.

Yü, who has just passed his examination for a Tungppwanship, and Ching, whose appointment as Kwo-kung-yuen, has received the Imperial sanction, both paid their visits.

Lew Kienking the Tsih-yung yuen reported his return from yang-tüh; having successfully executed his commission; he was admitted to an audience.

Chung Ming a We-yuh-lew (or follower of the Court, who has not yet received any official rank) reported his arrival, and his having relinquished his mourning-garments.

The fact that the Company's treasury had been reopened for the receipt of Cash for Bills on Bengal on the 6th inst., led us into an erroneous belief in our last week's paper, that applications for advances on Tea and Silk to England would be received. The Company's Agents for the present do not receive any new applications for such advances, and no new changes have taken place in the orders from Bengal, which is however very likely, judging from that frequency hitherto, all such as neglected to apply for registration of their names in good time, will continue disappointed. The recent reopening of the Treasury after it had been suddenly closed twelve days before, has apparently been caused by a desire of the Company to make still greater profits than they already derive, on their exchange speculations here, and probably to pay such as are promised advances the greater part in money, which costs them only 2/8 C. R. whilst in case of giving Bills on Bengal to these parties, they would have to give them at 220 R. per £100; making a difference to the Company of one per cent, a consideration far more important to that money loving Government than the well being of the Freetrade to China.

The nine prisoners taken by Captain Stanley, of H. M. Ship *Wolf*, off Pulo Tingie, have been tried in the Supreme Court of Calcutta, and found guilty. The prisoners are to be brought up for judgment on the last day of sessions. The presence of the Arch bishop of Cochin-china in Calcutta, who acted as interpreter for the Cochin-chinese witnesses, who had been captured by these pirates, and liberated by Captain Stanley, was a fortunate circumstance to promote the ends of justice. We hope these men will be sent to Singapore for execution, where their fate is likely to make a salutary impression on their countrymen and partners in crime.

EDICT ON OPIUM. On the 13th we published an extraordinary, the substance of which we recopy into this paper as the information it contains is of great importance to the commercial community.

"Record of the imperial will. The following "edict has been received from the Emperor: the "Censor *Hen Kwaetsëu* has presented a memorial, "respecting the injury which will accrue to the people from the introduction of opium (literally "*foreign smoke*) through the custom-house, and "requesting that it may be interdicted: the memorial "is most just; let not the drug be admitted. Respect this."

Peking Gazette No. 70. Taou-kwang 16th year, 6th month, 11th day (July 26th 1836.)

We refer to our No. 44 of the 9th July for Heu Naetse's memorial to the Emperor, recommending the importation of Opium to be made legal, and to our No. 2 of the 17th September last, for the report to the Emperor, of the Governor and other local officers of Canton in favor of this memorial. These documents seemed nearly decisive both to foreigners and Chinese, as to the admission of Opium to duty, at no distant period. The present Edict will therefore cause considerable surprise, but as we are not in possession of the arguments of Heu Kew-tseu's, which have influenced the Emperor's decision, it still remains to be seen, what effect the Viceroy's report may have, of which the Emperor could not have been in possession when he issued the Edict.

We cannot account for the delay in the Peking Gazette reaching Canton, as the usual period is from 30 to 60 days, except supposing that the copier of the Gazette here, has made a mistake in the date, and that in fact it has been sent down by express, and is of a much later date.

Per the Royal Saxon we have received a *Sing pore Chronicle* of the 24th September, containing an account of a mutiny on board the British Brig *Zoroaster*, Captain Patton, in which the Captain, his wife and son, and the mate were murdered. The crew then scuttled the brig and landed at Kurong Kaya, a port in Navicator's back Bay about 25 miles to the westward of Pedier, to which place three of the crew had travelled over land, bringing an account of this barbarous transaction. Most of the crew were malays and other natives of Singapore. The same paper states that a Dutch Government Schooner, with $3,000 Rupees on board, had been cut off by her crew, who, after murdering the Captain, his wife and officer, but sparing the life of a child, probably the Captain's son, carried her into Acheen roads and gave her up to the Rajah. The Dutch Resident at Padang is said to have immediately sent a vessel to Acheen, demanding the restoration of the schooner, treasure and child, which demand the Rajah has refused to comply with.

The Rusy which arrived in Singapore on the 25th September, had the misfortune to strike on the outer rocks of a reef off Point Romania, when on leaveving to run through the middle passage. The extent of damage to the ship was not then known, but it was expected that much of her copper was off, and that she would have to be docked in Calcutta.

On Thursday night last, a fire was seen from the foreign Factories, burning brightly, and on that account, was supposed to have consumed a good many houses; but on enquiry we learn that only two shops were destroyed, in a street called *Hom-ho lan*, near the wall of the new or outer city, and drawing a line between the Dutch and French Forts, about midway between them, though at some distance from the river.

The *Richard Alloy* from London 28th June, is reported this day, but no letters or papers by her have yet been received, with the exception, we hear, of a letter from one of her passengers. We are consequently not yet in possession of the news she may bring, but if report is to be trusted, the prices of Teas and Silks were very low in England at the time of her sailing, the latter having fallen to 2s. 6d. for Taotlee, and of the former to 2s. 3d. for best Congous.

Just before going to Press (Friday evening) we receive the *Canton Register* of Tuesday last, in which the Editor regrets our having been led into a mistake in our last number, supposing that the Company's advances on Tea would recommence with the reopening of the Treasury. The Company's notice being at the time of our writing, but a few hours old, we shared this belief with many others, and have undeceived our readers in another part of this paper.

NOTICE.

STANFORD & MARES, beg to inform the Gentlemen of Canton and the Public in General that on Tuesday Next the 10th Instant they will offer for sale by PUBLIC AUCTION, a variety of articles consisting of ENGLISH STATIONARY, BLANKETS, COTTON HANDKERCHIEFS, CAMLETS, OPTICAL GLASSES AND BOXES, ROUND CLOTHS, VASES, HANGING AND PRISMATIC LAMPS, A Chronometer by French, FLUTE with Eight Keys and a variety of other articles. The sale to Commence at 11 A. M. Precisely.

Canton, 14th October, 1836.

*OFFICIAL NOTICE.*

CONSIDERABLE inconvenience and public expense having been incurred, by reason of the improper conduct of certain masters of British merchant vessels in wilfully leaving behind in this place, men belonging to the said vessels; Notice is hereby given that this practice is contrary to Law, and that the Offence may be prosecuted by indictment or information at the Suit of His Majesty's Attorney General in the Court of King's Bench at Westminster, as if it had been committed at Westminster in the country of Middlesex, and it is now declared, that the Superintendents will take measures to institute proceedings against any master or masters of British merchant vessels who offending herein in future.

By Order of the Superintendents.

EDWARD ELMSLIE.

## *SHIPPING INTELLIGENCE.*

ARRIVED.—Amer. *Italy*, Comerais from Liverpool and Gibraltar. *Torquin*, Hunt from Liverpool and Java. *Humboldt*, Eldridge from Boston. Brit. *Royal Saxon* from Singapore 29th Sept. Amer. *Richard Allsop* from London June 28th. British. *William Rodger* from Liverpool. 2nd June. *Jardine*, Greig from Singapore (reported by mistake in our last.)

PASSENGERS.—₱ *Richard Allsop*. Mess. Jos Archer, and others, names not known. ₱ *Royal Saxon*, Mr. and Mrs. Stranghan and Mrs. Saunders; ₱ *Enterprize* (omitted in our last) Mr. William Davis. and ₱ *Plymouth* Mr. Lewis; ₱ *Inglis*, Mr. Bibby.

SAILED AND DESPATCHED.—Amer. *James Perkins*, Burty for Manila. Brit. *Imogen*, Kiley, London. Spanish. *Dos Amigos*, Pardo, for Manila. Brit. *Charlotte*, Liebschwager, for Bombay. *Julia*, for the Straits.

The despatch of the *Waterwitch* is postponed till the 20th. The *Martha* for Liverpool will be despatched on Tuesday.

The *James Matheson* was spoken by the *Royal Saxon* entering Singapore straits from Liverpool 102 days. We have that she is on board home from Singapore, and have no doubt that many ships will have to leave this without cargoes, as the difficulty in the way of shipping is encreased by the last news from London.

We, by mistake, inserted in our last, the arrival of the *Eliza* from Java; there was no such arrival, and we were wrong in the report of the *Jardine*. It is our wish to make our shipping list as correct as possible, and we shall be obliged to our friends, to make their communications as full as convenient, to enable us to do this.

Ships passed Anjer, September 8, *Athens*, from Boston 14th July (2 June) 7th: *Constitution* from Boston, 9th June. 14th: *Emily Taylor* from ditto, 18th: *Neponset*, 10th June from ditto. 23rd: *Panama* from Newyork 28th June. 24th: *Wm. Jardine*, from Liverpool 21th June.

The *Panama* has since, we hear, arrived at Batavia.

VESSELS EXPECTED.

From England. *Charles Grant*, *Viscount Melbourne*, *Mandarin*, *James Matheson*, *Lady Charlotte*, *Carshalton*, *William Jardine*, *Ann Baldwin*, *Mary Somerville*, *Penang*, *Thomas*, *Trusty*, *Jamaica*, *Clyton*, *Earl Grey*, *Afrika*, *Brilliant*.

From United States. *Liberty*.

From Bengal. *Resource*, *Neptune*, *Red Rover*, *Rosand*, *Lord W. Bentinck*, *Heber*, *Lordsduckland*, *Sullaway*, *Bombay Castle*, *Tigris*, *Emily Jane*, *Ann*.

From Madras. *Thames*, *Orwell*.

From Bombay. *Hasheny*, *Earl of Clare*, *Chas. Mangalm*.

From Singapore. *Victoire Elise*.

From Java. *Strathfieldsay*, *Burrang*. *Madura*, *Mercury*, *Panama*.

Latest Dates, from *England* to June 27th ₱ *Richard Allsop* From United States 4th June via *Batavia*. From *Calcutta*, September 4th, ₱ *Cowasjee Family* From *Singapore*, 26th September ₱ *Royal Saxon*. From *Java*, 15th September ₱ *Elora*. From *Bombay* 13th August, ₱ *Inglis*. From Manila 29 September ₱ *Humbolt*.

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—But little has been doing in all imports during the past week, and we have only to notice that American Shirtings are in rather better demand, and at better prices.

WOOLLENS.—continue dull at our quotations.

LEAD.—without improvement.

IRON.—Nailrod is enquired after at our quotation.

QUICKSILVER.—very difficult of sale.

BETELNUT:—we have heard of a sale at @ 3.80, and previous quotations can no longer be sustained.

RATTANS.—some Bai just arrassing are reported to have been sold at @3.10.

TIN.—though we have no sales to report, is held in firm hands, mill @ 20 are asked for Banca, and some in hands of Chinese is held at @ 23, duty paid.

RICE.—The wet weather which has set in within the last two days, has made purchasers less eager.

COTTON.—There is a demand for fine descriptions of Bengal and Bombay, but not bi her than 10.5, is offered for fair quality of Banda; for fine Bombay however 11.5 @ 11.7 could be obtained, but there are, we understand, only a few hundred bales of that quality in the market. The middling or inferior kinds remain with little or no improvement.

OPIUM.—In the early part of the week, holders being a little firmer, the prices of the Bengal drug advanced $10 @ 15, and, we believe, sales were made at a month at from @770 @ 780 for Patna and 690 @ 700 for Benares, but the transactions were limited, and since the report of the Emperor's edict was known, the rates have again receded.

The deliveries on the 8th were.

| PATNA. | new | old | BENARES. | new | old | MALWA. | TOTAL. |
|---|---|---|---|---|---|---|---|
| Chests. | 139 | | | 93 | 1 | 637½ | 870½. |

### EXPORTS.

RAW SILK.—The determination of exporters not to buy at the high rates asked, has made prices recede.

TEA.—Nothing is yet settled as to Congous, nor is it likely that the Tea and Hong-merchants will come to an understanding, till more parcels arrive.

## LITERARY.

*( From the Lady Chinese Gleaner. )*

### THE HISTORY OF THE PEOPLE OF THE LOO-CHOO ISLANDS.

On this subject Captain Hall's account gives no information whatever.

The Chinese account says, that anterior to A. D. 1120, there had been twenty-five reigns on the island. The first King was called Tein-shun, but the name of his successors, and the duration of each reign, were lost.

A change of Dynasty took place at this period in the person of Shun-tien, and continued three generations, when the original Dynasty was restored in Ying-tsoo, the descendant of Tien-sun.

The sovereignty was subsequently transferred to four different persons, and rested for a while with one called Cha-too, during whose reign about A. D. 1290, the Loo-choos first had intercourse with China.

From Cha-too, the sovereignty passed to Shang-pe-che at which time there were three nations, called the central, the south and the north.* These three, long since, became one united kingdom.

The dominion subsequently passed into the hands of seven different chiefs, and at last rested with Shang-yuen, the ancestor of the late King Shang-nuh, who was the fourteenth from Shang-yuen, and who considered himself the descendant of the ancient Shun-tien, who obtained the dominion in 1190.

It is remarkable that, according to the Chinese official memoir, there is on the Loo-choo Island, an original written character; and the history of the Islands composed about 1460, is in that character. Their genealogies they keep in the Chinese character.

The King, Shang-nuh died in 1794, and was succeeded by his grandson Shun-wan, who died in 1801. His eldest son succeeded in autumn and died in winter, without being confirmed by the Emperor of China, which was however done eight years after his death, by his Imperial Majesty Kea-king. The King in 1808, was Shang-hsun, a great grandson of Shang-nuh, and was born in 1787. He ascended the throne in his 23rd year, and was confirmed by the Emperor of China five years afterwards.

If the above account of the Chinese be correct, the same Monarch of whom our English voyagers speak, must have been in 1817 in his 30th year.

Inaccuracy is unavoidable in transient visitors of a foreign country, whatever their talents and integrity may be, for the reason assigned at the beginning of this paper—want of time and means.

The natives declared to the English, that they had no weapons, and we should be almost led to suppose these innocent but storytelling islanders, could not comprehend the use of a weapon, nor had any occasion for the infliction of punishment.

The Chinese narrator says, that Shun-tien in 1190, laid the foundation of his kingdom by military force, and that till this day there is, in a temple dedicated to him, an arrow placed before the tablet on which his name is inscribed, and which tradition says, is in conformity with his dying will, to show that his kingdom was founded by military prowess.

However, since the southern, northern, and central divisions became united under the sovereignty of Shang, their civil broils have been comparatively very few, and their records make little mention of wars for a long period. The Chinese attribute this, to their acknowledging the supremacy of the Emperor of China.

In the Loo-choo annals of eminent men, is the following narration, which shews that they have not been exempt from the evils of lust and war.

The hero of the tale is Kwei-show who was an officer of rank in the district Yuh-tsun. The wife of Gan-sae the chief of the district, was considered a beautiful woman, and to obtain possession of her, Pe-chung, another chief, invaded Yuh-tsun; subdued, abused, and insulted Gan-sae, and then murdered him; his wife, however having first sent her son, then an infant, into another district under the care of a respectable family, put an end to her own existence by hanging herself. Pe-chung being disappointed in his brutal desire to obtain Gan-sae's wife, turned his attention to the destruction of her infant, and was preparing to attack the district where he was, and thus to gratify his revenge. Kwei-show, heard of what was meditated, gave notice of it to the chief of Ping-gan, where the child was, and solicited the chief to raise troops and attack Pe-chung. The chief advised with Keih-tsen, one of his principal men, what was to be done.

Keih-tsen said, "The affair is fraught with danger, but if we can get a man who will die instead of his young Lord, we may devise some mode of defence by gaining time."

Kwei-show stood forward, and requested that he might be delivered up instead of his Lord, and Keih-tsen forthwith bound him, and delivered him to Pe-chung. Pechung in a great rage ordered him to be immediately beheaded. Kwei-show instead of fearing death, poured upon the tyrant, a volley of abuse, which increased Pe-chung's anger, and he determined to protract Kwei-show's sufferings before he murdered him; accordingly he sent him to prison, and fixed a future day for his execution. In the mean time, Keih-tsen continued to rekindle ancient animosities against Pe-chung amongst the neighbouring chiefs, who raised soldiers to attack him. When told of Kwei-show being bound and delivered up to death, they would not believe it. The sight of young Gan sae however animated them, and just as the day fixed for Kwei-show's execution arrived, they, conducted by Keih-tsen, came upon Pe-chung unexpectedly, in the midst of his revels and debauchery. The soldiers found him drunk in bed, and without taking him themselves, cut his head off, and thus delivered from prison and restored to life, the faithful and magnanimous Kwei-show.

* The central is called Chung-shan. The south Shan-nan, and the north Shan-pih.

## ORIGINAL.

### A CHINESE HELL.

Some Chinese, the Budhists in particular, have an idea that there exist ten Hells, or rather that Hades is divided into so many portions, each of which has it's King, and the punishments of them, are inflicted upon culprits for particular crimes.

An opportunity offered itself a few weeks since, during the celebration of an annual Chinese festival, to see representations of these various places of torment. They were very ingeniously constructed of split bamboo and paper, and exhibited publicity to the people. Of the ten, which together formed a scene of the most horrible and appalling nature that can well be imagined, there was one in particular which may be described in a few words.

In a recess, probably 15 feet square, were placed the figures representing the Judge or King, the assistant demons, the witnesses and prisoners, each as large as life, and clothed in the garb they are supposed to wear. Each seems eager to surpass the other in ferocity, and the perfect hideousness of their countenances one would suppose alone sufficient to prevent crime altogether. Behind a large table, carrying a most magisterial and ferocious air, is seen seated the King of the particular Hell over which it is his duty to preside, his brow contracted, his eyes rolling and starting from their sockets, his lips conveying the idea of unbounding firmness, and his whole demeanour just such as one would suppose a gentleman of his character to assume. Immediately in front of the table, pinioned and on his knees, is a most unhappy personage, the unfortunate culprit, who is waiting to receive his doom, while on either side stand several hideous looking figures, their eyes glaring fiercely on their victim, and while some sustain a heavy chain which is attached to his body, others are busily employed in preparing, or making use of, various instruments of torture.

In advance of the entire conclave, placed over a hissing and turbulent fire, is seen the final receptacle for the unfortunate sinner, a large pot filled with boiling oil, having it's edges "garnished" with demons of frightful forms and looks, who are amusing themselves with spears, in preventing the escape from the pot, of sundry other victims, who are receiving their allowance of the punishment, that the hardhearted King of Terrors has already meted out to them. At length the sentence is pronounced, and as the prisoner is raised upon the ends of various sharp pointed instruments, and cast into the boiling liquid, the roar of the daemons, mingled with the crackling of the flames, drown at once all cries for mercy, and afford the spectator a good idea of the fun and amusement to be enjoyed in the Hell of the Boiling Cauldron.

P.

*( From the Singapore Free Press 29th Sep. )*

### SHIP CHARLES EATON.

By the brig *Napoleon*, of which we notice the arrival from Batavia in another place, the following copy of a communication made at the place by Captain Harrison of the ship *Thomas Harrison* was transmitted to us; containing the melancholy and final particulars of the crew and passengers of the *Charles Eaton*, viz.:—

"In coming through Torres' Straits, when off Double Island, Captain C. M. Lewis of H. M. Colonial Schooner *Isabella*, came on board and reported as follows: "That he left Sydney on the 3rd. June last to endeavour to find the survivors of the *Charles Eaton*. He entered the Barrier Reefs at Cumberland's entrance and brought up at Murray's Island, where he found William D'Oyley (youngest son of Captain D'Oyley of the Bengal Army) and John Ireland, a boy belonging to the *Charles Eaton*, about 17 years of age—both quite naked. He bought them with axes from the natives, who had been kind to them, having taken them from a small island called Boydang, where all the rest of the crew and passengers of the above unfortunate vessel had been murdered by the natives of an island called Aureed.

"From the information received from the boy Ireland, it appears that they all left the ship on two rafts. The Captain of the *Charles Eaton*, Captain and Mrs. D'Oyley and family, and part of the remaining passengers and crew on one raft: and a week afterwards the first and second mates and the rest of the passengers and crew on another. Both rafts happened to drift on the same island.

"Ireland was on the 2nd. raft; he relates that on landing at Boydang he saw the eldest son of Captain D'Oyley who told him that his father and mother and the whole of the people of the first raft were murdered, a lad named John Benyon and himself only escaped. Ireland further states they murdered three men who and all that were with him on the 2nd. raft, shortly after they landed, only leaving him and the child, Wm. D'Oyley, alive.

"On Captain Lewis landing on the island all the natives had taken to their boats and gone off—he found the skulls of all the white men, hanging to the huts, which he took with him;—he destroyed, with fire, their huts, and cut down their cocoanut trees, on which they chiefly live. It appears that the boat which left the ship when she was on shore on the Barrier was stolen away by the carpenter, boatswain and three men, the carpenter taking his tools. The Captain had prepared the boat with provisions—they did not wait at the ship as stated in their depositions on Java. Many jumped overboard to get into the boat which was pulled away from them, and in attempting to regain the ship, one was drowned.

"Captain Lewis was satisfied that he had accomplished the object of his voyage, having got every possible information, with respect to the unfortunate sufferers of the *Charles Eaton*, and intended to proceed immediately for Sydney after calling at Coepang for water.

(Signed.) T. O. HARRISON.

*Commander of the Ship Thos. Harrison."*

This account taken from the mouth of the only one of the two survivors, who could be supposed capable of communicating such details, together with the other evidence received by Captain Lewis himself of the tragic occurrence, seems conclusive of all further hope or conjecture. The depositions, taken at Batavia of the five men who made away in the boat, were published in our number of 11th February last. It is seldom in the record of similar occurrences, that we see such an unworthy instance of desertion by English seamen of their companions in the hour of danger and distress.

From Williams' Annual Register.

### SUMMARY OF MANUFACTURES IN THE STATE OF NEW YORK ACCORDING TO THE CENSUS OF 1835.

| | | V. of raw material. | V. of manufactures. |
|---|---|---|---|
| Grist Mills, | 2021 | 17,697,000 | 98,140,535 |
| Saw Mills, | 2048 | 2,551,150 | 6,061,055 |
| Tanneries, | 612 | 2,363,301 | 3,202,097 |
| Iron Works, | 202 | 2,503,000 | 4,300,000 |
| Cotton Factories, | 111 | 1,600,330 | 3,020,710 |
| Woollen Factories, | 226 | 1,430,028 | 2,433,198 |
| Dyeing & Printing, | 15 | 1,000,000 | 2,063,000 |
| Fulling Mills, | 243 | 1,006,491 | 2,004,056 |
| Carding Machines, | 1061 | 2,179,616 | 2,611,539 |
| Distilleries, | 337 | 6,078,000 | 3,000,040 |
| Breweries, | 96 | 910,000 | 1,991,040 |
| Oil Mills, | 71 | 214,010 | 214,454 |
| Trip Hammers, | 151 | 166,000 | 363,561 |
| Asheries, | 602 | 454,304 | 726,118 |
| Glass Factories, | 12 | 165,210 | 446,850 |
| Rope do | 62 | 604,304 | 863,088 |
| Chain Cable do | 2 | 30,071 | 31,025 |
| Oil Cloth do | 24 | 63,110 | 83,840 |
| Clover Mills, | 60 | 95,000 | 110,000 |
| Paper Mills, | 70 | 356,537 | 665,794 |
| Articles made in families, | | | |
| Twilled cloth, 2,196,951 yds. | | | |
| Flannels, &c. 2,190,000 " | | 1,300,000 | 2,000,000 |
| Linen & Cot'n 2,190,000 " | | | |
| | | $43,600,000 | $90,000,007 |
| Acres of improved Land, | | 9,023,000 | |
| Neat Cattle, | | 1,005,771 | |
| Horses, | | 304,005 | |
| Sheep, | | 4,961,765 | |
| Hogs, | | 1,594,350 | |

From the above statement it appears that fully one third of the manufactories of the State is in the article of Flour. The number of Grist Mills is distributed through every County in the State. The largest number in any County is in

| | | |
|---|---|---|
| Montgomery County, | | 76 |
| Oneida, | do | 68 |
| Otsego, | do | 70 |
| Westchester, | do | 61 |
| Orange, | do | 60 |

The smallest number in any one County, is New York and Richmond counties, which have only two each.

Here is the single article of Wheat, yielding the farmers of New York a larger amount than the Cotton of any one of the Southern States.

Commerce & Navigation.—The "Annual Statement" of the Commerce and Navigation of the United States, for the year ending 30th September, 1835, was submitted to Congress on the 10th of last month, and ordered to be printed. This, of course, is not yet accomplished, ( the documents on paper 200 or 300 pages, ) but we are enabled to state the general results.

The imports during the year, (ending 30th September last,) amounted, in value, to $149,287,703, of which there was imported in American vessels $130,213,804, and in foreign vessels $14,493,977. The exports during the same year amounted to $121,693,327, of which $101,189,023 were of domestic, and $20,504,654 of foreign articles. Of the domestic articles, $79,088,760 were exported in American vessels, and $22,100,263 in foreign vessels. Of the foreign articles, $15,119,645 were exported in American vessels, and $5,385,009 in foreign vessels. Of American shipping 1,300,582 tons entered, and 1,400,517 cleared from the ports of the United States. Of foreign shipping 661,310 tons entered, and 630,996 cleared.

| | | |
|---|---|---|
| The registered tonnage, as returned at the Register's office, for the year ending December, 1835, is stated at | | 827,435 49-95 |
| The enrolled and licensed tonnage at | | 765,659 62-95 |
| And the fishing vessels at | | 117,699 03-95 |
| | Tons | 1,710,797 14-95 |
| Of the registered tonnage, there was employed in the whale fishery | | 105,599 16 99 |

The total tonnage of shipping built in the United States, during the year 1835, was, viz:

| | |
|---|---|
| Registered | 35,683 69-95 |
| Enrolled | 74,797 79-95 |
| Tons | 110,389 39-95 |

The greatest imports in any previous year, were in 1816, at the close of the war, when they amounted, to $147,102,000,—being $42,702,703 less than last year; and the greatest exports in 1807, when they amounted to $108,343,150, or $13,350,177 less than last year. Of the exports in 1807, only $48,699,592 consisted of domestic articles, whereas in last year the domestic exports amounted to $101,189,023. (The year in every case taken otherwise specified, ends 30th of September.) In 1816 the imports amounted to $147,102,000, being $61,814,416 less than in 1835; and the domestic exports to $81,394,160, or $19,794,863 less than 1835.

The tonnage which entered the ports of the United States in the year ending 30th Sept. 1835, was 1,300,582 tons, as stated above, being a greater amount than in any former year. This may from the seasonal schedule; but the increase would be still more apparent, where to one the excess which crept into the returns for some years previous to 1835, by including sundry vessels which had been lost, or sold out of the country. In 1835 eight vessels were thoroughly expunged from the list, which amounts for the great apparent falling off that year to the amount of shipping.

*A comparative view of the Registered, Enrolled, and Licensed Tonnage, of the United States, from 1813 to 1834, inclusive.*

| Years. | Registered Tonnage. | Enrolled & Licensed Tonnage. | Total Tonnage. |
|---|---|---|---|
| | Tons 95ths. | Tons 95ths. | Tons 95ths. |
| 1813.. .. | 854,291 76 | 513,233 64 | 1,367,527 40 |

*( New-york Journal of Commerce. )*

## CANTON PRESS.

Canton October 22nd 1836.

### Heavenly and Canton.

A small pamphlet entitled "Conference for the encouragement of a general monthly concert for," drawn up by Mess. Robbjason, Gutzlaff, and Parker, with an account by the latter Gentleman of the sums that have hitherto been raised in the

Ophthalmic Hospital in Canton, has been put into our hands a few day since.

We extract from it the following

"Viewing with peculiar interest the good effects that must likely to be produced by medical practice among the Chinese, especially as tending to bring about a more social and friendly intercourse between them and foreigners, as well as to diffuse the arts and sciences of Europe and America, and in the end introduce the gospel of our Savior in place of the pitiable superstitions by which their minds are now governed, we have resolved to attempt the foundation of a society to be called the "Medical Missionary Society in China."

The objects we have in view in the foundation of a Society of this description are:

1st, That those who shall come out as medical missionaries to China may find here those to whom they can apply for assistance and information, on their first arrival in the country.

2nd, That by this means their services may be made immediately available, while, at the same time, they may be put in the way of learning the language for the purpose of fitting themselves to practice in parts of the country to which foreigners have not hitherto gained free access.

3rd, We do not propose to *appoint* individuals to the work, but to receive and assist the medical men who shall be sent out by Societies formed for the purpose either in England or America. Being acquainted with the peculiarities of the case, our especial desire is to draw attention to the selection of men of suitable qualifications. • • •

4th, We therefore propose to receive any sums of money which may be given in aid of this object and to disburse them as shall be deemed expedient, until *the Society* be formed, so that the labors of those who engaged in the cause shall not be retarded.

Individuals, subscribing fifty dollars, or upwards, in one payment, shall be considered members for life; or fifteen dollars annually, members during the period of their subscriptions." • • •

"In addition to the *Ophthalmic Hospital* already established, other departments are equally needed, and each would fully occupy the time and talents of one medical person. Among these may be mentioned:

*A Surgical department*, for the treatment of cases requiring the interposition of the surgeon, as the removal of tumors, cure of ulcers, reduction of fractured and dislocated limbs, and the like.

*A Department for the ear.* A vast amount of good may be effected by curing the affections of this organ, which perhaps are as numerous as those of the eye, or even more so. The man who shall publish a treatise in Chinese, accompanied by a statement of facts, that shall correct the pernicious practice of barbers who introduce a sharp cutting instrument into the ear, by which violence is frequently done to this delicate organ, will deserve well of the Chinese nation, for it is a national evil.

*A Department for cutaneous affections.* In no country in the world, are di-eases of this class more numerous and aggravated; and added to the misfortune of being thus afflicted, if the disease of the sufferer is *suspected* to be malignant and contagious, he is liable to be deprived of his liberty, and immured during the remainder of life.

*A Department for diseases of females.* Daily experience has disclosed that these are very numerous, and in some instances exceedingly aggravated, and but little understood by Chinese physicians. And contrary to expectation, facts have demonstrated that the seclusion, characteristic of the upper classes of Chinese females, does not restrain them from applying to foreign practitioners with the hope of relief from these calamities.

*A Department for the diseases of children.* An inconceivable amount of suffering is endured by children in China, which in many instances might be avoided, but for the ignorance of parents and want of medical aid and advice. The merchants from distant provinces, who trade at Canton, are often attended by members of their families, and frequently have brought their children for medical treatment. We cannot suppose the fond parent will remain insensible to the obligations of gratitude when he returns to his own home, or fail to speak there of the *excluded foreigner* who had gratuitously restored his child to the blessings of health. We conceive there cannot be a more direct avenue to influence than will be presented in this department, and the impression may be far more enduring than that made in almost any other way; for while in the case of the aged, who receive medicine from the foreigner, the remembrance may quickly depart with them; it may be otherwise in respect to the babe and the youth, who are, by the hand of charity, rescued from a premature grave, or from diseases which, unrestrained, might extend through life."

We have the more pleasure in giving to these suggestions more extended publicity, as we are very certain that medical assistance given gratuitously to the Chinese, by really well informed surgeons cannot but raise the character of foreigners in the eyes of this nation, and point out practically to the common people that the men from the west are not such barbarians as the Chinese Government tells them. The superiority of knowledge alone, displayed by foreigners in affording relief where Chinese doctors cannot, must, in the course of time, cause a better feeling towards us; besides we do not believe the Chinese so hardened as not to feel grateful for the relief afforded them from painful and disgusting diseases.

Of the three gentlemen under whose name these suggestions have appeared, the two latter have already been active in, giving medical assistance gratuitously, the former in Macao during a number of years, and the latter here, the Ophthalmic Hospital being under his direction.

Applications for relief to this benevolent institution are as frequent as ever, and during the first nine months since it's establishment (4th November 1835) 1046 patients have been treated in it, 1785 for diseases of the eye, and 161 for miscellaneous diseases.

The expenses of this Hospital are defrayed partly by the Missionary Society to which Doctor Parker belongs, and partly by donations and subscriptions of residents and visitors here, and we hope that, as it is proposed greatly to extend the plan on which the Hospital has hitherto been conducted, Dr. Parker necessarily confining himself as much as possible to diseases of the eye, subscribers will not be wanting for the carrying into execution of this purpose.

We are convinced that nothing is more likely eventually to open the Empire to us, than such wisely directed charity.

---

A company of Actors, which performed at Honan a short time ago, and whose dresses were much admired for their richness, were a few days since engaged by the people of a village of the name of *Kow-hong* after the temporary theatre had been erected and every thing was ready for the play to begin when, striking up the music, the great drum burst, which accident being considered an unlucky omen, the actors refused to perform; but the people would not be thus deprived of their amusement and with threats and clamor compelled the actors to proceed. During the performance some fireworks were let off, and the bamboo shed in which the singsong was, took fire. The spectators too eager to save themselves, rushed out over a narrow bridge constructed for the occasion to lead to the theatre built over a river, which gave way under the too great pressure, and all those at the time upon it were precipitated into the water, and upwards of one hundred and twenty women and thirty men drowned. Of the Actors none lost their lives, but three chests of their wardrobe were either destroyed by the fire or stolen during the confusion.

---

A fire broke out in Canton in a street named Sun-shing-kai near the bridge Sun-mun-kiu on Sunday morning the 16th and is said to have consumed about 30 houses. The loss of property is said not to have been great.

---

By the *Panama* we have received a file of the New-York Journal of Commerce from which we learn that the war with the Seminole Indians in Florida and Georgia still continued, and that the Cherokee and Creek Indians were also about rising. The Indians destroyed the houses and property of the white inhabitants where ever they could. Strong bodies of militia have been mustered, and were about entering on active service, in spite of the season of the year.

These papers seem to confirm the accounts previously received of the defeat and capture of *Santa Anna* and General *Cruz* who are kept prisoners under a strong guard at Velasco.

The Texans seem to wish for the execution of Santa Anna as punishment for the cruelties committed by him during the war, which are represented as very great, but considerable allowance no doubt must be made for exaggeration in the accounts given by his enemies. The war in Texas is however by no means at an end; the Mexicans are making great efforts to collect an army in that unfortunate land, 4000 men of which are already said to be on the frontier, and an equal number was expected soon to arrive. Mr. Clay brought a Bill into Congress, to recognise the Indepence of Texas from Mexico, and it was thought probable that this bill would pass. That Texas will soon become a state of the Union is very probable, and in that case the United States will possess another slave state, it being apparently to enable them to be possessors of slaves, which the Mexican laws do not permit, that the Texans rebelled, and called this rebellion a struggle for liberty. We copy from the Journal of Commerce some interesting statistical notices, which will be found in another column.

---

We refer our readers to the memorial on Opium, translated from the Peking Gazette. It would appear that the plan of legalising the Opium trade has caused dissention in the Imperial Cabinet, and that the party opposed to it has for the present his Majesty's ear; whether the Edict we published in our last week's paper, has been a final one, is difficult to say, since the Viceroy's answer from here had at the time of it's appearing in the Peking Gazette, not reached the Imperial Court.

We are much obliged for the valuable contributions of Chinese literature, our Correspondents P. and F. favor us with, almost weekly, and are certain that they will be very acceptable to our readers, as they tend towards rendering them better acquainted with Chinese manners, habits and customs.

The *Richard Alsop* from London 29th June, whose arrival we noticed last week, brings no news of any political importance. Every thing looks peaceable. The sons of Louis Philippe had been paying visits to the Berlin and Vienna Courts, where they had been very cordially received. Their munificence was the theme of much admiration.

The crim. con. case of Morton v. Lord Melbourne was heard in the Court of Common Pleas on the 23d June, when the Jury returned a verdict for the defendant.

We understand that Lord Palmerston after a most careful examination of the nature of the duties performed by the British Superintendents in China, and of the objects for which they were into to that Country has come to the conclusion that a very considerable reduction may advantageously be effected in our establishment in that quarter of the globe. Despatches have already been forwarded to China, announcing the abolition of the office and salary of Chief Superintendent. The office is at present held by Sir Geo. Robinson, and the salary is £8000 a year. *Sun.* (*Canton Register*)

The above we have taken from the Canton Register, and are glad to see that the useless establishment at Macao, is at last taken notice of by ministers.

Mr Spring Rice said in the House of Commons on the 23d of June that Ministers intended to bring in a bill for the equalisation of the duty on West india and Colonial East India Sugar.

The application for an extension of the term fixed for the duty of 1s. 6d. on Bohea tea expiring on the 1st July, has only produced the extension of the term for the payment of duty on such Bohea tea, as should be cleared for consumption before the 1st of July, to the 1st of August. The Chancellor of the Exchequer said that he could not allow any greater concession to the importers of Bohea tea, because it would be a dangerous precedent so frequently to change duties imposed by law, and thereby endanger the commercial interests of many.

We find no news of much importance in the English papers from the seat of war in Spain. General Evans was stated to be much displeased at the treatment he received from the Spanish Government, and that in his remonstrances with the latter, he has intimated that he may be forced, on the conclusion of the first year's service, 1st July, to claim the protection of his Government, with a view to the return of the Legion to their own untry.

The Prince of Portugal was about to commence a tour through his newly adopted country.

---

*Canton Court Circular.*

Tsaou-kwang, 16th year, 9th moon, 10th day.

October, 19th 1836.

*Ke* the Poo-yuen issued and received official documents.

*Woo* an acting magistrate at Leën-chow and *Yang Te-chou* the Ching-yuen Yuën after having returned thanks for their appointments were admitted to an audience.

*Poo Kwăyin* acting *Hă-pae yuen* paid his first wait visit, he being about to return to his official duties at *Hă-pae*.

*Seun* a promoted Tong-che at Mun-chow paid his respects; being the first time after his recovery from a dangerous illness.

*Shaou* the Shin-ling yuën paid his visit and reported his arrival at Canton, in order to have his accounts examined.

O, the Poo-shing-sze, *Wang*, the Gan-cha-sze, *Leang*, a Sub Commissioner, *Ching*, the Fuh keang tsze hëën, *Chou*, the Kwang-chow-foo, *Lew*, the Nan-hae hëën, *Tsing Chesun*, a Professor of Hă-pae, *Wang*, a major of the Right Battalion, and *Woo Shang-hsin*, *Yen Wan*, *Fang Yew-shing*, *Shin Ching-he*, *Thin Kwăngsze*, and *Chang Ming* gentlemen holding purchased rank, all paid their respects to H. E.

---

## TEA TRADE.

A paper entitled "Combination of the black-Tea men" was issued from the Canton Register Press last night, and though we have alluded to the differences that existed between this body of men and the Hong-merchants in our two last papers, we shall now give the substance of the resolutions come to in Council of the Merchants of Black Teas, regulations which, if any of their body transgress, he is to be fined 1000 Taels.

"That on entering on a Contract, the Hong-merchants are to pay 3 tenths of the value of the teas, and for the remainder by instalments according to the terms of the Contract, within the year. That is to say, the Tea-merchants require credit to the extent of about one third, for the period of about 8 or 9 months, but are not willing to give any, or next to none, to the Hong-merchants.

The 5th article is in the following words. "When all the teas are arrived, whether the Tea-merchants weigh them or not, the money must be paid according to contract; there must not be any delay."

We give only the meaning of the first of the five resolutions, and the last verbatim, the three intermediate ones being of little or no interest to foreigners, relating chiefly to particulars of the manner of delivery of the Teas, and of the payment for them; but what strikes us as the most important is a clause to the above five resolutions to the effect that "if it appears in the settling of accounts, a compliance clearance is not made, the masters of the "new Teas will not be forthcoming."

This in other words, is a refusal on the part of the Tea merchants to sell to any Hong that may be in debt to them, and if the former can carry their resolutions into effect, cannot but fail seriously to inconvenience several of the Co-hong. We suppose that it is for self-protection that the Tea merchants have published these resolutions, as it is more than probable that in former years the shroffs or money dealers demanded too high a rate of discount to change the promissory notes of several of the Hongs. Such discussions cannot but tend to shake the stability of the Co-hong, and it being smiled by outside merchants and smugglers on one side, and by the Tea dealers on the other, the probability is in favor of it's succumbing to these combined causes at no very distant period.

---

We have received, too late for insertion in our paper, a correct translation of the black-Tea-merchant's resolutions, which we shall publish in an extra of this day's date, of course without extra charge.

---

## OPIUM.

Peking Gazette 8th moon, 6th day, June 19th.

---

Your servant Wang Ping, Imperial Censor and Examiner of the Public Morals, kneeling presents to the following report respecting Opium smoking in the army, and requests that Boards may instantly be ordered to frame new laws strictly prohibiting the practice; so that the Soldiers may be awed into obedience. Looking up I request your Majesty to examine into the subject.

Opium is brought from the outer Sea and spread widely over the whole country. The Imperial will has been more than once received enjoining the principal Officers of the several Cities vigorously to to investigate and prohibit the practice (of smoking Opium); altho' these Officers have not been wanting in energy to enforce the prohibition, the infection has taken such deep root, that it is extremely difficult to eradicate it.

I, your servant, am well aware that they are only idlers and vagabonds without any settled occupation who smoke Opium; scholars, mechanics, and laborers each perform their daily avocations in a quiet and proper manner. The former class of persons give no thought to preserving their bodily health, while they are wilfully ruining their morals. The evil injures only themselves.

I will not speak of those wretches, but of the soldiers who annually cost the country several thousands for their support.

Their pay and rations are most liberal in order that they may exceed in strength and courage, and be prepared, in the hour of need, to exert those qualities in defence of their country. The consequences are of vital importance; yet they have daringly adopted the vicious custom, and actually smoke the thing! I dare not contemplate the disgraceful scene that may be expected to ensue when they are reviewed. They have no strength left them. In their bodies, they resemble the pigeon, and in their countenances, the black goose. It cannot be expected that they will be able to fight; they will only draw down contempt by their ridiculous efforts. It is absolutely necessary that the officers &c. immediately examine into the truth and take early means to arrest the progress of the custom.

I, your servant, again request Your Majesty to order the Boards to deliberate on the subject, and to publish a law visiting the crime with the utmost severity; and to impose, upon the military officers, the duty of strictly executing that law, and of destroying, driving away, and impeding the pernicious custom in the Army.

I, your Servant, am deeply impressed with the importance of this subject, and as in proper, hasten to lay before your Majesty this prepared report.

The Imperial Will has been received.

"It is recorded."

F.

### OFFICIAL NOTICE.

CONSIDERABLE inconvenience and public expense having been incurred, by reason of the improper conduct of certain masters of British merchant vessels in wilfully leaving behind in this place, men belonging to the said vessels; Notice is hereby given, that this practice is contrary to Law, and that they Offence may be prosecuted by indictment or information at the Suit of His Majesty's Attorney General in the Court of King's Bench at Westminster, as if it had been committed at Westminster in the county of Middlesex, and it is now declared, that the Superintendents will take measures to institute proceedings against any master or masters of British merchant vessels who offending herein in future.

By Order of the Superintendents

EDWARD ELMSLIE.
*Acting Secretary and Treasurer.*

On French and other Foreign vessels they are slightly varied. Bricoliers ships are charged only about @ 1300 in lieu of measurement &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—are not in much demand, most articles being excessively dull.

WOOLLENS.—Camblets have declined considerably during the past month, owing, we hear, to some very cheap sales from second hand.

RICE.—The weather has continued favorable, & prices same as last week.

BETELNUT.—has, after the cheap sale we noticed last week, again rallied, and may now be quoted at @ 4.

TIN.—does not rise in proportion to the higher outports.

LEAD.—without alteration

Most articles of Imports from Europe and India are very dull, and hardly any thing doing.

COTTON.—several sales of Bombay Cotton have been made within the week; upwards of 3000 Bales of Bombay at from 9 @ 11.2 and several parcels of Bengal at from 9 @ 10.4, but there is little demand for any but the fine qualities, the lower descriptions of Bombay and Bengal are nearly unsaleable.

OPIUM.—The market has been very inactive for the past week, but holders being firmer, our quotations show an advance on previous prices. Some sales have been made at these prices, and the deliveries continue tolerably good, being to the 15th.

| PATNA. | BENARES. | MALWA. | TOTAL. |
|---|---|---|---|
| 232 | 156 | 665 | 1053. chs. |

Nothing further has transpired regarding the admission of Opium to duty, of which many parties are still very sanguine.

### EXPORTS.

SILK MANUFACTURES.—continue at high prices, and shipments to the United States have been considerable.

RAW SILK.—has rather declined, but the fine chops are still held at comparatively high prices.

TEA.—The prices appear to be nominally the same as last week, little doing. No market price has yet been made for the season. Bohea Congous are reported to have been sold at 26 @ 28 Dollars per picul, equal to 42 @ 45 on board, though we do not put much faith in this report. Canton teas are said to be on the decline, and probably are to be bought under the quotations.

# CANTON PRESS EXTRAORDINARY.

## OCTOBER, 22ND 1836.

In our paper of this morning we mentioned having been favored with a correct copy of the five regulations of the black-tea merchants, from which it will be seen that they are somewhat differegt from what we stated them to be on the authority then referred to. The document proves that the Tea-merchants are acting in concert, and their regulations are not much more than a revival of old rules, not lately acted on; with the exception, we presume, of the second which seems an innovation, and cannot possibly be acted on.

---

*Declaration of five regulations adopted at a public meeting of the merchants trading in the Woo-e (Bohea) Teas.*

---

1st. The merchant, for every kind of Tea which he sells, shall stipulate that three tenths of its value be paid in advance-money, and within five days after the contract is ratified; and the whole of the remainder, according to the terms of the contract, must be paid within the current year, excepting three tenths, which must be liquidated before the second day of the second month in the ensuing year. Each of the parties (the buyer and seller) must have a copy of the contract.

2nd. On the delivery of the tea, if any of it is found damaged, the same shall be replaced with good: the whole chest is not to be returned.

3rd. From each 100 taels of unbroken dollars 2½ are to be deducted, leaving a full balance, according to the true standard, of 97½ taels. All must conform to the same just rule, without the slightest deviation.

4th. The money must conform to the received currency; when any copper or lead is found in it, the money must be exchanged; if the sum exceed $100, it must be exchanged within five days; if less than $100, within ten days No excuse can be admitted for a longer delay.

5th. When the tea has been delivered to the Hong-merchant, though he may neglect to weigh it, the money must be paid according to the contract, without delay.

The five regulations are in accordance with established usage, and seem, on deliberation, to be well suited to the occasion; they ought, therefore, for ever to be complied with. Should even any (Hong-merchant) not clear his accounts in due season, musters of the new teas must not to be sent to him. Should any one (of our own number) presume to set aside the regulations, it is herein agreed that he shall, whether a principal or subordinate merchant, forfeit the sum of 1000 taels, which shall be paid for the public use of the merchants in this trade.

Given at a public meeting, held on a lucky day in the 8th month of the 16th year, of Taou-kwang. (1836.)

## LITERARY.

*( From the Indo Chinese Gleaner. )*

### JAPAN.

ACCOUNT OF A SHORT VISIT TO JAPAN IN 1818

"On the 17th of June, we stood in for Jeddo Bay, and having joined company with some Junks, which appeared to have the same destination with ourselves, were at sun set, close in with the land, without having been recognized as a stranger; this gave me much pleasure, as it was my wish to push direct for the capital, and I flattered myself with the hope of being by day light at the gates of the Kubos' palace; but falling calm in the night, we drifted near a rock, and were necessitated to anchor and await a breeze. At day light, we were visited by many boats, being within two miles of several populous towns and villages, and in the course of the morning received the visits of many Officers of Government, and especially of two persons, who from their gravity, and the profound respect paid to them by all others, I imagined to be of high rank: I made known my wish to proceed to Jeddo, and acquainted them, that the object of my visit was to obtain permission to return with a cargo for sale; the wind and tide being against us, they advised me to remove into a neighbouring bay for shelter, and offered a pilot and tow-boats which I readily accepted of: aware that we should have to await news from Court, from whence we were upwards of sixty miles distant.

"I was requested to allow the arms and ammunition to be landed, and subsequently, to unship the rudder and send it ashore; knowing that it was customary to do these things at Nangasaki, I complied without hesitation, but declined dismantling the vessel on account of the loss of time, which so doing might occasion, however, I willingly landed the spare sails.

"We are encircled by twenty small boats, fastened to each other, at the distance of a few yards from us, and beyond them by about sixty larger guard boats and gun boats, besides two or three Junks, equalling our own vessel in size, and mounting several small guns. Often our guard afloat amounted to a thousand men, and it was never less than half that number; it is incredible how good a look out was kept up from each boat, and how narrowly all our actions were watched; every transaction was noted down, and drawings were made of every object which attracted notice.

"At first our visitors were too numerous and too constant, but after the first day strangers were kept from us, and not even allowed to come afloat, however, the shore used daily to be crowded with spectators, a very great majority of whom were females.

"On the fourth day of our stay in the bay, I was gratified by a visit from two interpreters, one of whom was a perfect master of the Dutch language, and the other knew something of Russian, each of them also could speak a little English, but all our communication was in Dutch; by this medium I was enabled to explain my motives for visiting Japan, more fully than I had before been able to do, and at the same time to give a fuller account of myself.

"Captain Gollovin's name being mentioned, they inquired very particularly if he was at Ochotsk. It was also asked, if the English and Dutch were at present on good terms, and replying in the affirmative, the interpreter remarked that he understood there had been peace throughout Europe during two years.

"On saying that, I hoped permission would be granted for the vessel to return the next year, it was remarked that the laws of Japan were very hard, and that a similar request made thrice by Russia, had been negatived as often; on taking leave, they said, that if I would allow them, they would do themselves the pleasure of calling on board daily during our stay: nothing could gratify me more than their doing so. I sat on the deck with them as most convenient, though coming on board they begged me to be seated: most of our visitors used to amuse themselves by attempting to how to us in the same manner as we did to them.

"The following day about noon, we observed the arrival of a Norimor at the Governor's house, and imagined it contained some great person from the respect shewn it in passing. At two o'clock, the interpreters favored us with a second visit, and inquired the place af birth of each person on board; they also inquired very minutely concerning my family and the several members of it.

"On producing some vaccine scales received at Malacca, by the kindness of Dr. Chalmers, of the Honorable Company's Medical Establishment, I was happy to find that the cow-pock was known in Japan, where the advantages attending it had been made known by Captain Gollovin about 1812, and its introduction was ardently desired.

"Nothing however could be done concerning a trial of the vaccine, without advice from superiors. Observing that one person was desirous of having a few grains of our pushy for the purpose of planting it, I brought forward a variety of garden seeds, and requested his acceptance of them, but was told that the laws of Japan were so hard regarding intercourse with foreigners, that if we did not obtain permission to trade, they would not be allowed to accept of any thing from us. In the course of the visiting I took another opportunity of saying, that even if we were refused permision to return, I hoped that we would be allowed to leave behind us the vaccine matter, together with the sheep' pigs, goats, and seeds, which were expressly taken on board for the purpose of being left wherever they might prove to be of use: I also said, that it would afford me pleasure to leave with them newspapers, and other publications relating to the political state of Europe, as well as a few maps and books on geography, seeing they were particularly anxious to acquire information on these subjects, and able to understand English books, by the aid of a Dutch and English Dictionary, which they always brought on board with them.

"The name of the King of Holland was asked, as well as that of the family to which he belonged; in answer I informed them that the was formerly Prince of Orange, and had returned home after a residence of about 20 years in England; his age as well a the age of his son, was asked and led to the mention of the recent marriage of the latter with a sister of the Emperor of Russia. The name of the King of France, and the present abode of Napoleon were inquired into on pointing out St. Helena, it was asked if the English yet kept possession of the Cape of Good Hope; also if we yet held Java; saying, that we did not, they inquired if we had not had possession of it; I said that we had, as well as of all other Dutch settlements which were occupied when the French over-ran Holland, but that they were all restored as soon as the Dutch regained their independence. Reference having been made to the return of Napoleon, and to the battle of Waterloo, some particulars were necessarily entered into which excited much interest, especially an enumeration of the different states who were there combined against France.

"They said, that they had heard that Captain Gollovin was to be the Governor of Ochotsk this year, and asked if such information was correct; from the desire they have to ascertain this point, I am inclined to think that they rather direct the neighbourhood of one so intimately acquainted with their northern possessions, and their natural character and resources, as he is.

"On entering the cabin in order to look at it the interpreter asked if I had a barometer: I had not one, but showed them the instruments which I had, and found them well acquainted with their names and uses: they remarked that instruments were made much better in London than elsewhere.

"The next morning a supply of fresh water was brought alongside for the purpose of filling up our water casks; the casks having been gauged before, I imagined they were now trying for the purpose of ascertaining more correctly the number of days we had been at sea, particularly as the number of bankers handed on board was counted; had it not been for this consideration I would have declined the water, wishing it to be most clearly understood, that my only object for visiting Japan was to obtain permission to trade; at the same time I looked upon the water being filled as an omen of our approaching departure.

"The persons who accompanied the boats with water, were more talkative than usual; they showed me a string of beads, used like the rosary as a help in devotion; and the pearls of a sword-handle; they likewise read the characters marked on a Canton tea chest; told me Japanese names of many articles, and spoke much of the manufactures of London, which place they seem to consider as the seat of the arts.

"About noon, the interpreters repaired on board, and after the usual compliments, produced some papers, and said in an official manner: 'You have applied for permission to trade to Japan; I am desired by the Governor of this place to inform you, that this permission cannot be granted, as the laws of Japan interdict all foreign intercourse, with the exception of that which already exists at Nangasaki with the Dutch and Chinese, and that the Governor therefore desires you will sail with the first fair wind.'

"After a little desultory conversation I was remarked from another paper by way of explanation and in a demi-official manner, that in August, 1803, an American ship had arrived at Nangasaki, and the following November, an English ship from Calcutta had visited the same port, with views, similar to our own; also that in 1806, the Russian Embassy had been at Nangasaki, and since then another ship of the same nation had visited that port; a third Russian vessel had applied in 1813, at Matsmai: all these vessels having been dismissed, we could not be admitted, therefore it was better not to return as we would get nothing by it." The bluntness of such a caution would have displeased me, if I supposed they were aware that it bore a threatening import, but as it was, it excited but a smile.

"An offer was made of boats to tow us out of the bay when ready for sea, and it was asked what flag I would hoist as a signal when ready: having none other than the ensign and jack, which I did not like to display, surrounded and guarded as we were, I said, I would hoist a boat's sail instead of a flag; this appearing strange to them, they asked why I would not hoist the flag, and I merely replied, that I could not as we were then situated.

"The name of the Governor of Ochotsk was again asked this day, and they appear to be very suspicious of the intention of Russia respecting their detention of Captain Gollovin, so much so that were I to assign any specific cause for not being allowed to trade to Japan, independent of the national policy, it would be a wish on the part of that Government not to give umbrage to Russia by conceding to others a favor which had been denied to them; indeed, this was assigned as the true cause of our dismissal in a manner almost official.

"Expressing a hope that I would be allowed to leave with the interpreters, some trifling remembrance, they answered that the laws of the Empire were so strict, that they could not receive any thing whatever.

"In the afternoon, our arms, ammunition, rudder, &c. were returned on board, and the following morning, having made the signal agreed upon, we were towed out of the bay by about thirty boats; on none of the gun boats weighed. I shewed our colours for the first time as soon as clear of the bay, and when in a fair way, dismissed the tow-boats, and our friends who had accompanied them with three hearty cheers; for all on board were tired of our restricted stay; but I believe that all parties regretted the circumstances under which we were quitting each other.

"The shore was not only thronged with spectators, but many hundreds came by water from the neighbouring shores, in order to gratify their curiosity by a sight of the strange vessel. We were scarcely quitted by the tow boats, when some of these persons approached very near, and at length accepted our invitation to come on board; our decks were soon thronged in such a manner that I was glad to see a guard boat pull towards us for the purpose of dispersing the crowd, by whom it was no sooner recognized than they fled in every direction; however, many quickly returned, and when we would point out a guard boat afterwards some would merely laugh and say, that they did not care for them; whilst at other times they would quit and give us to understand that they were afraid of being destroyed.

"In the course of that day and the following, we had not less than two thousand persons on board, all of whom were eager to barter for trifles; amongst other things I had the pleasure af obtaining some little books and other specimens of the language, and distributed amongst our visitors two copies of the Chinese New Testament, together with some tracts written in Chinese, which language appears to be pretty generally understood in Japan.

"If inclined to set any value on ideas which can be formed concerning the hearts of men, steadfastness of men so accustomed to disguise their feelings, as we are informed the Japanese are, I would say with much confidence, that our dismissal was universally regretted; this idea does not arise so much from any thing which has been said, as it proceeds from a remembrance of the eager satisfaction with which every body used to examine the several articles of my dress, particularly such as were of a fine quality, and the desire very generally expressed of purchasing similar articles on our return to the port."

## ORIGINAL.

CURIOUS INSTANCE OF FIDELITY AND FILIAL PIETY.

In that celebrated Chinese novel, named *San-Kuo-Che*, or the Annals of the three Kingdoms are contained narrations of such a curious kind, that, could the whole book be translated into English, it would prove highly interesting and amusing. No work probably better illustrates the nation at the period, the 3d Century, than the one in question, and the customs were which then distracted the Empire, give opportunities of judging of the people of that time, in connexion with their military talents, stratagems in battle, and courage in the field.

One of the most celebrated persons who figure in the history, is Heuh-Tsu, and in him is exhibited a remarkable case of the success of well directed talents. Of poor origin, he raised himself to the command of a large force, at the head of which he united himself with the fortunes of the last Emperor of the Han Dynasty, and finally became Emperor of the dynasty which succeeded it, known in history as the *Hou-Han* or Han restored, under the title of Chaou-Lieh-Tu, literally the Emperor of dazzling splendour."

The following story is one of many related in connexion whith him.—Having been defeated in battle by his adversaries and obliged to fly the field, he was overtaken by night, and espying a light at a distance, he rode up to it and discovered it to proceed from a cottage inhabited by a hunter named *Lew Gan*. He alighted from his horse and demanded admittance and refreshment. The host welcomed him, and, saying he had no provisions, departed for the purpose of procuring some. In a few moments he returned, and, placing food before Heuh-Tsu, desired him to eat. Faint and exhausted, the warrior partook eagerly of the food provided, at the same time asking what animal's flesh it was. *Lew-gan* replied: "it is wolfs flesh."

Heuh-Tsu having satisfied his appetite, returned thanks to his host, and retired to enjoy a short repose. Scarcely had the day dawned, when he arose and entered an outhouse, where his horse had been secured, to prepare him for a renewal of the journey, when to his horror he perceived, lying across the manger, the mangled body of a female. He instantly returned to the Cottage, and roused his entertainer, of whom he demanded an explanation of the sight he had witnessed. Bowing low to the ground, the poor man replied: "The flesh you ate last night, was that of my wife; unable to procure food, I destroyed her to preserve you; when I did so, I determined to quit my connexion, and follow the fortunes of the great General," but I forget the dependence of an aged mother, whose support rests solely on my personal exertions."

This example gives an idea in exact conformity to the Chinese taste. Fidelity and affection for the warrior, induced the hunter to destroy his own wife, to supply him with food, while his filial piety forbade him desert his mother in her old age and decrepid state.

P.

## PROSPECTUS

OF THE SANDWICH ISLAND GAZETTE AND JOURNAL OF COMMERCE.

It is proposed by the undersigned, to publish at Honolulu, Oahu, Sandwich Islands, a newspaper under the above title; to be edited by Stephen D. Mackintosh, and to be devoted to the interests of Commerce, Navigation, and Agriculture in the Pacific, and for the diffusion of information upon such topics as may be worthy of notice, by them, who, in this quarter of the world, or in a distant from it may feel interested in its welfare.

That such an undertaking as is proposed, will be arduous and difficult of accomplishment, needs not to be asserted; and it is equally obvious that the advantages of a public journal, at these Islands, will be seen and appreciated by all, who have intercourse with them.——By foreigners, residing at these Islands, the immediate convenience of a newspaper will undoubtedly be understood; and it is believed that as a medium of information to others abroad, this paper may prove acceptable.

Commerce, Agriculture, and Navigation, have already been quoted as the principal subjects, to which this publication will be devoted; but to its literary character, to include among its items, any thing of news, amusement, and general utility, which may offer itself, form the interest which may be open to its publishers. The resources of the Sandwich Islands, in a commercial point of view, as well as their history, prospects, and peculiarities, will afford materials for much interesting matter; while Shipping News, Foreign Intelligence, Advertisements, &c. &c. will add to its usefulness.

The Gazette will be published every Saturday, at six dollars per annum; payable at the completion of the third number. The first number will appear as soon as the necessary arrangements, now in progress, are completed. Communications for this paper, to be sent to the "Oahu Printing Office," and to be addressed to the editor of the S. I. Gazette. Should any communications be received which may be deemed inadmissible, they will be returned to the writer, upon application.

Contributions, Advertisements, and Subscriptions, are respectfully solicited.

STEPHEN D. MACKINTOSH.

HONOLULU, OAHU, MISSION HOUSE.

Sandwich Islands, July 19th 1836.

## SHIPPING AT WHAMPOA.

Wan, by Imperial appointment, Superintendent of maritime customs at Canton, &c. &c. proclaims to the Hong merchants for their full information.

It is authenticated that formerly when ships from the various foreign nations entered the Port, they were moored in the river near Whampoa; so that it was easy to examine them. They were not permitted to anchor so far away as Woo-yung where they could easily smuggle goods, thereby defrauding the revenue. I have before issued an Edict on this subject.—This is on record.

Now upon examination it appears that for the last few days the Tides have been high, so that there could be nothing to prevent the Foreign ships coming up to Whampoa; yet they have anchored at a great distance from it, thereby setting the established laws at defiance.

Uniting the circumstances, I issue this Edict for the Hong merchants' full information. On receipt of it let them all implicitly obey and hasten to inform the Barbarian Managers of the different nations' affairs of its contents. Let them order their ships, in obedience to the laws, to anchor near Whampoa, so that there may be no difficulty in examining them.

If there be any so daring as again to disobey the laws, I will immediately strictly examine into the affair and positively prevent the offending ships from either receiving or delivering cargo. They cannot plead in excuse that they have had no previous notice of my intention.

The Hong merchants, also, shall not escape unpunished.

Let them again order the Barbarians to obey the laws and remove their anchorage to Whampoa, and let them make a clear report to me (of their success) that I may examine and investigate

Do not oppose. A special Edict.

Taou-Kwang, 16th year, 9th moon, 15th day, October, 24th 1836.

Yih-Chung foo, the newly appointed Chaou-Chow Foo, is expected to arrive at Canton on the 19th or 20th day of the moon, from Peking.

*Canton Court Circular.*

9th moon, 15th day. October 24th.

Tung the Governor issued and received official documents.

Hew, a Mugestente of Tung Kwan, and chaou late ching yuen Yuen both paid his Excellency a visit of congratulation on his return to Canton.

Chung, a newly appointed Kuh-kang Yuen and Tseung Lagany who has passed examination for a magistracy both reported that they were stationed in the Foo-yuens, office to receive petitions.

Woo-Shaou-yang (Howqua) and Loo-Ka-kwang (Mowqua) both Hong-merchants, knocking head presented a foreign petition.

Ke, the Foo-yuen left his Office early, and paid a visit of congratulation to Tsing on his appointment as Superintendent of the Salt department at Shantung. He then returned to the Office and issued and received official documents.

8th moon, 16th day. October 25th, 1836.

Tung the Governor issued and received official documents.

Shaou acting Shin-ling Yuën and Heaou a newly appointed Tsin-hwa Yuën reported that they were in waiting to attend on their Excellencies to worship the moon which was eclipsed.

9th moon, 17th day, October 26th, 1836.

Tung the Governor issued and received official documents.

Tsin-Kung-loo a newly appointed Yen-che-sze reported that the Gan-cha-see had ordered him to proceed to Pwan-yu to survey the Suburban streets of the new City.

Wang the Gan-cha- see, Bhoo the Kwang-chow-foo, Lew acting Man-hae-heen, Tsen the Pwan-yu-yuen, Kwŏ acting Kwang-chow-heë, and Lieut. Gan, Ying reported that all the criminals were executed.

# CANTON PRESS,

29th October 1836.

It is a fortunate thing that our cotemporary's belief, that the Emperor's answer to one of the censors, with regard to the importation of Opium, published by us in an extra sheet on the 13th of this month, was a *hoax*, does not make it one, or we should have been in the awkward predicament of having given false information to our readers. We are as liable as others to be misled, but according to all we can hear on the subject of this edict, it appears that in many copies of the Peking Gazette from which we extracted it, it did not exist, whilst it was in others, from which we infer, that the Copyist, on receiving this Edict, which had probably come from Peking by express, inserted it as important information into such Gazettes as had not yet been circulated. It is evident that it must bear a later date than the Gazette alluded to, which was of the 24th July.

We learn from Chinese merchants, that a communication from Peking has been received by the Governor of Canton, to the effect that, "two censors having given in memorials against the importation of Opium and his, the Governor's, report on the same subject being in it's favor, he should revise his report."

We are charged by the Canton Register with having indulged in a *sneer* at his practice of charging extra for information of importance to the public. We only stated that we did not make any such charge. We, of course, do not blame the Editor of the Canton Register for doing with his own what he likes, but this subject having been brought forward by him, we give it as our own individual opinion, that, in case of it's being desirous to convey information to the public before the publishing day comes round, the subscribers to the Editor's paper ought to have such news gratis. This has been, and ever shall be, our mode of proceeding.

In another part of our paper will be found a Prospectus of a weekly paper about to be started at Honolulu, under the name of the Sandwich Island Gazette. It is with much pleasure that we are thus the means of giving extended publicity to this Prospectus; and this new paper, if judiciously conducted cannot fail to convey to distant readers much interesting and novel information about these Islands and their inhabitants, of which hitherto but little is generally known, and most of the descriptions of which, of much publicity, have been given by travellers whose stay in those Islands was limited to a short time only.

We have been favored with the perusal of a letter from Captain Steel of the Adelaide, a vessel which left here for Bombay in July last only a few days before the Hurricane, and for the safety of which fears were entertained. His letter is dated Batavia 19th September, and we extract from it the following. "I am sorry to inform you that on the 24th August, off Bas-elan, the ship was struck by lightning which shivered both fore and main topmasts, topgallant and royal masts, and has done some injury to the lower masts, but will, I hope, take us safe to Bombay. I have put in here for new masts, and shall sail again this evening or early to morrow morning for Bombay. This, together with the Typhoong on leaving China, makes it a very unlucky voyage for me.

The Rice crop has partly been cut, and partly is now cutting, and turns out, at least about Canton, a very abundant one.

We give the translation of an Edict from the Hoppo, from which it will be seen that ships in future are not to lay lower down in Whampoa reach, but are all to lay near Whampoa, under the pretext of preventing smuggling.

Much inconvenience has been experienced during the last five or six days, by a prohibition to Passage and ships boats, to land any kinds of goods whatsoever. It has hitherto been the practice to ship small articles, bought of Outside-men, by these conveyances to Whampoa or Linti and Macao, the sellers giving to the buyers a certificate or chop that the duties either have or are to be paid by the latter. We are at a loss to account for this strict measure, unless indeed the tidewaiters wish to raise the former demands for connivance at this practice, in which case, we presume, this prohibition will soon be removed.

## STATEMENT OF THE BRITISH TRADE AT THE PORT OF CANTON

*From the 1st April 1835 to 31st March 1836.*

By Order of the Superintendents of the Trade of British Subjects in China.

EDWARD ELMSLIE,
*Acting Secretary & Treasurer.*

We had been for some time in considerable doubt, as to whether the very valuable statement above published, was to be given to the world; that of last year having been somewhat roughly handled by our cotemporary, as well as ourselves, and it being generally understood that it was, to say the least, very far from correct. As this statement has however now come to us officially, so to speak, for publication, we give it to the world "with all it's faults and all it's errors," promising only that it must stand or fall by it's own merits, and convinced that the intelligent mercantile community will be able justly to appreciate the *boon*. On looking over this document we can not fail to observe that despite the ridicule heaped on the minute correctness of last year's statement, this is distinguished by it, in at least an equal degree. We doubt not that, in correctness, each rivals the other. Of the utility of this document we do not pretend to judge; it is doubtless meant to record correctly the amount of the immense trade carried on by Great Britain and British India with the Celestial Empire; and, if this could be obtained fully and correctly, it would no doubt be valuable to all now engaged or to engage in the trade. We fear however that it is not so, and that it can be taken but as a guess, in many cases a wild one, and that it is not to be regarded as a guide, in which, if correct, would consist it's value.

This may in part not be the fault of those who have undertaken to compile it, as in the first place, supposing the fulness and generality of all returns; and this in a trade such as this it were foolish to hope for, there is no means of checking the statements given in, many of which must be taken by guess. Much of the trade is with Lintin alone, or Macao, and no small part is conveyed in different bottoms to Whampoa, from what it reached the former place in; much British trade is conducted by Americans, Parsees and others; and the consignees of British Ships, who give in a valuation of goods coming and going in British vessels to them, can but give an approximation to the value of their Imports and Exports; so that, even presuming each to be actuated by a sincere desire to add his quota of information, the aggregate must be of doubtful correctness after all.

Diligence will however, there can be no doubt, effect much, and if we dispute the correctness, we must at least accord it the meed of minuteness, and this is something. So minute indeed are the valuations, that the subdivisions are carried far beyond what we know to be the practice of the merchants of the place to indulge in. Opium, an article which rises or falls by $ 10 or 5, is quoted to cents! *ear one three ounces*: all is on the same plan. Cotton, Longella, Broad cloths etc. etc., all are carried on the same scale of wondrous minuteness to the Dr. and Cr. of the account. We shall add a few remarks as to these quotations, and taken, as they are supposed to be, from the individual returns of the merchants, we cannot but be astonished at the countless errors in the valuation and computation of articles known to ourselves; those acquainted with the trade, can, no doubt, point out many more.

We shall commence our remarks on the prices at which the different goods are valued, and which we find very erroneously stated for many articles, but shall point out only the most important.

Ebony is quoted at $ 6 69—almost one dollar higher than has been given for the best quality. The price has been between $ 3 @ 6 during the year, and ought therefore not to have been stated at more than about $ 4½.

Saltpetre was during the greatest part of that year at very low prices say at $ 6½ @ 7, in the statement it is valued at $ 9.74.

The quotation for Iron at $ 3.7—is much too high, having ranged for Bar Iron at between 2 @ 2½—and of this the bulk of the importation consists. Nailrod, Hoop &c. having been at between $ 3 to 4.

Cotton Yarn is quoted considerably below it's real value during that year, as we see from the price current that it's price ranged between $ 40 @ 48.

Longells instead of 13.33—ought not to be quoted at more than $ 9 @ 9½

Broadcloths again are at too low a valuation. Taking the average length at 11 yards and it's average price $ 2, the value would be about $ 33 per Piece and not 27½.

Coppers for export ought to have been valued at least at $ 19, instead of 16.95. The imported Copper is quoted at 33.94; it would have been well to have named it sheathing Copper, whence the difference of price.

Kittisols we suppose means Quitasols the Spanish or Portuguese word for Umbrellas.

The quantities of many articles we find to be misstated; for instance those of British manufactured goods, where we find of Cottongoods (all sorts), the imports to be valued at $ 775,466 only. This may possibly be the value of such as were imported in English ships, but a large quantity no doubt has been imported direct from England in American bottoms, and ought to have been included here. All the imports of manufactures are given at much less than they have been, and give by no means a just idea of the consumption of British goods in China.

The quantity of Longells imported in the last year is here stated at 21,805 Ps., probably only one tenth of the real quantity. The Company's imports alone, in former times were about 150,000 Ps. annually, exclusive of private and American trade.

The imports of Tin are guessed in this document at 32,510 Piculs, which is probably five times as much as the real amount imported.

This same remark as to omission applies to Iron, Lead, Tinplates, Steel, etc. all which articles are imported in large quantities by the Americans. Quicksilver has been omitted altogether, of which the importation during that year has however not been very considerable.

The importation of Spanish Dollars appears to us by far too small.

Of Teas we find the quantity given in this statement, to exceed that given under the sanction of the British Chamber of Commerce, an institution said by some still to exist in Canton, and which statement, whatever the title be under which it appears, is considered carefully drawn up, by about 1 700,000. As to it's valuation in the statement we find it to be a little higher say about 4½ on an average than we make out by a careful calculation of which we gave the result in our paper of the 11th June, which was, that last year's Teas had been shipped at a fraction more than 24 Taels per Picul or at $ 33½.

Vermillion. The export of Vermillion we suppose must be greatly exaggerated, being stated at 12,010 boxes value 705,000. We hear from well informed persons that the exports of this article probably does not exceed 3 @ 4000 boxes per annum.

The quantity of soft Sugar exported is by far short, we believe, of the actual exports, as likewise that of Cassia, of which in the year before upwards of 13,000 Ps. were exported from here to Sing. alone.

Gold Jewels, trifling an article as they may be, are not so very trifling as here represented, their value being stated at $ 1150 only.—We have no means of knowing it to any certainty, but we believe that the exportation of small quantities of gold Jewellery cannot fall short of $ 50,000 per annum. That of Silverplate is very considerable.

We could, we find, add more, but *jam satis est*: it is useless to break a fly upon the wheel, and as the rumour is abroad, that the establishment whence this interesting document emanates, is to cease, or merge into a less imposing one, we desist from the unpleasant task of criticism of this it's last official; We as well as the rest of the foreign public, wish to see no attempt on the prejudices of the Chinese, save such as may bring respect to foreigners, which we fear this establishment has failed in creating, and they hope, that, as it's course has been short, so may be it's memory, and that the motto of Junius: *sine nomine umbra*, may no longer be applied to the representatives of the name and honor of Great Britain.

### OFFICIAL NOTICE.

CONSIDERABLE inconvenience and public expense having been incurred, by reason of the improper conduct of certain masters of British merchant vessels in wilfully leaving behind in this place, men belonging to the said vessels; Notice is hereby given, that this practice is contrary to Law, and that the Owners may be prosecuted by Indictment or Information at the Suit of His Majesty's Attorney General in the Court of King's Bench at Westminster, as if it had been committed at Westminster in the country of Middlesex, and it is now declared, that the Superintendents will take measures to institute proceedings against any master or masters of British merchant vessels who offending herein in future.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd „ „ „ 1200 do. & under 1600 „ 0.7221091 „ „
3rd „ „ under 1200 do. 0.566[illegible]341 „ „

N.B. The cubit in 14½ inches; measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products—The largest class pay from $ 430 to $ 4320; 2d class from $ 3760 to $ 3760; 3rd class from $ 3760 and under. The Cumshaw or Present Fee is paid by all vessels 1600 Tacls or $ 2223. Linguists fee $ 173½ and Comprador's fees $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

Our market continues dull for most descriptions of imports particularly of European Manufactures, and we have no alterations to notice since last week. Partly this inactivity is owing to no prices having yet been fixed between sellers and buyers for the two chief exports, TEA and SILK.

WOOLLENS,—particularly Longella are even duller than before, and have declined in price.

RICE,—the abundant crops in the neighbourhood of Canton have caused an unwillingness in the buyers. We hear of some very low sales at Macao.

BETELNUT,—has declined in consequence of two or three importations.

COTTON,—continues without improvement, except for the best kinds, but the low prices seem to encourage consumption, as the deliveries have been large within the last fortnight, so that we trust prices have reached their lowest. Sales of both Bombay and Bengal have been made within the week to some extent of inferior kinds at our lowest quotations.

OPIUM.—Our quotations must be considered almost nominal, as within this day or two the smuggling boats have stopped; one cause assigned for the interference of the Mandarins, is the expected arrival of Commissioners from Peking; but we have also heard that there is an Edict just come down regarding parties engaged in the trade, which may have given rise to this apparent vigilance to suppress smuggling.

The deliveries to the 22nd were.

| PATNA. | BENARES. | MALWA. | TOTAL. |
|---|---|---|---|
| 313 | 236 | 867 | 1416. chs. |

### EXPORTS.

RAW SILK.—Though we do not perceive any increased anxiety in Exporters to purchase, prices continue as high as before, though very few parcels, we believe, have changed hands at our quotations.

SILK PIECE GOODS.—Large Purchases having been made and considerable contracts entered into, prices of most descriptions have risen to our quotations, which will be found to be generally higher than before; for good articles contracts cannot be effected at less, though there are some ready made in the market at lower rates.

TEA.—The merchants have this day offered prices to the Tea-men for the Pekoe Kook Oongcow, which would not admit of their performing their contracts with foreigners, without heavy losses, and these prices the Tea-merchants have declined. The enslavement of the question appears therefore as far off as ever, and cannot be effected for some time. The only way to bring the Tea-merchants to terms would be an absolute cessation of the trade, as regards Tea.

## LITERARY,

*( From the Indo Chinese Gleaner. )*

### ARRANGEMENTS FOR THE RECEPTION OF A NEW VICEROY AT CANTON, IN 1812.

The following paper, though of an old date, has not yet, so far as we know been made public; it is therefore presumed it will not be uninteresting to some of our readers

Copy of a letter from Tsuen tajin, the new Viceroy of Canton, to the principal Foo and Heen in the province. The letter was dispatched from Peking on 22nd of the 11 moon, and arrived at Canton on the 11th of the 12th moon.

"On the 18th of the 10th moon, I went from Che-keang to Peking; provide men and horses for my own accommodation at every stage. Making the utmost haste I shall be at the boundaries of Canton by the middle of the first moon (of the 17th year.) I now send a statement of such arrangements as will be proper;—as follows:

"1st It has hitherto been customary to send to meet a Viceroy as far as Gan-chow, or more distant to Shi-tsing: at present only send one Woosum-poo with four attendants to Nan-heung, there to wait. The hire of the boats in going and returning, their provisions, and expenses, do you supply. It is not allowed to take the smallest possible cash from the districts on the way. If this be not obeyed, it will be most rigorously examined into.

"2nd. The expense of the boats from Nan-heung to Canton, I will myself defray. The said district may not make any inquiries about it. The places that we pass through are not permitted to present any provisions, wine, &c; it is a vulgar custom which I entirely abolish. If presents be, they will not be received. If any thing be given privately to the household or officers in waiting, they will one and all of them be broken.

"3rd. Those who come out from the city to meet me, are not allowed to go further than Tsing-yuen. The officers of the several districts are not allowed to go beyond the boundaries of their districts. If the Taou-tae leave the city ten Le, it is sufficient. Only four secretaries are allowed to come and receive my first proclamation. Let them wait at Po-hill. Let all other officers and people wait at Teen-tsee landing-place. They are not permitted to crowd in boats to meet me; nor are runners allowed on this pretence to impress boats.

"4th. Let the military officers observe the same regulations as the civil officers: they are not allowed to go far to meet me; nor allowed privately to leave their posts.

"After my arrival at Canton, let the civil and military officers of both provinces send in their Lae-lee (an account of themselves, their term of services, &c.) They may send them by post or by water, but must not send soldiers or runners with them to Canton.

"The civil and military officers, without public business, are not allowed to come to Canton to see me. If they privately send soldiers or make some pretence to commission people to come, the circumstances will be inquired into and their offence be punished.

"5th. At the landing places by the river side, it is not allowed to erect scaffolding, to ornament them, &c. nor is it allowed to make new the ornaments of my palace. As to the red carpets, &c. for the hall of audience, borrow a set of old ones and make out a list of them that when I arrive, I may compare it with the things themselves. I only require the cook house with the boilers and furnaces to be in order. I will a few days before my arrival send a person to my palace; and when I come, will myself light the fires. The officer of the principal Heen is not allowed to prepare rice, nor is he allowed to supply what is necessary, except for the porters.

"6th. I do not want to detain in Canton more than 20 messengers and military attendants. These will be sufficient for every purpose: the others may return to their stations, and attend to their exercise. They are not allowed needlessly to go backwards and forwards, to impress boats and neglect their exercise. The officer in command is requested to attend to those regulations and wait for my decisions.

"7th. Let all the military stations send in a drawing of the place where they are posted; and explain fully all connected with them, and how distant they are from each other. Let them send in a statement of the number of men. Let the naval officers do the same. Let none be omitted. They may be sent in either before or after I arrive at Canton.

"8th. Whoever of the superior officers, or inferior ones, with their advisers, or the salt or Hong merchants, or any other persons, shall represent that he is intimate with me, and in my confidence; or if persons shall write to each other to this effect, or shall suffer themselves to be thus deceived;—let all such be taken up and presented to justice: those who conceal such things shall be considered as guilty as those who commit them.

"Let the above be sent round to every officer, civil and military, that they may act in obedience thereto. It is my sincere wish. My heart and mouth are one. It is no specious pretence; neither is it from a perverse disposition, but because the officers of Canton have hitherto acted in many things in a way not agreeable to the Tsi-shun. I have not inserted your titles, for which I hope you will excuse me."

---

### RULES TO BE OBSERVED AT THE PALACE OF THE SAME VICEROY.

CANTON, MARCH, 1812.

The Chung-keun together with the civil and military officers attached to his Excellency, are enjoined to make known:

I. That the servants of the household are not allowed, either secretly or openly, to receive any presents from visitors; nor to recommend servants. If this be violated, both those who give and those who receive, will be guilty. The civil and military officers who know of any such transaction, and do not make it known, will be rigorously dealt with.

II. The persons who have been in the habit of waiting at the gate of the palace, to be employed as messengers, are all prohibited. If I have any messages to send, I will myself personally order the head Foo or Heen. If in opposition to this, there be any understanding amongst these persons, the Foo and Heen will be accountable. I am determined not to make the least allowance.

III. I have heard that those whose duty it is to introduce strangers, have been in the habit of extorting money from young officers; and that from those of the 9th degree of rank, who have not yet entered on office, they receive thirty or forty dollars. If this occur again, it will be severely punished.

IV. The inferior officers of both provinces are not allowed to enter the inner rooms of the palace. Those who offend will be broken for their impertinence. The attendants of officers, if not called for, are not allowed to enter.

V. The Foo and all civil officers below the rank of Foo; the Foo-tseang, and all military officers below him, unless they have some very important secret business, or are called for by me, are not permitted to see me personally one by one. If they come to the palace to announce their return to or their departure from their offices, it is allowed them to send in a card and wait for my orders.

VI. The apartment for the An-chi-sse, Lengtsae, &c. when they call at the palace, must be kept without the least noise. Beside their servants, none are allowed to enter: their chairmen, people with papers, and persons to make tea, are not allowed. If they and a mixed crowd presume to enter, I shall require it of the officers of my household.

VII. The inferior military officers are not allowed a number of men, as orderlies, to follow them: because it would impede the men in their duty; some would have too much, and some would have too little to do. The Kwang-hee is required to be invariably attentive, and not put on a fair appearance before me, whilst he is disobedient behind my back. If he does, his offence will be great.

VIII. If any military situation be vacant, an examination of persons to fill it must take place, and, a choice, deserved by justice, made. For the inferior situations, choose persons according to their natural abilities. for the higher situations, choose men who can speak the Mandarin dialect. If commanders of a thousand or a hundred men, (colonels or captain,) are sent on any service, I must choose them myself. I will not allow any other person to name them. Such officers must not allow themselves to be deceived, or in dulge any foolish hopes, for if I find it out, I shall consider them also offenders.

IX. If an important communication arrive, present it the moment that it is brought. The common communications of the day being in when the drums beat, at the morning and evening. If pressing come from a distance with papers, they are not to be delayed. If such persons are delayed, I allow them to come and tell me.

X. Officers who send in their cards, whether I see them or not, deliver my answer to them immediately. you must not presume to detain them.

XI. When civil and military officers are sent on my service, they must inform the owners of boats, horses, &c. (which they may require) from what office they are sent, that the people may go there and make their claims. They who are sent must have a certain allowance made them, a statement of which must be brought to me. The officers of districts are not permitted to make extravagant allowances; nor may the persons go beyond their allowance.

XII. If the Hong merchants have any business, they must first see the Kaou-poo; if the salt-merchants have business, they must first see the Yun-yaou. If they have any very important affair on which they must see me, it is required that they all come in a body, or engage three or four of their number to see me. One person is by no means allowed to see me privately. The presents to servants and other fees, are all entirely cut off. If any persons visit the Hong or salt-merchants, and say, that they are my relations, or friends, the said merchants must immediately inform me. Let there be no disobedience, otherwise the offence will be examined into.

---

## CORRESPONDENCE.

### TO THE EDITOR OF THE CANTON PRESS.

Dear Sir,

Hearing that you are to leave Macao early this morning, and anxious that you should give in your next paper an account of our Macao festivities, I prefer writing to you immediately after returning from the Fancy-ball, to going to bed, though I must say, that the latter has great attraction for me, as the day is beginning to dawn, and the amusements of the night rendering the wish for repose somewhat imperative.

This Fancy-ball then, about which I am going to write, was given by one of our Canton merchants, at his residence here. Cards of invitation had been issued some time, and as it was generally understood that the ball was to be both as splendid and numerously attended as circumstances would admit, every one seemed to be anxious to contribute as much as possible, by his own dress and splendour to the gaiety of the scene. Tailors had been in universal request during the last fortnight, old prints and pictures were turned up to give models for dresses, Chinamen instructed, drawings made, parts of dresses ill fitted removed, and many an anxious look was given to the watch even on the night of the ball in expectance of the tardy tailor, who had not yet brought the last part of the costume, and that in some instances the most important. I will not take upon myself to decide, which of the sexes were more anxious by their personal appearance to give lustre to to this fancy ball; their efforts seemed to have been equal, but the fair sex as is natural looked their characters best.

The house was thrown open for the reception of Company at half past eight, and on arriving I was struck with the taste and brilliancy of the decorations. The house which is one of the roomiest in Macao is remarkably well adapted for a party of this kind, and every room in it, communicating with each other, beautifully decorated with drapery and festoons of flowers, so as to give to them the appearance of tents. The walls were decorated with medallions containing the names of our poets and heroes, and beautifully painted and judiciously illuminated landscapes, of which the eye now and then caught a glimpse through the folds of the draperies, seemed to give an appearance that a sunny and luxuriant land was all around us, if we only stepped out of the tent.

But enough of the lifeless decorations: let me now say a few words of the figures that moved in this gay scene. There were the dresses of all nations; you saw peaceably and joyfully meeting about, the no longer silent turk; a wanderin sing ing french and italian songs; Circassians under no fear of bondage from the close neighbourhood of fierce looking Syrians and Persians "withheld to the eyes," nor from Egyptians and other semi-barbarous Asiatics or Africans, of whom there was a good many. But the costumes of Europe had not been neglected either, and Denmark's fair land of country girls, or the dark eyed daughters of Picardie, were seen in the mazes of the waltz or in the more measured step of the quadrille with Henri IV. or a parish beadle; Mary Stuart no longer had reason to fear the frowns and cruelty of Elizabeth of England, and, strangely forgetful of their rural lineage, would deign to enter into friendly converse with an English waggoner, or a miserable mendicant, nor would they refuse to be led to the dance by the infidel turk, or other swarthy natives of Asia. Julius Cæsar seemed to enjoy a memory drawn amusingly, and the polish Queen gave evidence enough lost to show, that it was not the unearthly state which he knew.

Besides these there were Kings and others in plenty, but I should run you by enumerating them all; I shall only add that a Gentleman in the Court dress of the last century, indicated by the satisfaction and pleasure he seemed to derive from the room about him, that the hospitality for which either Tom's room so famous, is not confined to the present generation.

Dancing was kept up very spiritedly, when at a given signal, the supper, which had hitherto been right good of the house, opened, with a generous smile every thing requisite to the palate was dispensed, and speedily upwards of a hundred of the guests were seen seated at it, doing justice to the good things before them. If I had as good memory as I wished, I would give you the toasts in which one of the guests proposed the health of our hospitable host, & the host's guests, proposing the "Ladies" both of which toasts were drunk with great applause, but you must be content with this short notice. After supper amusements formerly were let off in front of the house, to the great delight not only of the guests, but also of those who, not able to mix with the Company, had contrived to become unobserved witnesses of the scene.

Dancing was then resumed, and lasted till a late hour in the morning, our train bands any longer necessary to light it to bed of the Company home.

I am very sleepy, Mr. Editor, so shall only conclude, that great credit is due for the excellent and beautiful arrangements and decoration, to the taste and labours of a french Gentleman who volunteered his services for the occasion, and under whose superintendence the whole was conducted.

Good night Mr. Editor,

Yours

Macao 1st Nov. 1842. M. V. B.

---

### TO THE EDITOR OF THE CANTON PRESS.

Dear Sir,—You must be aware from the reports of the Rescripts of Tuesday last, that some important demonstration by the Chinese was about being made on Opium. What is it, no one, Chinese or Foreigner, is aware of. One party says; abandon or a duty; another party from that an effort from headquarters is about to be made to annihilate, the Linin Piper, and put an entire stop to its import; Q: when doctors differ (about a drug) who shall decide? Old father time, and on him we leave it! meanwhile every Chinese Opium broker has fled and all the smuggling boats are outside the Bogue; no man (Chinese) would buy of you a Chest of Opium if you paid him to do so, and give the Opium gratis.

But much for Opium. The Teazers and the Hongs have differed as to prices, and we are reinstated, that of 37,000 Tons of shipping, not long

than two ships are taking in Cargo, though now prime season.

Silk only can be shipped on board one ship to the extent of 100 Piculs, without double duty; the double duty if about $ 12 per Picul; 17,000 bales of silk of this Crop are now in Canton; few ships have yet made the point they mean to sail to; a deficiency exists for coming ships of even at the double duty; thus about $ 200,000 lay in the Company's treasury, which cannot, in absence of Bills of lading be got at. So Dollars are cut off in Paucity in China, on Opium, Tea, Silk and Dollars. Any one acquainted with Canton usage will pronounce this *strictly* to be a *virtual* stop of Trade, it reaches all! pervades all!

I am Mr Editor

Your obedient servant,

X.

## EXPORTATION OF SILK

TO HIS EXCELLENCY,

The Governor of Kwangtung and Kwangsi.

We beg leave respectfully to represent to your Excellency the great inconvenience our Trade is suffering by the present Regulation of the Hoppo office, which prevents Raw Silk and Silk piece Goods being taken on board the ships of our various Nations, excepting in a limited quantity.

The increase in our Import Trade the last few years is evident by the greater number of Vessels which annually visit Whampoa, and the value of the Products and Manufactures of the Chinese Empire which they take in return—amongst them Raw Silk, which is now purchased by us in much larger quantities than formerly; but which for the reason above stated we experience great delay in shipping off, and are obliged to take advantage of any Ships offering, instead of being allowed to select good vessels belonging to ourselves and others thus frequently involving the embarkation of our property in Ships which in consequence of gales and boisterous weather encountered on their long outward voyage have been rendered quite unfit for the safe conveyance of articles so valuable, and requiring such care as Raw Silk and Silk Manufactures and by which damage and loss has frequently been experienced by us.

We therefore trust that your Excellency will take our representation into your favorable consideration and give instructions that hence forth the regulation which now limits the quantity of Raw Silk and piece Goods to be exported by one Ship, be removed, and that we be allowed to ship off by any vessels we may consider most eligible for ensuring its safe conveyance, without being subjected to any other charge than the single Duties now levied. Signed by 38 of the principal foreign merchants.

Canton, October, 14th 1836.

Reply to the Petition of the foreign barbarian Merchants, from Tung, President of the Military Board and Governor of the Provinces of Kwangtung and Kwangsi.

On examination it is found that the exportation of Raw Silk and Piece Goods was, formerly, prohibited by the Laws. But his Imperial Majesty was pleased, in his kind regard to merchants from far, to relax those prohibitions; and each Ship was allowed to take on board 5000 Catties of the Raw material of Canton, with the same amount of the second quality of the Raw Silk from Nanking: if the manufactured article was destined for exportation, 100 Catties of Piece goods were to be substituted for every 1000 Catties of the Raw Silk; and that the exchange might be made to the full amount of the Raw material specified above. These regulations were carefully prepared by the Board of Revenue; and, having been laid before the Emperor and received his sanction, they have for a long time been strictly obeyed. Crafty merchants were never permitted, under the exercise of these laws, to exceed the amount fixed for exportation; nor was the amount allowed to be increased, on any account whatever, in disregard of the existing regulations. Thus for a long time the Trade was carried on, as appears from the records (in my Office).

But now a Petition has been presented, stating that within a few years the imports have been continually increasing and the exports have necessarily not been small; and requesting that such changes may be made in the regulations, that the Cargo in each ship may not be limited, but be received for exportation at pleasure; &c. Not only is this request opposed to the existing regulations; but it is evident that if the amount of the Imports is increased, the ships are also multiplied; and each can always, in regard to exports, conform to the Laws? why then seek other Ships? And if this is done, it is immaterial (to the government) whether the goods are injured on not on the voyage; but how can the laws of the Celestial Empire be changed? Shall those Barbarian merchants be allowed to buy and export according to their own pleasure? What they request is most unreasonable and extravagant, and can by no means be granted.

The Hong-merchants, Howqua, and others, are, therefore, directed immediately to consult these orders to the said Barbarian merchants, and cause them to yield obedience thereto; and henceforth in exporting Raw Silk and Piece Goods, they must conform to the limits of the laws, and not indulge their wild expectations, lest thus their far distant trade be cut off.

Taou-Kwang 16th year, 9th month, 29th day.

(October 28th 1836.)

## OPIUM.

We Tang, President of the military Board and Governor of the two Kwang Provinces, Ke, Vice President of the military board and Lieutenant Governor of Canton, and Wan, Fung Shin-tseu-king and Superintendent of maritime customs at the port of Canton, proclaim to you the principal and all other Hong-merchants for your full information.

We have received the following mandate in an Imperial Edict respecting the following points in a representation to H. M; made by Heu, a Keih-tsze-chung; namely those relating to the debased wretches engaged in the traffic of Opium, the Hong-merchants who settle the prices, the melters who purchase it wholesale, the fast crabboats in which it is conveyed (from outside), and the Police who receive bribes.

"Let there be immediate strict and secret investigation, let the offenders be apprehended, and let diligent exertions be made to remedy the evil and cut off it's sources. Act with sincerity and make a clear report of the circumstances to me." Respect this!

Annexed is a copy of Heu, the Keih-tsze chung's report which we have also received, and the contents of which state, that "the debased wretches who traffic in Opium, not being able to procure it direct from the barbarians, purchase it from the wholesale smelters, who are assisted by the Hong-merchants who settle the prices. The resident barbarians, on receipt of the purchase money, give a document which enables its possessor to go and receive the dirt from the Receiving Ships.

These barbarians reside in the different foreign factories;

Jardine, nicknamed the Ironheaded old rat and Innes live in the Eho Factory.

Dent, Frainjee, and Merwanjee in Paoushun.

Dadabhoy in Fangtae

Gordon in Kwangyuen.

Whiteman in Maying, (the Imperial) and

Turner in the Lew-sing Factories.

Besides these there are many others, of whose names I am ignorant." "Such is his report"

Now we have examined into the subject, and find that repeated Edicts have been received ordering strict investigation and prohibition of the article. "If any outside barbarian merchant ship dare to bring Opium into the port, let her instantly be driven away, and not be permitted to enter the port and trade." Those were H. M's words.

Yuen when Governor, investigated the case of the India ship Keih, and four others which brought Opium into the port; and upon receipt of an imperial mandate to investigate and decide, he prepared a clear report of all the foreign ships which entered the port; he ordered the principal Hong merchants to appoint security merchants who were to keep the vessels under strict scrutiny. The foreign Agents of the Ships were also required to give a bond that there was no Opium on board, as also were the Hong-merchants. The bonds were delivered into the Hoppo's office, and from hence transmitted to the Governor's. Hitherto the Hong merchants have conducted the trade in this manner. This is on record. Although in consequence of this arrangement, it is certain the outside barbarians do not bring Opium into the port, yet at Lintin they have Receiving ships, where it is sold and scattered, which is still more disgraceful and lawless.

The Hong merchants, although they cunningly avoid introducing opium into the port, induce the foreigners to bring it outside. They are all equally implicated; they settle the prices and receive a share of the profits: without their connivance how could the barbarians execute their artful schemes? Instant and strict investigation is necessary, and instructions how to proceed should be petitioned for.

As is proper, we issue this edict for your (the Hong-merchants') full information. Immediately on receipt of it proceed to examine whether Jardine, the Iron headed old rat, and Innes, Dent, Frainjee, Merwanjee, Dadabhoy, Gordon, Whiteman and Turner, are actually residing in the Eho, Paoshun, Fungtae, Kwang-yuen, Maying and Lewsung Factories; what countrymen they are; their manner of living and of selling opium; how many years they have lived in Canton; in what year they commenced selling, and what quantity they sell in a year; and whether they receive Sycee silver in payment for opium?—When you have examined well and ascertained the truth, instantly draw up a clear statement of the facts, that we may deliberate and decide upon what measures may be necessary.

If you, the Hong merchants, apprehensive of personal consequences, connive together and avoid this duty, assuredly you will not be able to bear the heavy punishment attending the crime.

Weigh well in your minds your duty, and act up to it.

Tremblingly obey and instantly report.

A special Edict. Taoukwang, 16th year, 9th moon, 19th day. (18th October, 1836.)

# CANTON PRESS,

5th November 1836.

What there may have been in our notice of our cotemporary in our last week's paper, impairing our "fairness or candour," we are at a loss to perceive; we merely stated our opinion on a subject, viz, that of giving or not, without extra charge, important information to the Public, before the publishing day comes round. We held it to be our duty to give such information without extra charge, whilst our Cotemporary is of opinion that it is better to "*turn a cent*" by his translations of Chinese documents. We said before that we had no reason whatever to quarrel with our brother Editor on this account, he may do with his own what he likes, but we also claim to be left to act according to our own judgment. We are accused of perverting the meaning of his words by calling chinese translations, "important intelligence"; but this surely is a mere splitting of straws, for if the chinese translations, our brother Editor offers to the Public, did not contain intelligence worth communicating, his "days and nights passed in translating chinese documents a yard or two long" would not obtain for him "even the barren acknowledgement of thanks from the public," much less would that public be willing to give money for what is not worth knowing."

What difference it can possibly make to our readers whether the Editor of this paper translates documents for it, or whether his friends favor him with them, we know not, but our Cotemporary seems to attach much importance to that circumstance, which, as far as the public is concerned, is irrelevant.

We are again called upon by our Cotemporary to account for the Imperial Edict given by us in an Extra of the 15th October. He maintains that it was a *hoax*, we say it was not, and refer our readers to what we said last week on the subject. We may here add that the Vice-Roy's edict of which we give a translation in this paper, instead of proving the former edict to have been a hoax, rather proves it's truth. In the Register's translation of this edict, the Censor's name, on whose memorial the Viceroy is to report, is, no doubt by mistake, made to be *Heu-Nwei-tse*, whilst in fact, though no name beyond *Heu* is given in that Edict, the Censor's name was *Heu-Kea* or *Kow* as it is here pronounced. In the Edict we published on the 13th of the last month, the Censors name was given as Heu-Kewtseen, the coen by mistake supposed by the translator as part of the censor's name, while in fact it was not; such mistakes our brother Editor must well know are not easily avoided in a translation from the Chinese, in which, language, we understand, there are no distinctive signs for writing proper names, which latter always have some signification, and may therefore accidentally become confounded with the text or vice versa.

It will therefore be seen that the short Edict in question referred to the memorial of Heu-Koy, and was not a hoax; but the transcriber of those few lines may have mistaken the Emperor's meaning, and that instead of his words "let not the drug be admitted" perhaps only his mere acknowledgement of having seen the memorial, and his order to investigate the matter, ought to have been substituted; this is however merely speculation on our part; we took the Edict from the Chinese document we mentioned, and subsequent events have proved it's correctness in part; it may be wholly correct.

We are now in possession of both the memorials of the two Censors Heu-Kow and Choo-tsung, of which we hope to be able to give translations in our next. They are said to be very ably written, and cleverly to refute the memorial of Heu-Tsee-tze in favor of the importation of Opium. This subject seems to have excited uncommon attention at the Court, and two strong parties seem to contend against each other; it is impossible to foresee which will gain the Emperor's ear, but in the meantime the provincial Government, aware of the Court being in possession of the most minute particulars respecting the Opium smuggling trade, seems to be awed into severe measures against it. Most of the Opium brokers have absconded, and the smuggling boats also keep out of the way. Imperial Commissioners are on their way down, thoroughly to investigate the state of the trade here, and it is rumored that they are ordered to take evidence from the foreign merchants. Some even say that the Peking Government intends to invite several of the foreign merchants to the Capital to give evidence; this we give merely as a vague report, as we have not traced it to any satisfactory source; the report may have arisen from the circumstance of the names of several of our leading merchants being mentioned in the Governor's Edict of which we give a translation.

Our readers will likewise find the correspondence that took place between the foreign merchants and the provincial Government on the subject of exportation of Silk. The Governor's answer is by no means favorable but is just what might be expected from a Government which has ever shown itself averse to innovation. We have also seen the Hoppo's answer on the same subject, of which we do not give the translation, it's purport being similar to that of the Governor's, only entering more into detail. This restriction of shipping only 100 Piculs of Silk in one vessel is one of the most vexatious in our trade; vexations to the seller as well as the buyer, and nobody is benefitted by it, except the ship which has to take it's 100 Piculs, and which if not loading on it's own account, or if what is called the "Silk privilege," i. e. the permit is to export one hundred Piculs of Silk for $ 5 or 600 as the demand may be. The origin of this restriction was the fear of the Chinese that the foreigners might carry away too much silk and not leave them enough for home consumption; but this fear the Government must long since have known to be groundless.

We are obliged to our Correspondent M. V. B. for the sketch he gives of the late Macao festivities. We were an eye witness to them, and confirm all he says of the splendour and convivality of the party.

Our Correspondent X gives an appalling account of the present stagnation of trade here, and one which we believe to be true.

On Thursday morning a thief found means to enter a shop in old China Street, and to escape with about $ 400 worth of Silk Piece goods. The alarm was given after he had left the house, and such was the tumult made on the discovery of the loss, that it was thought a fire had broken out, and the engines came to the spot.

We have just been informed that the Hoppo has issued an Edict against the Passage boats; we suppose it is of the same kind as appears every year, and not meant to be acted on.

---

Two inside fast boats returning from Macao to Canton with four Europeans in each, were attacked yesterday evening at about ten o'clock a few miles below Jennai by a piratical boat, pulling nearly 40 oars, and resembling in appearance one of the large mandarin cruizers. The two boats were fortunately within hail of each other and at the first alarm joined company and lashed to each other. The pirate made one attempt to board, which, had she resolutely persevered in, there is no doubt both the boats might have been captured, as they were, at the moment, quite taken by surprise; they were however repulsed with a volley of stones, and in a few minutes fire arms were hauled, pikes prepared, and every precaution made for a formidable resistance, in case the attempt were repeated. The pirate approached several times, as if intending again to try boarding, firing rockets, and guns apparently not loaded with ball; but was evidently deterred by the strong parcy of foreigners he saw ready to receive him; and, after hovering about them for nearly an hour, disappeared. This is the second instance of piracy which has come to our notice within these last days, as two boats were stopped and plundered of property to the value of $ 5000 close to Macao lately, by pirate vessels of a similar description.

NOTICE.

A Gentleman about to embark for Lisbon wishes for the Company and assistance of a medical Gentleman on his passage to Europe. He intends to leave China in January next, and if any medical Gentleman be desirous to avail himself of this offer, he will please to apply for particulars at the Canton Press Office.

### OFFICIAL NOTICE.

CONSIDERABLE inconvenience and public expense having been incurred, by reason of the improper conduct of certain masters of British merchant vessels in wilfully leaving behind in this place, men belonging to the said vessels; Notice is hereby given, that this practice is contrary to Law, and that the offence may be prosecuted by indictment or information, at the Suit of His Majesty's Attorney General in the Court of King's Bench at Westminster, as if it had been committed at Westminster in the county of Middlesex, and it is now declared, that the Superintendents will take measures to institute proceedings against any master or masters of British merchant vessels who shall so offend herein in future.

By Order of the Superintendents

EDWARD ELMSLIE.
*Acting Secretary and Treasurer.*

April, 15th 1836.

The London Assurance Offices grant Policies payable in London, Calcutta, and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874256 of a Tl. per cubit.
2nd ,, ,, ,, 1200 do. & under 1600 ,, 0.7213991 ,, ,,
3rd ,, ,, under 1200 do. ,, 0.656.341 ,, ,,

N B The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or 12ds head in Bridge; and across at the main mast; these are multiplied together for the absolute measure.—The largest class pay from @ 45 to @ 1200; 2d class from @ 3700 to @ 4700; 3rd class from @ 3200 and under. The Canton or Present Fee is paid by All vessels 1600 Tons or @ 2225. Linguists fee @ 1734 and Comprador's fees @ 50. Also Pilotage @ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Russian ships are charged only about @ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

Cotton Manufactures.—We have hardly any changes to report in these during the last week; owing to the unsettled prices of exports, very little has been doing. This remark applies equally to many Imports from India and the Straits.

Cotton Yarn.—has declined within these few days in consequence of intelligence from Chin-chew of bad markets there, where the principal demand hitherto has been for lower numbers.

Cotton.—There has been rather a brisk demand for good cotton during the week and our highest quotations have been obtained; this is said to arise from there being so very little good cotton on hand, and also from the dealers being bare. The inferior kinds are nearly the same. The stock on the 1st is estimated at 58,600 Bales Bombay, 31,300 Bengal, 6,600 Madras. Total 96,700 Bales. Clearances in October. 11,093 Bombay, 9441 Bengal, 1037 Madras, together 21,551 Bales

Opium.—There is almost an entire cessation of all business in Opium, and most of the brokers as well as smuggling boats, have considered it prudent to keep out of the way, until the object of the late affray regarding Opium is ascertained.

The deliveries were large in October, being,

| Patna. | | Benares. | | Malwa. | | Total. | |

| 2. | 555 | 16. | 224. | 1972½ | | 2015½ | c'ts. |
| | | Stock remaining 1st November, | | | | | |
| 2. | 1808 | 49. | 677 | 3670 | | 6207. | ,, |

### EXPORTS.

Raw Silk.—has, owing to the unwillingness of exporters to ship teas at the exorbitant demands of the Tea-merchants, experienced a livelier demand, in consequence of which prices have advanced a little.

Tea.—a few Chops of Green Teas have been settled at our quotations. Canton Teas have rather declined, from the new arrivals and very slight demand. The Hong-merchants are still unable to come to a settlement with the black-Tea-Men for the Congous.

Exchange.—We omitted in our last to direct attention to another alteration in the rate of the Company's Agent's bills on Bengal, which was raised on the 25th October to the rate of 220 C. R.

## LITERARY.

### THE CHINESE REPOSITORY FOR OCTOBER.

The first article of this number is a review, or rather an exposition of the sentiments recorded in the several pamphlets that have appeared during this year in England, on the political relations between that country and China. We have in this paper noticed most of them before; the introductory remarks to these selections, do not quite agree with our often repeated opinions on the subject of British interference; it is a question we are well aware of extremely difficult solution, and looking to the insolent *official* character of the chinese, it is difficult to say, in how far even a quite friendly diplomatic approach might become the cause of eventual hostilities. The steps hitherto taken by the British Government have been proved premature, and no provisions having been made by that Government against the failure of their measures, have had by no means the tendency to improve the British interests. From the late discussions at the Court of Peking respecting the importation of Opium, it may be gathered, that the rapidly extending traffic in that commodity has excited extraordinary interest in the Government, and it appearing at the same time that the Chinese Government, having been put in possession of very circumstantial information regarding this trade, and of the habitual corruption of it's Officers in Canton, two Officers of very high rank have been sent to investigate into the conduct of the local Government. If these officers are men of talent and integrity it is possible that much good may result to the foreign trade from their visit; but if they, in any information they may require from foreigners, continue to stand strictly on the old etiquette, allowing all such information to go through the Hong merchants, and to be moulded by them to their purposes, the misrepresentations of our character and objects will probably continue to be as gross as ever. One of the officers is a Tartar of high rank. "the keeper of the nine gates of Peking," a man reputed to be an enemy to all innovation; the other is a Chinese. Their expected visit has caused considerable excitement among the Chinese, particularly since some acts of severity towards officers of high rank, on their way down have been reported. We still continue of opinion that with the increase of commerce, the restrictive regulations must insensibly give way, and that the means of improving the condition of the Chinese, such as spreading Christianity and knowledge, will never be pushed as outposts to clear the way to a more familiar intercourse, but must follow commerce as it's rear-guard, and may then tend towards giving more stability to our relations with this country. We by no means wish to be understood as if we undervalued the philanthropic labors of several of the Gentlemen connected with the Mission societies; on the contrary, we have the greatest respect for them individually, nor can we help being aware that particularly the OPHTHALMIC HOSPITAL under the able direction of DR. PARKER, is not only doing a great deal of practical physical good, but that also the *disinterested* devotion to the relief of suffering cannot but prove to the intelligent chinese that there are foreigners who not only are superior to them in knowlage, but who also have no motives of personal profit, in the discharge of their functions.

The SECOND ARTICLE, is a translation of the report of the Governor of Kwangtung and Kwangsze, and. of the Lieutenant Governor, in reference to the proposal to sanction the introduction of Opium. On this we have nothing now to remark, having given the document already in our columns on a former occasion.

ART. III. *Notices of modern China: Mahomedan states on the western frontier of the Empire: Ladákh; Iskárdo; Kúndúz; Bokhára; Kokan; &c. by R. J.*

This is one of a series of papers that have from time to time appeared in the Repository, in which a great many materials are collected to aid the Historian in forming a history of the chinese Empire, a great many authorities having been consulted and collected, and as such these papers will be very useful. The present contains information of a very interesting kind, being of countries of which but little is known, viz, those bordering on the western frontier of the chinese Empire, and giving interesting details how the two great Empires, the British and the Russian, are gradually approaching the confines of China. We take rather a long extract from this paper, which will no doubt be found interesting, and which we cannot well curtail without injuring it.

"In our last number we supposed the Chinese empire to be threatened certainly, although remotely, by the Christian powers which rule the countries bordering upon her northern and southern limits; we proceed now to notice the several Mohammedan states on the western frontier, where alone the empire has been actually invaded of late years. The next country westward of Tibet is Ladákh, the gelpo or raja of which, a Mohammedan, has been placed under the control of the Chinese resident at Lassa in order to restrain the incursions of his subjects into Tibet. This country borders also upon the Sikh states, one of the chief of which, Golab Singh of Jumún, a dependent on Runjit Singh, has lately invaded it and levied contributions there. Moorcroft visited Leh the capital, several years ago, from Tibet; and two other European travellers, baron Hugel and Mr. Vigne, have lately entered it from Cashmir, along the valley of the Indus in which Leh is situated. The death of Runjit Singh, ruler of Lahore is seldom anticipated, without the supposition being added, that it will hasten the approach of the British to the banks of the Indus. The valley of Cashmir will become then of course a British province, and a new channel will be opened for British commerce into the heart of Tibet. Ladákh will follow in due course; into which another large stream the Shyók, is said to flow to the Indus from the northward, and to take its rise in the (Tsung ling or) Korum mountains, which separate Ladákh from Yárkand.

Following the Chinese frontier westward from Ladákh, we find the mountainous states of Iskárdo, Gilgit, Gunjút, Chitral, &c. Iskárdo or Bolúristan, said to be eight marches northeast from the city of Cashmir has also been invaded by the Seiks from that valley, who appear to have been driven back; but they succeeded in subduing the little intervening principality of Kuthái, which was before independent. Ahmed shah, the present ruler of Iskárdo, is in friendly correspondence with the British political agent at Ludiána. A high road, we are told, leads from Iskárdo to Yárkand in Chinese Turkestan, over which merchants travel in caravans. The rulers of these mountainous states, as well as their people, are Tájiks, that is, the aboriginal natives of the country before it was overrun by the Túrki or Usbeck tribes; but they have been converted to the Shiah sect of the Moslem faith, and they receive their religious education from the Persians. This circumstance is favorable to China, inasmuch as it renders improbable an alliance between these states and the more powerful Mohammedan countries in the west and north, which follow the Súnite creed. Chitral is, however, subject to the chief of Kúndúz, who is an Usbeck, but the mass of his population are Tájiks.

Kúndúz, a small town of 1500 inhabitants in the valley of the Oxus, has given a conqueror to Budakshan, and some of the mountainous states of Wakhan, Shughnan, Hissar, &c. which lie about the mountains which separate Chinese Turkestan from Maweralnehar (Transoxiana). The heir of Kúndúz is an Usbeck, as is also the ruler of Hissar, but their subjects are chiefly Tájiks, and in also the other hill states both prince and people are of the latter race. The high plain of Pamer in the mountains between Budakshan and Yárkand, is inhabited by Kirghis. Besides Kúndúz, the two principal kingdoms in the neighborhood of the Chinese possessions in this quarter, are Bokhára, including its provinces of Samarkad and Bálik, and Kokan.

Bokhára and Kokan may be said to include all Turkestan (not Chinese), since they are the two most influential of its states. The rulers of these countries, and the greater part of their subjects are Usbecks, and Mohammedans of the Súnite sect. Their slaves, who chiefly cultivate the land, are mostly Persians, captured and sold by the Túrkmans of the desert; and those Persians are all Shiahs, whom the Súnites do not consider as true believers. The connexion of Bokhára, according to Burnes, with China, Cabúl, and Turkey is friendly, and all of them have sent embassadors. The bazars of Bokhára, he continues, are supplied with European merchandise by the caravans from Russia, and also with British fabrics by the native merchants from India. The Russian government is supposed to have been straining every nerve, since the time of Paul, to force a trade in this direction; whilst the English commerce, with very little if any effort on the part of its government, has widely extended, so that the Russian merchant discovers a formidable rival in the diminution of this trade." A considerable trade is also carried on from Bokhára and other countries of Maweralnehar to Cashgar, and Yárkand, where European commodities among others find their way in exchange chiefly for tea.

Kokan, which is the next considerable country on the western frontier of Chinese Turkestan, is bounded on the north by the Russian dependencies of Orenburg and Tomsk, and thus we complete the chain of foreign powers around the Chinese frontier. There are however, some roving tribes of Kussaks, and Kirghis among the mountains bordering on the Chinese territories, who are apparently in half subjection only to one or other of the powers on each side of them. They are all tribes of the same Túrkish stock who have alternately overrun these countries and established themselves there; and they have all been converted to Mohammedanism except the Kalmuks."

The fourth article is a report of the Committee of the BRITISH SEAMEN'S HOSPITAL SOCIETY in China, giving the rules of that institution, and containing an account of it's proceedings hitherto.

It appears that the funds of that Society including the donation by the British Government, (to be equal to the sum subscribed by others and now amounting to $ 4500) amount to $ 8488.39; and that as a temporary arrangement Mr. Johnstone of the Ship *Earl of Balcarres* is now stationed at Whampoa to give medical assistance. Messrs. Colledge and Anderson, surgeons to H. M. Superintendents, the former at Macao, and the latter at Lintin, who have offered their services to the society, have already treated about 200 cases. We find room only for the following extract, explaining the reasons, why a Hospital Ship at Whampoa has been determined on. We hear it said that a ship of a suitable size has lately been purchased.

"The necessity for the establishment of a hospital ship at Whampoa was deeply impressed on the minds of the committee, and if a doubt had ever existed on the subject, it would have been entirely removed by the following extract of a letter from Mr. Colledge, who, from his long and intimate knowledge of the diseases prevalent there, must be considered the best authority in such case.

"I am not called upon for my opinion by the committee, but consist pass over this opportunity of offering a few remarks. The Committee must bear in mind, that almost all the subjects they are about to provide assistance for, are young men, or men in the prime of life, just from Europe, full of health and vigor, and that the diseases they are most prone to in Whampoa reach during the months of July, August, September, and October, are of a highly inflammatory character, requiring on the part of the medical practitioner, prompt, decided, and energetic measures; as in many cases, an hour's loss of time in applying appropriate means will render the cases tedious, and in some instances, perhaps, place life in imminent danger; whereas a timely bleeding, combined which other antiphlogistic means will at once subdue a formidable attack, and enable the patient to return to his duty in as many days as it would otherwise be weeks. When cases occur which have passed over the first symptoms unchecked, I shall, provided the committee or surgeons send them to me, do my best for their restoration; but I would repeat, that as almost all the cases are inflammatory, no time should be lost in treating them, and that the distance between Whampoa and Macao must preclude my seeing patients under incipient symptoms."

ART. V. is a collection of Armenian Apothegms.

ART. VI. "Literary notices." Is a short resumen of what has lately been written on China and on our intercourse with the Chinese in several of the English periodicals, on which we have no comment to offer.

ART. VII. gives an account of the movements of Missionaries in Asia and the Indian Archipelago; from which it appears that the Mission Societies and their Agents continue their vigorous efforts to convert the heathen.

ART. VIII. *Journal of occurrences.* We extract only the following.

"PROCLAMATIONS, edicts, manifestoes, &c. have been the order of the day during the month. On a preceding page we have given the Report of the chief provincial authorities respecting the importation of opium: it seems probable, judging from all that we can learn that the question whether it shall or shall not be introduced is undergoing a thorough revision, and new and strange inquiries are on foot both here and at Peking. What will be the result of them, we will not venture even to guess. * * *

In a late number of the Canton Court Circular, the arrival of an official agent from Hoonan, is announced; he has come hither to procure fire-engines for that province.

---

*( From the Indo Chinese Gleaner. )*

INDIA PRESENTED TO THE EMPEROR OF CHINA, ON HIS BIRTH-DAY.

Peking, May 8, 1811.

The Emperor's commands to the following effect, have been most respectfully received.

"In the 24th year of my reign, the anniversary of my 60th year occurs. It has been the usage of the MUNG-GHO Kings and Nobles to make willow-images of Buddah and present them. But the place in which these are dedicated, is already full of them, and if they be added to every ten years, they will be so crowded as to have a want of respect. Let all the MUNG-GHO Kings and Nobles be informed, that when the time shall arrive, there is no occasion to adhere pertinaciously to former usage, and to present images of Buddah, but let them appropriate the money which they would spend on these to the repair and beautifying of the Temples at Jo-ho, where I constantly descend to bless the place and to burn incense. Thus they will display their feelings of sincere veneration. Respect this."

---

CRIMINALS IN CHINA

In the close of 1816, there were in the various prisons of the Chinese Empire, 11,271 criminals convicted of capital offences, and awaiting the Imperial order, to carry into effect the sentence of death. They consisted of persons who had been respited at various times, either from their crimes being less atrocious than of those consigned immediately to the sword of the executioner; or on whose guilt there still hung some shadow of doubt. The sufferings of criminals detained in prison for years are great. The Chinese in their best state are not very cleanly in their dwelling houses. In prisons, criminals are at nights chained to inclined boards on which they sleep, and without the power of removing them to an appropriate place, to perform the offices of nature; hence their prisons become at once disgusting and unhealthy in the highest degree. Money can procure some alleviation, and the prisoners of long standing, attach, in the most ferocious manner, unhappy persons who newly enter. They seize them by the arms and legs, toss them, beat them, and bite them, to extort money from them.

## CORRESPONDENCE

### TO THE EDITOR OF THE CANTON PRESS.

Sir,—Allow me through the medium of your Paper to offer a few remarks on the singular position in which the Trade with China is at present situated.

Both the Canton Press and Register have alluded to the stagnation of trade at this usually active season of the year, consequent on the unreasonable demands of the Tea-men and both have published a paper entitled "Combination of the Black Tea-men" which your contemporary characterises as "an audacious manifesto, utterly indefensible on any commercial principle." That their actual proceedings are so, no one doubts, but it appears to me that neither of you have given a clear exposal of the real grounds of dispute between us, for the information of those parties in England or elsewhere, who are deeply interested in the result. The regulations published, as agreed to by the Tea-men, are in themselves not so very unreasonable, nay some, such as that which states that "if in settling accounts, a complete clearance is not made, the masters of new ones will not be forthcoming," which means that they will not commence a new score with a Hong-merchant, till the arrears of the former season are cleared off, appears founded on a most just and business-like principle. The really unjustifiable points of the combination, which now threatens us, are not even alluded to; they may be briefly stated as follows. All the Black Tea-merchants have combined together and refuse to deliver a single chop of Congo or Souchong, which form the bulk of the Black Tea, except at prices fixed by themselves and which it would be perfectly ruinous for us to accede to. Taking the Company's standard, the Tea-men demand an advance of from 8 to 10 taels per picul on Souchong, of 10 to 14 taels on Pekoe-kaik Congou, and but little less on Congou of inferior quality. The Hong-merchants have entered into extensive contracts with the foreign merchants at Company's Prices for Souchong, and Souchong Congou, and at an advance of 2 to 4 taels P picul on Pekoe-kaik Congou; but it appears that they have neglected to bind down the Tea-men to supply them at adequate rates to enable them to fulfil their engagements, though they have made large advances to them on account. These parties encouraged by the success they have met in raising prices during the two past seasons, now evidently think that both the Hong and foreign merchants are at their mercy, and that they can dictate their own terms. They have witnessed the eagerness which has been shewn in former seasons to load and dispatch the ships, and now seeing Whampoa reach filled with empty shipping, they appear to think that we must submit to any sacrifice to be enabled to fill them and send them back to their homes.

But fortunately for us in their extreme rapacity, they have somewhat overstepped the mark; our position would be worse if their demands were considerably lower, for then many might be inclined to yield, rather than submit to a temporary inconvenience. But, as it is, it appears impossible that any can be so negligent of the interests of their constituents in general, and of their own, as to think of making a compromise for the sake of accommodating a few. Let every one bear in mind that the price demanded on Souchongs and Congou of about 10 taels per picul on an average beyond the contract prices of the season, would more than pay the entire freight of every ship in Whampoa reach bound for Great Britain, and let them moreover remember that if a successful resistance is not now made, the battle will have to be fought again next year, and again and again, until successive losses and the ruin of many have by bitter experience convinced us of the necessity of devising some effectual mode of resistance.

The question then comes: how is this efficient resistance to be made? The answer is simple. The prosperity of our commerce is threatened by a powerful combination against us; the only way to meet it, is by a counter combination for self-defence on our part, which, if properly conducted, must speedily ensure a complete victory. I address myself particularly to my brother merchants in China. We are all deeply interested in the question; we all allow that a remedy is simple and easy; yet I doubt whether any could be found to give a satisfactory reason, why that remedy is not adopted.

The first attempt to establish a Chamber of Commerce in China, was made during a period of great political excitement and violent personal animosities, both of which contributed to its failure. I allude to the period when lord Napier was in Canton, and though the originators of it were undoubtedly actuated by the most patriotic and praiseworthy motives, none can doubt that it entirely failed in it's objects. The first of these counter acting causes no longer exists, the ardour is much subsided, and

it is to be hoped, will ere long entirely cease. The time therefore appears to be now much more favorable for entering again on the subject in that calm and dispassionate mood which is essential to ensure its success. One great and radical defect appears to me as existing in the constitution of the former Chamber, namely that of making it consist solely of British subjects, to the exclusion of all others.

Against this several conclusive reasons could be urged, the first and most prominent consists in the fact that a very considerable portion of the British Trade is at present under the management of American houses, who certainly could not with any shew of reason be excluded from a voice in what immediately concerned them. The main object of a Chamber of Commerce is to adjust and decide commercial differences, and in peculiar cases like the present, to devise means for mutual protection.—I will venture to say, that hardly a week elapses without some one or more of us practically feeling the inconvenience which arises from the non existence of such a body, which to be really useful must comprise in it's numbers the most respectable merchants of every nation trading with China, to enable it to take cognizance of any case which may be submitted to it. This is more peculiarly applicable to our position here, where we have no laws to appeal to, and I am sorry to say, little or no protection from our respective Governments. Is it not then doubly incumbent on us to unite to protect ourselves, not only against the frequently recurring acts of injustice on the part of the Chinese Government which all Foreigners are equally interested in opposing, but also for the purpose of establishing some tribunal, which may efficiently check the unjustifiable acts occasionally committed by foreigners towards each other, and towards the Chinese for which there is now no appeal, and which form a fruitful source for creating angry disputes and ill will, all of which might be obviated, did an efficient Chamber of Commerce exist to whose decision all such cases would be referred.

Allow me in conclusion to express a hope that the remarks I have made may have the effect of drawing some attention from my Cotemporaries in China. Let us only meet together to discuss the point and we shall be surprised to find that we are almost, if not quite, unanimous in the opinion that something should be done towards the immediate establishment of a Chamber of Commerce. As to the details, the proper time for discussing them will be after we are once agreed upon the principle.

I remain,—Your obedient Servant,
a RESIDENT MERCHANT.

Canton, Nov. 10th 1836.

## PASSAGE BOATS.

Wan, by Imperial Appointment Superintendent of Maritime Customs at the Port of Canton, promoted twice, again raised two steps and recorded sixteen times, proclaims to the Hong merchants for their full information.

On the 23rd day of the 9th moon of the 16th, Year of Tau-Kwang (November 1st) I received a dispatch from the Governor the contents of which state that on the 15th day, of the 9th moon, he the Governor, had received a dispatch from Admiral Kwan, stating that on the 9th day, of the 9th moon, Colonel Shay Tsing of the Central Batallion had reported to him as follows.

"It is on record that in the 6th moon, of the 14th year, of Tau-Kwang, Le, who then held the Office of Commander in chief of H. M's maritime forces, made a representation to Loo, the then Governor to the following effect."

"Hitherto the English Barbarian Eyes, when travelling in the passage Boats, were allowed to hoist flags; but they not being on board, on no account were the Boats permitted to display flags

For the transmission of letters, small boats only were permitted to be used; before leaving the river they were obliged to report themselves at the Tsing seun station and before entering it at the Bogue Stations After having been examined at all the Custom House Stations, and found to have no smuggled goods or military weapons on board, they received passes which on being shewn to the Revenue Cruisers and Forts, enabled them to pass unmolested.

On arrival at Whampoa they were obliged to deliver up their passes at the Cutom House there; and leaving the river they were obliged to deliver them at the Bogue Custom House.

Those that came up to Canton delivered theirs at the Tsing seun station.

If Military Weapons were discovered to be clandestinely kept on board the boats, no passes were granted to them by the Custom Houses, nor were they permitted to pass the Bogue Forts.

The various small boats, besides those belonging to the foreign merchant vessels, which brought letters, also received passes and were allowed, according to Custom, to pass in and out at will. It was not permitted to molest or hinder them contrary to the established regulations."

"In this manner every emergency was provided for and anticipated; but now upon examination it is found that lately the foreign passage boats entering and leaving the river, availing themselves of the breeze pass direct on their way without reporting themselves, being examined, or even seen at the Bogue Custom Houses, who are not able to communicate to the officers of the Forts and cruisers, that the boats have passed.

This is decidedly contrary to the old regulations.

Now the fast Country Ship Greighing anchored in the Lintin waters, it is necessary that a strict vigilant and secret watch be kept over her movements.

I earnestly request Y. E. to represent to H. E. the Governor the necessity of ordering the barbarian traders to obey the old established regulations respecting the passage Boats.

It is imperative that, when they leave and enter the river, they report themselves at the Custom House stations and request passes; and that they be examined whether they have smuggled goods or military weapons on board: they will then be permitted to pass unmolested by the Forts and cruisers.

And the old regulations will be respected."

Such was the Colonels report.

"This coming before me the Admiral, I have examined and find that there are old established regulations respecting the foreign passage Boats entering and leaving the river; let them be obeyed and all may yet proceed smoothly.

In regard to the contents of the Colonels petition it is proper that I instantly prepare a report for H. E. the Governor's inspection, and request him to issue orders for the Hong-merchants' full information, which orders must be transmitted to each of the barbarian traders directing them to order their passage boats on entering and leaving the river to report themselves at the Custom house stations, to request passes, and to be examined, so that they may be permitted to pass by the Forts and cruisers. Thus the consequences of disobedience will be prevented."

"This coming before me the Governor, I have examined and find that there are old established regulations respecting the Foreign passage boats entering and leaving the river. Their passages should be conducted in respectful conformity to these regulations. I therefore issue strict orders for the Hong merchants' guidance. These orders must also be transmitted to each of the barbarian traders that they my respectfully obey. It is imperative that on leaving or entering the river, the foreign passage boats report themselves at the different Custom House stations for passes and examination. The officers of the Forts and Cruizers being provided with the necessary information will allow the Boats to proceed unmolested, and the evil consequences of disobedience will be prevented.

I forthwith forward the circumstances, of the case to the Hoppo for his examination and that he may jointly with me issue an edict. So that the orders may have their due course."

This coming before me the Hoppo I unite with H. E. in issuing an Edict.

The Hong merchants, on receipt of it, are instantly to obey H. E's orders contained therein. Let them immediatly transmit copies of it to each of the barbarian traders, ordering them to obey the old regulations repecting the passage boats (Here follow the beforementioned orders.)

Let there be no remissness or delay
Haste! Haste!
A special Edict.
9th moon, 25th day.

# CANTON PRESS,

12th November 1836.

*Fire in Canton.* A fire broke out on Tuesday morning last, in a district of the suburbs called *Shaming*, on the water's edge, about a quarter of a mile to the westward of the Factories. It apparently began in one of the wooden houses built on piles in the river-bed, and the wind being northerly, the whole of the buildings stretching farther into the river, and a great many flowerboats were soon one mass of flame. The combustible materials were however soon consumed, and after two hours only the smoking or burning piles, on which the houses had stood, were seen, the fire having cleared a space of, we suppose, at least 200 yards square. The water happened to be very low and the boats not being able to move, and the fire spreading with extraordinary velocity, many of their inmates, only fled when part of their dwellings were already on fire. It is rather a matter of wonder that no more fatal accidents occurred than have been reported, which are limited to a very few in number, the bed of the river being very soft, and presenting great obstacles to speedy flight. But as is usual on such occasions a great number of thieves were collected, who, in spite of the numerous police, carried on their depredations successfully, and succeeded in carrying off, not only a good deal of property, but also stole a great number of young women (some say about 40) who had been the inmates of the boats destroyed by fire. This is a common practice with Chinese thieves, who afterwards either give up the females for a ransom, or sell them to others; from the apparent facility of achieving this kind of theft it may almost be suspected that the females themselves may not be very unwilling to change their situations. Many troops were seen to hasten to the spot, with their Captains on horseback and servants carrying a chair for the accommodation of their masters, should they have occasion to alight. The Lieutenant Governor arrived at the Consoo-house during the fire, and some luckless thieves have been caught following their calling, *in flagrante delicto*; they were forthwith brought before him, and had a due portion of blows with the bamboo administered to them, the execution of the sentence following it's pronunciation on the spot.

---

At a meeting of the MORRISON EDUCATION SOCIETY held at the residence of the Revd. Mr. Bridgman on Wednesday last, the following Gentlemen were elected Trustees to the Society.

| | |
|---|---|
| Lancelot Dent Esq. | President. |
| Thomas Fox Esq. | Vice President, |
| William Jardine Esq. | Treasurer, |
| Revd. E. C. Bridgman | Corresponding Secry. |
| J. R. Morrison Esq. | Recording Secretary. |
| W. S. Wetmore Esq. | Auditors. |
| H. H. Lindsay Esq. | |

A resolution was passed, that the proceedings at this and the former meetings, shall be printed and distributed.

---

The arrivals during the week have been but few. The *Liberty* from Philadelphia 28th June, bring no later dates than we were in possession of before by the *Panama*, nor do we find in the papers any thing worth extracting.

The *Elizabeth Walker* in 71 days from Valparaiso, brings, we hear, accounts from Peru and Chili, by no means of a satisfactory nature. After Salaverry's execution, President Santa Cruz had been at the head of the Government, and from personal feelings of animosity, he is said to entertain against the President of Chili, a war between that country and Peru was anticipated; neither of the countries can gain any thing by such a war, and it is to be feared that the prosperity of Chili, which has enjoyed peace during the last nine years, will be destroyed.

In another column will be found a letter from "a resident merchant," on the present state of our trade with regard to tea, which well merits the attention of our readers, particularly of those engaged in the trade. It were much to be wished that a combination of foreign merchants could be brought about to oppose that of the black tea-merchants, and if it were taken in hand by one or two of our influential merchants, it is, we hope, not unlikely that the project may succeed.

We have frequently urged upon the foreign community the necessity of establishing a General Chamber of Commerce, but though most of our neighbours with whom we have conversed concerning it appear to entertain the same opinions on the subject, not expressed by our correspondent, and before by us, nothing, that we are aware of, has yet been done to attain this object. If some of our neighbours were to draw up propositions for the constitution of a Chamber of Commerce, and then convene a general meeting before which to lay them, it is probable that not many, if any, will decline to become members; from the importance of the object to be gained, it is, at all events, well worth a trial.

On the 24th of September last, we directed the attention of the public to the crowded state of the space allotted to foreigners to dwell on. Since then, the influx of strangers, partly visitors for a short time only, and partly permanent residents, has been very great, and the evil has become worse than ever. Something surely might be done to extend our limits, and a representation to the Vice-roy, signed, if no other signatures can be obtained, merely by such as can find no comfortable house to live in, would, we believe, be numerously enough signed, to call the attention of the local Government to the subject. The Chinese, in allowing people to trade with them, will hardly refuse them the necessary shelter; we recommend to our neighbours to get up such a representation. Minqua ought also to be prevailed on to leave his premises, and to give them up to the use of foreigners.

---

We give the translation of the Hoppo's Edict regarding passage boats, which we mentioned in our last; hitherto it's provisions have not been enforced, as far as we can learn.

We likewise give a translation, with which we have been kindly favored, of the Emperor's order to the Grand Council, which, with a note from that Council and two Memorials (one from Choo-Tsun, and the other from Heu-Kew.) were received by Governor Tang on the 16th October. The two memorials, the existence of which we noticed last week, are of considerable length, and as only such copies as have been transcribed here, can be obtained, which frequently are in a manner incorrect, we have not yet been able to obtain a translation, which we hope however to be able to lay before the public in our next.

## OPIUM.

On the 17th day of the 9th month, (October 16th), the Governor, while in the district Teenpih, received from the Grand Council of State the following communication, dated the 9th day of the 8th month (19th September.)

"To Tang, governor of Kwangtung and Kwangse, and Ke, lieut.-governor of Kwantung.—to be also rejoined by them on Wan, the Commissioner of maritime customs.

"We have received the following imperial Edict."

"The Councellor Choo-Tsun has presented a "memorial recommending increased severity in the "prohibitory exactments against Opium; the sub-"censor Heu-Kew has also respectfully presented a "statement of his views on the same subject, with "a supplemental memorial with reference to su-"pressing traitorous conduct on the part of Chinese.

"Opium, an article of foreign importation, has "spread its baneful influence over the empire, and "has become the object of very severe prohibitory "enactments. Lately a difference of opinion has "arisen in regard to it, some recommending to our "consideration an entire change of policy; and "others advising the continuance of strict prohibi-"tions against it. It is necessary that a thorough "and particular investigation of the circumstances "be made, looking at the whole subject in every "light, that such measures may be adopted as may "without detriment continue for ever in force. "Such a plan is the only safe and good one. Let "Tang and his colleagues take into consideration "the several propositions of the above named me-"morials; namely, that the traitorous natives who "deal in the opium, the Hong-merchants, who "bargain for it, the brokers who purchase and store "it up, the fast boat men by whom it is conveyed to "the provincial city, and the military who are "bribed to connive at it,—be all strictly sought "after and apprehended. These propositions let "them thoroughly and attentively consider, and let "them be strenuous in their endeavors to stop up "the source of these evils; and having so done, let "them faithfully report to us. As regards the "statements contained in the supplemental memo-"rial of Heu-Kew, in reference to the foreigners "from beyond sea, let the same functionaries con-"sider them in detail, and report also as to their "truth, whether such things have or have not exist-"ed Let copies of the memorial be sent for their "perusal and together with this edict be made "known to Tang and Ke, and to the Superintend-"ent of maritime Customs, Wan. Respect this."

"In obedience to the imperial will, we the Grand "Council of State transmit the enclosures."

---

The following few verses have been taken from a poem "*Terrible Tractoration*" by *Doctor Cassalis*, and will, we hope, prove amusing to Phrenologists.

S

We have for sale the seeds of humps,
Which dibbled in the heads of grumps,
Take root without the aid of thumps,
And grow as large as camels' humps.

Can take a wicked ugly tyke,
And every organ we dislike
Pull out or drive in, at a venture,
Thus change each bump to an indenture.

Protuberant *destructiveness*,
Placed in our phrenologic press,
Is render'd, by its power immense,
Exuberant *benevolence*.

In infancy, in half a trice,
We thus extinguish every vice,
Before it has had time to harden,
As easily as weed a garden.

We keep fine faculties ready made,
Thus beat dame Nature at her trade
Of manufacturing mental powers,
For her's are not half up to ours.

## NOTICE.

A Gentleman about to embark for Lisbon wishes for the Company and assistance of a medical Gentleman on his passage to Europe. He intends to leave China in January next, and if any medical Gentleman be desirous to avail himself of this offer, he will please to apply for particulars at the CANTON PRESS OFFICE.

NOTICE. We have established ourselves in this place as general Commission Agents in connexion with Mr. William Gemmell of Glasgow, and Messrs. Gemmell & Co. of Valparaiso.

WM. & THOS GEMMELL & Co.

**N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.**

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camblets, Sattpoire, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or translhip their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pictures &c, Confectionary Stationary, Cutlery, Crockery ware, &c.*, for foreign-ers consumption, are sold at Auction, duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk piece goods &c.*, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

| Australia .. | | " direct .... | 2½ 2 | Lintin &c. .... | ½ do. |
| Sund. Islands .. | | France .... | 2½ 2 | | |

Note. Above rates are from 20th Oct. to 20th April annually; during remaining 6 months the premiums are somewhat higher. Risks on Hlocks are @ 9 per Cent per annum, @ 4½ for 6 months, @ 2½ for 3 months and @ 1 per month.
The Local Insurance Offices grant Policies payable in London, Calcutta, and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

| | | | |
|---|---|---|---|
| 1st class vss. measg. | 1600 cubits & upwards pay | 0.7874756 of a Tl. per cubit. | |
| 2nd " " " | 1200 do. & under 1600 | 0.7241091 | " " |
| 3rd " " " | under 1200 do. | 0.5062341 | " " |

N. B. The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or taller head to Brigs, and across at the main mast; these are multiplied together for the above products.—The largest class pay from @ 13 to @ 1328; 2d class from @ 3700 to @ 3780; 3rd class from @ 3700 and under. The Cumshaw or Present Fee is paid by all vessels 1600 Tacls or @ 2223. Linguists fee @ 173½ and Comprador's fees @ 50. Also Pilotage @ 6", inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Recleaden ships are charged only about @ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

We have no improvement to notice in our market since our last; it continues, in the same inactive state.

COTTON MANUFACTURES.—are without demand.

COTTON YARN.—Continues dull.

WOOLLENS.—Broad-cloth and Spanish Stripes are not enquired after, but we have to notice a slight improvement in Longulls.

PEPPER.—Is in good demand at our quotation.

RATTANS.—The supplies keep equal to the demand, and we do not alter quotations.

BUTTERNUT.—Has given way a little.

TIN.—In demand, without improving in price,

EBONY.—Is dull at our rates.

SANDAL WOOD.—Is in good demand, and would realize our quotation.

COTTON.—Prices shew a tendency to rise, especially for the Bombay Cotton, and perhaps the Timevelly.

OPIUM.—No alteration since last week, the same causes for cessation of business continuing.

### DELIVERIES TO THE 8th WEEK.

| PATNA. | BENARES. old, new | MALWA. | TOTAL. |
|---|---|---|---|
| 136 | 7. 60 | 308 | 503 chests. |

### EXPORTS.

RAW SILK.—But little of the best is in the market, and the lower quality is very inferior.

TEA.—Our quotations have, we believe, been paid for the green Teas; a few chops of better quality are down, and for them the Teamen demand higher prices. We have hitherto not quoted Campoi and Souchong, doubting the correctness of our information, that such high prices had really been paid; we however quote them now upon tenantworthy information. Where our prices for Black Teas are lower than last week, they are for inferior qualities, and not owing to a decline in price for good Teas.

## LITERARY,

*( From the late Chinese Gleaner. )*

### THE PRESS NOT FREE IN CHINA.

From the great number of persons in China, devoted to letters as the road to preferment and honors in the state, the press since its invention in the 10th century, may be said to have been fertile. The number of books printed and reprinted, being all in the native language, are perhaps as numerous as in any country of the world. But China has always been subject to an absolute monarchy. The press had not been free. And not only in politics has it been restricted, but on some occasions also respecting the philosophy to be promulgated. The authority does not appear to have been at any time in the hands of Monks, or religionists of any description, but man is the same under every variety of external profession.

The histories of China have generally been edited by the Governments; and all their histories have emanated from themselves, from which it is natural to expect great partiality.

The late Emperor Kien-lung, put several persons to death for some things which they published; * and the Peking Gazette of *May*, 1818, contains a notification of his Majesty's displeasure against the compilers of the history of the last Dynasty. They were writing in obedience to the Imperial order, and had ventured to insert at the close of the Ming Dynasty, something complimentary to the reigning family.

The Emperor is vexed to see any thing respecting his own family, blended with accounts of the falling fortunes of the house of Ming, and he has sentenced to banishment those who presumed, without asking his advice, to insert their flatteries in such an inauspicious place.

Modern books in China, indicate no effort of the human intellect to enlarge the spheres of knowledge: they are mostly voluminous compilations made in obedience to the commands of the Sovereign; or the collections of industrious individuals; they are productions of the HAND, rather than of the MIND. The authors have little more merit than that of being laborious transcribers.

Topography tediously minute; commentaries on the ancient books, and which have been a thousand times repeated; prize essays of the successful candidates at the triennial examinations; scraps of poetry, and occasional novels of a very inferior description; with corrupting ballads similar to those common in Europe, are the chief of their productions. In science and natural history the Chinese press seems at a stand.

### CHARACTERS OF THE CHINESE PEOPLE IN THE DIFFERENT PROVINCES, TRANSLATED FROM THE COURT CALENDAR.

1. Peking—Or Shun-tien-foo. The people are strong and brave—silent—famous for politeness and justice; plain, unceremonious, and moral—regenerated by their vicinity to the Emperor.

   Pien-ting-foo. Literati not endowed with remarkable talents—an agricultural people.

   Yung-ping-foo. The Literati value their reputation—a frugal people, attentive to agriculture.

   Tien-tsin-foo. A mixed people from every part of the country; gay and extravagant—some frugal.

2. Keang-soo — Keang-nin-foo. An expensive people, a great number of Literati.

   Soo-chow. The scholars are very polite, and the people taught to love each other.—Their manners are pure and instruction has a powerful effect.

   Sung-keang-foo. The Literati are studious—the people eminent for benevolence.

3. Gan-hwuy. A light unsteady people—economical and of good appearance.

4. Keang-se. The Literati are partial to classical learning; the people attentive to husbandry.

5. Che-keang.—Hang-chow-foo. Gems and curiosities are here collected. Foreign and home trade are united. The people are genteel, and elegant. The Literati are very methodical.

6. Fo-kien.—Fo-chow-foo. Inwardly sincere—and of a gay exterior.—Very attentive to business, and value economy.

7. Hoo-pe.—Woo-chang-foo. A mixture from every part of the Empire. Every family observes its own customs.

* A Kew-jin graduate suffered for some expression contained in his prize essay. It is said of him, that he wrote verses on his way to the place of execution.

We find in the Historical and Descriptive account of China by Mr. Murray, the following ridiculous description of the outward appearance of the Chinese. "The external form of the natives is marked by peculiarities which have become familiar to us by the paintings on their porcelains; yet both Le Comte and Du Halde assure us that they are by no *means so deformed as their cups and saucers would indicate.* This arises from the great imperfection in the drawing of the human figure, with which their artists are duly charged. The leading characteristics, however, are a broad flat face, with *pointed chin* giving to the head the appearance of an *inverted cone*; high cheek-bones; eyes small, distant from each other, in an oblique position, depressed towards the nose, the corner next which resembles the end of an ellipse; nose short, low and broad at the root; ears large and broad; and black hair. Mr. Barrow considers them as bearing a great similarity to the *Hottentots*! Their features also much resemble those of the Tartars, though their form is taller and more slender."

It is an odd thing for an historian to look to his tea-cup for information on the physical qualities of the nation he describes; had the compilers gone to the London docks and looked at a real Chinaman, and then compared his features and figure with those of the Hottentot Venus, which may, for any thing we know to the contrary, be still exhibiting in London, they would find how little similarity there is between them. It is any thing but flattering to the Chinese, who, however their features may differ from ours, are a well formed race of people, to be pronounced similar to, with the exception we believe of the aborigines of New Holland, the ugliest race of human beings on the earth.

### EUROPE NEWS.

*( From the Atlas, June, 26 )*

SPAIN

Cordova was to leave Madrid for the army on the 16th. Mendez Vigo had commenced his duties as Minister of War. Bonelle and Evans remained in their positions, as did Don Carlos, but at Berriel, Col. Canovas had fallen in with Quilez and defeated him, killing 100 men.

General Villareal has succeeded Eguia in the command of the Carlist army. There was a skirmish with the Carlists at Penagos on the 9th in which Lord John Hay took part; a heavy cannonade from his lordship drove back the assailants with great loss.

The Carlist officers taken in Arragon have been shot by the Queen's troops at Jaen; they were Torres, Sanz, and the Canon Lembiola. They all died with great courage, and Membiola showed the most violent enthusiasm for the cause of Don Carlos up to the last moment.

A report from the *Bayonne Telegraph* says, that on the 16th the Carlist chiefs declared to Don Carlos, that, as they could no longer find means of subsistence in the mountains of Navarre, they were determined to proceed to Arragon and carry on the war in that province. Later dated letters do not mention the report.

We have reason to believe (says the *Courier*) that the Spanish government show no disposition to treat with the consideration they deserve the eminent services of our gallant countrymen in Spain. General Evans has found himself obliged to return the Grand Cross of the Order of San Fernando, in consequence of the irregular and far from complimentary manner in which it was transmitted to him. We have even heard that General Espartero, his junior in rank, has been placed in command over his head. This is, no doubt, one of the results of Gardoqui's visit to Madrid. We are also informed that General Evans has remonstrated with the Spanish government respecting the treatment the legion has received, intimating, at the same time, that unless more attention is paid to their wants, he may be forced, on the conclusion of the first year's service, on the 1st July, to claim the protection of his government, with a view to the return of the legion to their own country.

The celebrated Abbe Sieyes died at Paris on Monday last, in the 88th year of his age. He was by turns a member of the Constituent Assembly and of the Republic, a count and peer of the empire. He voted the death of Louis XVI., for which he was the National Convention, a Director and Consul of proscribed from France under the Restoration. After the revolution of 1830, he, like all the other French exiles, returned to his native country; but he never re-appeared on the political scene. It is supposed he had prepared not less than 30 constitutions at various times for the benefit of France.

ATTEMPT TO ASSASSINATE LOUIS PHILIPPE

*( From the Spectator, July, 2. )*

A frank attempt to assassinate Louis Philip has thrown Paris into consternation. On Saturday evening about six o'clock, the King, with the Queen and Madame Adelaide, left the Tuileries in his carriage for his country-seat at Neuilly. The carriage was passing slowly under the gateway which leads to the Pont Royal, when a young man, who had been conversing with an Algerine, advanced to the open window of the carriage, and deliberately levelled a gun in the shape of a cane at the King's head: he fired, and though the muzzle was almost close to the object, missed his aim; part of the wadding was lodged in his Majesty's whisker, but the ball hit the roof of the carriage. The King instantly put his head out of the carriage, and said, "Is any body hurt?" The assassin dropped his gun, and was secured by the National Guard; one of whom, named Deviesne, a gun-smith, recognised him as the purchaser of several cane-shaped guns at his shop, a few weeks before, and among them the one in question. The prisoner was taken to the guardhouse: where he attempted to stab himself with a pentard, but was prevented.

Louis Philip continued his journey to Neuilly. He has since received addresses from numerous deputations of the two Chambers, and other public bodies. He is said to be cool and calm as usual, but collectedly. Every body is now repeating his answer to Gisbert, who after the failure of the Fieschi plot, congratulated him on his escape, and said that a similar attempt would never be made again: to which the astute King of the Barricades replied—"Ah, my friend, Henry the Fourth escaped twenty-two attempts to assassinate him, and fell by the twenty-third."

The assassin has undergone several examinations; but little has been published to gratify public curiosity as to his motive, or his accomplices, if he had any. His name is Louis Alibaud; his age about twenty-four; his calling that of a commercial traveller. He appeared to be in extreme poverty, and his under garments were filthy. He pretends to be a sublime villain à la Fieschi; in whose prison room he also is confined; but whose example as talkative he swears he will not follow. He says that his own head was the chief of his conspiracy, and his arms the members of it; that there are thousands sworn to kill the King; that his motives cannot be appreciated by the egotists of the present day,—and such like nonsense. He is to be tried on Monday, by the Court of Peers: and thus the villain's appetite for notoriety will be gratified. Numerous arrests have been made by the Police; who, as usual, are very active after the event; but nothing has transpired which leads to implicate other parties in Ali-mont's conspiracy. The King will not review the troops at the next anniversary of "the Days of July;" and he has also been advised, by Lord Granville, not to ride about the country, of which he is very fond. But his Majesty will not give up this gratification. Couriers have been despatched for the Duke of Orleans and Nemours to hasten their return from Germany.

Parties in Paris are divided as to the best mode of preventing future attempts on the King's life. One set cry out for the rigid execution of the laws on all offenders, and say that the King has been too clement; while others assert that the refusal of the amnesty to political offenders has created a feeling of exasperation, which is the real source of danger; and that the extension of the Royal mercy to numerous prisoners would be likely to disarm the animosity of their friends and kindred. This appears to be by far the wisest policy.

*( Singapore Free Press Extra 7th Oct.*

### NEW SUGAR DUTIES.

The following are the duties to be levied, from the 5th of July last, on sugar imported into Great Britain:—

| | £. s. d. |
|---|---|
| Sugar.—Brown, or Muscovado or Clayed Sugar, not being refined, the Hundred weight | 2 8 0 |
| Ditto ditto, the growth of any British possession in America, and imported from thence the Hundred weight | 1 6 0 |
| Ditto ditto, the growth of any British possession within the limits of the East India Company's Charter into which the importation of foreign Sugar may be by this act prohibited, and imported from thence the hundred weight | 1 6 0 |
| Ditto ditto, Brown or Muscovado or clayed sugar, the growth of any other British possession within those limits and imported from thence, the hundred weight | 1 10 0 |
| Ditto ditto, Mauritius, the hundred weight | 1 7 0 |
| Ditto ditto, the produce of, and imported from any Brit. possession the hundred weight | 0 2 0 |
| Ditto ditto, refined, the hundred weight | 0 2 0 |
| Ditto ditto, candy, brown, the hundred wt. | 2 12 0 |
| Ditto ditto, white, the hundred weight | 3 8 0 |

The Moniteur of Wednesday (22nd July) states, on the authority of a telegraphic despatch from Bayonne, that on the 16th the Carlist Chief Gomez, at Don Carlos, that as they could no longer find means of subsistence in the mountains of Navarre, they were determined to proceed to Arragon, and carry on the war in that province. This report is however contradicted by others.

M. LAFARGUE, the celebrated naturalist, died in Cuba in June last.

The following is an instance of rapidity with which intelligence may be conveyed to a great distance. The vote of the colonies for Algiers was passed by the Chamber of Deputies at half past four in the afternoon on the 11th June. The news reached Toulon by Telegraph on the 14th, and on the same day a steam packet set off with it for Algiers, where it was passed up in the forts and made generally known on the 16th, having thus been transferred from Paris to Algiers in the space of three days. (Times.)

### Recent Accidents.

By the *John Calvin*, in 28 days from Gibraltar, the fate of Peruvian and Chilian papers have been received, and we have been kindly favored with the loan of them. It appears from the manifesto issued of General Santa Cruz, that he is entirely engaged in restoring the peace of the country and in consolidating it's internal resources, but it is feared that Peru will be involved in a war with Chili, and some hostilities have already taken place. Some time ago a small expedition was fitted out in this port of Callao, with an intention of attacking the coast of Chili; many of these adventurers had previously to this enterprise, been banished from Chili. The Chilians, to resent this upon the Peruvians, sent a brig of war, the *Aguilas*, to Callao, which anchored in the port on the 31st of August, and remained there quietly at anchor during the whole of the day, the Captain being all the while ashore with the Huaches[illegible] and others, obtaining such information as he required, as to the effective state of the Peruvian vessels then in port. At twelve o'clock that same night, the boats of the *Aguilas* took possession of the Schooner *Peruviana*, which had at the time only two hands on board, and of the Brig *Arequipeno* and the Corvette *Santa Cruz*, both which vessels, not expecting an enemy, were not prepared to receive one, and with these prizes the Aguilas left the port immediately, and was within two miles of the port the whole of the following day, when the prizes, chosen as well as others, were sent back to Callao.

General Santa Cruz enjoys the following high sounding titles, which head every one of his letters "Captain General of Bolivia, great marshall Protector of Peru, supreme Protector of the southern and northern Peruvian States, &c. &c." It seems that, for the present at least, the whole of the legislative and executive power is in his hands, and that he is fully as absolute as any western king, if not more so.

On looking over these South American papers, we were reminded of the arguments on Lotteries we had with our Mauna Cantonensis some short time ago, on coming to them a list of such lotteries as had come up prizes, with their different drawers, of which the following two are a fair sample—"John Morris and Joseph." One Grandfather and one Grandmother. "The most holy Trinity." No mail without a house "God's will be done." My

mother's soul. "I have my basket filled" and more of the same kind. We hope that our Contemporary will agree with us, that in this instance the lotteries have been the cause of a good deal of frivolity and even blasphemy.

## SHIPPING AT CUMSINGMOON.

Tang. President of the Military Board, and Governor of the two Kwang Provinces, proclaims to the Hong merchants for their full information.

The Heang-shan Hëe and Yuen have jointly prepared a report to the following effect.

"We have examined and find that there are no laws permitting barbarian ships to anchor in the inner-waters of Cum-sing-moon, except in very stormy weather when they are allowed to enter.

Now, the barbarians daringly presuming on this accustomed concession, yearly increase the number of their vessels (which anchor in Cumsing moon). If they are not strictly restrained, it will not be possible to foretell the disturbances they will create. We should not wait till they have entered, and then proceed to drive them out, for that would be the cause of wrangling disturbance; but if we prevent them before they enter, many of the evil consequences will be avoided.

At this present time the barbarian vessels have all anchored in the waters of Lintin.

We again request your excellency to intimidate them with stern majesty. The Hong merchants should have strict orders to transmit copies of an Edict to the Ships of the different foreign nations, sternly prohibiting them to anchor in Cum-sing-moon under pretence of the weather being stormy. Thus the laws will be obeyed and the firesides of the inhabitants respected."

This coming before me the Governor, I have examined and find that Cum-sing-moon is situated in the inner-waters, and is not allowed to be used as an anchorage for the Ships of the different barbarian nations.

How can the fixed and splendidly luminous laws bear with these barbarians, when they in open defiance of them, enter?

Now it appears upon examination that all the foreign vessels have anchored in the outside waters. But who can be certain that in a few days their former cunning will not again display itself and that they will not return and anchor (in Cum-sing-moon). Apprehending this, hasten to issue an Edict for all the Hong-merchants' full information. Let them immediately transmit Copies of it to the different barbarian traders for their implicit obedience.

From this time forward let all the barbarian trading Ships which come to Canton, in obedience to the laws, remain at anchor at Lintin until they have permission to enter the Port and discharge their cargoes. They must not under pretence of the weather being stormy enter and anchor in the inner waters of Cum-sing-moon. If in disobedience to this they do so, assuredly I will order the Cruisers to drive them out.

Let there be no remissness or neglect —Haste! Haste! A special Edict.

10th Moon, 3rd day,—November 11th, 1836

# CANTON PRESS,

19th November 1836.

### General Chamber of Commerce.

We must dissent from our brother Editor of the Register's opinion, that the *nucleus* round which a General Chamber of Commerce is to be formed, ought to be the remains of the "British Chamber of Commerce, "an institution," as our cotemporary rather pompously observes, "the acts and correspondence of which are on record in the public archives of Gt. Britain." This latter circumstance is just one of the reasons why the General Chamber of Commerce which in it's constitution and objects must be necessarily very different from the defunct British Chamber, the public utility of which is disproved in these very records, may not, even if in appearance only, mix itself up with this latter, as it might then be supposed by people at home to be an offspring of the same stock, and the inefficiency of the British Chamber, from causes which it would now be unnecessary to explain, while it existed, would augur unfavorably for the new institution now under consideration. Our Corresponden "a Resident Merchant" never meant, if we understand rightly what he says, that *British* merchants should first form this institution, and then deliberate on the propriety of admitting also merchants of other nations, thereby changing the *ci devant* British into a General Chamber of Commerce. Our correspondent speaks of forming the latter, and this has been the object of many articles which before have at various times appeared in this paper. The proposal for a Chamber of Commerce must be made to all the foreign resident merchants here at the same time, in order to obtain their cordial co-operation, and the primary object of it's establishment must be the protection of all foreign trade, against aggressive or extortionate acts of the Chinese Government, as well asthe protection of private interests, in differences of account or disputed commercial usages among foreigners or between foreigners & Chinese. The British Chamber of Commerce has served the purposes for which it was established by Lord Napier, but the circumstances under which it rose into being do no longer exist; let it therefore, though fondly cherished and nursed during it's decline, be entombed with so many other projects, which, however conceived with the best of intentions, were found not to answer in practice.

The reason why a General Chamber of Commerce, only, ought to be established here, not the offspring of a sickly parent, but as a new and vigorous shoot, is, that the object of all foreigners residing in China is the same, namely, trade; and the policy of the Chinese Government against foreigners, is the same likewise, namely; to look on them with either real or feigned suspicion; to prevent as much as possible their free intercourse with the natives; and to derive from them and their commerce the greatest possible revenue; to this must be added the many unauthorized acts of oppression and rapacity committed or attempted upon foreigners by the Government officers.

Assuming therefore that the interests of all foreigners coming to trade here, are similar, it follows that they ought all to share in their mutual protection, and that the Establishment of a General Chamber of Commerce may be of considerable utility in effecting this object is very probable, nor is it less so that the attempt at it's establishment would meet with the cooperation of most merchants here. Let only the beginning be made, and zealously be persevered in and we do not doubt of success.

It is a matter of surprise to us that, though the want of an institution like the one under consideration, has been so frequently felt, and it's establishment been desired by most with whom we conversed on the subject, no individual has yet come forward to make the attempt. The reason of this may be, that failure is dreaded, but we rather think that the difficulties to be encountered, will considerably diminish on approaching them, and that, if the object be only pursued with sufficient energy and perseverance, success cannot be wanting.

---

Per *Syed Khan* from Calcutta the overland despatch of 1st July, and P Amer. *Anawon* news from England to the fourth of July have reached us. We give on the other side such extracts as we deemed interesting, and have only to add, that the latest accounts state that some difference had arisen between the Turkish and British Governments, in consequence of the ill treatment of Mr. Churchill, who by accident had shot a Turk, and was by Turkish officers thrown into the Bagnio and personally illtreated. The demands for satisfaction made by the British Minister at Constantinople, had been disregarded by the Turkish Government, and the same affair is said to have caused a coolness between Lord Durham and Count Nesselrode at Petersburg. An English Frigate had been refused entrance into the Euxine Russian influence seemed to be paramount at Constantinople.

### Captain James Horsburgh.

In a letter signed "a sailor" which appeared in the Canton Register of the 15th, we are, conjointly with that paper, called on to propose a subscription to be raised for the erection of a monument to the memory of the justly celebrated hydrographer, Captain James Horsburgh, lately deceased. No book similar to Horsburgh's Directory, has ever been of so much utility to the navigator, particularly between Europe and Asia; and the Indian Trade is much obliged to him, as to his directions, without which, we believe, no ship now ever ventures to India and China, the preservation of many a ship, and many valuable lives is due. That a monument should be erected to the memory of a man who has conferred such signal benefits, not only on his own country, but on navigators of all nations, is a proposal in which we heartily concur, and hope that our neighbours will be willing to cooperate by their subscriptions in the carrying into effect the object proposed. It is certainly more honorable, though we are sorry to say, less frequent, to honor the memory of those who saved human lives, and contributed to their welfare, than of such as destroyed mankind heroically.

After writing the above we have seen a Circular requesting that a General meeting, to take into consideration the best means of honoring the memory of Capt. James Horsburgh, should be held on Tuesday next at 11 o'clock in the forenoon of the 22d inst. at Mr. Markwick's Hotel in the Imperial Hong, and shall be glad to see it well attended.

We take the following from the Macanese Impartial of 10th of the month. "It is said that the Governor's officers, accompanied by 500 men, went to Lintin this day to destroy the huts of the Chinese on shore in order to prevent their intercourse with foreigners. Three days ago Chinese Commissaries arrived here, to obtain information as to the Chair-coolies and wetnurses in houses of Europeans. These Mandarins were informed by the local officers, that the Coolies served by no means as slaves, but for regular wages; and that it were better to allow this, than to cause the increase of the black porters, by whom disturbances might be created and that the nurses are in no danger in European houses, being necessary there to take care of the new-born infants. Withal some arbitrary acts have been committed, such as to seize coolies etc; but no order on the subject has been published; we must wait for the decision of the Governor on his receiving the commissioner's report. The Chinese were a good deal frightened, but without sufficient cause, it appears."

---

The following taken from the Canton Register of the 15th November, are the concessions the Glasgow merchants wish to obtain from the Chinese Government, as expressed in a memorial addressed by them to Lord Palmerston. These demands are similar to others made in a number of memorials addressed to Lord Palmerston, and though their fulfilment no doubt would be of considerable advantage to our trade, we do not at present see by what means they can be obtained. The arrival of the daily expected Commissioners from Peking will be the time for the foreign merchants to push their interests, and memorials addressed to them, explaining the privations and grievances of which we have to complain, requesting them to make them known to the Emperor, may perhaps make a favorable impression.

Demands of the Glasgow merchants:

1st. Freedom of communication with the supreme Government at Peking, as a protection against the oppression of the subordinate authorities—also with the local authorities at Canton, as a protection against the inferior Chinese officers and merchants.

2nd Domicile at Canton, not only for the individual merchant, but for his wife and family.

3rd Permission to erect and possess ware-houses at Canton.

4th Permission to trade with any other Chinese as well as with those of the Co-hong.

5th The protection of Chinese laws such as they are.

6th The privilege of trading with Amoy, with Ning-po, and a third port near Peking to the northward.

7th The obtaining by negociation or purchase, an Island on the Eastern coast of China, where a British Factory may reside subject to its own laws, and exposed to no collision with the Chinese.

8th Admiralty Jurisdiction to at least the extent of securing proper discipline on board of our own Ships.

---

We give this day the translation of an Edict against ships anchoring at Cumsingmoon, where during the months of May to September inclusive, they seek shelter from the Typhoon. This edict appears at a time when there is not a single ship at Cumsingmoon, and is probably meant to prove to the Commissioners on their arrival here, how implicitly his Excellency's orders are obeyed by Foreigners, ships being now, as is their custom during the wintermonths, anchored at Lintin. The Edict, though a knowledge of the Ships being at Lintin is therein expressed, seems tacitly to acknowledge their right to that anchorage, and may as such become a document of some value in future disputes.

Schooner *Syed Khan*. Off the little Andamans this vessel, on her passage from Calcutta to China, sprung her foremast, and was obliged to put in a new one at Singapore. After she left Singapore, she had light winds and calms as high as 7° north, when the north-easterly winds set in; on the 24th October, in 11° north, she experienced a very severe N. Easterly gale, which lasted till the 29th, with a tremendous sea, when she sprung her mainmast and lost a man over board; carried away the foretopmast, jib and fore-stay-sail and the fore-stay, and had the bowsprit cap washed off. From that latitude she came under very easy sail, and carrying only a double reefed mainsail. Great credit is due to the Captain of this vessel for his successful exertions in bringing her in so well under these circumstances, and the vessel herself has proved an excellent seaboat.

We are sorry not yet to be able to lay before our readers the Memorials of the two Censors, Chou-tsun and Hew-kew, against the legalising of the Opium trade, which we promised to them in our two last papers, but this delay is chiefly owing to the difficulty of obtaining complete and correct transcriptions.

A private of the 3d Company of Artillery at Macao, on interfering in a scuffle between Chinese and Manilla and Malayan sailors, which took place on the 14th inst, was stabbed by a Manila man and died a few minutes after. We hear that the sailors belonged to a French Ship now in the Typa.

We give the translation of a letter addressed by the senior Hong merchant Howqua, to each of the foreigners whose names were mentioned in an Edict from the Governor which we published a fortnight ago, from which it will be seen that these Gentlemen are required to give an account of their dealings, with a view to ascertain how far they are interested in the Lintin trade. We believe that several of them have answered this letter, and that *Howqua* has reported to the Vice-roy, that the foreign merchants whom he addressed on the subject, state that they never smuggled Opium to Whampoa or Canton; and that he (Howqua) was ignorant of what was going on in the outer seas. In how far this answer will be deemed satisfactory by the Local or Imperial Governments, or by the Commissioners, remains to be seen.

---

The following remarkable surgical case occurred at the Ophthalmic Hospital a few days since.

A young man of the name of Po-Asing, now 23 years old, six years ago fell from the roof of a house, and broke the left arm midway from the elbow to the shoulder. He applied to a Chinese Physician, and the arm again became serviceable to him, till about six months ago, by some accident, it was broken a second time. From that period it began to enlarge gradually, till it attained an enormous size. When he came to the Hospital on the 2d November, the average circumference was 20 inches; the veins passing over it were considerably enlarged. It evidently contained fluid, and strong suppurations were entertained that it might be of an aneurismal character. The weight of the arm was burdensome in the extreme, and painful; at several points it seemed ready to burst; which if, as supposed, the artery was opened, the consequences might be immediately fatal. Under these circumstances a consultation of several Gentlemen was held, and all were unanimous that something must be done soon, if ever, for the safety of the young man. On Monday last, Doctor Parker, assisted by Messrs. Cox, Cullen, Jardine and Bonsall, punctured the arm with a lancet, preparations being made for the removal of the arm if necessary. Thirty two ounces of dark fluid and semi-purulous blood were discharged, but the father of the young man not being present to take upon him the responsibility of an operation, it was deferred till Tuesday, when he gave the agreement usual in cases of danger of fatal termination. The above Gentlemen again giving their assistance, the arm was amputated at the shoulder joint; the time did not exceed one minute since the scalpel was applied to the arm, till it was laid aside, the axillary artery was readily secured with a moderate loss of blood. The patient endured the operation remarkably well. The whole arm weighed 16 catties equal to about 5 21. The bone except an inch and a half of each extremity was *completely absorbed*, and it's place supplied by cartilage 3 inches deep on the innerside and near the elbow.

The patient is now doing remarkably well, and a favorable termination is confidently expected.

This is, to our knowledge, the first chinese that has voluntarily submitted to the amputation of a limb, it being against their principles.

---

### Letter from the Hong Merchants.

To Mr. Dent.

We beg to inform you, that on a former day, we received the command, of the Governor, Deputy Governor and Hopoo, to examine yourself and others in relation to the Opium trade, and acknowledge your answer to our communications on these subjects, the contents of which we have examined, and placed before the proper authorities.

Having done so, we again received a mandate from the Governor, which commands foreigners, in consideration of their being permitted to remain and trade at the port, to comply with its fixed regulations, and enquires, why you have remained stationary at the city, during 10 years or even before that period, and attributes your so doing to some unfair motive. It also enjoins upon us further investigation, and to discover, why you have dwelt so long at the port, and have not in compliance with its laws returned home, and if you are concerned in the vessels which are stationed to facilitate the traffick in Opium, as well as to enquire in what manner the operations of receiving chits, paying money, and taking the drug, are carried on, and in 3 days we are required to give an answer to these interrogations.

It is also to remind yourself and other foreigners, that you should be sensibly aroused to the overwhelming compassion of the Celestial Empire, that you should conduct your business with care, and submit it to those laws for its Government, with which you are acquainted, and not be deluded and stray into a wrong path.

This we communicate and beg your attention to it.

*Signed* Howqua.

Taou-Kwang, 10th day, 10th moon, 8th day.
November 18th, 1836.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also high prices are obtainable for *Canisters, Saltpetre, Ginseng* and other *Goods* on which the Duties at Whampoa are high.—Ships with *Rice, Cotton* &c sometimes discharge at Macao or transship their Cargoes at Lintin & to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—All invoices of *Wine, Beer, Pickles &c, Confectionary Stationery, Cutlery, Crockery ware, &c.*, for foreign-ers consumption, are sold at Auction duty paid.

*Note.* Alum, and Cassia are presentable cheaper at Lintin, Macao, &c.; as *Raw Silk, Silk piece goods &c.*, are sometimes shipped there the latter Port avoid double duties, chargeable on those goods, if more than 100 Pounds required for the ship when at Whampoa.

| Australia ... | | " direct ..... | 2½ 2 | Lintin &c. ..... | ½ do. |
| Sand. Islands ... | | France ..... | 2½ 2 | | |

Note. Above rates are from 20th Oct. to 20th April annually; during remaining 6 months the premiums are somewhat higher. Risks on Blocks are $ 9 per Cent per annum, $ 4½ for 6 months, $ 2½ for 3 months and $ ½ per month.
The Local Insurance Offices grant Policies payable in London, Calcutta, and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd " " " 1200 do. & under 1600 " 0.7221091 " "
3rd " " " under 1200 do. 0.5062341 " "

N B. The cubit is 14¼ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Forecast to the Mizen mast; or tiller head to Brigs; and abreast of the main mast; these are multiplied together for the above products.—The largest class pay from $ 43 0 to $ 630; 2d class from $ 3700 to $ 4700; 3rd class from $ 3700 and under. The Comprador Present Fee is paid by all vessels 1600 Tons or $ 22223. Linguists fee $ 17½ and Comprador's fee $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Rice laden ships are charged only about $ 1300 in lieu of measurement &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

There have been but few changes in the market during the last week. COTTON MANUFACTURES.—continue dull, nor can any improvement in these be expected, until the Hong and Teu merchants shall have settled the price of Teas.
WOOLLENS.—Both Broadcloths and Longells command rather better prices than before, as will be seen from our quotations.
BAR IRON.—is rather improving.
RICE.—Difficult of sale at our quotations, in consequence of the abundant crop, and fine weather in reaping it.
BETTELNUT.—the supplies have been comparatively small, and prices are steady at our rates.
PEPPER.—little or none in the market, and prices have consequently improved.
RATTANS.—for Barjermassings $ 3, and for good Straits $ 3½ may be obtained.
TIN.—Banca may now be quoted at $ 24, but there is none in the market. Of Straits also we have had no supplies for some time.
COTTON.—We have no alteration to make in our last week's prices. There has been a little demand for the finer kinds in the early part of the week, but it has ceased and prices are nominal.
OPIUM.—There was a little stir amongst the dealers a few days since, and some sales of Patna and Malwa were made, but the demand has ceased again.

### DELIVERIES TO THE 15th WEEK.

| PATNA. | BENARES. old, new | MALWA. | TOTAL. |
|---|---|---|---|
| 130 | 7, 99 | 270 | 506 chests. |

### EXPORTS.

RAW SILK.—of the first qualities of Canton Silk there is little or none in the market. No. 3 has advanced to our quotations.
SILK MANUFACTURES.—Some contracts have, we hear, been made during the week at prices similar to our rates.
TEA.—We hear that a slight advance has been paid on the opening prices of Hysons and Skin. The Congou Prices have not yet been settled.

# THE CANTON PRESS.

VOL. 2d No. 12. CANTON, SATURDAY, NOVEMBER, 2[illegible], 1836. No. 64.

BIRTH.

At Macao on the 12th inst the Lady of A. C. Bowman Esq. of a Son.

DIED.

At Whampoa Reach on Wednesday at midnight Mr. CHRISTOPHER JOHNSTONE, Surgeon of The Earl Balcarres.

To see the loss of this estimable young man is severely felt and deeply lamented by all his shipmates, is scarcely adequate enough to his memory. The whole fleet at Whampoa may be truly called his mourners.

On the formation of the Seamans Hospital Mr. JAMES STONE volunteered his Services to the Committee, and from that time to the moment of his illness he was most zealous in the discharge of his new duties.

Death has suddenly closed the job on this industrious fellow; it will be the Prayer of many a sorrowing sailor that he is gone to receive his reward above!

On the 18th in the evening of dysentery Mr. GEORGE HILL, at the house of Messrs. TURNER & Co.

## LITERARY.

*( From the Indo Chinese Gleaner. )*

TRANSLATIONS, &c.

A TOOTH OF FUH.

At a temple in Fung-ping, there is a Superbone of the god Fuh; according to vulgar tradition it was exposed once in 30 years; when exposed the year was fruitful and the people happy. The Emperor Heen-tsung sent an officer, holding a Telgraph Power, to meet it with respect——and having kept it in the place three days, presented it back to the temple; on which an officer named Hwuy-ta, sent up the following document to the Emperor:

"The worship of Fuh, is the practice of foreigners: it entered China in the time of How-hay. Before that time there was no such thing. Fuh-hee, Hwang-te sat upon the throne 100 years, being 110 years of age; Shaou-haou sat upon throne 80 years, and was 100 years of age; Chuen-heu sat on the throne 79 years, and was 98 years of age; Te-kwuh sat on the throne 10 years, and was 105 years of age; Te-yaou sat on the throne 98 years, and was 118 years of age; and Emperors Shun and Yu were both of them 100 years of age: at that time the Empire enjoyed great tranquility, the people were peaceful and happy, and lived to a great age, yet China had not then embraced Fuh. Afterwards Thang of the Yin Dynasty was also 100 years of age, and his grandson Tae-woo sat on the throne 75 years; Woo-ting sat on the throne 59 years: history does not record to what age they arrived, but the number of their years could not be much short of 100. Wan-wang, the ancestor of the Chow Dynasty, was 97 years of age, and Woo-wang was 93 years of age; Mo-wang sat on the throne 100 years——and all this time the laws of Fuh had not entered China, so that it could not be, that they attained this great age, through serving Fuh. In the time of Ming-te, of the Dynasty Han, they then began to obey Fuh, but Ming-te sat on the throne only 18 years; after him confusions and rebellions followed close upon each other——and seasons of rest were not long. Then followed the various Dynasties of Sung, Tsee, Leang, Chin, Yuen, and Wei, who served Fuh more and more eagerly, but the period which those Dynasties existed was still shorter: only Woo-te of he Leang Dynasty sat upon the throne 48 years, first and last three several times he gave up his body to the god Fuh——in the sacrifices in the ancestorial temple, he would not use slain animals——he ate once a day, and lived on nothing but fruit and vegetables, at last he was chased by his general, Hew-king, and starved to death in the city of Tea; his kingdom also was overthrown——this is serving Fuh for the sake of happiness, and on the contrary falling into misery, if we consider this, we shall find that Fuh is not to be believed, how much less to be served. When the first Emperor of the present Dynasty received the kingdom from Suy, he consulted about abolishing the religion of Fuh, but the ministers of that time possessed but inferior talents and discernment, and could not deeply investigate the upright way of the former kings, with what is suitable both in ancient and modern times; they could not therefore, improve and carry out the enlightened proposition of the prince, in order to rid us of this disgrace; the consequence was that the matter dropt, to my great and constant vexation. I now bow to your Majesty, as an enlightened sage, a martial and politic Emperor, a spiritual and holy hero, whose equal has not appeared for hundreds and thousands of years. When you first ascended the throne, you forbade the proselyting of persons to become priests and nuns of Fuh, or ministers of the sect of Taou; and would not permit the building of temples and nunneries; I began to cherish the idea, that the resolutions of your ancestor, would be carried into effect by the hand of your Majesty——but your present indulgence and want of prompt decision, how will it on the contrary pamper them, and cause them to increase more and more!

"I have lately heard that your Majesty has ordered the host of priests to bring with respect the bone of Fuh from Fung-tsiang, into the Imperial chamber for inspection, and then into the Imperial palace, ordering, all the temples to contribute and supply it with sacrifices. Now, though I am the most stupid of men, yet I know that your Majesty is not deceived by Fuh, but have performed this service, in order to pray for prosperity. But truly to appoint in your capital and before your eyes, these false and imposing spectacles, these instruments of folly, in order to render the harvest abundant, the people happy, and their hearts obedient——how could one possessing sacred intelligence act thus, and believe such things as these? The blind and stupid people are easily deceived and slowly understand, but when we see your Majesty thus, we must certainly conclude that your whole mind is given up to the service of Fuh——all will say, "that if the Emperor so exalted and intelligent, is still with his whole heart believes in Fuh, who are we, people, that we should not, much more give up our very lives?" They will singe their crowns and burn their fingers, and by tens and hundreds go to give away their clothes and distribute their money to the priests, from morning to evening, imitating one another, till I fear, by and bye, both young and old will run away, utterly neglecting their business and employments. If you do not instantly prohibit these things, but increase their temples still more, then there will soon be persons amputating their limbs and mincing their bodies, for offerings to Fuh, ruining our morals, and exciting the ridicule of surrounding nations; this will not be a trifling matter. Now Fuh was originally a foreigner, speaking a language different from that of China, wearing clothes of a different pattern; his mouth not uttering the rules of the ancient kings, his person not submitting to their laws, ignorant of the duties of princes and people, and the affections of parents and children——now suppose he were at present still alive, and had received the orders of his country, to come and wait upon your Majesty; your Majesty condescending to receive him, would only allow him one audience in the Seun-ching hall, appoint a single feast usual for guests, give him one change of raiment, and see him safely protected to the borders of your kingdom, and not suffer him to tempt your people: now that his body is long since dead, and his bones are rotten, this remnant of unpropitious filth, how unsuitable is it to bring it into the Imperial palace! Confucius said, "Respect the gods, and keep them at a distance." The ancient princes, when they went to console the neighbouring princes, first ordered a necromancer to pronounce spells, and with the plant Taou-le, to drive away calamities, and then they entered to console: but now without any cause, you have taken a putrid filthy thing, have come yourself to inspect it, without any necromancer preceding, or without using the Taou-le. The host of ministers have not spoken of the impropriety of it——nor have the Imperial Examiners reported the error. I am really and truly ashamed of it. I intreat that this bone may be delivered to some officer, to cast it into fire or water, and for ever exterminate its essence——in order to remove the doubts of the Empire, to counteract the temptations of former Dynasties, and cause the people in the Empire to know that the example of our great Sage infinitely exceeds those of common useless things. His example how amazingly full! How exceedingly pleasant!

"If Fuh is indeed a spirit, and can make men miserable, whatever calamities he is able to inflict, let him heap them upon my person.——Heaven is my witness——I will not retract or complain——I cannot contain myself——my passions are roused to the extreme height of devotedness,——I respectfully present my petition to your Majesty——excessively trembling and filled with fear."

On the receipt of this document, the Emperor was exceedingly enraged, degraded Han-yu from his office, and banished him to a part of the Canton province, which was then in an uncultivated and barbarous state;——Han-yu, however, improved his banishment to the good of his neighbours, and instructed them in the doctrines of the sages. The inhabitants of that part, to this day, mention his name with peculiar respect

---

In "Murrays China" we find the following curious information.——"The British trade, formerly "transacted by the Company's Factory, an establish- "ment which cost £ 100 000 per annum, is now "carried on by Royal Commissioners. They are "three in number, with a secretary and master "attendant to assist them in details."

We congratulate the commissioners at Macao, that occupation has been found for them, though this has been a secret thus in China, hitherto.

We find further "The beach (at Canton) is cover- "ed with vast piles of goods, which have been "landed from the country boats, ready to be trans- "ferred into others for conveyance to the ships at "Whampoa. The crowd of clerks and porters run- "ning to and fro, and vociferating to one another; "the numberless boats upon the water, crowded with "people, pigs and poultry, render this, in Mr. "Wathen's opinion, the most tumultuous and noisy "scene in the whole world; *the hour is drawing "and almost (since) nine.*"

L.N.——FE-KING.

THE SURVIVOR AND A PET CRANE.

*( Continued from No. 9 )*

Early on the Pingtsiw days of the 8th and 9th moons he used to enter the seu hein chamber and with his fore finger tapping nine blows on his teeth he earnestly regarded the southern Horizon which is the mansion of the Go Inf Summer, whose surname is Tanyang and name Tangyuen.

On one of these days, while Shaou was thus occupied, the God, in his carnation robes, riding on a flying dragon, and with the twelve pure and beautiful virgins of the vermillion Palace in his train, descended from his heavenly mansion, and entered Shaou's fasting chamber, when he presented him with a divine charm, which he immediately swallowed and thanking the God, recited the following verses.

"Vermillion vested God of purity and truth
Thy excellence surmounts is Tanyang
The carnation robes are of the purest silk
And elegantly flow with a wide spread."

"When thou entered my apartment it reflected
Of thy ruddy hue
When thou was gone it was dismally vacant
Thou dwelst aloft from thy mansion of purity and lustre
And entering my dwelling thou gavest me a vermillion card."

"Attended by five Gods and the delicately vested virgins
Riding on a vermillion Fung* thou roamest through the heavens
Vying in splendour with the rising sun
Thou excellest eternal nourishment to the elements"

TURKEY.

*( From our own Correspondent. )*

*Constantinople, 15th May, 1836.*

A great sensation has been occasioned by the arrest and imprisonment of a respectable British merchant, a Mr. Churchill, who has been a long time resident here, and is well known as a clever and upright man. The cause of this arrest was trivial, when it is considered with what unusual severity he has been treated, and that his incarceration is the strongest and most insulting violation of our capitulations ever remembered of this nature. It may in some measure be accounted for and our astonishment will be diminished when it is known that Mr. C. has been for some time actively employed in representing to the people of England the dangerous position of this country, exposing the most secret machinations of her enemy, and praying them to watch and guard her from utter annihilation——cause of the displeasure of Russia sufficiently obvious in the influences exerted to insult and punish the individual, thereby gaining the double end of revenge, and devising the estrangement of the nations friendly to Turkey.

The accident which gave rise to this important circumstance was occasioned by wounding a Turkish boy in the leg with small shot fired at a bird, whilst sporting at Kadekoi, a village on the Asiatic shore, opposite to the Seraglio point. The boy was laying hidden in the long grass, at a considerable distance, and was consequently invisible to Mr. Churchill when he fired. Instantly afterwards, hearing cries and seeing a boy rise about a hundred paces off, in the direction of his fire, he approached to see what had happened, and then saw that a shot or two had scratched the skin of his leg, causing infinitely more fear than injury. Some labourers came up, and, hearing the boy's story, that the Frank had shot him, seized Mr. Churchill, whilst one ran for the guard. The guard came, commanded by a yuzbashi, (one of a hundred) who paid no regard to Mr. C's statements, but, on the contrary, proceeded to inflict the severest blows upon him with their muskets. They then led him to the hall of the village, who sat half and hour in judgment, receiving the testimony of the child and labourers, who all asserted Mr Churchill had attempted, purposely, to destroy him. A sentence was made out, drawn from this evidence, and addressed to the vali effendi, and the prisoner was conducted under a guard to be dealt with as the vali effendi might direct. Many this proceeding above is in direct contravention of our capitulations, which declare that when a British subject is committed for any offence whatever he shall only be kept in the confinement of the Turkish authorities until such time as notice is given to the janissaries, or the nearest British consul, who at once claims his person, and answers to the Turks for his being impartially judged according to the laws of his own country. But this is nothing compared with what followed. When Lord Ponsonby was informed of Mr. Churchill's arrest, he sent his dragoman to require his immediate release. This was not only refused, but, in the very face of our ambassador's message, orders were given that Mr. Churchill should be transported to the Bosnso, to be there imprisoned and chained; and, what is worse, to be thrown amongst the crowd of the most infamous criminals——wretches that pollute even a prison. Those who have read *Anastasius* will form an idea of his situation.

Lord Ponsonby was highly and justly indignant on learning the contempt and insult with which his authority was received. He again sent to the vali effendi to insist on his release, and satisfaction being given; and now he was joined in his demand by the French, Austrian, and Prussian ambassadors. So alarming an encroachment was this on all the existing treaties with the Porte, that each embassy considered itself interested in protesting against it; indeed, what awakened the sympathies of the Austrians more was an occurrence somewhat similar in nature, and of a late date, in the arrest and imprisonment of one of their subjects, and for whose release even the personal request of the ambassador was made in vain. France, hand in hand with England, wrote a note to the Russian embassy, intimating that it was reported Russian influence had been used in leading the Turks to offer so gross an insult to the British nation, and that the only manner in which it could be disproved would be by Russia's acting strenuously in the same cause with herself. This was of good effect. Russia joins England in her demand for redress.

Three days or more elapsed ere Mr. Churchill was released, and, during that time, frequent applications were made by the ambassadors in vain. It was only when they demanded of the Sultan that the vali effendi should be banished from office, that the kiaja of Achmet Pasha should be banished, (this man, as chief resident of Kadekoi, had advised Mr. C.'s ill-treatment,) and an indemnity of £ 1,000 sterling be paid to Mr. C., that they fully comprehended the seriousness of the offence. No

* An imaginary Bird.

definite result has yet been attained; but the conditions of reconciliation are firmly demanded as stated. The unfortunate object of the prosecution is at liberty. As to the wounded boy, every one is convinced that the wound was the result of the purest accident, and what proves it was of no importance is, that he is already perfectly recovered.

This affair carries every one's attention away from other public matters, and the late rejoicings in celebration of the marriage of the sultan's daughter and the circumcision of his son have ended in rather an unfortunate manner. No doubt the astrologers, who can decide so confidently from the signs of less important events, will have no difficulty in describing the foreboding of this.

---

PUBLIC MEETING HELD AT MARKWICK'S HOTEL

For the purpose of taking into consideration the measures proper to be pursued, to render a lasting tribute of respect to the memory of the late Capt. Horsburgh.

W. Jardine Esq., *in the Chair.*

November 29th 1836.

The meeting was opened by Capt. Hine who briefly stated it's object and suggested that, if sufficient funds could be raised, the purpose would be best answered by the erection of some work of publicutility, as a light house on Pedra Branca, in the Straits of Singapore.

Mr. Clarke suggested the founding a Scholarship or Professorship of Navigation but it was determined by the sense of the meeting, that, as subscription were to be invited from all parts of the world, a merely national institution was not to the purpose.

Proposed by Mr. Innes, seconded by Capt. Grant that the following Gentlemen be appointed as a Committee to carry into effect the objects of the meeting—with power to add to their number—viz.

Mr. Jardine,—Mr. Dent,—Mr. Wetmore, Capt. Hine,—Mr. Van Basel,—Mr. Astell,—Mr. Fox, Framjee Pestonjee,—Capt. Young.

Proposed by Mr. Layton, seconded by Mr. Matheson that it be suggested to the Committee.

"The propriety of establishing an annual examination of the junior Officers, Midshipmen and apprentices of ships trading to China, in theoretical and practical Navigation. A zebra, Arithmetic, Practical Astronomy, Naval Mechanics, and other useful subjects—such examinations to be conducted by a Committee of Commanders and Resident Merchants.

Proposed and carried,—That a subscription list be now opened, and afterwards to lie at different Mercantile Houses.

Proposed and carried—That the thanks of the meeting be given to the Chairman.

---

General Chamber of Commerce.

Resolutions to be submitted to the meeting for the purpose of taking into consideration the expediency of adopting measures for the establishment of a General Chamber of Commerce.

---

1st. That it is desirable a General Chamber of Commerce should be established in China, which, to be really useful, must comprise among its members, the most respectable Merchants resident in China of all nations.

2d. That the specific object of the Chamber is purely Commercial, it has nothing to do with Political questions

3d. That all firms established in China and individuals interested in the trade, are eligible to become members on the payment of the following entrance Fee, and annual subscription, which sums will be devoted to meet the requisite expenses of the Chamber.

Entrance Fee for each Firm..... $ 50
Annual Subscription..... 25
Entrance Fee for each Individual..... 30
Annual Subscription..... 15

4th. That a Committee consisting for the present of 13 members shall be elected by ballot from the general body, who shall, with as little delay as possible, proceed to draw up such rules and regulations as may appear best adapted to the case, and when completed, they shall so mit the same to a general meeting of the Members, when, if any alterations or amendments are proposed, the sense of the meeting shall be taken by open voting and the decision of the Majority shall be adopted.

5th. That a General meeting, for the purpose of electing a Committee shall be held on the—

6th. That each Firm subscribing shall have two votes on all subjects, and each individual one.

7th. That no two members of the same firm shall belong to the Committee.

8th. That the Committee shall consist of, the commencement, of the following proportion of each nation.

| | |
|---|---|
| English — — — — — — — — | 4 |
| American — — — — — — — — | 3 |
| Parsee — — — — — — — — | 2 |
| Dutch — — — — — — — — | 1 |
| Portuguese — — — — — — — — | 1 |
| Open to any Nation — — .. — — | 1 |
| | 13 |

9th. That three Gentlemen be requested to act as Secretaries on the day appointed for balloting for the members of the Committee.

* It would have been desirable to have had a French merchant in the Chamber, but on the departure of the French Consul, there will be no resident French merchant in China.

# CORRESPONDENCE

TO THE EDITOR OF THE CANTON PRESS

Dear Mr. Editor,—I have read what you have published as to want of space for residence of the many foreigners now here. Can you say if any thing has been done in consequence or is going to be done? Your plan to eject Minqua is not bad, but will it answer? I have heard it said, that if applied for a range of Factories would be permitted in front of the Danish Hong down to the water. This would be worth applying for.

Your obedient Servant,
Nonpy.

# CANTON PRESS,

29th November 1836.

Captain Horsburgh.

We give in another column the proceedings of a meeting held on the 29th inst. and which was very numerously attended, particularly by such whose vocations led them to take a more immediate interest in the subject of the meeting, in which it was proposed that a fitting monument should be erected to the memory of the lately deceased Capt. James Horsburgh. From no spot could the proposal be done honor to the memory of Capt. Horsburgh come with more propriety than from Canton, where there is not a foreigner resident but is indebted to that eminent Hydrographer for the safety perhaps of his person and for the property floating at sea, or which has at previous periods, under Horsburgh's directions, been safely taken from, or brought to Canton. We were therefore glad to see the proposal come from Canton first, and as the European community in Calcutta as well as in every part of India and the Straits shares equally with us the debt of gratitude, we doubt not that the call upon the public there will be equally effectual, and that there also a part of the sum requisite to carry into execution the monument the several Committees shall decide on, will be collected; nor do we think that in the commercial cities of England, and perhaps Europe, the call to do honor to the illustrious dead will be unresponded to.

It is unnecessary here to explain in detail of what nature are the benefits Capt. Horsburgh as conferred upon the shipping of all nations; his labours are too well known to every one for us to comment on, and thousands are daily, on the wide ocean, consulting him on their voyages. Every one connected with trade is more or less under obligations to Horsburgh's directions; the seaman for lessening the dangers of his adventurous calling; the merchant and shipowner for the saving of time in, and comparative safety of, his enterprise; and the underwriter for lessening the risk he protects the merchant from. All therefore ought to contribute to a testimonial of gratitude to this distinguished man, nor ought such a tes timonial to be raised merely by his countrymen, but by individuals of all civilized nations, for to all in proportion to the magnitude of their shipping interests has he been a benefactor.

At the meeting, these opinions were very properly expressed, and unanimously acted on, and gentlemen resident here, of seven ny different nations as could be found were named as Trustees, to carry into execution any plan that should be agreed on hereafter.

To erect a merely ornamental monument to the memory of a man whose whole life was devoted to useful sciences, & who leaves behind him memorials more lasting than the purest marble, would however gratifying to his friends, be but a poor comment on his exertions. Such monuments well befit the winner of many battle, the results of which generally are as fleeting as his short span of life; they are becoming to the memory of the Statesman, whose exertions can only be partially appreciated by his successors, who may be reminded by them, that to such a man their forefathers were indebted for a more or less lasting prosperity of their country; they may suit the memory of the less gifted poet, whose marble effigy may peradventure outlive his works, or the language in which he wrote, now become obsolete; but let Horsburgh's memory be honored by the erection of some durable monument, which may, while it proves that his services are gratefully remembered, continue to be beneficial to the seafaring, whose interests when living he had so much at heart.

The meeting held on Tuesday last appeared to be nearly unanimous in similar sentiments, and Capt. Hine proposed that in memory of Capt. Horsburgh, a lighthouse should be erected on a rock called Pedra Branca, situated at the eastern entrance to the Singapore Straits in about 1. 20 North Latitude, and 104. 24 west Longitude. No project appears to us more happily conceived, and none which, with moderate means, could be more easily achieved. From it's position, it would be of very great advantage to all ships bound eastward of Singapore and most of the valuable shipping to and from China would be benefitted by it, the want of a similar beacon having long been felt, it being now, we believe, the practice of ships about to enter the straits from the eastward, not to attempt it during the night. This rock is peculiarly favorably situated, and from the great numbers of ships annually passing it, the light upon it would be of service to a great many. The expense of a Lighthouse on Pedra-branca would probably not be much, and quite within the reach of the probable amount to be raised by subscription, and we even hope, that, after it's erection shall have been determined on, such subscribers as put their names to very moderate sums only, as not knowing to what purpose they were to be employed, will then come forward more liberally. As it is, the subscriptions at the meeting only, from which on account of it's being a very busy day in most of the Offices, a great many of the resident merchants were absent, amounted to about $1500, and considerably more will no doubt have since been collected.

We can of course make only a very rough guess at the probable expense of the lighthouse, but, seeing that no expensive foundations are necessary; that the rock at all times is above water; that the weather in the Latitude of it's position is almost at all times fair, so as seldom or never to interrupt the communication between the rock and the shore, and that it's distance from Singapore, where building materials are almost cheaper than any where else, is only about forty miles; that moreover, the rock being about 30 feet above the level of the Sea, and that therefore the light to be effective in that singularly clear and placid atmosphere would not require to be more than perhaps 25 feet higher, or altogether 55 feet above the level of the sea; we come to the conclusion that the building of the lighthouse with it's lamp would not probably cost much above $7000, if so much, as only a substantial round brick tower is needed. The warder and his family might, we think, not cost more than $20 a month, or $240 per annum, and, supposing that a Picul of Oil at $7 was consumed every three days, the total expense per annum would not exceed $1100. This annual expense might be raised partly by the interest on the amount of subscriptions not expended in the building of the lighthouse, and partly by levying at Singapore, Bombay and Calcutta, Lightmoney, say $5 per annum on every ship about to proceed to China.

These suggestions we beg, may be taken only as a speculation of our own, which we believe not to be incorrect in the main, but which, not having any data to rest on, may require correction.

We merely notice two other propositions made at the General meeting; the first by Mr. Clarke, to found with the proceeds of the subscription a scholarship or professor-ship of Navigation in England, which proposal was opposed by Captain A. Smith as contrary to the objects of the meeting, it being not one of a national but of a cosmopolitan character; all nations being invited to do honor to the memory of Capt. Horsburgh, the monument to be raised to it should not be confined to England alone. Mr. Clarke thereupon withdrew his proposal.

The other motion was by Mr. Layton, seconded by Mr. Matheson, as will be seen in our account of the meeting. We do not quarrel with the motives of this proposal; they are no doubt praiseworthy; but we much doubt it's feasibility. It would be necessary to establish a nautical board; this would necessarily consist of such of the commanders of ships as annually visit China; they would have to be elected annually, and would perhaps not be very willing to prepare themselves to enable them to examine the youngsters, besides we are afraid that in practice, however well it may look in theory, any thing but the good expected, would arise from it.

*Fires in Canton.* The cold season having set in, conflagrations begin to be of frequent occurrence, and there are strong grounds to suspect that they not always originate in accident or neglect, but that some villains, for the sake of plunder, fire the houses. A fire took place in the northern part of the city of Canton on the morning of the 18th of this month, and at about 4 past 11 at night the inhabitants of the Foreign Factories were alarmed by the cry of fire, and by the strong glare it threw over our houses. A part of Sha-ming, where a conflagration had taken place only a few days before, and which we recorded in our paper a fortnight ago, was again on fire and the flames, impelled by a strong northerly wind spread rapidly towards the river; destroying in a very short time a great number of boats, but soon exhausting itself from want of fuel. It broke out, we are told in, one of the pleasure boats of which whole streets are moored in that part of the river, and which from their very number cannot, in case of danger, disentangle themselves sufficiently quickly, and spread rapidly to the boats adjoining. We are sorry to state that on this occasion a great many people lost their lives, partly in the flames, and partly in their efforts to save themselves by swimming. The Foo-yuen and Kwang-chow-foo as well as many other civil and military officers were on the spot, to keep order, and to prevent robberies; but notwithstanding, a great many young women have again been stolen.

---

*Exportation of Silk.* Another representation to the Local Government on this subject, has received the signatures of most of the foreign merchants; it's object is to obtain from the authorities the permission to export an unlimited quantity of silk, raw or manufactured, in vessels leaving this, instead of being as now, restricted to the quantity of about 130 bales of raw silk for every vessel. The inconvenience of the present restriction is very great, both to Foreigners and Chinese, and beneficial only, but in a very small degree, to Country Ships and others which, not returning to England or the United States, but allowed to export their 100 Pecul of Silk, sell, what is commonly called the Silk privilege, and ship the silk thus taken at Whampoa, or Lintin; such has been the eagerness of exporters of silk of late, and so great the scarcity of silk Privilege, that 7 @ 800 $ have been given for if freely, whilst heretofore it was not worth more than 3 @ 400 $.

We have copied from an English paper an account of the ill-treatment Mr. Churchill suffered from the Turkish authorities, owing to which it is said a coolness exists between the Russian and British Ministers at St. Petersburg, as we mentioned in our last.

*Medical Missionary Society.* In our paper of 22d October last we published a prospectus of a society about to be established under this name, in which the Ophthalmic Hospital, in which thousands of Chinese sufferers have already found relief, was to be merged, and the plan on which it's operations had been hitherto conducted, was to be considerably enlarged. We hoped at the time that the foreign community at Canton would come forward with liberal donations, to advance these really benevolent and useful plans; some subscriptions, have, we believe, been since received, but the public, which has ever shewn itself so very liberal on other occasions, has, contrary to our expectations, but coldly cooperated with the three Gentlemen who proposed the Establishment of a Medical Missionary Society, and funds for it's realization are not coming forward readily. We impute this chiefly to the circumstance that the measures taken by the projectors were not sufficiently impressive or urgent, and that this establishment has on that account failed to obtain the attention it so greatly deserves; we have therefore much pleasure in reminding our neighbours that by pecuniary assistance to this institution, they will confer real charity on the suffering.

*General Chamber of Commerce.* We are glad to be able to inform our readers that this Institution is likely to be established, and that, as we mentioned in our last would probably be the case, less opposition has been experienced from any of our neighbours, than had been feared. We hope that the individuals who are engaged in uniting the Public for the purpose of establishing the Chamber of Commerce, will continue in their praiseworthy efforts, and that their proceedings may soon be in a sufficient state of forwardness, for a general public meeting to be called, finally to institute it. The want of a similar establishment has long been felt, and we only hope that it may answer it's ends. None of the nations trading here being protected by their respective Governments, it becomes the duty of the merchants themselves to do it, and that this can only effectually be done by acting in concert is evident, and that the Chamber of Commerce may tend towards creating unanimity of purpose among them, must be the earnest desire of every one interested the China trade.

The establishment of a general Chamber of Commerce is a thing to be desiderated by all foreigners in China, as well as by those who may be in any way connected with it, and that for the plain reason that it is but by combination that we can meet combination, that it is only by our union that the cabals that now press heavily and may yet press more so on us can be met, and, we trust, defeated. It is because the Chinese Government and their Agents, the Hong merchants, are leagued against all foreigners, that we cannot but look on a counter plan as a consummation devoutly to be wished, and we are convinced that if properly exerted, the moral power which has enabled foreigners to supersede or annul the many absurd and tyrannical trammels which the Chinese have attempted to hamper our trade with, will yet make their struggles, if ceaseless and carried on in a fair spirit, more successful than they have ever yet been.

The change which has been effected in the commerce with the Chinese by what is called the free trade must be apparent to all.—At present it is much in favor of the Chinese. Foreigners have, there can be no doubt, lost ground. It is now we think in their power to regain it. We may at least try. The means are in our power; few if any of the foreign community but must now be suffering from the present uncertain and unsafe mode in which trade is carried on. The question is not one referable to any certain individuals; the measure is to all, and it is thus the business of the public to find a remedy for the evils which are found to oppress the trade. Individual opposition can do nothing; it is the voice of the community that must speak, and if this be exerted, we feel convinced that it will not be in vain.

We would exhort residents of all nations, factions, parties, or opinions to join in this, regardless of petty or personal differences, convinced as we are that the announcement to the Chinese, that foreigners were at last combined to protect themselves, would at once establish a wholesome check on their actions, and hoping that, regardless as we have avowed ourselves of party new that of foreigners in general, our voice may be heard, though we do not profess to consider profit from the Chamber which we hope as a public benefit to see established in a proper and suitable spirit within a few days of the landing of this. *Sorrow was ready would be our stake.*

---

Since writing the above, a Circular has been put into our hands, which we recopy in another part of the paper, containing an explanation of the principles on which it is proposed a General Chamber of Commerce should be established. We hear that these principles have met with the unanimous approbation of the foreign community. A general meeting of residents is to be held on Monday next at the Hotel of Messrs Stanfield and Marks to deliberate on this subject; we doubt not that it will be fully attended, and hope that the object of the meeting may be accomplished.

---

We have just seen, too late for translation, a letter addressed by the Hong merchants to many of our most influential merchants here, stating that the Viceroy has ordered the latter to leave Canton within a fortnight, and to return to their homes; compulsory measures are threatened in case these Gentlemen do not obey the order. As reason for this proceeding it is stated that these merchants have already resided too long in this country, and that they are engaged in the Opium trade. It is not yet known, whether this order is meant to be serious, though some of the well informed Chinese seem to attach great importance to it.

---

The principal of the two Commissioners expected here, *Keying*, the Tsi-tuh-how-man of Pe-king (keeper of the 9 gates) or commandant of the City wall as he may be called, has been recalled by the Emperor from *Kiang-si* to the Capital. Instead of him the Tsoung-kwan of Canton, (Tartar General) is to be associated with the other commissioner in the enquiries to be made here. He is, we believe, a near relation of the Emperor. The man who has been recalled was much feared, being of a stern, uncompromising and cruel character.

---

Canton Court Circular.

Tang, the Governor early in the morning left the Office and repaired to the Temple of the God of Heaven to burn incense, then to the Public Hall dedicated to the Emperor, where he expounded a chapter of the Shing-yu (moral obligations) and afterwards returned to the office were he issued and received official documents.

All the high officers of the City, and the Professors sent their respective servants with congratulatory cards to H. E.

O. the Poo-ching-sze, Wang the Gan-cha-sze,—&c. &c. &c. paid their visits to H. E. to congratulate him on the happy return of the day.

10th moon, 15th day, (November 29th 1836.)

NOTICE.—In consequence of Mess. DOUGLAS ANDERSON & Co. of London not having completed their engagement with Mess. DOUGLAS, MACKENZIE & Co dated London 31st December 18 9, and Mr. H. H. DOUGLAS having died at Edinburgh on the 4th June last—the firm of DOUGLAS MACKENZIE & Co. at Canton, Singapore and Batavia will be restricted to the last named place, after the 31st Dec. next;—after which date the above firms at Canton and Singapore, as well as the powers of attorney of the parties in charge there, will cease.

The undersigned, as sole partner, will continue the firm of DOUGLAS MACKENZIE & Co. at Batavia until further notice.

W. MACKENZIE.

Batavia, 5th Oct, 1836.

## LITERARY.

*( From the Late Chinese Gleaner. )*

### 3. SUPERSTITIONS AND CUSTOMS OF THE CHINESE.

"Those who, on building a house, worship the upper beam of the roof; or who comply with those who so worship; or worship the patron of the Masons—SIH."*

It is a custom with the Chinese builders on fixing the upper beam of the roof of a building, to let off fire works, and worship it; or the spirit that presides over the ground on which the house stands; when they congratulate the owner on their proceeding thus far with the building. The journeymen generally get a little liquor on the occasion. It is a very general opinion that the Masons, by concealing, in the wall of the building, an image, or a representation of some evil spirit, can materially affect the prosperity or happiness of those who reside in the house: hence it becomes an usage to worship the patron of the Masons, that success and happiness may attend the inhabitants. †

"Those who, on erecting a house, suspend a red cloth, or a corn sieve, from the upper beam; or throw CHIH-YEN over it; or suspend, over the door, a red cloth, or put pearls in the ceiling of the inner room; or money beneath the base of a wall; ‡ or below the threshold of a door—SIH."

The suspending a piece of red cloth, and a corn sieve, from the upper beam of a house, is supposed to promote fertility—the latter to cause an abundant crop of the various kinds of grain. Chin-tsuys (a kind of dumpling) are thrown over the beam, to relieve any impure or evil spirit that may harbour about the building. The placing of money below the door, or a pearl in the inner room, are to confer happiness and felicity on the dwelling.

"Those who paste up the word Spring at the commencement of the new year; or the words Happiness and Longevity—SIH."

The Chinese are superstitiously strict in observing the new year. Labour, even by the lower classes, is put a full stop to on the preceding and following day of the new year; and by the better orders of society, a fortnight or a month is generally kept. On New-year's day, the old paper charms are removed, and new ones, such as above, with some scalloped paper, are pasted up in their stead. The shopmen paste, or put in their drawers, the word *Lucky or Fortunate*; and mechanics, on commencing any employment, either place before them the last mentioned character, or write it on the work on which they are about to be employed, hoping, that the new year will prove a propitious one.

"O, marrying, those who paste up the double character Happiness; or put up a paper, soliciting the felicitous animal, KO-LEAOU, to enter—SIH."

The felicitous animal, Ko-liaou, is said to appear as a prognostic of sages being born into the world,—one appeared at the birth of Confucius. The divine birds, Fung and Hwang, are often pasted up for the same purpose.

"At a wedding, those who hang meat at the front door of the house; or put the chop sticks in a sieve at the door; or beat the clothes-box with the first; or fix on up the looking glass, to the curtains, within the bed; or arrange pans of flowers by the bed-side; or burn incense—SIH."

It is fabled, that a certain bride, on leaving the house of her parents to go to that of her husband, was met and devoured by a tyger. The parents of the bridegroom, to prevent so serious a catastrophe in the present day, suspend a piece of meat at the door, as a bribe to the cruel monster. The bride, on entering the house of her husband, leaps over the sieve with the chop-sticks, which are thought to promote the speedy birth of children. The suspending of the looking glass within the bed, is to expel all evil spirits that may enter; for evil spirits, or demons, cannot endure to see their own forms. The arranging of flower pans, around the bed, is an offering to promote the birth of children.

"At a wedding, those who scatter rice on the bride's leaving the house of her parents; or select a person of repute, as a companion for the bride and bridegroom; or who burn a candle on the evening of being married, to see whether it dribbles or not—SIH."

The scattering of rice is to prevent the fabulous bird, Kin-ke fing, which dwells amongst the stars, from injuring the bride, when going to the house of her espoused. The persons who are esteemed respectable, and are selected to attend both the bride and bridegroom, are those who are the fathers and mothers of a numerous family. ¶ If the candle dribbles, it is thought unlucky.

"Those who put money in the mouth of a corpse; or put rice in jars, to be buried with the dead; or paste up blue papers at the doors; or place a burning lamp before the corpse; or call the sons and grand-sons to detain the spirit of the deceased; or set up a tablet of respect to the deceased; or those who, by tossing up two pieces of wood, inquire the will of the deceased—SIH."

Money is placed in the mouths of deceased persons, that in case they should re-enter the world in the same form, they may have the means of procuring food to eat. Persons who attain the age of sixty are considered aged. On their death, their sons and grand-sons (supposing that the spirit requires food) later at the door, to inform the neighbours of a person's death, that they may not defile themselves by entering the apartments of the deceased. The lamp is called, a ten thousand years' lamp; it is lit out of respect to the deceased's ancestors; and at which the incense sticks are lit. After the return of the eulogy of the deceased, (which is carried before the corpse, to the grave—and is generally written in large gold characters,) the priests of Taou place it on one side of the room, while they, on the other, drive a nail in the wall, to detain the spirit of the deceased from secretly departing into Hades. Great happiness at ends the son, or grandson, who obtains this nail. Inquiring of the dice used, or of the goats, by means of the Keaou-pei, or throwing up two pieces of oval wood, cut through the centre, is often had recourse to in the temples; they are thrown up thrice; if the smooth surface turn up offmost, it is supposed to indicate the will of the Deity, or of the deceased, to the question or petition put. It frequently occurs that, if the person is disappointed in the answer, he throws again and again till he obtains the supposed consent of the gods.

---

From the Shing-mesou-che, 4 vol. 9d page, it appears, that there are in China, one thousand sixty and odd temples, dedicated to Confucius. At the spring and autumnal sacrifices offered to him, it is calculated in the work I have now quoted, that there are immolated on these two occasions annually:

| | | |
|---|---|---|
| Bullocks | .... | 6 |
| Pigs | .... | 27,000 |
| Sheep | .... | 4,000 |
| Deer | .... | 9,000 |
| Rabbits | .... | 27,000 |
| | | 67,006 |

Thus, there are annually sacrificed to Confucius in China upwards of sixty two thousand victims, and it is added, there are offered at the same time, twenty seven thousand six hundred pieces of silk! What becomes of these does not appear.

---

### THREE ANCIENT CHINESE OPINIONS RESPECTING THE FORM OF THE HEAVENS AND THE EARTH

"The form of the (visible) heaven is round, like the egg of a bird. It is the shell in which the earth is contained. The earth is a flat plane. The one half of the heavens is visible above the earth; the other, hidden below it. The heavens move round the earth from east to west. The circumference of the heavens is upwards of 365 degrees. Each degree is about 250 Lee. The whole circumference of the heavens (probably of the solar system) is upwards of nine times ten thousand Lee. The earth is a vast plane, which, measured in a direct line from north to south, is, in length, 131 degrees and measured across from east to west, the same in breadth. The earth is not placed, strictly speaking, in the centre of the heavens, but about one degree below it."

---

### STOP HIS PAPER.

Of all the silly, silly, shortsighted, ridiculous phrases this, as it is frequently used, is the most silly and unmeaning. We are called an infant nation, and truly we often individually conduct ourselves like children. We have a certain class of subscribers who take the Mirror and profess to like its contents till, by-and-by, an opinion meets their view with which they do not agree. What do they, then, in their sagacity? Turn to their nearest companion, with a pawing comment upon the error they think they have detected? or direct a brief communication to the editors, begging to dissent therefrom in the same pages where the article which displeased them has appeared? No. Get into a pet, and, for all we know, stamp and swear, and *patawtify*, before the foam has time to cool on their lip, write a letter, commencing with—"Stop my paper!" If we are rents are exorbitantly high and landlords should be too generous to take advantage of an accidental circumstance—round come a broad hat and gold-headed cane, with 'Sir, stop my paper!' Does an actor receive a bit of advice? The green-room is too hot to hold him till reliesed by those revengeful words—"Stop my paper!" If we chance to praise one, some envious rival seems gloomily ever ready to—"stop, sir, if you please, stop my paper!" We dare not hope to navigate the ocean with steam boats, but our paper is 'stopped' by a ship-captain's thus doctor nearly left us the other day because a correspondent had praised an enemy of 'our college,' and we expect a *'feri faces'* in the office presently, on account of something which we understand somebody has said against some law-suit in which we do not remember what court. But all these affairs were out-done yesterday by the following:

We were sitting in our elbow-chair ruminating on the decided advantage of virtue over vice, when a little, withered Frenchman, with a cowhide as long as himself and twice as heavy, rushed into our presence.

'Sair!' and he stopped to breathe.

'Well, sir.'

'Monsieur!' he stopped again to take breath.

'Diable Monsieur!' and he flourished his instrument about his head.

'Really, my friend,' said we, smiling, for he was not an object to be frightened about, 'when you have perfectly finished amusing yourself with that weapon, we should like to be the master of our own leisure.'

'No, sair; I have come to horse whip you wis dis cowhide!'

We took a pistol from a drawer, cocked it, and aimed it at his head.

'Pardon, sair;' said the Frenchman, 'I will first give you some little explanation. Monsieur, if you have write dis article'

We looked it over and acknowledged ourself the author. It was a few lines relating to the great improvement in railroads, since showing that this mode of travelling would one day supersede every other.

'You have write dat in your paper?'

'Yes, sir.'

'Well, den, sair—stop you dem paper.' 'I have five *guerres* of my ass. I have dey are all my life to ride de *railroa*? I shall look to fi el every one wis his little *button*—to de horse-cart, to de air—to go round de world in one minute, and make me rich like Monsieur *Astole* wis de big hotel. Well Monsieur, now you put piece in you dem paper to say dat de *railroad*, monsieur de litel railroad, supersede—main *superseede*.' Dat is what you say—supersede everything else, monsieur, mais I have de honnair to inform you dat de railroad servair supersede be balloon—and den, as malere—*restez-Mes!* stop you dem paper!'

*( New York Mirror. )*

---

## CORRESPONDENCE.

### TO THE EDITOR OF THE CANTON PRESS.

Dear Sir,—The repeated favorable notices, you and your contemporary have taken of the Ophthalmic Hospital, are sensibly appreciated by those who are immediately connected with it; but lest a wrong inference be made from your kind notice in your last week's paper, permit me to state, that no solicitude has been entertained that the generous community of Foreign Gentlemen, in China, will not seasonably respond to the appeal made to their munificence in behalf of the contemplated "Medical Missionary Society." Upwards of 3 lacs have already been subscribed, and gentlemen have expressed themselves ready to come forward and by their influence and donations to promote the object. How far the existing institution will be merged in kindred ones about to be established, will be subject for subsequent consideration. At present the objects are distinct.

With many thanks for the lively interest you have taken in behalf of the objects of our common sympathy, sincerely and respectfully your's,

I'ANG PAK-KA.

Canton Nov 30th 1836.

---

### HONG MERCHANT'S MUTUAL LIABILITY

Dear Mr Editor,

In a hasty glance which I have lately taken at Mr. Davis's work on China, I was surprised to find repeated misstatements and inaccuracies, which, from a man who knew this country as well as he should have known it, appear strange. False conclusions and mistaken premises in all matters connected with the E. I. Company and the Chinese, I expected to find, and there is certainly a goodly crop of them. But to my present point.

At page 113 of Vol. I. I find it stated that the "cause of Government were however opposed to the "mischievous consequences of the regulation which "obliged the corporation of Hong merchants to be "answerable for the debts of any member of the "cause, however improvident or dishonest, and it "was enacted that from henceforth the corporate "responsibility should cease." He then proceeds to argue that there can be no injury to foreign merchants in the removal of this, the only security, poor as he states it to have been; and I must take another passage in which he speaks of it as like a shew of general and public information, that no Hong merchant is liable for the debts of another. I cannot presume to say whether this is the case or no; but this I know, that it is not generally understood here. If it be the case, it is high time that foreign merchants, especially those now establishing themselves, should be made acquainted with what so deeply concerns them. If it be not true, it will be as well to contradict Mr. Davis, and not allow those who may read his book, to run away with the idea, that this insecurity is known to those embarked in the trade, an argument which it is not impossible may be used bye to set up at home, in case of appeal to enforce claims for amounts due by bankrupt Hongs. This is a point of no trifling importance, and I am sure that you and your fellow laborer, the Register, can be of public utility by giving your opinions or those of your friends as to it. It will be better to have it discussed now than hereafter, it is probable.

Mr. Davis' information I cannot but suspect to be wilfully incorrect; he has omitted much that was well known to him; and smoothed over the whole thing, what he must have well known was not the best, very thankful. The only authority for his assertion, that I can find or hear of, is a passage in the Canton Register of December 1st 1831, where, in reference to a letter, from the Secretary of the Select Committee on the subject of the payment of the debts due by Chunqua's Hong, the Editor remarks as follows:—

"We have pleasure in announcing that an arrangement has at length been concluded for the "payment of Chunqua's debts as set forth in the "accepted letter from the secretary to the Select "Committee.

"We believe that we understanding was at the "same time come to with the Co-hong, that, this is "the last occasion on which the Committee will call "upon them to pay the debts of any member of their "body who may become insolvent.

"Although the arrangement of the Committee "applies only as the British creditors of Chunqua, "we presume that it will be extended by the Co-"hong to all foreign creditors without exception."

It is plain from this that the then Editor of the Canton Register did not consider this "arrangement" as made by others than the Committee, and how the renunciation of their right to claim, could do away with the rights of others, it is not easy to guess—at any rate it can but be on the British that this proves, for however the acts of the E. I. Company might bind their fellow countrymen, they can't act kind others. Americans, Portuguese Parsees, Dutch, French &c. It may not now be said (it point not stated in the Register at the time, from motives of delicacy, or what not) that it was generally believed, that the great money-vats and cups at the doors of Chunqua paid, some from the first time any of the Company's servants here, high up on the list were found Creditors of the Hong, their timely hinting to the Co-hong, that no one could doubt the honesty of such an one of which Mr. Beale was one. I do not know that he was one of the creditors, but I think it the chance to that he was—by some such hint, for he must have known the whole work, and should have said so.

In case, it has been intimated by some, that there is liability of the old Hongs prior to the 1st of 12th, we confess to the charge not to be acquainted with the circumstances of the case, and therefore not to be able to form any opinion, but if such be the case, as public information, the subject is produced, in the same opportunity; and I am informed to consider you will allow remarks from reading it on kindly opened by Mr. Davis' finish that the subject be entirely closed. I am, Dear Mr. Editor,—Your obedient servt.

B.

P. S. It is to be noticed that this assertion of Mr. D. appears to elicit power from it's coming from one who has been in authority under the present system, as an "Chief Superintendent of British Trade in China" as well as President of the Select Committee after the date of the change of which he speaks. B.

---

### EXPULSION OF FOREIGNERS.

Edict from Tang, governor of Kwang-tung and Kwangsi, &c. &c. &c., and Heuen, governor of Kwangsing, the Tsoo-tsung Commissioner of Maritime Customs at the Port of Canton, &c., to the Hong merchants.

In your Report to us, you have stated "We "have received your condescending commands—to "examine how long the barbarian merchants, "Jardine, and others have resided in Canton, and "why they do not go to either of the three towns, "to their native countries, &c.; and you have requested us to scrutinize the statement which "you have made. Such is your report. We have received the Imperial commands in reference to this case. The original memorials [of Hen Kew and Chou-Tsze] point out the aforesaid case, with great clearness. The said barbarian merchants, Jardine, and others, have many years resided at Canton, and can it be for no purpose? It is made clear (by your statement?) that there are receiving ships in the outer seas; that there is a clandestine trade carried on, and treasure is passing out of the country; that many native vessels go out to meet the receiving ships; and that there are also smuggling boats employed in the trade. Now if the evils are without (the boundaries of the empire), how is it that formerly there have been so many cases detected in this city? You affirm that there are instances of seizure of opium; but that many are without, and but few within our jurisdiction; granting that it is so, they there must be persons by whom, and places in which the business is carried on.

We feel the most tender regard for your prosperity, your families, and your lives; and have agreed unanimously to instruct you and return you from port. But though the force of your report are all objectionable, you must be fully aware that whereby errors we will execute laws with rigour; and it becomes you to look well to the future, when you still have no cause of resentment (towards us). In regard to the said barbarian merchants, Jardine, and others, having long resided at Canton, it is not important to inquire whether they have had many ships, or whether they have been waiting for the payments of money; grant that they have; yet it is reasonable to suppose, that their visit is now suspended for a day? Or that the said barbarians will never return to their country? Already have they been enacted, requiring the barbarians of every country,—when it is impossible to complete their business in season, and show they cannot remain in Canton, to go to one of their ships have left the Port, and reside at Macao; in which case their

goods are to be delivered over to the Hong merchants, that they may be sold and the money paid back; and the next year the merchants must return to their own country; and should the said barbarian procrast their stay in Canton, both the Hong merchants and the Linguists must be called to an account for it. Now the laws not only will not allow the said barbarians to reside in Canton, but they will not permit them to remain a long time in Macao. And since they cannot conduct their trade as they please, your co-hong has been instituted for the management of this branch of commerce. Will you then, under the cover of the laws for its regulation, presume to carry on a clandestine traffick? Such a thing is out of the bounds of reason.

The said barbarians are in duty bound to give thanks to the Celestial dynasty which tenderly cherishes those who come from afar; while they ought, one and all, to obey its laws with trembling awe, that both in coming hither and in returning to their country they may keep the way open for their commerce. His Majesty is now instituting a most rigid investigation; if therefore the barbarians do not settle down and engage in smuggling here, then you can have no intercourse with them; but if they remain here, then the suspicions respecting you will daily increase: what then would you yourselves propose to do in such a case? As for ourselves, we will firmly maintain the present regulation, pluck up every evil, wash away every stain, and that too without injuring the innocent. Having received his Majesty's commands to investigate this subject; we will guard well every point. Admitting that heretofore we have been lenient, shall we now, therefore, neglect to do what is right and good? We wish you all speedily to put your wits to work, and to think long and deep on this subject.

The orders are most peremptory; when they reach you, instantly transmit them to the barbarian merchants, Jardine, Innes, Dent, and Turner, and to them commence recently, Framjee, Merwanjee, Dadabhoy, Gordon, and Whiteman, that they may all obey. If their business be very important, half a month will be allowed them to pack up and to move out of the provincial city, and embark in one of their own, or some other ships going to sea, and return home. They are not to be permitted to loiter and linger. If they have any business that cannot be completed within the half month, they, at the expiration of that period, must go to Macao for a little time, and their accounts be left in your hands; and as soon as all their affairs are settled, they must return to their country. They must not be permitted to stay at Macao as long as they please in opposition to the existing laws. If they presume to be insolent, and act haughtily, and will not listen to our kind words, and obstinately refuse to go in the path we mark out, the Celestial dynasty will not spare the consequences. The laws will be maintained; and there is reason to fear the said barbarians will find it hard to get back to their country. The houses in the Creek factory and in the ground upon hongs will be taken and sealed up. There must be no failure.

Within three days give us a true return respecting the time (in which they leave the city); let it be well attended that we may examine and report thereon to the Emperor. Let every one yield obedience. An especial Edict.

Tsuukwang, 16th year, 10th moon, 14th day.
(November 23d 1836.)

P. S. The Note from the Cohong accompanying the original is dated the 22th instant.

## GENERAL CHAMBER OF COMMERCE

In our last number we mentioned that a General meeting was to be held at Canton on the 29th November to take into consideration, the necessity for establishing a General Chamber of Commerce, for the protection of the commercial interests of the foreign Community here. The meeting was very fully attended; representatives of every commercial firm extant in Canton, were present, with the exception however of most of the Parsees, who, we hear, from some misunderstanding, not originating in any unwillingness on their part to join the Chamber, but purely accidental, did not attend.

In proceeding to give a short outline of the business transacted at the meeting, we may first observe that we were much gratified at the perfect unanimity which prevailed, and that the foreign community, every one of them, seemed to be anxious, in promoting a public good, to bury in oblivion any differences of opinion that may have existed heretofore on the same subject.

Mr. Lindsay, being called to the Chair, addressed the meeting in an appropriate speech, dwelling on the advantages likely to be obtained by the institution of a General Chamber of Commerce,

Mr. Dent then proposed the first resolution, and said that he should have preferred another to move it, particularly Mr. Jardine, who though absent, it was hoped gave his support to the institution of the Chamber, particularly as Mr. Matheson was then present, and whose extensive commercial dealings entitled him to take the lead on such occasions. Mr. Dent then said, that he hoped that the obstacles which had hitherto been thought to prevent the establishment of this institution, did no longer exist. The points which would probably, before others, engage the attention of the Chamber of Commerce. Mr. Dent stated to be: the removal of the restrictions on exportation of silk; an extension of accommodation for the residence of foreigners; and the clearance from rubbish and filth of the space allotted to us in front of the Factories.

Mr. Matheson then moved the second resolution, and mentioned that, though he had not been instrumental in framing any of the resolutions, he, as well as his partner Mr. Jardine, fully sanctioned the proposals which had been previously submitted to the public. (These proposals were published by us last week, and are, with a trifling alteration, the resolutions agreed to at the meeting.)

The other resolutions, were proposed and carried, as given below.

---

1st. Proposed by Mr. Dent, and seconded by Mr. Wetmore—That it is desirable a General Chamber of Commerce should be established in China, which to be really useful must comprise among its members, the most respectable Merchants resident in China of all nations. Carried unanimously.

2nd. Proposed by Mr. Matheson, and seconded by Mr. Fox—That the specific object of the Chamber is purely commercial, it has nothing to do with political questions. Carried unanimously.

3rd. Proposed by Mr. Green, and seconded by Mr. Maclean—That all firms established in China, and individuals interested in the trade are eligible to become members on the payment of the following entrance Fee, and annual subscription, which sums will be devoted to meet the requisite expenses of the Chamber. Carried unanimously.

Entrance Fee for each Firm $ 50. Annual subscription 25. Entrance Fee for each Individual 30. Annual subscription $ 15.

4th. Proposed by Mr. Turner, and seconded by Mr. Wallace—That a Committee, consisting for the present of 13 members, shall be elected by ballot from the general body, who shall, with as little delay as possible, proceed to draw up such rules and regulations as may appear best adapted to the case, and when completed they shall submit the same to a general meeting of the Members, when, if any alterations or amendments are proposed, the sense of the meeting shall be taken by open voting and the decision of the majority shall be adopted. Carried unanimously.

5th Proposed by Mr. Jenkin, and seconded by Dadabhoy Rustomjee—That the gentlemen present who wish to join the Chamber do now subscribe their names on a sheet of paper handed round, entitled "Members of the General Chamber of Commerce." Carried unanimously.

6th. Proposed by Mr. Bell, and seconded by Mr. Alexander Matheson—That each Firm subscribing shall have two votes on all subjects discussed at General Meetings, and individuals one vote. Carried unanimously.

7th. Proposed by Mr. Gibb and seconded by Mr. Inglis—That no two members of the same firm shall be Members of the Committee. Carried unanimously.

8th. Proposed by Mr. King, and seconded by Mr. Gray—That the Committee shall consist, at the commencement, of the following proportion of each nation:

English 5, American 3, Parsee 2, Dutch 1, French 1, open to any Nation, 1, total 13.
Carried unanimously.

9th. Proposed by Mr. How, and seconded by Mr. Stewart—That a ballot be held, for the purpose of electing the Committee, between the hours of 12 and 1 of Wednesday, the 30th instant; and that Messrs. Bell Gibb, and Gordon be requested to act as Scrutineers on the occasion. Carried unanimously.

10th. Proposed by Mr. Dent, seconded by Mr. Matheson, and carried unanimously—That the thanks of the Meeting be voted to Mr. Lindsay, for the trouble he has taken relative to the establishment of the Chamber, and for his services on the present occasion.

Canton, 29th November, 1836.

(Signed.) H. H. Lindsay, Chairman.
W. S. Boyd, Sec. pro. tem.

The following Gentlemen were elected members of the Committee of the General Chamber of Commerce, on Wednesday last, viz.

| | |
|---|---|
| H. H. Lindsay, Esq. | |

| B. Grabarry, Esq. | French. |
| W. Bell, Esq. | Open to any nation. |

## CANTON PRESS,

3rd December 1836.

---

Our Brother Editor in his last No., expresses somewhat like indignation that we should have published in our columns, Intelligence as to the Commission sent here from Peking, of which he was not informed. This is not the first time that we have had to undergo his animadversions, for something of the same kind. The business requires no exhibition of temper from us; and we shall therefore content ourselves with remarking that the news was communicated to us as a very respectable native authority; which, as far as we can ascertain, was perfectly correct; and, in our own defence, we may be allowed to add, that we have not yet seen such superiority in priority or correctness of local intelligence in the pages of the Register over our own, as to induce us to suppose his ignorance of higher authority than our information.

"Every host," as the proverb goes, "thinks her own chicks the handsomest" and it may be that the Register may never at our attempts to give Chinese information, such as we may deem of importance; while preferring thereunto his own, given to the world under the somewhat sounding title of Two Provincial Cry—to the purport that *Ping the Chè heng chao of Fu tse ha* called on His Excellency to report his going away; or that *He* called to state that he was in expectation of a District Magistracy; while *Pu* informs him, and the Register us, that he is returned from the country: information, we must admit, that is not to be found in our pages; but which it is in our power to give, *sequo modo*, at the small charge, to us, of a Cash per sheet; but which, in our or his columns, would look far more like school-boy exercises, than what we consider as information.

We are not fond of controversy; far less so of mere squabbling. The Editor of the Register attaches apparently far more importance to our columns than we to his. We wish him joy of the discussion.

---

We publish in another part a letter from Doctor Parker, correcting a statement of ours in last week's paper, respecting the backwardness, as we were led to suppose, of the Canton Community to subscribe for the maintenance of the Ophthalmic Hospital, or rather for the establishment of a Medical Missionary Society, which was, a short time ago recommended in a small pamphlet under the signature of Messrs Parker, Colledge and Bridgman. From the tenor of this publication we understood, that, if the proposal met with the encouragement it deserved, so as to extend the limits for relief now necessarily confined to the Ophthalmic Hospital, to other descriptions of ailment, the latter would form only a part of a more comprehensive medical establishment. We are much obliged to Doctor Parker for the manner in which he notices our efforts, to assist him in his charitable objects by giving them extended publicity; this we have always considered a duty to the public, and shall continue to point out to them that they cannot better bestow their charity than upon institutions, which like the one in question, by it's admirable arrangement, and the assiduous care bestowed on it, effects so much practical good, and which moreover is likely, more than any thing else, to raise the character of foreigners in the eyes of the Chinese.

---

It will be seen from the proceedings at the meeting for the institution of a Chamber of Commerce, that the three objects which it was likely would first occupy the attention of the Committee, would be; extension of space for our dwellings; the free importation of silks; and the preserving the space in front of the foreign factories free from filth and rubbish. There can be no doubt that all these points deserve the serious attention of the Committee, but there is a subject, much more important than either, to which we wish to draw the attention of the Committee as well as of the Community of Canton. This is the unprotected state of our property from fire. The houses of foreigners here, as is well known to the residents, are so closely surrounded on three sides by the suburbs of Canton, that whenever a fire breaks out there, they are in the most imminent danger, and hardly a winter has gone over of late, that some conflagrations, either in the city itself or in the suburbs, have not shot threatened destruction to our houses. Last winter two great fires took place and had the wind shifted or blown stronger than, our houses must have been burnt, nay, in the last of these two fires, we mean the one which destroyed Carpenter square, one of the foreign Factories had actually ignited. It is now fourteen years since, with the exception of a few apartments, the whole of the foreign factories were burnt, and since that calamity the danger of a similar occurrence has by no means been diminished. It is difficult to devise means for the better protection of our houses, without effecting a radical change in the manner in which the suburbs are built, & in which their houses press upon the Factories; and aware of this danger insured their merchants resident here, avoid warehousing much property in them, which, with a few exceptions from their very circumscribed size, they would not be able to do, even if they wished it. As to the safety of our Factories therefore, we fear we must run the risk in common with the Chinese, nor is there at present any means of insuring it.

What however well deserves our consideration, and our efforts to remedy the evil, is, that we have no control over the bulk of property, either our own or entrusted to us, which after landing, is placed in the warehouses of Hong-merchants, which are most of them equally dangerously situated as the Factories, and which, being at a considerable distance from the latter, our goods in them may be consumed, even before we know that a fire has taken place, and certainly before we are able to devise means for saving them.

The being compelled to warehouse one's goods under Hong-merchants is besides liable to many objections; as it gives them a control over them, which, in many instances, may be any thing but desirable; frequently preventing their owner to dispose of them according to his liking, or if he does so, at an additional expense.

It would therefore be an object of immense importance, to obtain from the local Government permission to build substantial warehouses of our own in some spot where the danger from fire may be less, and where, after having paid the import duty, the goods may be delivered over to any native merchant, their owner chooses.

It is well known that at present, from the peculiar nature of the danger from fire, to which foreign property is exposed at Canton, no insurance against it can be effected, and the richest man may thus in a few hours see all his substance consumed, without having the power of averting his fate. Would reiterated remonstrances to the local Government, have no effect? A well drawn up document, detailing the danger we are under from fire, and the unprotected state of our property, might perhaps make some impression; it can at all events do not harm, and by persevering in giving in such representations from time to time, may perhaps at last be attended to.

---

Per *Charles Grant* from we have received the Singapore Chronicle of 12th, and the Singapore Free Press of 13th October. In the of latter which we find that a lascar, describing himself to be the only survivor of the crew of the *Ship Hermogio Domingo*, lost in the China Sea during the Ty-phoong, had been brought into Singapore by a native vessel. This man states that about a week previous to the vessel going down, they experienced enormy weather, and the upper-masts had been taken down, and the hatches battened down, before the gale had reached it's height. On the second day of the Ty-phoong the poop was washed away, and on the same day both her main and mizen-masts went over board, but they succeeded in getting the Ship clear of the wreck of the masts. On the following night at about 10 o'clock the foremast went—the Ship seemed to be now sounder from the keep as far aft as the foremast, and was seen no more. The lascar who gives this account saved himself by catching hold of a piece of a mast, to which he clung, tossed about at the mercy of the wind and waves for seven days, when he was taken up, he knows not where, by a square rigged vessel, commanded and manned by natives, which was then on her way to Singapore, and which is supposed to have been the *Sapiee Salem* from Sambas. The man had been a week in Singapore before his story became known, nor did his preservers, it appears, give any information of the event.

The *Ardaseer* from China for Calcutta had arrived at Singapore on the 12th September, and the *Fanny* on the 14th.

We hear that the Government auctions have made a seizure of a considerable quantity of Opium and of a large sum in Sycee Silver, near Lintin, and that the owner of this property is likewise in the hands of the Government.

We give the translation of the Edict alluded to in our last, respecting the expulsion of some of the merchants resident here. From what we have heard, since that Edict has been received, it is to serve only to swell the archives of the Imperial Government like so many others that preceded it; it will probably be forgotten in a short time hence.

We wish to direct the attention of our readers to the letter of our correspondent H. The subject is well worth serious consideration, and we should be happy to receive communications on the subject from others of our friends, as by candid discussion, the point, whether Hong-merchants do, or do not, guaranty each other, might be elicited.

NOTICE.—In consequence of Mess. DOUGLAS ANDERSON & Co. of London not having completed their engagements with Mess. DOUGLAS MACKENZIE & Co. dated London 31st December 1835, and Mr. H. H. DOUGLAS having died at Edinburgh on the 4th June last,—the firms of DOUGLAS MACKENZIE & Co. at Canton, Singapore and Batavia will be restricted to the last named place, after the 31st Dec. next;—after which date the above firms at Canton and Singapore, as well as the powers of attorney of the parties in charge there, will cease.

The undersigned, as sole partner, will continue the firm of DOUGLAS MACKENZIE & Co. at Batavia until further notice.

W. MACKENZIE.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camlets, Saltpetre, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or transship their Cargoes at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rests outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary, Stationary, Cutlery, Crockery ware, &c.* for foreigners consumption, are sold at Auction, duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk* piece goods &c, are sometimes shipped there the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

Note. Above rates are from 20th Oct. to 20th April annually; during remaining 6 months the premiums are somewhat higher. Risks on Rice are @ 2 per Cent per annum, @ 4½ for 6 months, @ 2½ for 3 months and @ 1 per month.
The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class vessels, measg. 1600 cubic feet and upwards pay @ 0.7871756 of a T. per cubit.
2nd " " 1200 do. & under 1600 " @ 0.7221891 " "
3rd " " under 1200 do. @ 0.568.341 " "

N B. The cubit is 14¼ inches; measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Forepast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from @ 43. 6 to @ 4320. 2d class from @ 2760 to @ 3780; 3rd class from @ 3700 and under. The Comshaw or Present Fee is paid by all vessels 1600 Tuns or @ 2223. Upwards fee @ 1734 and Compradore's @ 50. Also Pilotage @ 60. upwards and outwards the same. On French and other Foreign vessels they are slightly varied. Russian ships are charged only about @ 1300 in lieu of measurement &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON GOODS.—There is little demand for Cotton Yarn at our quotations, indeed none but the lower numbers are enquired for

LONG CLOTHS.—Of good quality are in fair demand, particularly the Gray; inferior descriptions have rather declined.

CHINTZES,—of good patterns and quality are in good demand, the supply during the season having been small.

WOOLLENS.—are still more depressed, the reports from the markets in the interior continuing to be very unfavorable.

LEAD.—has advanced a little, as has also SPELTER.

STRAITS PRODUCE.—The quotations for Tin and Pepper must be considered quite nominal, the high prices being entirely owing to the very short supply.

COTTON.—There is little altgration either in price or demand since our last, and but little doing, and there is a heavy stock.

OPIUM.—The market has been quite inactive for the past week, and our quotations must therefore be considered as nominal. Nothing further has transpired of the intentions of Government regarding the importation on a duty, but great alarm has been excited amongst the smugglers by the capture near Lintin of 2 or 3 smuggling boats with, it is said, 15,000 Taels of Sycee. For Deliveries see above.

### EXPORTS.

RAW SILK.—The price of good silk remains the same, and there cannot be much of this quality in the market; the inferior kinds are rather lower; including the three ships under despatch this day, the export hitherto must be nearly 7000 bales.—

TEA.—We have to notice a further advance in prices of *Souchong, Skin* and *Hyson*, though our quotation for the latter is for better quality than was in the market last week. *Twankays* have been settled at 30 @ 32 Taels, 4 Taels above the Company's contract prices. All green Teas, with the exception of *Young Hyson*, are in demand and the market looking up. The black-tea merchants' new Company have been settled at 32 @ 36 Taels.

SILK MANUFACTURES.—Of these the shipments have been very considerable during the last few weeks, chiefly of goods previously contracted for. The weavers are all well employed, but we hear

### MUTUAL LIABILITY OF HONG-MERCHANTS.

In how far the Cohong as a body is liable for the debts of one of it's members, is a question of such vital importance to foreigners engaged in trade here, that we have, in consequence of the letter from our Correspondent H. which we published last week, given the subject our full consideration. And have, that the question as it now stands, may be fully understood by our readers reprinted some correspondence that occurred regarding it in the years 1830 and 1831.

From this it will be seen that the Hong-merchants informed foreigners that they would no longer continue responsible for any debts contracted by any of their body after the 18th March 1833, the date of their first communication, and that they would not be responsible for the debts, in the event of failure, contracted by any of the new Hong-merchants, who at the date of that letter were about to be established in compliance with Mr. Plowden's representations to the Viceroy, signed at Macao on the 31 October, and in which we find the following observations bearing on the subject.

"1. Chung-qua's Hong must not be all sold to fall. Less shing-qua must come back and bring in more. If Tong-shing Hong fails, Foreigners will be clamorous, and demand instant payment of the whole amount, they will not bear to be deprived of their property and soon be told to wait for payment in five or six years.

2. The new Hongs now created, if there be 20 or if there be 30, are not to be responsible for any debts of Foreigners or Natives on account of bankrupt Merchants: let each answer for his own, as one for his neighbor's debts. Then each will be trusted as far as he deserves, but no further.

3. The old Hongs must not be responsible for any debts contracted by them from the day on which public notice is given of the new system coming in. They must now pay off, or declare the amount of their present incumbrances.

4. The debts of former Hongs now bankrupt must be paid by an assessment on the amount of the whole Import and Export Trade of each; a small percentage on the total value of their transactions will suffice. The new Hongs, as well as the old, must be assessed in proportion to their dealings, or the old cannot stand long. The debts still due must be paid at the time agreed upon. The Government may reasonably grant time for paying the duties now due, as the debts of Foreigners have been so often and so long postponed. In a few years the assessment will have paid off all: it must then cease. No fresh occasion, he will soon be shown, can ever occur for it."

To which the Viceroy's answer was as follows:

"1 Again it is suggested that the new made Hong-merchants should not pay the debts of other Hongs that fail. We find that as Imperial order has been received sanctioning the making of Merchants with the security of one or two existing Merchants. Hereafter should a failure occur, only those who become sureties, will be required to pay for the others. The Merchants who did not become sureties, will not have to regard, or be anxious about it; but the fixed Law is that foreign Merchants shall deal only with Hong-merchants, and they are by no means allowed to lend money to Hong Merchants.—In all barter transactions, let the foreign Merchant at the close of the year, when buying and selling affairs are completed, himself report clearly to the Hoppo, whether or not the Hong Merchants owe him money, and let every Hong Merchant report to the Hoppo distinctly whether or not he is in debt—keeping a good to that effect, to be examined, and produced as evidence; they must not as heretofore, when Ships quit the port, vaguely assert that they are not in debt, and so settle over the business—After this consultation, in obedience to orders, a bill have been reported, if any Hong fail, let it be ascertained whether the foreign claim had been reported to Government, and if so, then according to Law, let the debt be paid:—And if an appeal be made to Government against the Creditor, let it be disregarded. As to the foreign Merchant, who in disobedience of the Laws, secretly lends money to Hong Merchants, let no prosecution for recovery be allowed, and we don't trust will eradicate the evil of foreign Merchants giving unlimited credit to Hong Merchants.

5. Again it is said the Hong Merchants must pay off entirely what they owe—if not, they must be required on that day, to state publicly that all men may know how much they owe &c. As to debts owing by Hong Merchants, to Foreigners, whether they shall be prosecuted then for or not, must be decided by the preceding regulations; at present, what debts are owing by Hong Merchants to Foreign Merchants no Government office has the means of knowing. It will be right to order the foreign Merchants, and the Hong Merchants to make up their accounts, and report the same to the Hoppo's office, to be there examined.—If the Hong Merchants defer long in paying, then may the foreign Merchant be allowed to prosecute for payment.—If hereafter other debts be incurred let a distinction be made and the affair managed according to the new Regulations.

6. Again it is said that for the Hong debts, a small percentage will be sufficient &c. For the hongs which have already failed, owing money to foreigners, heretofore, application is made to all the Merchants, who annually from the Consoo Charges, pay according to the amount. If new Hong Merchants be made, it will be right that they also should pay—since for the Hongs that have already failed, indebted to foreigners, a certain number of years has been fixed in which to pay the whole amount; if again a small deduction be made it will necessarily protract the time, and prevent the practicability of paying off in the number of years originally fixed, which will be still more inexpedient for the foreign Merchant,—it is right to continue the old rule.

From this answer it appears that every one of the new Hong-merchants must by law be guarantied by one or two members of the Cohong, and that these latter, in the event of his failure, are to be answerable for his debts, but not any of the other Hong-merchants who gave no such guaranty. It is however to be remarked that by Vice regal order the Consoo-fund is to continue as before, though if this order is acted up to, after the old Hongs then existing, and which by inference from the Viceroy's answer, continue to guaranty each other, shall be extinct there will be no longer any occasion for it, as no more calls are to be made on it for payment of debts owing by insolvent merchants, whilst the new Hongs, which were not deserving any benefit or security from the Consoo-fund, are required to contribute to it in proportion to their business, at the same rate as the older Hongs do.

The question then naturally arises For what purpose does the Consoo-fund still exist? why accumulate so large an amount of money without an object?

Messrs. Magniac & Co. on receiving the first intimation from the Cohong of the further irresponsibility protested against it, considering at the same time the Co hong, as a body, irresponsible for the debts of the newly made Hongs. An opinion of this kind, expressed as in this instance by an individual mercantile firm, though the Hong-merchants seem to have considered it as coming from the body of foreign merchants, naturally is not binding for others; but going through the previous correspondence on this subject, we do not see that any other conclusion could be come to, as to this irresponsibility of the new Hongs, which were established consequently on the representations of the Company's Factory in China, as a distinct understanding that they should not mutually guaranty each other, and this fact was made known to the President of the Committee in China by a letter from the Viceroy himself.

The declaration of the seven old Hong's that after March 1833 they would no longer be responsible for each other appears to us to be invalid, as the Viceroy himself states that they continue as before. The only ground on which they can evade responsibility seems to us to be, the non-compliance of foreigners with the injunction of giving in, at the end of the season, a list of the debts owing to them by the different Hongs. To give in such lists is totally contrary to all practice in trade, exposing to publicity the affairs of every merchant, and would probably, in the present state of many of the Hongs, if the Hoppo were to take measures for the speedy payment of their debts, immediately break a great proportion of them. Such a measure is therefore totally impracticable, and this order has therefore, we believe, never been obeyed by any one.

After the above letter had been received in March 1830, it will be seen that the debts of one the Hong-merchants, *Chunqua* were paid from the Consoo-fund, thus affording a precedent setting at nought the Hong-merchants declaration. It may be here objected, that to obtain a settlement of *Chunqua's* debts, the Company gave up their claim upon the Consoo-fund for ever after, which our Correspondent H. informs us, was done with a view to secure the individuals of the Company's factory from loss in this instance, they having lent Chunqua large sums of money on their private account. However this may be, and however binding the acts of the Company's servants may be considered by the Chinese as binding on other subjects of Great Britain, the claims of merchants of other foreign nations can not be influenced by any act of the Company, and if they are paid from the Consoo-fund, in the event of a Hong-merchan.'s bankruptcy, it follows that the English will not suffer to be treated with less justice than others, nor allow their demands to be disallowed, whilst those of others are satisfied.

We come therefore to the conclusion, which in part differs from the opinion expressed by the Register of the 6th, that the only security we possess in the event of failure of any of the new Hongs established since 1833, are the one or two security merchants, who, according to the new law are to guaranty him, and that the Co-hong as a body is no answerable, but that it continues to guaranty the seven older members whose signature are affixed to the two letters given below.

In conclusion we beg to offer a few remarks on the Consoo fund as it now exists. It is, we believe, generally supposed to be under the exclusive controul of the Senior Hong-merchant, and possibly amounts to a very large sum, from which expensive presents are said to be periodically made to the local Government, and even to the Court of Peking. The present contributions to it are, we believe, merely nominal, every Hong-merchant being debited with the amount of Consoo-duty at the end of the year, but not called upon to pay, unless some circumstance should require a heavy disbursement to be made from the fund. That this fund was originally created for the sole purpose of securing foreign traders against loss from failure, fire and other disasters, there can be no doubt, as it was instituted immediately after the demand for the payment of large debts then owing by Chinese to British merchants, made by Capt. *Pearson* of the ship of war *Seahorse*, who was despatched by the Indian Government to Canton in 1792, and whose negociations with the Viceroy were in so far successful, that a great part of the debts were paid off gradually by means of this fund instituted for the occasion.

### CORRESPONDENCE RELATING TO THE MUTUAL LIABILITY OF HONG-MERCHANTS.

*Canton Register*, 29th *March*, 1830.

We do ourselves the pleasure of publishing the following translation of a circular letter, lately addressed by the old Hong-merchants to the foreign residents here, giving them formal notice of the new regulation respecting foreign trade, by which the Hong-merchants are no longer to be held responsible for each other, in the payment of any possible for each other, in the payment of any debts they may hereafter contract to foreigners, unless due notice thereof be given to the Hoppo, at the close of each season.

From the Hong-merchants, concerning debts that may hereafter be contracted; dated 18th March 1830.

A respectful notification. We the Hong-merchants, have of late years waded with difficulty, and much has been done wi hout advancing our interests. Since the 4th year of Tuou-kwang till now, including a term of five years, four Hongs have failed, the cause of which, in a great measure, has been the involvement occasioned by paying the debts of others. Therefore last year, the English Chief, Mr. Plowden, and the Committee, seeing the ruinous state of trade, requested Government to establish some regulations to improve and retrieve it.

At that time an order was received from the Governor, directing the Treasurer and Judge to deliberate, and fix some regulations—Among these it is said.

"According to fixed laws, foreign Merchants are permitted only to deal in Goods with Hong Merchants; they are not permitted to lend money to Hong Merchants. Hereafter foreign merchants are disallowed to lend money secretly to Hong Merchants. And in all trade, by exchange of commodities order the foreign Merchants every year, when the buying and selling are over, themselves to report clearly to the Hoppo, whether or not there be "bad debts" (balances due) by the Hong Merchants. And also let the Hong Merchants give in a Bond to the Hoppo, according to the facts, whether or not he has incurred debts, that these documents may be examined and compared. They may not, as heretofore, when Ships sail, merely assert that there are by no means any debts incurred, and vaguely wind up the business.

After we, the Judge and Treasurer, have, in obedience to orders, reported proceedings, let it be the law, that should any Hong Merchant fail, and it is found on examination that the foreign claim has been clearly reported to Government, therefore it according to law, be cleared and paid. But if it has not been reported, let it not be paid. And if an appeal be made to Government, let it be disregarded.

As to foreign Merchants, in disobedience to fixed laws, secretly lending money to Hong Merchants, let it also not be prosecuted for. No doubt this will eradicate the nefarious practice of foreign Merchants trusting excessively to Hong Merchants." &c.

The order was sent to us the Hong Merchants, and we communicated it, and enjoined obedience accordingly; as is on record.

Moreover, the Hoppo's orders were received to the same effect as the above, and directions given to act in obedience thereto, which are also on record.

We now write the Government orders we have received, and make them generally known. Hereafter Chinese-man † (Gentlemen) trading with Hong Merchants must not trust them excessively. If they incur debts, we cannot, according to the law heretofore, pay for them.

There are now several rich Hong-merchants made. But these new Hong-merchants have not as for their sureties. It Gentlemen dealing with them, choose to trust them excessively or not, let them do as they please. But hereafter if they incur debts to the Gentlemen of the several Hongs, it shall be no concern of our's; we cannot according to the former law, pay for them. And this will be the case not only with the new Merchants, but even among us, the old Merchants. Should debts by hereafter incurred to Gentlemen, neither can, or, as heretofore, pay for them. To sum up the whole—hereafter all buying and selling, and exchanging of goods, must be transacted in obedience to the new regulations. If people believe "lightly" and trust "heavily," so as to have claims for debts owing, it shall not at all concern us. Decidedly we cannot, according to the law heretofore, pay for them.

We presume to trouble you, "Senior benevolent brethren," to make this generally known to the Gentlemen of your Honorable Country—that hereafter all mode of barter, or buying and selling, with the Hong-merchants, must be transacted according to the new regulations. It is incumbent on all to be particularly careful, and love themselves, lest hereafter, some other day, their claims for debts revert to no settlement.

This is what we intensely hope (viz. that people will be careful) and for this special purpose, we make this communication.

With compliments, we are—(signed) How-qua Junior, How-qua, Chung qua, Pan ke-qua, Go-qua, Fat-qua, King-qua—(names and eyphers.)

Tuou-kwang 10th year, 2nd moon, 21th day.

*Canton Register* 1st *May* 1830.

We are happy to have an opportunity of publishing a letter written by one of our Commercial Houses, remonstrating with the Hong-merchants on the inconsistency and injustice of their attempts to throw off a responsibility, which the laws of the Empire have hitherto brought them under for the protection of Foreign Trade—and which will point out the little security that is afforded to Foreigners in their future intercourse with the Chinese Merchants; and how much that intercourse is circumscribed for the purpose of any extensive operations of Commerce.

† These three syllables, which are intended to give the sound of the word Gentleman, denote. "Truly earthly literati." They could give the same sounds conveying the same sense "Truly respectable literati."

This address has called forth a document considered by the Co-hong as a reply, but which must rather be found our readers, when they view the appeal as coming from an individual Establishment, and the reply addressed to the general body of Merchants and giving quotations from a letter as having been written by them. Were we any remarks upon this inconsistency, or upon its general tendency, we cannot however refrain from expressing our regret to see a class of respectable Merchants declaring a conduct which is destructive of that delicacy and confidence which regular Commercial Trade has a claim upon; and which cannot be pleasing to the feelings, or accord with the circumstances of more than one or two of their own Community.

To Howqua, Senior Hong-merchant, and all other members of the Co-hong.

### A RESPECTFUL REMONSTRANCE.

On the 28th day of the second moon of the present year, we were assembled, a notification from your respectable Cohong, which in consequence of certain Edicts issued by the local Authorities of Canton, you had determined to communicate to all foreigners in the following words.

"Hereafter Gentlemen trading with Hong Merchants, must not trust them excessively. If they incur debts, according to the law heretofore, we cannot pay for them. There are now several new Hong-merchants made; but these new Hong merchants have not as for their sureties. If Gentlemen dealing with them choose to trust them excessively or not, let them do as they please. But hereafter, if they incur debts to the Gentlemen of the several honorable Hongs, it will be no concern of our's; we cannot, according to the former law, pay for them. And this will be the case not only with the new Merchants, but even among all the old Merchants. Should debts by hereafter incurred to Gentlemen, neither can, or, as heretofore, pay for them. To sum up the whole—hereafter all buying and selling, and exchanging of goods, must be transacted in obedience to the new regulations. If people believe "lightly" and trust "heavily," so as to have claims for debts owing, it shall not at all concern us. Decidedly we cannot, according to the law heretofore, pay for them."

In acknowledging the receipt of the above notification, we had submitted respectfully our opinion, in justice to ourselves and our constituents, to present some additional Articles under an indistinct attempt to avoid the fatal loss of the Empire, under the dreary records of Edicts issued by the local Authorities of a distant Province, which Edicts are not even admitted to have been submitted to His Imperial Majesty for his approbation.

Having that day taken our decent seats, and proceeded our solemn prayer against this contemplated notification, we shall take the liberty of remarking on its, to us, apparent injustice. By the Imperial law, the Hong-merchants of Canton enjoy a strict monopoly of the whole foreign trade of the Empire; and are held responsible collectively and individually for all debts due to foreigners by any insolvent member of the Co-hong, during the whole charge of the trade of his predecessor, and each successor, for the purpose of paying from the liquidated duties, or debts due to the State, and recently the foreign claims of the Chinese creditors of insolvent Hongs having no claim against the Co-hong. The foreign debts have generally been paid, without interest, by annual instalments, drawn from a duty on the foreign trade, levied and collected by the Co-hong for that express purpose: so that in fact the Co-hong have, in cases of insolvency, only restored to foreigners their own money previously arbitrarily levied on their trade. In reason and justice therefore, the Custom duty, which is the basis of the right to foreign trade, must entail with its responsibility of the Co-hong.

The Cohong while issuing this edict, must have been aware that some of their members were at that very moment, deeply indebted to foreigners; but no notice has been given, that those debts are recorded in the books of the Custom; nor have the foreign Merchants any security against their being refused on the plea of their not having been reported.

To guard against this probable occurrence, we deem it necessary to state, that we have claims against more than one of the old Hong-merchants, whose names, solitary and inchoate usage forbid us mentioning here; which claims our Books and other vouchers still prove, and for which we consider the whole Co-hong of old Merchants responsible, in the event of failure, which at present we have no reason to expect.

As regards the Hong-merchants recently made, we have never been sufficiently unreasonable to expect the old Hongs to be responsible for their debts—being aware that the Cohong have not only given notice to foreigners, but to their own government, of their determination to the contrary.

We take this opportunity of expressing our surprise at the facility with which the local Authorities have, of late years, varied and dispensed with, such of the Chinese laws as tend to protect foreigners in their commercial intercourse; while those of an opposite and degrading nature have been considered as fixed and immutable.

We remain, with respect,

Your most obedient Servants,

MAGNIAC & Co.

Canton, 28th April, 1830.

ANSWER.

**The seven Senior Merchants How-qua, Mow-qua &c. to Messrs. Dent, Jardine, and other Gentlemen; dated.—April, 27th 1830.**

**A respectful notification.** On the 24th day of the 2nd Moon of the 10th year of Taou-kwang, we took the facts of the English Chief Mr. Plowden and others, having last year requested Government to make a change in the commercial regulations; and the regulations issued by the Governor and Hoppo which were received—"that hereafter foreign Merchants are not allowed to give excessive credit to Hong-merchants. Every year, when the buying and selling are completed, they shall report to the Hoppo for his examination, whether or not there are any balances due by Hong-merchants. If such report be made, hereafter in case of failure, these claims will be paid according to law; but if no report be made, they will not be paid; and an application to Government also will be disregarded" &c.

On the 24th of the 2nd moon we informed you by letter of these things, that you might communicate the information to the Gentlemen of your Honorable Country, to conform in every respect to the new regulations. We suppose our document has been examined and conformed to.

Now, on the 4th of the 4th moon we received your reply saying—"that you, in your former letter, had said nothing about paying the old debts of the old Merchants, which seems improper. As to the new merchants, if they should hereafter contract debts your not acting according to the former law, which required you to pay for others, seems equitable." &c.

We consider that our not stating clearly in our former letter, how the old debts of the old merchants were to be settled, was really an oversight; and we before received the Governor's decision, saying, "Concerning debts at present owing by Hong Merchants, to foreign merchants—it is right to order the foreign merchants, to make up their accounts, with the Hong-merchants; and report the result to the Hoppo's Office, for examination" &c., which is on record.

**Now, in public Council we have fixed on a limit, by which to regulate the affair; which will prevent either side from being injured; and which seems sufficient to manifest justice and equity. Whatever debts may have been owing by any of us to Gentlemen anterior to sending of our letter on the 24th day of the 2nd moon of the 10th year of Taou kwang (March 18th 1830.)—we beg that a list of them may be made out, stating such a Hong owes so much,—the debt was incurred on such a day, month, and year—and whether for cargo, or money lent—Let each particular be distinctly stated. During all the 4th moon of this year it is allowed to send in accounts to the Hong-merchants Hall ‡ to have them there, in presence of the Hong owing the same, clearly reckoned, that all men may know the same and future altercation be prevented.**

**The Hong owing must then adopt means to pay off at the appointed time. If it be unable to pay off at the appointed time; it is requested that Gentlemen will at the close of the year, in obedience to the regulations fixed by Government, report § the sums not paid off for examination, and to prevent the nefarious shuffling of turning new into old claims.**

**Should any of our Hongs hereafter fail, and it is found on examination, that the claims were indeed antecedent to the sending of our letter on the 24th of of the 2nd of this Year; and the debt was duly reported, we then doubtless ought, according to the former law, to pay the same by annual instalments.**

**But, if any of the Gentlemen, being on terms of friendship with Hongs, over-trust them, and will not make out a list of their claims, let them then do as they please; only those who do not now make out a list of their claims, will not be paid by us hereafter, according to law.**

**Uniting the above circumstances, we again send a letter, and pray you, benevolent Senior Brethren, to make it known to Gentlemen concerned, that they may immediately make out a list of debts owing to them, anterior to our letter of the 24th of the 2nd moon of this year, and send it to the Hong-merchants' Hall, to be there preserved for examination, and to prevent hereafter the shuffling of new claims being turned into old ones.**

**As to claims subsequent to the date of our letter of the 24th of the 2nd moon of the 10th Year of Taou-kwang, it is right to obey the new regulations established by the Governor and Hoppo, and not, on any account to over-trust Hong-merchants, either with goods or money.**

**If persons do over-trust them with money, we most decidedly will not as formerly, pay for them.**

**Gentlemen, we must pray you to be very careful and to love yourselves.—This is what we greatly hope, and for this special purpose we again write.**

**Other topics were explained in the former letter, and are not farther noticed in this Wishing you well in every respect we are: How-qua, Mow-qua, Puan-khe-qua, Chung-qua, Go-qua, Fat-qua, King-qua.**

---

*Canton Register* **1st** *December* **1831.**

**We have pleasure in announcing that an arrangement has at length been concluded for the payment of Chun-qua's debts, as set forth in the annexed letter from the Secretary to the Select Committee.**

**We believe that an understanding was, at the same time, come to with the Co-hong, that this is the last occasion on which the Committee will call upon them to pay the debts of any member of their body who may become insolvent.**

**Although the arrangement of the Committee applies only to the British creditors of the Chun-qua, we presume that it will be extended by the Co-hong to all the foreign creditors without exception.**

---

**To WILLIAM JARDINE ESQRE.**

**SIR,—I am directed by the President &c, Select Committee to communicate to you, as trustee for the claims of British subjects on the Bankrupt Hong of Chun-qua, the information, that they have this day come to a final and definitive arrangement with the Hong-merchants, for the payment of all British claims on the said Hong, which is as follows.**

**The entire sum remaining due after the payment of the 2nd Instalment in July last, is to be liquidated in three equal Instalments, payable on or before the Chinese new year corresponding with our years of 1832, 1833, and 1834. The interest on all claims ceasing from the date of the payment of the first Instalment.**

**I have the honor to be,—Sir,**

**Your most obedient Servant,**

**H. H. LINDSAY,**

**Secretary.**

**Canton, 24th November, 1831.**

---

CAPT. HORSBURGH.

On the news reaching China, of the late Captain HORSBURGH'S death, a meeting was held, to consider in what most suitable manner Honor might be done to the memory of a man, from whose labours and research, commerce and navigation at large, but particularly that with the East, has derived so much and such lasting benefit.

It was at once resolved to commence a subscription, and in order that it's object might be in the spirit of that usefulness to which the life of the deceased was ever devoted, a Lighthouse was suggested, as an appropriate memorial, and PEDRA BRANCA at the entrance of Singapore Straits, named as the site of one of a Series, (should funds enough be collected to extend the number.)—The whole to bear his name.

The Undersigned were appointed to act as Committee, in furtherance of the general object, and as the Services of HORSBURGH, were confined to no country, but belonged to the world at large, it's members were selected from the various nations, who trade to Canton.

Our first steps has been to endeavour by correspondence, to obtain a general cooperation in every quarter of the Globe, from whence the pages of his Directory have pointed the way to the East.

Canton may be considered one of the main concentering points of Eastern Commerce, and as the China Sea, with it's neighbourhood, has been, in a degree, illustrated by his own Original Directions, drawn from personal observation, it may, not inaptly, be called the principal scene of his Glory.

It was natural that an unprompted proposal, of the kind, alluded to, should immediately follow the melancholy news of his death, in a place where his worth and great experience and his strict fidelity as a Guide, are so well known and have been so beneficial be felt; but if, as is not improbable, the idea has occurred to others, of perpetuating one of the brightest names in the Calendar of Scientific Navigation, (a name as good as it was great,) by any common object of general utility, we are anxious to make known our earnest desire to concur in whatever may hereafter be determined on.

While a lasting memorial might be afforded of the dead, by some durable record—fitting companion to his imperishable work—most important benefits to the living and to all posterity, may be connected with it.—The suggestion of a Light house arose out of this consideration.

The numbers are so large, who might be induced to contribute, embracing a considerable portion of the Shipping interests of the world, and his work having been translated into the languages of most nations that have any extended commerce, a zealous cooperation on the part of all HORSBURGH'S friends and admirers, seems alone wanting to ensure success.

This cooperation we feel assured will be duly fully afforded, and if the appeal sent forth by the Public Press of Canton, shall be as zealously seconded by the same powerful arm, in every other quarter, and be as promptly responded to, as in this small community, we cannot for a moment doubt the issue.

We have the honor to remain,

Your obedient Servants,

Canton, Dec. 1830.

---

# CANTON PRESS,

10th December 1830.

Were the subject of greater importance, or the charges brought against us by our Cotemporary in his two last papers founded on truth, we might express resentment at his associating us with himself where he likens himself to a scolding demirep of Billingsgate; we profess our ignorance both of that character and place, but in this instance, as far as the simile applies to himself, we will, for this once implicitly believe him on nothing more than his own confession. We must however caution the readers of both the Canton papers to be chary in taking for truth other assertions of the *Register*, particularly where, rendered splenetic by seeing the Canton Press anticipate our brother Editor by a fortnight or more, in giving Chinese political news to it's readers, he, not informed of such news, comes forward with inexplicable boldness, to say, that our information cannot have been correct, merely because he had heard nothing of it.

Such has been the treatment we have received at his hands in his two last numbers, and our remarks on the first of them, where we treated with less reverence than our Cotemporary seems to think they deserve, some of his translations from Chinese daily papers, have again drawn upon us the full measure of his wrath.

We mentioned two weeks ago, that one of the Commissioners, *Keying*, on his way to investigate affairs in Canton, had been recalled to Peking, and that the Tartar General at Canton had been appointed in his stead. Our Cotemporary, not informed of this fact, in his paper following ours, remarked that our information could not be true, and in his last number, a week later, he again harps on the same subject, saying: "In our last number we "remarked upon the false information by a contri-"butor to, or correspondent of, that paper, in sta-"ting that the Tartar General of Canton Province "*could* be associated in the Imperial Commission "appointed to investigate certain matters in this "province. What does our brother Editor? prove "that he is right or wrong? No! he &c."

But after this tirade our Cotemporary is at the trouble of proving us to have been perfectly right, for he gives in his paper the following note.

"Sometime after the above was in type, a friend sent us a copy of an Edict, dated on the 24th day of the 9th moon, in which, in consequence of some mismanagement on the part of *Keying*, and a want of due severity in an affair in which some of the imperial eunuchs were concerned, he is ordered to be delivered over to the board of punishments. *Chin-kwan* succeeds him in the management of affairs in *Keangsu*, and *Soo-ih-fung-he*, the Tatar General of *Kwang-chow* district, in those of *Kwangtung*. Time will show the truth or falsehood of the report of this unprecedented measure."

This is just what we stated a fortnight ago, information which we had from a respectable native source, and had our brother Editor not accidentally received the above intelligence, he would still be proclaiming that the thing could not be true, for a most convincing reason truly, which is, that he knew nothing about it. We would recommend the Editor of the Canton Register in future to be more on the *qui vive* for intelligence of local interest, and not to trust to *accidental* communications of friends only, but to be active himself in obtaining it; thus he would not, as he has done in his last papers, expose his ignorance of facts, by denying truth and verisimilitude to statements appearing in our paper, the correctness of which he is afterwards obliged to admit. We believe that the Canton Register will not gain much credit by it's repeated blustering attacks on us, nor is it on our part a pleasant task to repel them; he would even do better, if fancy leads him to suppose any thing wrong in our paper, to pass it in silence, or correct mistatements of ours on better authority; his own motto is well deserving of his serious consideration "*He that has reason on his side, need not talk loud.*"

---

We give below a letter from a Correspondent signed "Nobody" on the present state of our Tea-market, and much as we are obliged to him for choosing our columns to comment on a subject of so much interest to those engaged in the China trade, and although we are perfectly aware of the disadvantages under which the trade now is, we must dissent from him materially in the view he takes of the cause of the present high rates of Teas. We hardly expected to be called upon by any one engaged in the trade of the present day, to advocate a combination for our own defence and *for that of the Hong merchants* a monopoly, which even the E. I. Company, though they opposed another monopoly to it, found troublesome to counteract; how much more difficult then will this be to the free-trader, whose very life is competition, one of whose conditions of existence even is to thrive better than his neighbours, and who would never consent to be guided by regulations a combination may enact; but who will withdraw from it, as soon as he finds that his individual interest, or that of his constituents, is likely thereby to be endangered. The free-trader therefore, to be enabled to carry on a profitable business, ought not be opposed by a monopoly, and as long as the Co-hong shall, by the laws of the Chinese Empire, continue to be the canal through which the foreign commerce flows, as long will the disadvantages, under which he here labor, last. It ought consequently to be his endeavour to make this obnoxious establishment cease, nor ought he, even for his own *temporary* benefit, exert himself to uphold it. The Tea-merchants, it is true, have succeeded in exacting a price for their article much higher than before, and that this will be severely felt by some of the speculators is doubtless; but they have only acted as other men would have done under the same circumstances, and the manner in which the Hong-merchants, in the hopes of making great gains from the foreigners, contracted for the teas of this season with the black-tea men, has been the real cause of the present high rates. The Hong-merchants made advances on teas to be bought in the Tea-districts to be delivered to them, at prices to be fixed at the time of delivery. They then contracted with foreigners *fixing* prices, and the Tea-men well aware of this fact, and probably afraid, lest they did not oppose combination to combination, the Hongs would take undue advantage of them, combined together for mutual protection, and were able to obtain their point.

The disadvantage, of which "Nobody" complains, under which the foreign trade is now suffering, is chiefly owing to the acts of the Hong-merchants and not to those of the black-tea-men.

---

We give in a preceding column the Circular from the Trustees of the Subscribers to CAPT. HORSBURGH'S monument. We doubt not that their call upon the distant commercial communities, will be responded to with liberal subscriptions. Those collected in China, though the list has not yet made it's full round, we hear, already amount to no less than near $4000. Should the object of these Subscriptions meet with equal sympathy elsewhere, we are confident that a sufficient sum will be collected, not only to erect a lighthouse on Pedra branca, but also on such other spots in the Straits where their want has hitherto been most felt.

The Committee of the Chamber of Commerce met on Tuesday the 6th inst., when Mr. MATHESON was elected Chairman, and Mr. WETMORE, Deputy Chairman. Mr. BOYD to be Secretary pro. tem.

A considerable part of our present number is taken up by documents regarding the liability of the Co-hong for their insolvent members, but the importance of the subject must excuse their length.

We hear that the Commissioner from Peking has reached Kwang-tse; his arrival here may therefore be daily expected.

The Hong-merchants, have, during this week been very busy in calling on the Gentlemen whose names were in the Edict we gave a translation of last week, to demand of them to fix a day when they would be ready, according to the orders from the local Government, to leave the Country. We are not aware what answers the Hong-merchants may have received, but little or no apprehension exists that these nine merchants will be forced to leave the Country. The order is of so partial a nature, that it is by some thought not to originate with the Local Government, but to be an intrigue fomented by other Chinese for selfish purposes. The time must now be drawing near when the final answer from the Imperial Government, whether Opium is to be, or not, a legal article of trade, may be received. The question of it's admission on a duty or it's total exclusion, seems to have had violent advocates on both sides, and conjecture is at a loss, which party will ultimately prevail. It was said however, a few days ago, that intelligence had been received from Peking from which it was inferred, that Opium would ultimately be admitted.

---

**A fire broke out at Honan on Sunday last, but was soon got under, having only partially destroyed one house.**

We have not a single arrival to report during the week, though a good many vessels are expected from England and Bengal, several of them overdue. This may be owing to the very strong north-easterly winds which have been blowing during the greater part of the week; the wind at Macao was so high as to prevent the passage boats to leave it, on which account our communications with that place was interrupted during three or four days; and many and alarming were the speculations on the cause of the non-arrival of the boats. They have however since made their appearance, one of them having suffered slightly in her rigging from the violence of the wind.

---

# CORRESPONDENCE.

TO THE EDITOR OF THE CANTON PRESS.

Mr. Editor,—In the present critical state of the Tea market, it is a great pity that those who possess the necessary qualifications, do not come forward and endeavour to benefit the general interests, by placing facts in a clear and convincing point of view, and showing, how it is still in the power of the foreign merchants to protect themselves and the Hong-merchants against a most exacting combination.—But what is everybody's business is nobody's, and accordingly I shall endeavour to make it mine, and with your able assistance shall feel myself fortunate, if I can only induce some more able advocate to take the field.

By the reported scale of settlement of Prices between the Hong-merchants and the Tea-men, seven Taels more are to be given for the best Congou than form the second-grade in the Company's scale, and for the lower descriptions a still greater difference.—If this is to be submitted to throughout, what, but most serious loss is likely to await the shipments of the season; add how disheartning it is to reflect that this is a loss by no means unavoidable, as capable of being averted. There are understand a limited number of superior Congou which might still make some return on the high prices demanded for them. Let them be taken and here make your stop, I would say; and tell the Hong-merchants you are determined not to ship another chest until a fair scale of prices is arranged.—I should be disposed to make a nearer stand even than this—but possibly there may be some difficulty in getting a general concurrence on a point where difference of opinion may prevail as to the success of the purchase. Why does not the Chamber of Commerce make this the subject of their maiden endeavour to benefit our trade? Though in the infancy of their creation, a more important question may never come under their consideration during the whole career before them. The call is loud and crying for such an interference somewhere. Fortunes are trembling in the balance depending on the difference between what this question might be reduced to, and what it will be if not checked by some strong and general resolve.

"Time and I against the world" was Cardinal Mazarin's motto, and it might be hung up at all the Hongs with success on the present occasion.—If they are supported by the determination of the foreign merchants not to buy, they can set the Teamen at defiance who, as the season advances, will be compelled at length to yield. Much time of course must be sacrificed, but the gain will more than compensate. The issue too will be doubly blessed, for the Hong-merchants will be enabled to make their own arrangements for next year's produce in the Tea country, and thus a wholesome condition be restored to a market which has been, for the last two Seasons, in a very feverish state. The facts, Mr. Editor, are strong, and I call your attention to them as one of the guardians of the Public Interests. Shall the predictions too of the opponents of Free Trade be verified that higher prices and inferior quality would be the consequence of letting the world in here—unless it's friends are up and doing, this will be the case for some time to come—a timely exertion may, nay must prevent it. Let the Gentlemen who examine the Tea for the different Houses be appointed to decide on a fair value, as between man and man, for the different grades, and let the foreign purchasers determine on being guided by their decision and the game is won.

I am etc,

NOBODY.

---

# DIED,

**At Whampoa on Sunday the 4th December, Mr. CAMPBELL, midshipman on board the VISCOUNT MELBOURNE, being drowned by the upsetting of a boat. His body, in spite of the zealous search made for it, has not yet been found.**

**At Whampoa on Friday morning at six o'clock on the 9th December, of dysentery, CAPT. W. COLES, Commander of the British Ship CANTON.**

---

‡ Or Consoo House.

§ To Government seems understood.

NOTICE.—In consequence of Mess. Douglas Anderson & Co. of London not having completed their engagement with Mess. Douglas, Mackenzie & Co. dated London 31st December 1829, and Mr. H. H. Douglas having died at Edinburgh on the 4th June last—the firm of Douglas Mackenzie & Co. at Canton, Singapore and Batavia will be restricted to the last named place, after the 31st Dec. next;—after which date the above firms at Canton and St. Ygnace, as well as the powers of attorney of the parties in charge there, will cease.

The undersigned, as sole partner, will continue the firm of Douglas Mackenzie & Co. at Batavia until further notice.

W. MACKENZIE.

Batavia, 5th Oct, 1831.

N B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

Note. Opium can only be delivered at Lintin &c. where also high prices are obtainable for *Camlets, Saltpetre, Ginseng* and other Goods on which the duties at Whampoa are high.—Ships with *Bicr, Cotton* &c. sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary, Stationery, Cutlery, Crockery ware, &c.*, for foreign ers consumption, are sold at Auction duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c.; and *Raw Silk, Silk piece goods &c*, are sometimes shipped there the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class vessels, measg. 1600 cubits & upwards pay 0.7874256 of a T. per cubit.
2nd " " " 1200 do. & under 1600 " 0.7221091 " "
3rd " " under 1200 do. 0.6567341 " "

N B. The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or other head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 43 0 to $ 4320; 2d class from $ 3700 to $ 3780; 3rd class from $ 3700 and under. The Comshaw or Present Fee is paid by all vessels 1600 Tuels or $ 2223. Linguists fee $ 1234 and Comprador's fees $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

Cotton Manufactures.—The only demand is for Long cloths, but chiefly unbleached, though we can not report better prices. Cotton yarn is in little demand at our quotations, but the low numbers are most enquired for.

Woollens.—remain as dull as heretofore, and prices for Broad cloths, Longells and Camblets remain stationary.

Lead.—has advanced to our present quotation

Pepper.—and Tin remain at their high nominal quotation. There is none of either in the market.

Cotton :—There have been a few sales in the past week at a little advance, but the demand is so languid that we do not alter our quotations.

Opium.—Nearly all the brokers are absent, and there have been no transactions for the last week. The mandarins are prosecuting their enquiries into the smuggling system, particularly as connected with Sycee, and one or two individuals have been seized in Canton. At Lintin the deliveries have, of course, been very short.

### EXPORTS.

Silk Manufactures.—The former contracts are being completed, and we have not heard of any new engagements having been entered into. It is expected, that, should orders be slowly forthcoming, the workmen will be obliged to submit to lower wages than hitherto.

Tea.—The only alteration in our quotations of green tea that we have heard of is an advance o. 2 @ 3 Tuels on Hyson. The merchants and black tea-men have at last settled the prices of the higher grades of the mixed leaf Pekoe-Kooks, at equal to Tuels 33.3, 34.3 and 33.5,—but considerable difficulty consists in determining the qualities. The blackish leaf, strong and Pekoe flavored have been settled at 36 @ 38 Tuels. This

## CORRESPONDENCE

TO THE EDITOR OF THE CANTON PRESS.

Mr. Editor,—I am one of those who have so often tried to improve, years since, on our fellow Traders here, and also on our home Government, the necessity of a change, and the dangers of the system we are working under, and to such endeavours having met with only partial support, here, and at home with *the greatest neglect*, it was my purpose never again to have visited the columns of any periodical with remarks of mine, but as I now see a *Crisis*, not approaching, but absolutely here, *the point of which this day showing it*, I am desirous to say a few words, as a bond of union, to the foreign sufferers. It shall be brief, and as it is meant for representation of English and American interests here, not for the wide body of distant merchants they represent, it may be allowed to be written what local to it's terms.

1st. A decision is not abroad, that on Chunqua's failure terms were adjusted, by which the Co-hong was freed of all debts *under a 3 lacs*.

Let us examine this, who made the bargain?—The Hon. E. I. Company; whose Supercargoes were *then* the Chief Authority, being *then* the English Factory, and *now* the Consul, their Private, British, and American interests of that time, there is no bond!

2nd. Consider they continued in this hour to be treated on [illegible] which [illegible] imports, by it's institutions [illegible] to enforce the debts of Chinese to Foreigners.

Let us see how the amount of that duty has been applied, if all the collectors pay the debts of [illegible]

3rd. [illegible] by Government and by law; we are told not to trade with others; (having no means of Courts of Justice, does not such exclusion [illegible] the Government, when [illegible] of their debts of honor, they [illegible]

4th. It appears that a Hong-merchant can be put up as a Security to the property and having filled his godowns therewith—on the [illegible] of payment, with [illegible] of duties, or as now [illegible] property, [illegible] by him as broken [illegible] this day? Did [illegible] the [illegible] for if the Hong-merchants [illegible] and [illegible] he is a child of the Empire, and the child who is [illegible] of [illegible] his property, is only [illegible] father the [illegible] Should this [illegible] [illegible] from home?! Why, my friend in London, acting on the plan to the profits of one of our Indies [illegible] the counting [illegible] would go to Botany Bay.

Gentlemen, this [illegible] in your [illegible], and is from

AN OLD RESIDENT.

Canton, Dec 14th 1836.

### HONG AND TEA-MERCHANTS.

Dear Mr. Editor,—It is quite time that your late correspondent "Nobody" should put questions of the whole facts connected with the question as to the prices of the black Teas of the season. If he were, he would see that, to prevent the existence of so intolerable a state of things, no combination between foreign merchants and Chinese is required. Were this needed, we should have to wait long enough. "A combination" of these two rival and inimical bodies! A pretty combination it would be. Something, we trust, like those combinations in the fables of the mad, and the lamb; or where the fox, the sea, and the goat go to hunt "in combination" with the lion. Similarly successful would, no doubt, be the result!

We have, Sir, no fear of result for combination against the Tea-merchants. They have done what, although not justified in doing, when parts of their own property; according to the favorite Tory axiom, they "may do what they like with their own." They were well aware of the great [illegible] chartered exclusive [illegible] time, during the [illegible] since the Company [illegible] English here [illegible] saw that, at these high prices, purchasers were as eager as ever; and it could not have been little from them that foreigners, who got the best Tea at the highest prices, thought [illegible] favorable so great was the competition. Such was the state of things at the end of the second season. The Tea men, on going back to their country, to prepare for this the third season, took back with them a [illegible] of hard money, to an immense extent, advantageously the monied foreign establishments of Canton [illegible] through the Hong-merchants [illegible] Teas, to be furnished during the opening season generally said 2,000 @ 4,000 Taels per chop, more than one third the whole of the shipping, of price, including the Duty, Hong Charges, &c., probably, on an average of the Congou, not far short of one half of what the black Tea men would have to receive on each chop. Besides this, the Hong-merchants, not content with their already multitudinous avocations, were [illegible] to turn Tea-leaf-sorters on their own account, and shut up some of their own premises, on purchase, as the stock Tea country is to be supposed that this desperate activity to forestall Teas should be unchecked by the cunning Chinese? Is it reasonable to think that the [illegible] capturing all such should not affect prices? Is it not plain that this all-but-grasping [illegible] good market would compel the manufacture of as large a *quantity* as possible; and that, in this the desired object, all care as to *quality* would be [illegible] regarded? Who cared for this? the 3,000 @ 4,000 Taels per chop, bargain money in hand, was a literally safe guarantee that the Tea would "pass." In few words, the foreigners were, nominally, and in consequence of their own acts, as the money of the Tea men; and *they* are now using the advantage which has been allowed them.

Further; the Tea-men, on arriving in Canton, would, previous to putting their larger property in the hands of the Hong merchants, make some few enquiries as to the stability &c. of these same; and, if they found that there were any doubts, no one can blame them for determining to keep themselves safe. We are all fond of railing at the Chinese, and, not unfrequently, we are not far wrong in so doing; but let us act with justice, and not blame indiscriminately. We must not forget that, on the failure of the last Hong that went, the foreigners were paid, yet these same Tea merchants were very heavy losers; they, with others, having the additional satisfaction of knowing that it was with their property that great part of the foreigners had been paid for the imports sold to the Hong. In it, I say, to be conceived that, while they had the power to prevent the recurrence of this, by keeping the Teas till settled and paid for, or in some way secured to them, they would not insist on doing so? They have done it, and this is for other merchants present to blame them; and rant and execrate their combinations, illegalities and so on—know what! The *must* have acted, as all men act for their own interests and it is more childish folly to find fault with them.

Instead of doing this I will tell you Mr. Editor, and, through you, Mr. "Nobody," and all others whom it may concern, how the foreigners may, now, get the whip hand—let them [illegible] contracts—let them be in advance—let the Tea men grow idle, prepare, pack, and bring down the Tea with their own money; and let them wait for payment till the Teas are shipped off. Depend on it, you will then have a loss in quantity, and a gain in quality. You will have fewer and better Teas, new, and cheaper ones; whereas, if the contracting and advancing system is continued, such one severing unfortunate and unscrupulous, things will, ever [illegible] be to fill as pretty a predicament as we have seen, and yet see them, still.

I have gone to so great a length that I cannot enter [illegible] remarks of [illegible] Impossible that you are wrong, and many, many, perhaps, I'll prove that you are so

Your most obedient servant.

H.

Canton, 13th Dec 1836.

### PASSAGE BOATS.

Several points still your attention to a subject which is of considerable importance to the foreign community of this place. I suppose it may have been delayed that we kept you about us to it till now that it could not be ignorance; I am well convinced. I must say that the [illegible] if such it be, is in [illegible] But be it [illegible] without further preface.

It is known to you and all of us, that we have somewhere about [illegible] to get over the [illegible] to foreign hosts to see us off and turn the corner, [illegible] to Macao, Lintin &c. This is at present lodged [illegible] one of the principal accommodations that we could enjoy, and were it denied us, I know of some [illegible] we should feel the privation of more severely.

Now it is perfectly evident that some of these boats are used for the purposes of navigating up and down the river etc. I will ask of the owners of the boats if it is fair that the general good of the community should be endangered by the [illegible] and unauthorized of a few? It is high time that it was put an end to. We know that the Government Officers are now extra vigilant, and the consequence of the first offence will be that all [illegible] will be stopped. Strike is done, who can blame the Chinese [illegible]

I am,

Sir,

ONE OF THE PUBLIC.

Canton, Dec 13th 1836.

## EDICT FROM THE VICEROY.

An order to the Hong-merchants, from Tsu, Governor of Kwang-tung and Kwang-se and President of the board of war, Ke, the lieut. Governor of Kwang-tung and secondary guardian of the Prince, and Wan, commissioner of the maritime customs at the Port of Canton, and overseer of the Imperial Gardens.

A paper from the Hong-me chants, has been presented to us, in which you states:

"having received your Excellencies' command, we immediately [illegible] to the barbarian merchants, Jardine, and others, ordering them immediately to wind up their mercantile affairs, and within half a month [illegible] up their effects and leave the provincial city, dwelling themselves of some vessels now here to return to their homes; and further, if any of them cannot complete their business within that time, then to retire to Macao for a little while, but not to protract their stay there so as to transgress the laws. Such were the commands we received.

"We [illegible] to inform your Excellencies, that we have already reported that there is no one here by the name of *Mowshjoe*. But upon Jardine and the others we have enjoined the orders, to wind up their affairs with the utmost despatch, and within half a month clear out of the provincial city, and either go home or down to Macao; and if they really cannot finish their business in the given time, then to deliver over their goods and accounts to us to complete the sales and make the returns; and further, we commanded them to in arm us in writing within what time they should certainly leave the place.

"Having done this, *Frampee* informed us by letter, that his trade required him to delay, and that he would certainly go home during the first month of next year.

"*Jardine, Dadabay, Gordon, Turner, Innes, and Dent*, have also replied by letter, saying they have now many ships in Port, and must delay their returns till they have completed their business, when they will go down to Macao.

"Such, now the case stands; which, being presented to your Excellencies, you were pleased to pronounce it quite and unsatisfactory, and at the same time to give us verbal instructions to send down orders, admonishing and hasting the departure of the said barbarians from the province.

"Having received these instructions, we returned to the consoohs, that with remaining obedient they should complete their business and to us Whitewash.

"Frampee again declared, as before, and begged that he might be allowed to complete his trade, and then return to his country during the first month of next year.

"Whitewash again declared as before, and begged he might carry on and up his accounts, as he was to embark the house at the end of this year.

Gordon again replied begging that he might be allowed to complete his business, when during the third month of next year, he would go home.

"Dadabhoy again replied, that his business was just now necessary, pressing, and he requested therefore that he might be [illegible] and to remain till the commencement of the year, when he would go down to Mac—

"Jardine again replied, that he had nine many ships at Whampoa, and it was necessary to purchase cargoes of teas and silks, and begged they might be allowed to remain till the third month of next year, when they would go and reside at Macao.

"Innes also replied again, begging that he might remain and finish his business, when, at the end of the year, he would go down to Macao and reside there.

"They all having thus made their requests, it becomes our duty to lay the same before your Excellencies, or determine whether they are just or not, and to deal with the said merchants as your benignity may deem expedient.

The for going statements fill up the pages which you have presented to us. On examination we do not find any laws which allow barbarian merchants to live (during the whole year) in Canton. This usage has sprung up by indulgence on the part of the local officers, who, from [illegible] to time, [illegible] the said barbarian merchants faithfully attend to their own business, and really had no dealing with collusion native merchants; still as they were dwelling on suspicious ground, it was easy for natives to go abroad that they did engage in clandestine trade. These receiving the nine heavens (i. e. the emperor) forthwith on received strict injunctions from his August Majesty to investigate the subject.

Having now received the statements, which are given above, we, the governor, the lieutenant governor, and hoppo, imitating our most wise and illustrious sovereign in his sublimest look down with indulgence on the condition of the barbarians, and will not deal with them as they deserve. But to report so long apprised for their departure as those of them have owned, we cannot neither does it become to arrogate of the local, to allow them to escape with impunity. Therefore consulted in general council, we have determined that

Frampee Whiteman, and Gordon, may return to their native countries at the before-named, the first at the end of this year; the second at the commencement, and the third, during the third month of next year.

Both Innes and Dadabhoy may go down to Macao; and reside there a little while as they have requested—the first at the end of this, the second during the first month of next year.

As for Jardine, Dent, and Turner, who have omitted to period for returning to their country, though they think of going down to Macao to reside, and have requested that they may do so during the third and fourth months of next year, they are really very rash and obstinate. But since they have declared that they have now have many ships and their business must be transacted, we will be no indulgent as to allow them all to remain till the second month of next year, when they must repair to Macao. Reckoning from the present time to the end of the second month of the next year, there is a long period of four months, during which they can [illegible] their business; but if not, yet while at Macao they may get other persons to act in their stead; therefore, to no account whatever will they be allowed to remain here beyond the time (above) specified.

We, the governor, the lieutenant governor, and hoppo, will shortly make out a report, stating the respective period fixed for the departure of each of the out side barbarian merchants, and dispatch it to Peking to be laid before his august majesty. Not the slightest deviation shall there be (from what is here stated).

You, the Hong-merchants, within three days from this date, must divide themselves from the said barbarians, each specifying the time fixed for his departure;) and you yourselves must also give us written dependence, pledging your persons and your property that you will not [illegible] them to linger beyond the proper time. Let no delay be allowed. Only wait till the periods for their respective departures have arrived, then immediately report (each one) for our examination. If after the time have arrived, they again [illegible] to remain, and cannot drift it will be your duty also to [illegible] their property are used to the proceeds of illegal gains, and the persons punished and [illegible]

As for ourselves, we will carry the business through without [illegible] to [illegible] of [illegible] and [illegible] the duties of [illegible] &c. Finally, although the [illegible] we shall see that they are [illegible] [illegible] [illegible] on the foreign and the native [illegible] [illegible] [illegible]

### The Viceroy's reply.

| 3rd " " " under 1200 do. | 0.5667341 " " |

N B. The cubit is 14 inches; measurement is taken on each entry of the vessel with carpenter's rule (except Rice) and is from the Forefoot to the Mizen mast, or 1/3rd head in Bridge; and across at the main mast; these are multiplied together for the Custom House measurement. The largest class pay from @ 43 9 m @ 4320; 2d class from @ 3720 to @ 3720; 3rd class from @ 3700 and under. The Comshaw or Present Fee is paid by all vessels 16 0 Taels or $ 2223, Linguists fee $ 1734 and Comprador's fee $ 30. Also Pilotage @ 6 m. towards and outwards the same. On French and other Foreign vessels they are slightly varied. Excludes ships are charged only about @ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

Very little is doing in Europe Imports of all descriptions, and we have no alterations to notice since our last both in COTTON CLOTHS AND COTTON YARN.

WOOLLENS.—nothing doing in them, and not the slightest demand.

RICE.—has improved a little, about 5 cents per Picul.

STRAITS PRODUCE.—Though several vessels are expected, none have yet arrived, and there being no stock of *Pepper* and *Tin* our quotations continue as high as before, though they are quite nominal

COTTON.—There have been a few small sales during the week, but the demand is very languid, and our present quotations could hardly be now obtained.

OPIUM.—The deliveries up to the 8th were: Patna 10, Benares 41, and Malwa 8, Total 59, chests, and we understand they have been equally small since. This sufficiently indicates the state, of the market. There is absolutely nothing doing, and prices are quite nominal, all the brokers being still away.

### EXPORTS.

RAW SILK.—The late favorable accounts from England have created a brisker demand for the finer descriptions, of which there is very little in the market

TEA.—Many ships are now loading for England, and a great part of this season's teas will probably be shipped before the end of the year under Company's advances. We have no alteration to notice in prices.

# THE CANTON PRESS.

VOL. 2d. No. 16. CANTON, SATURDAY, DECEMBER, 24TH, 1836. No. 69.

## LITERARY.

TO THE EDITOR OF THE CANTON PRESS.

My dear sir,—You, some time since, published a translation or two of mine from M. Stanislas Julien. I now hand you another, which you may insert, if you think it worth while. It gives a more pleasing idea of the strength and constancy of the tender passions than we are used to fancy to belong to the Chinese, and it's allusions to the customs in use at the different times of the year, are not unpleasing, I think. Any how, it is at your service.

Your's
A READER.

KOUAN-YOU-YOUAN
*Elegy on the death of a wife.*

1

On the first day of the year, at the fifth watch, at the time when winter gives out all it's rigour, my tender wife died. In there in the world a man so unhappy as I? Oh, wert thou yet alive, I would have here given thee another dress to celebrate the new year. But alas! thou hast already gone down to the dark empire, where the yellow fountain waters. That the husband and wife may once more see each other, come and visit me in the middle of the night; come at the third watch. I wish to renew the soft illusions of the past.

2

In the second month, at the birth of spring, the sun shines longer in the Heavens; every family then washes, in the purest waters, their robes and their garments. The husbands, who yet have wives, delight in adorning them with new costumes. But I, who have lost my wife, I am a prey to a grief which undermines and consumes me. I have sent far from my sight the small coverlets which confined her pretty feet. Sometimes, I have thought of taking a second companion. But where should I find another as beautiful, as witty, as affectionate?

3

In the third month is the time called *Tsing-ming*. The peach tree expands its vermilion flowers, the willows begin to display their downy head dress. The husbands, who have yet wives, go with them to visit the tombs of their parents. But I, who have lost mine, I go alone to visit her tomb. At the sight of the place, where lie her ashes, burning tears furrow my cheeks. I make funeral offerings; I burn for her images of gilt paper. Tender one! where art thou? I say to her, in a voice broken with sighs, "where art thou?" Tender spouse, where art thou? "But, alas, she is dead to my cries. She is a solitary tomb; but I cannot see my wife.

4

In the fourth moon, at the season called *Mang-tchong*, the air is pure, the sun shines in all its splendor. How many ingrateful husbands give themselves up to pleasure, and forget her whom they have lost. The swallow and wife are like two birds in one forest. When the fatal time comes they fly off, each its own way. This so accomplished beauty, this tenderness without bounds, they have vanished in a morning. Why, alas, two spouses so closely united, why should not they have lived and grown old together. I am like a man whom an enchanting dream has cradled in a sweet delusion. When he awakes, he seeks the young immortal one who charmed his ears and his eyes; and he finds around him cold, solitude, silence.

5

In the fifth moon, at the season called *Tuen-yang*, dragon headed boats joyously furrow the waters. The most exquisite wine is warmed, the most delicious fruits are heaped up in jars. Each year, at this time, I loved to partake, with my wife and my children, the pleasures of these simple feasts. But, now, I am unquiet and agitated; I am a prey to the most cruel anguish. I cry from morning till night, and from night till morning; every moment I think that my soul will burst with grief. What do I see? charming infants are gaily gambolling before my door. I understand their pleasures; they have each a mother who presses them frequently to her bosom. Go far hence, tender children, your joyous outcries do but tear my heart.

6

In the sixth month, at the season named *Sa-yé*, it is difficult to bear the burning heat of the day. Rich and poor dry their clothes. I will take a robe of silk, and expose it to the rays of the sun. I will also lay out the embroidered shoes of my wife. Let us see—here is the dress with which she adorned herself on feast days; here is the elegant covering which enclosed her pretty feet. But where is my wife? Or, where is the mother of my children? It seems as if a blade of steel froze and divided my heart.

7

It is the seventh month—the season called *Ki-kiu*. I cannot contain the tears which overflow my eyes. It is now that *Niu-lan* visits in the skies his wife *Tché-nu*. I also had a lovely wife; but I am separated from her, for ever. I have incessantly before my eyes that delightful form which eclipsed the very flowers. Do I walk, do I run—whether sitting, or lying, the idea of her lost countenance tears my heart. Where is the day in which I have not thought on my dear wife—when has been the night in which I have not bewailed her, even until morning?

8

On the fifteenth day of the eighth moon, when her disk shines in all her splendor, they offer to the gods incense and cakes, of a form round as the lamp of night. Men and women go, two and two, to walk in the country, and enjoy the sweet clearness of the moon. But the rounded disk would but recall to me the wife whom I have lost. Sometimes, to dissipate my grief, I pour into my cup generous wine; sometimes I take my guitar; but it scarcely gives out a sound, under my languishing hand. My relations and friends come, in turn, to invite me; but my heart, filled with bitterness, refuses to partake of their pleasures.

9

In the ninth moon, at the time called *Tchong yang*, the chrysanthemums open their cups of gold, and all the gardens give out a fragrant odour. I would wish to call a nosegay of newly opened flowers if I had a wife with whose hair to adorn them. Mes eyes moisten with tears; my hands contract with grief, and strike my desolate bosom. I go, once more, into the shining chamber which my wife inhabited. My two children follow me, and come, in sorrow, to embrace my knees. They draw me by the hand, and call me in a stifled voice. They ask of me their mother, by their tears, their gestures, and their sobs.—

10

The first year of the tenth moon, rich and poor offer to their wives winter dresses. But I, who have no wife, to whom shall I offer winter clothing? When I think of her who shared my couch, who slept on the same pillow, I burn for her heaps of gilt paper, and my tears flow in abundance. I send these offerings to her who dwells on the banks of the yellow fountain. I am not aware that these funeral gifts will be useful to the manes of her who is no more; but, at least her husband will have paid a tribute of love and of regret.

11

In the eleventh moon, when I have saluted winter, I call several times, on my beautiful spouse. In my frozen bed, I draw up my body; I dare not sleep at my length; and half the silk coverlet flows over a vacant space. I sigh and invoke heaven. I beg it to have pity on a husband who passes his nights alone. At the third watch I rise, without having slept, and I weep till dawn.

12

In the twelfth moon, in the midst of the rigour of night, I called my tender spouse. "Where art thou?" I said. "I think on thee all the day, and cannot see thy face." But on the last night of the year, she appeared to me in a dream. She pressed her hand in mine, she smiled on me with an eye wet with tears. She entwined me in her caressing arms, and intoxicated me as formerly with joy and happiness. "I entreat you" said she to me "not to torment yourself with the remembrance of me. Henceforth I will come thus every night to visit you in your slumbers."

### SUPERSTITIONS AND CUSTOM OF THE CHINESE.

*( From the Indo Chinese Gleaner. )*

*(Continued from Canton Press No. 68.)*

"Those who cause to be engraved on the tombstones, that such a hill was selected, and that the person lies towards such a point of the compass, and was buried on such a propitious day; or foolishly believe the geomancy of the Pung-shwuy—SIN."

The doctrine of the Pung-shwuy, which inculcates the above superstitious customs, is adopted, by the considerate Chinese, to be one of the most useless that has entered the mind of man; yet this absurd doctrine has taken such a hold of the minds of the simple, that the Pung-shwuy are necessary to fix the site of a house, and the position of a grave. These demons among the tombs (as they are always wandering about in burial places, and on hills) frequently go in companies of two or more persons, who, after passing over a piece of ground twenty times, they have been heard to remark to each other: "This is too high; (on taking a few steps) this is too low; on receding a step or two, this is not a good situation; or it is too much to the south, &c." When, after spending a month or more, sometimes several years, they frequently fix on the spot from whence they set out. Should the family decline rather than prosper, after this expense and trouble, and Pung-shwuy are appealed to for the cause, they reply, by way of consolation, that if you do not prosper in this generation, you (i. e. the family) will certainly in the next!

"Those who weep over the dead; or present eulogies, or give the various gilt paper offerings—SIN."

On the death of any one, the near relations prostrate themselves before the corpse, with their hair loose about their shoulders, and weep bitterly, both morning and evening, for a considerable time. This is continued for three days; when the person is put into the coffin. If he be a poor person, and has left no relations, he is generally interred on the day of his death. The Chinese, like all eastern nations, are much addicted to compliment; and it is usual with them, at the death of any, to say or write something out of respect to the deceased. The death of the aged, or of the parents of a large family, affords them ample subject for this. These eulogies are generally written on silk.

"Those who worship at the tombs during the TSING-MING festival, or put paper beneath a sod, on the tomb—SIN."

This festival, (at which time they repair the tombs of their ancestors) is observed during the third moon, by all ranks in China, from the Emperor to the meanest family, when the offerings, which are frequently expensive, are according to the circumstances of the family. They often consist of fish, flesh, and poultry, as well as of pastry and fruit, with wine and tea, and offerings of paper, &c. It is no unusual occurrence to see, on the occasion, a large dressed and roasted pig, with a goose ready for the spit. These being all spread before the tomb, after bowing thrice, they pour out libations both of tea and wine, at which time, it is supposed, the spirits of the deceased come and partake of the offerings, after which the relations sit down and partake of them, or remove them home, where they generally spend the day in mirth. The wealthy, on those occasions, are frequently attended by one or two priests, who pray for the souls in purgatory.

"Those who foolishly weep before the tablet of the deceased—SIN."

After the deceased is interred, it is usual to set up his tablet, or inscribe his name on the family altar, before which incense is lit up night and morning. The modern usage is for the near relatives of the deceased to weep, and make their prostrations before it, both morning and evening, for forty-nine days. The custom of erecting a tablet to the deceased is said to have originated during the Dynasty Chow, ( B. C. 350, ) when one Kae-tsechuy, attendant on the sovereign of Tsin, cut a piece of his thigh and caused it to be dressed for his Majesty, who was fainting with hunger, Kae-tse-chuy not being able to continue his march from the pain he suffered, concealed himself in the wood. This prince, on his arrival at the state Tsin, sent soldiers to take care of him. They, on being unable to discover him, set fire to the wood, when he was burnt to death. The prince, on discovering his corpse, erected a tablet to his manes, which he begged to accompany him home, when he caused incense to be offered to him daily. Youths, under twenty, unless married, have no tablets erected to them; and children, under ten, have no funeral processions; being interred privately. Young children and infants are seldom allowed a coffin—they are often wrapped up in a cloth or a few leaves, and in that manner put into the ground, a part from the family tombs.

"Those who worship the Northern Polar Star—SIN."

This is done by the literati to obtain fame. They make their prostrations before a representation of Kwan-tsze, who is represented standing on one foot, holding a pencil in his hand; and who is supposed to be, on account of his extraordinary talents, transhaped to the Northern Polar Star. He is considered the god of learning.

"Those who foolishly believe in the strange appearances of birds and beasts; wood and grass; and that these are capable of injuring persons—SIN."

The Chinese ideas of strange appearances are not dissimilar from those of ignorant Europeans; they have, besides the above unaccountable noises, spirits of hogs and of rivers, with two-headed sheep, monsters, &c. &c.

"Those who foolishly believe, that the flowering of a candle, (exuberance of the snuff,) or the laughing of the fire, (the fire blazing up) indicates felicity or infelicity—SIN."

The flowering of a candle in the evening, they think, indicates that an affair of a pleasant nature will occur on the following day. The blazing up of the fire, that something unpleasant will happen.

"Those who believe that when a neighing or morning fit occurs, a person is talking about them—SIN."

Offerings are presented to the sun at eclipses. Eclipses are regarded, by the Chinese with peculiar dread, as portending some calamity of a national nature. On the 16th of the 8th moon, cakes, of a kind of small mince pies, are made on the occasion; oblations of wine and tea are offered to the moon, very generally throughout the empire. On the 7th of the 7th moon, the unmarried women offer flowers and cosmetics, with wine to two stars in the milky way.

"Those who foolishly believe that the cries of the Rook and Magpie, indicate felicity and infelicity—SIN."

The Magpie is held in great esteem by the Chinese, and its flight over a house is supposed to indicate the arrival of some stranger. The Rook is considered infelicitous, and a certain prognostic of some trouble from the magistrates.

"Those who issue placards or libels, with or without names—SIN."

In China there is no daily or weekly papers for the people; of course they have not the opportunity of publishing libels or satires, or indulging themselves in scurrilous abuse by that means. They therefore, to defame or take revenge, paste up papers in the streets, much to the injury of the accused or traduced person, as truth is seldom a prominent feature of these papers. If the libeller is discovered, he is punishable by the law.

"Those who kidnap children—SIN."

The stealing of children is carried to a very great extent in China. These poor deluded victims are sold as slaves to the rich, and for other purposes. At the close of the year 1819, a whole family, consisting of father and mother, with their two sons and wives, were apprehended at Canton for kidnapping children. The parents were both executed. One of their sons made his escape, but the other, with his wife and sister-in-law, were sentenced to close confinement. It is supposed, in that province only, that they decoyed away and kidnapped upwards of six hundred children.

"Those who take poisonous medicines to cause abortion—SIN."

"Those who commit infanticide—SIN."

It has been doubted by some Europeans whether the Chinese be guilty of such an inhuman crime as infanticide. It is, however, too credibly attested by the Chinese themselves to leave, in the mind of any impartial person, a doubt on the subject. The most prevalent mode of effecting this crime is by suffocation, which is done by means of a piece of paper, dipped in vinegar, laid over the face of the child, so as to prevent it from breathing either by means of its mouth or nostrils. It is said to be frequently done to spare and offered persons, to cut the brittle thread of life; In the two districts of Hwuy chow-foo and Keang-ying-foo, of the province of Canton, infanticide is still carried on to a very considerable extent; so far, that it is believed that not above one out of three females is suffered to live; and what is to be regretted, it does not seem a crime in the eye of the law. The male branch is generally preserved, and in those districts they form by far the greater half of the community. Parents are frequently under the necessity of going to other districts, or to the city, to purchase wives for their sons.

The magistrates of the different provinces frequently issue notices, advising the people to abstain from the horrid practice above alluded to. They particularly address themselves to those parents who have children born on unlucky days.

"Those who commit the crimes against nature—SIN."

The Chinese are too well known to be guilty of these detestable crimes to require a single word by way of note on them. The time is greatly to be desired when virtue in China shall not only appear on the pages of her books, but be imprinted in every bosom in that immense empire.

The customs which have been noticed in the preceding pages are not peculiar to the lower classes of the Chinese; but are such as are to be met with, very generally, in the various walks of life; from which (and other works on the customs of the Chinese which are before the public) it appears evident, that the Chinese are an idolatrous and superstitious people; and though they have not debased themselves with the gross idolatrous notions of the Hindoos, from which the doctrines of Buddha or Fuh originated; yet their belief in sorcery, and witchcraft, and the prevalency of fortune-telling, divining, sacrificing to departed spirits, to demons, and their worshipping mountebank gods, who have temples erected to them, and others who have no temples, but many of which have set days for monthly being paid to them; shew, that they are the slaves of superstition and idolatry.

Two of the gods of the Chinese, who are named in three are called Sze-tsze Tsi-in (or Kwan-yin) and Chang-yuen-soo, (of whom &c.) The latter lived during the dynasty Tang, (Since A. D. 614,) and was acquainted with astronomy, on which account the reigning sovereign decreed him a god. They were both possessed of divine powers, and in whose company one was never safe; but these three gods are the present time, one brands or other of their families has succeeded them, to whom additional worship has always been paid, in the manner mentioned to them, throughout the empire. They are allowed to marry, (which the priests of China do not) and are still considered as inherit all the virtues of their ancestors. They have sometimes gone about to exhort the people to virtue.

If we have said progressively, when applied to religion, that ignorance is the mother of devotion; but it seems with some propriety when applied to idolatry. The mind, when illumined with the rays delight in contemning the works of creation, of nature, and of providence; but when the mind is devoid of this wonderful light, it calls within itself, and follows custom, in bowing to stocks and to stones, and in offering, morning and evening, a few meatless of incense, without reflecting for a moment —Why? Thus it has been with China ever since the notions of Buddha attracted general notice.

It seems more than probable from the high spirit of valour which China displayed during the three contending states, and from the literary spirit which pervaded the empire soon after those contentions, that, had China been early favored with the Christian religion, and the surrounding states kept equal progress with herself, (which has been the case in the west) that she would, at this day, have been the admiration of both, for science and religion. Had China been early favored with the Bible, it is more than probable that ere now she would have forsaken her idolatrous temples, and have discarded as unintelligible jargon of Buddha for a rational religious worship. But she has not had this light—this treasure of knowledge—this spring of love. She, like a forlorn traveller, (in an uninhabitated country) without a compass, or a guide, wanders here and there, and is pleased with whatever he discovers. On reaching the boundaries of the land, he fancies he has travelled over the globe, and arrived at the summit of attainments. He has never imagined that there are other nations, and other people, where the land is cultivated, and the rivers stocked.

* The prevailing opinion among the lower classes of the Chinese is, that at an eclipse, an animal monster, resembling a frog, with two forepaws and one leg, swallows the sun or moon, on which account, the priests in the temples, and the number of people in the streets, as well as the officers at the public courts, sound the drum. Just as the eclipse commences, every one sounds it as loud as he can, that the frog, being alarmed by the noise, may instantly cast it forth. This is continued till the eclipse is gone by.

† The vulgar opinion respecting Sze-tsze Tsi-in and Chang-yuen-sze is, that, when persons are presenting offerings before their representations in the temples, their spirits forsake their bodies, and go and partake of the offerings, whether they be food or wine; and after the return of their spirits that they appear flush and florid, as though they had both eaten and drunken.

MANILA.

*A Comparative Statement of the Export of Hemp and Sugar from Manila during the first six months of the years 1834, 1835 and 1836.*

The foregoing statement is worthy of remark

from the extraordinary annual increase which it exhibits of the export of these articles, indicating as it does, at the same time, the progress made in their cultivation.

# CORRESPONDENCE

## TO THE EDITOR OF THE CANTON PRESS

Dear Mr Editor,—When I stated, in my last, my intension of exposing the error into which you had fallen, with regard to the non liability of the Hong-merchants for each other, I was unprepared for the assistance of your Correspondent "an old Resident" who has brought forward the bulk of the arguments which can be used, and has saved me some trouble. I also notice that the Register has taken up this subject with considerable spirit; and, as the Editor now expresses himself, after much consideration, unable to form any decided opinion on the subject. I hope that you too will reconsider your decision so that the public of Canton may not seem divided on a point of so much importance to all who now are, or may in future be, connected with this trade. To a few you the grounds on which I go, I have taken out of various works, published at different times, the received opinions as to the Co-hong. Those that I find to bear most on the point are articles in Milburn (edition of 1813) and the Chinese Commercial Guide of 1834, in which are republished some articles from the Chinese Repository, both works on which dependence may be placed. The Extracts I subjoin. You will find much to the same purpose in Auber, Davis, and other writers and compilers on and of works connected with this country, but the gist of all will be found much the same as these.

I disagree in one material point with the Editor of the Register—the non levying of the consoo duty on the trade of the "new Hongs"—I have good reason to believe that, whether *paid* or not, the amount is carried yearly to their debit, in the account, kept by the senior Hong-merchant, of the liabilities of each. If it be as I say, the matter, as far as justice is concerned, is at once set at rest; and all that remains is for foreigners to fight the battle; no difficult matter now that all are willing to work together for particular as well as the general good.

The Consoo fund, it is generally allowed, (see below) was established in consequence of the failure of some of the Chinese to pay foreigners sums owing to them; and of their being forced, by the visit of a ship of war, to come to some arrangement. This, poor as it was, amounted to an acknowledgement, on the part of the Emperor, of the liability of the *Empire* for debts due to foreigners. Let us keep this steadily in view. A tax is levied to pay off this debt. Part of it, as per compromise, is paid off, and, to guard against the recurrence of such an untoward event as the visit—no complimentary one —of Capt. Panton—a man, by the bye, who seems to have understood the Chinese well—the tax has been continued to the present hour. This tax falls on the foreigner, in consequence of the absence of all competition; and it, in fact neither more nor less than a *Premium of Insurance*, paid by foreigners to guard against the losses that the bankruptcies of Hongs might otherwise cause them. It matters nothing to us what has become of these funds, as collected; unless it can be shown that all has been expended in its one legitimate purpose. If it has not been *some fair* collected, if it has been wasted, misapplied, or misappropriated,—in some of these cases can foreigners be fairly called on to suffer, for the carelessness or misdeeds of any of the Chinese,—merchant or government officer.

It is sufficient for us that every one of the Hong-merchants, old or young, great or small, have deducted, and yet do deduct, from the price of the Imports, and, in like manner, add to that of Exports, the same charges; and that, among them, figures, by no means the smallest, the Consoo Cunnoo; in fact, that they levy on us the Insurance, but, when the craft is wrecked, they wish to ingore the policy.

Nor can it matter to foreigners how this fund is managed, or mismanaged—whether, as it should be, all the Co hong have access to the books, accounts, and records; or, as it is supposed to be, that all is confined to the control and management of one man. The Hong-merchants are, as a body, virtually the Trustees, jointly for the government and foreigners, of this fund, which should be wealthy enough to answer all the purposes for which it was instituted —the prevention of the necessity for recurrence by the foreigners to such an appeal as that of Capt. Panton, and the security of foreigners against individual bankruptcies, of members of the body, so guaranteed.

It follows, therefore, that each Hong-merchant is bound to the foreign merchants for the full amount which the Consoo fund has produced; and that, for any one of the body to refuse this, his share of joint liability, is to expect that he is to reap all the benefit from foreigners, while he is free from all corresponding responsibility, entailed on him by his bargain.

The Consoo fund money has, it is said, not actually been called for, from the Hong-merchants. If so, whose fault is this? The foreign trade has paid it, and if the Co-hong, as a body, have thought proper to waive their claim, it by no means follows that our's is invalidated, from their neglect. It appears to me that this is the strong ground that foreigners should take. If the Co-hong is not to be answerable, let us know what has become of *our own* money. If the Emperor and his spouse, the Hoppo and his aunt, have *chow chowed* it, or if the yellow river has swallowed it up, the sooner they are asked to pay back what did not belong to them the better; and, if the trustees of this fund have not made proper use of the funds entrusted to them, let them be held answerable. If the strong hand of Government has interposed, to compel this breach of trust, why we, too, foreigners, have also governments, and it is for them to protect us, against enemies of a calibre beyond the power of merchants to cope with.

Again—in other commercial countries, in case of a failure, the creditors are entitled to know what deficiency in the assets of the individual has arisen. In this country, an enquiry of this kind would bring some curious items to light. *In primis* Cash Cr by payment to the Hoppo, his satellites, myrmidons, and attendant blackguards, great and small, for permission to set up a Hong, 50,000 Taels—pretty well this, for a beginning! but how many more such? The Hong, now in difficulties, might strike off probably 100,000 dollars, as alms for having secured a ship in the boat of which a too obliging skipper had, unknown to him, prevailed on Lord Napier to take a seat, that he might arrive in Canton at 2 o'clock in the morning. He might also put down another lac, probably, as the amount of loss of what might and would have been his profit, during that season, had he been at liberty to carry on the business of his Hong; add to this base set, of official tyranny and falsehood, may be perhaps point as the cause of a ruin, which involves so many so deeply.

If the government, therefore, have set, up a system of their own, on which they act when for their good, or gain, are they not answerable, on the other hand, however disagreeable it may be to them? If they can set up Hong-merchants, like nine pins, and knock them down when they please, is the game to be played at the cost of foreigners alone?

I know that you will not admit all this—what then? What can we do? Our governments have left us to ourselves and will not help us. It is all well to abuse the Government of China and cry out, against injustice, but what can we do? I will tell you what you can do. We are not so helpless as we are inclined to fancy. Let a manly and straitforward appeal be made to the local Government—now that the Imperial Commissioner is here is not a bad time—none of your whining, dancing, mewling Petitions, but a plain, common sense, strong talking, appeal for justice and a fairer and fuller understanding as to this mutual liability of the Hongs and Government, than we now have. Let a time be given that, if not satisfactorily answered, "there are eight entrance and sixteen outlets (as the Chinese say) to the inner waters" and that, through one of those four and twenty holes, a foreign Ship may creep to the mouth of the Peking river, with an appeal to the Emperor and some *exposé* as to what is actually going on here. Let this hint, if given, be meant to be acted on—no bullying—no threats—but, if once expressed, let it be done. Once convince the Chinese of this—that you are in earnest, and *no éclaircissement* would not be long withheld. The expense of such a trip would be no bar, as it would fall lightly where so many would be glad to join in it. It has been done before—why not now? We are the same people who forced a trade with China, and who should we have less courage or energy now, that the trade has encreased to an extent, unimagined but a few years since? A Petition house might not be a bad thing either; and now, that some little is known of this country, and of *the vital importance* of this trade to England especially, a Petition might not be unheeded; but our surest card is in our own hands. Shall we refuse to play it?

Your humble Servant,
H.

---

In the early period of the English trade to Canton, their business was transacted with the Chinese merchants resident on the spot; but there was then no association amongst these merchants, and the Europeans were at liberty to make their bargains with any Chinese merchant resident at Canton. The principal ones are called Hong merchants; and some one of them was required by the Chinese Government to be security for the payment of the accustomed duties, and for the good behaviour of the Europeans during the time the ship continued in China; and although a ship, in default of a cargo, was allowed to remain till the succeeding year, yet in general the Europeans departed with the ship the same season they arrived. In those times the East India Company employed different supracargoes for their different ships, without mutual connexion; sometimes there being five supracargoes in the same commission for two ships, and sometimes three supracargoes for one ship; but the several commissions were as much distinct from each other as they were from the agents of foreign companies.

In 1758 the Company changed their system, and instead of several commissions, they appointed one general council of all the supracargoes for conducting the whole of the Company's trade at Canton; and the four senior are termed the President and Select Committee, and certain members of this council were to remain in China, after the departure of the ships, to prepare the cargoes of the succeeding year. But as the supracargoes went to Macao, after the sailing of all the ships, they were obliged to leave the Company's treasure at Canton under the charge of the Chinese, who never abused this trust. About the same time another alteration had taken place in the mode of transacting business at Canton, viz., by trading more directly with the country merchant who brought his goods to Canton; although from his ingnorance of the English language, in a jargon of which the business of Canton is transacted, the agency of a Hong merchant was requisite as well as for the security to Government, that the duties should be paid, and for shipping goods, which can only be done in the name of the Hong-merchant, who is security for the ship.

It may easily be perceived that inasmuch as this new mode was beneficial to the Europeans, it must be hurtful to the Chinese Hong merchants, who were security to Government; for although at the opening of the trade to China, it appears the Chinese Government would have received the duties at Canton immediately from the Europeans, yet his ignorance of their modes of transacting business had induced him rather to pay his duties through the agency of the Hong-merchant, and long established custom had sanctioned the mode at Canton, though at Limpo the English paid their own duties. The Hong merchants at Canton were the persons from whom the Mandarins exacted presents, as that their situation necessarily exposed them to great expences, for which they were debarred from receiving any equivalent by the immediate trade with the country merchants; as the agency with the country merchant was confined to few individuals, and those individual Hong merchants became little more than brokers between the European and country merchant.

In 1720 the Company's resident supracargoes sent a small vessel to Tiensin, the seaport of Peking, with a remonstrance to the Emperor on the grievances which the Europeans suffered; in consequence of which, certain Chinese Hong merchants were thereupon appointed a Co-Hong, or Company, with whom only the Europeans were to transact business at Canton; and all business transacted by Europeans by others than this association, or Co-Hong, became contrary to law, except with licensed shopkeepers in one single street, which was separated by a gate from the rest of Canton, only open to the wharf on the bank of the river when the European factories are situated.

At first the Hong merchants trailed jointly; for although at the time the Europeans declared that they would transact no business with them conjointly, yet their separate transactions were communicated to each other, and concluded in the Co-Hong. In 1770, on application of the supracargoes, supported by a large sum of money, the Co-Hong was abolished; however, since that period the Hong merchants, or members who constituted the Co-Hong, have continued to transact business on their separate individual accounts, though they still remain a body, and assemble for purposes of a general concern, such as defraying the expences of presents, &c. But in course of time, by mutual consent among themselves, before this change took place in 1770, the members of the Co-Hong also transacted business separately for their individual concern, and in this capacity became again the broker between the European and the country merchant, as before. By laxity of regulation, other Chinese beside Hong merchants have come to transact business with Europeans; but still all such transactions are, in the eye of the law, illicit and contraband; and as no goods can be shipped but by a Hong merchant, all others trade in the name, and under the protection of some particular one of them, who receives a consideration on that account.

At this period a large sum of money was owing by the Chinese to the English merchants in India, and other British subjects, which had been lent at various times, to the extent of 3,809,075 Spanish dollars. The Chinese debtors failed; in consequence of which, representations were made to the Emperor. He observed, that probably Europeans might not be informed of the laws of the empire, which forbid foreigners making any loan to his subjects; and although he cautioned them in the strongest manner to avoid such practices in future, he directed enquiry to be made. The result was, the debts due by two of the Hong-merchants being adjusted with interest to the end of the season 1779-80, were found to amount to about £400,000, one half of which was immediately lopped off, and payment of the remainder was ordered to be made in ten years, in equal instalments, but without interest. The funds for the payment were not drawn from the Hong-merchants, but from a tax laid for the purpose upon the European trade with China.

*Milburn's oriental Commerce p. p. 58. 59 60.*

---

The Hong-merchants are required to consider the duties to be paid to government as the most important part of their affairs. If any merchant cannot pay at the proper period, his Hong, and house, and all his property are seized by government. And if all that he possesses be inadequate, he is declared bankrupt and banished. The next most important concern to a Hong-merchant is the payment of debts to foreigners. If the assets of a bankrupt Hong merchant are insufficient for the payment of his foreign debts, as well as of the duties, he is in such case also banished; and formerly the rest of the Co-hong was compelled to pay, by annual instalments, the principal of the debt, but always without interest. The claim to such payment has been renounced, with regard to the English, by the Select Committee of the Comp ny's factory; but foreigners of other nations do not consider their title forfeited in consequence. The law, however, does not permit Hong-merchants to take loans from foreigners, and requires them, at the end of every season, to clear off all outstanding accounts with foreign merchants.—*( Morrison's Commercial Guide P. 19. 1834. )*

*Consoo charge, for Hong yung, use of the Hong.*

This charge, more generally known under the name of the consoo fund, was originally established by Poukhequa, about forty years ago. The avowed object of it was to provide a fund to meet the demands on the Co-hong for the debts of bankrupt Hong-merchants and exactions of the government. Poukhequa being at that period supreme and without a rival in the direction of the Co-hong, undertook the entire control and management of the consoo fund; and this accounts for the otherwise somewhat curious circumstance, of woollens, calicoes, and iron being exempted from this charge. These were the articles to which Poukhequa's trade was principally confined, and he had power and influence enough to exempt them from contributing to the fund. On all other principal articles (of which a correct list is subjoined), an *ad valorem* charge of three persent, increased in cases of emergencies to four, five, and even six per cent, on a fixed price which never varies, is levied. The consoo charge, were it accurately paid, must amount to an enormous sum annually. It is said, however, that this is not the case but that at the close of the year each merchant is called upon to contribute a portion of the sum for which he is indebted, to meet the exigencies of the Co-hong. The tax of three per cent or upwards, remains, nevertheless, equally a burden on the foreign trade, as, in fixing prices, the full amount of the charge for consoo fund is always calculated; and the only difference is, that the merchant would probably style the sum arrears of consoo funds remaining in his hands, instead of direct profit. It is, however, difficult to come to any correct conclusions respecting the mode of levying and appropriating this fund. It is an object of mystery even to those who contribute towards it, none of whom, excepting two or three of the seniors, are allowed access to its records. A fund under such a system of management is naturally liable to much misappropriation, but it is improbable that any remedy will be found for the evil, so long as a Co-hong like the present continues.—

Notwithstanding the above remarks, there is reason to suppose that the profits derived from the consoo funds are not large, the Co-hong having to expend a considerable sum annually in presents and contributions to the revenue. The following, we are informed are the principal items of annual contributions, in round numbers.

| | | |
|---|---|---|
| Tribute to the Emperor. .... | Taels | 45,000 |
| For repairs on the Yellow river | " | 30,000 |
| Expences of an Agent at Peking | " | 21,600 |
| Birthday presents to the Emperor | " | 130,000 |
| Similar presents to the Hoppo .. .. | | 20,000 |
| Presents to the Hoppo's mother & wife | | 20,000 |
| Annual presents to various officers .. | | 40,000 |
| Expenditure for compulsory purchases of native goods .... .... | | 140,000 |

Some of these charges are not paid by the Co-hong, but by individual merchants from their arrears of consoo fund.—They are also liable to other calls for various objects. In 1832, they subscribed for the purpose of quelling the Lein-chow insurrection, about 100,000 taels;—and last year for the relief of the sufferers from the inundation, they paid compulsory subscriptions to the amount of 120,000 Ts. These things are not, however, mentioned in their defence, as they can have no right to yield to every imposition, in confidence of being able easily to repay themselves by a tax on the foreign trade.

*Commercial Guide p. p. 35 and 36.*

---

# CANTON PRESS,

24th December 1838.

The change in the Commission or whatever may be the proper designation of the anomalous body maintained in China by the British Government, that has so long been whispered of, has at length been made public. From the notice in our columns it will be seen that Capt. Elliot is now at the head of the Commission, with the style and title, it is said, of Senior Superintendent. The salary is to be, we understand, £ 3000 per annum, the same as Capt. Elliot before enjoyed. Sir Geo. B. Robinson retires without a pension for his services at Macao as Chief Superintendent, but we hear has a bonus for a quarter's pay allowed him. We believe that the whole change in the establishment has been the abolition of the office of Chief, which amounts to a reduction of £ 6000 per annum; the other members of the Commission remain as before.

It is confidently stated that the Senior Superintendent has sent an application to the Viceroy, for leave to come up to Canton, with four Officers in his suite, in the same manner as the Company's Supracargoes, used to do) and that the question was referred by him to the Hong-merchants, who met in Consoo on Tuesday, and have, it is said, given a favorable reply to the Governor's enquiries as to the number and business of foreign Consuls here. Many are the speculation's as to the object of the Senior Superintendent in this visit, and we might well have hoped, that, after the unfortunate issue of Lord Napier's mission, no attempt by Brit. officers, with powers similar to those of that Nobleman, would be made, which, from the ill defined nature of their official diplomatic character, may a sin subject them and the British in general, to insults for which no satisfaction can be obtained. No good is likely to result from this visit, at least the chances for good or evil seem to be in favor of the latter. We hope however that the present Chief of the Commission, since he will likely be in Canton within a few days, will act with the caution necessary in the delicate, and we need hardly add, anything but pleasant situation, in which a public functionary holding so anomalous an appointment, is placed, and that our Commercial interests will not suffer in consequence of his visit.

We have had many arrivals during the week, but none of much importance as to news. Our Singapore papers (the Free Press) reach to the 10th November, from which we extract a short account of Exports from Manila, which shows how rapidly the trade of that port is increasing. By direct arrivals from that town we learn that a fire broke out there in one of the last days of November in the Bazar, which from the proximity to many of the merchants' houses, threatened to do much injury; but it was soon got under, having done but inconsiderable injury.

The long expected Commissioner, Choo-sanyen, from Peking arrived here on the 17th inst. and was received with the usual formalities. We learn from the *Repository*, that he is to investigate eight subjects, of which the 5th and 7th are; the smuggling of Sycee and Opium, and the situation of the foreign shipping; the other six subjects do not interest foreigners. He has taken up his residence in the Collegiate hall, where, it is said, he is joined by *Soofungeh* the Tartar commandant of the City.

The Hoppo, it is said, is suffering from a severe attack of illness, which has, for the time, deprived him of reason.

There are again rumours afloat that instructions have been received from Peking, authorizing the introduction of Opium on a payment of duty. We have not been able to trace this report to any very good source, but it is supposed, that if the Opium trade is to be legalized, the trade at Lintin must be done away with.

We acknowledge receipt of a letter from "Nobody," which came to hand at too late an hour for insertion in this number; it shall however appear in our next, when we shall probably again enter on the subject of his correspondence.

Our Correspondent H. it will be seen, has favored us with remarks on the Liability of Hong-merchants, which we think well worthy the consideration of our readers. The subject has, we conceive, now met with a very full investigation, so as to as to put our readers *en fait* as to the facts *pro* and *con*.

---

### BIRTH.

At Manila, at the house of James Strachan Esq., the Lady of the late John Saunders Esq., formerly of Bombay, of a daughter.

## OFFICIAL NOTICE.

To His Britannic Majesty's subjects in China.

DESPATCHES have been received from the Right Honorable The Secretary of State for Foreign Affairs, signifying the abolition of the Office and Salary of the Chief Superintendent of the Trade of British subjects in China.

His Majesty's Government has been pleased to appoint Captain Charles Elliot R. N. to perform the duties of Chief of the Commission, from this date.

Macao December 14th 1836.

By Order of the Superintendents of the Trade of British subjects in China.

EDWARD ELMSLIE.
*Secretary & Treasurer.*

## DOMESTIC OCCURENCE.

DIED in Bombay on the 14th September 1836, MOTICHAND AMEICHAND Esq. aged 52 years, one of the wealthiest merchants there. The property he has left is said to be very considerable, (some 35 Lakhs Rupees) out of which seven Lakhs of Rupees have been bequeathed for religious and charitable purposes. His funeral was accompanied by all his friends, and about 8000 spectators were present; his body was burnt according to the customs of his race on the Malabar hill; his ashes have been sent to Benares, where the Hindoo principal ceremony will take place on the banks of the Ganges. The loss of this respectable man is generally and sincerely felt by all his relatives, as well as by his Native and European friends.

FOORDONJEE HORMASJEE.

Canton, 24th Dec. 1836.

## FOR SALE ON BOARD THE BARQUE ISABELLA.

ROUGH spars of various sizes, lower masts, topmasts, Jib-booms and other spars.
200 Teak sheathing boards 4 and 1 Inch thick.
20 Teak wide boards 11 feet long and 21 Inches wide.
Also all kinds of ship's stores.
Apply to Capt. HILLAR on board, or
STANFORD & MARKS, at Canton.

Canton, 14th September, 1836.

NOTICE.—In consequence of Mess. DOUGLAS ANDERSON & Co. of London not having completed their engagement with Messrs DOUGLAS, MACKENZIE & Co. dated London 31st December 1829, and Mr. H. H. DOUGLAS having died at Edinburgh on the 4th June last—the firms of DOUGLAS MACKENZIE & Co. at Canton, Singapore and Batavia will be restressed to the last named place, after the 31st Dec. next;—after which date the above firms at Canton and Singapore, as well as the powers of attorney of the parties in charge there, will cease.

The undersigned, as sole partner, will continue the firm of DOUGLAS MACKENZIE & Co. at Batavia until further notice.

W. MACKENZIE.

Batavia, 5th Oct, 1836.

NOTICE.—The interest of Mr. ANDREW JOHNSTONE, in our Establishment ceased on the 30th of June last.

JARDINE MATHESON & Co.

Canton, 24th November 1836.

NOTICE. Having admitted Mr. WILLIAM POTTER LIVINGSTON, a Partner in my business, it will for the future be conducted under the Firm of GIBB LIVINGSTON & Co.

T. A. GIBB.

Canton, 14th November, 1836.

NOTICE. We have established ourselves in this place as general Commission Agents in connexion with Mr. William Gemmell of Glasgow, and Messrs. Gemmell & Co. of Valparaiso.

WM. & THOS. GEMMELL & Co.

Canton, 3d November, 1836.

NOTICE is hereby given that the Honorable Company's Treasury is open for the Receipt of Cash for Bills on the Supreme Government of India at the rate of Two hundred and twenty (220) Company's Rupees per One hundred (100) Spanish Dollars, and payable thirty days after Sight

(Signed) J. H. ASTELL.
" H. M. CLARKE.

Agents to the Honorable E. I. Company

Canton, 25th October, 1836.

NOTICE. Mr. GEO. T. BRAINE, late of the firm of Messrs. WHITEMAN & Co & Mr. JOHN RUSSELL REEVES, late Tea inspector to the Hon. E. I. Company in China, have been admitted partners in our firm since the 1st July 1836.

DENT & Co.

Canton, 8th October, 1836.

## UNION INSURANCE SOCIETY OF CANTON,

PARTIES, previous to applying for Insurance, are requested to notify the same, that the vessels on which they intend to ship may be surveyed (free of expense to the assured) before any outward Cargo is put on board.

*The Agents for the Society are from this day,*

IN LONDON, ... Mess. PALMERS MACKILLOP DENT & Co.
" CALCUTTA Mess. MACKILLOP STEUART & Co.
" BOMBAY, Mess. FORBES & Co,
" SINGAPORE Mess. A. L. JOHNSTON & Co,
" MANILA, ... Mess. RUSSELL & STURGIS,

DENT & Co,

Canton, 1st, July, 1836. *Secretaries.*

NOTICE is hereby given that the interest and responsibility in our Firm of Mr. CLAUDE SCOTT STEUART and of Mr. JAMES ALEXANDER, ceased on the 31st ultimo.

Mr. HARRY GEORGE GORDON, and Mr. THOMAS KIRKMAN FINLAY, have this day been admitted partners in our firm.

RITCHIE STEUART & Co,

Bombay, 1st August, 1836.

NOTICE. Mr. JAMES STRACHAN (of the Firm of STRACHAN & Co. of Manila) is admitted a Partner in our Establishment from the 1st. of May last.

FOX, RAWSON, & Co.

Canton, 1st December, 1836.

## NOTICE.

Messrs. STANFORD & MARKS beg to inform the Gentlemen of Canton that they have received per "Neptune" "Trusty" and "Clifton." A large stock of Choice Wines, Beer, Cyder and Porter in Casks and Bottles.—An invoice of "Stout's" Boots and Shoes. A Quantity of Lemon's Biscuits and Spice nuts. DESPATCHED this day. Amer. *Sarah* and *Arietta*, Gardner for Manila. Dutch Hermina. Lemon, for Batavia. Span. *Narcisa*, for Manila. Dutch. *Johanna Susanna*, Berest, for Java.

The *Fanny*, *Napoleon* and *Lady Hayes* had left the Straits previous to the last departure. The *Harriet* put out five weeks put back leaky. The *Henry Wellesley*, *Barbastre*, *Samuel Winter*, and *Edward*, from this were, we notice, laid on for cargoes to English ports at good rates. The *Philadelphia* was the last arrival from this, in nine days.

The *Sylph* had, we observe reached Calcutta previous to the sailing of the *Cordelia*. The *Sir Charles Malcolm* and *Mermaid*, were loading for Whampoa.

The *Henry Eustace*, her during voyage from Manila, had to lay to for three days in a hurricane early gale in 17 north. The *Don Amigo* put back to Manila, after throwing part of her Cargo overboard, in a gale met for from the coast of China.

Almost all the ships which left this for Great Britain before the 1st March, had reached home. The *George the 4th* and *Camden* were the latest. The *Bussorah* was still out by the last advices; the Sesora was at the Cape on the 7th May.

The following are the Cargoes of the seven Ships, the first dispatched of this season. *Martha*, Congou 1546; Orange Pekoe 147; Silk 661 Peculs. *Imogene*, Congou 1191; Caper, 119; Souchong, 96; Ankoi, 50; Hongmoney, 79; Young Hyson, 681; Hyson skin, 19; Gunpowder, 1; Imperial, 9; Silk, 500; *Asia*, Congou 1696; Orange Pekoe, 310; Hyson, 89; Young Hyson, 96; Hyson Skin, 23; Gunpowder, 9; Imperial, 23; Raw-Silk, 1738. *Eliza Stewart*, Congou, 2161; Caper, 140; Souchong, 118; Pekoe 37; Orange Pekoe, 1014; Twankay, 155; Raw-Silk, 967. *Alexander Baring*; Congou, 3531; Souchong, 632; Pekoe, 1145; Hyson, —; Young Hyson, 234; Twankay, 305; Gunpowder, 61; Raw Silk & 6. *Sesora*: Congou, 3761; Caper, 142; Souchong, 621; Hong-money, 174; Pekoe, 52; Orange Pekoe, 188; Gunpowder, 12; Raw Silk, 759. *Eleanor*; Congou, 1526; Souchong, 230; Pekoe, 150; Orange Pekoe, 628; Hyson, 135; Young Hyson, 7; Twankay, 106; Raw-Silk, 417

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class tns. measg. 1600 cubits & upwards pay $ 0.7874756 of a Tl. per cubit.
2nd " " 1200 do. & under 1600 " 0.7221091 " "
3rd " " under 1200 do. " 0.5905341 " "

N.B. The cubit is 14¼ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Forecast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products. The largest class pay from $ 13.0 to $ 4320; 2d class from $ 3700 to $ 3780; 3rd class from $ 3700 and under. The Comsha; or Present Fee is paid by all vessels 1600 Tons or $ 2225. Linguists get $ 1734 and Compradore's fees $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly earlier. Brazilian ships are charged only about $ 1300 in lieu of measurement &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—We hear that the demand for Longcloths bleached as well as brown, has been rather more lively during the week, without however improving prices.
COTTON YARN.—the lower numbers from 18 @ 30 have experienced some demand, and may be quoted @ 40 @ 42 per Picul.
WOOLLENS.—continue as depressed as before.
LEAD.—is rather improving.
PEPPER.—The late small arrivals have not depressed prices, on the contrary our quotation is somewhat higher than before.
RATTANS.—most of the vessels expected to bring it, still keep out.
TIN.—remains at our high nominal quotations.
RICE.—is firm at our prices, though without improvement.
COTTON.—There has been very little business during the week in any description of Cotton; a decline of two to three mace has been the consequence. Bengal staple was in more demand, until, for the present, checked by the late arrivals.
OPIUM.—The trade is still interrupted, but, within this day or two, there have been some few enquiries at our quotations.

The deliveries to the 13th were,

| PATNA. | BENARES. | MALWA. | TOTAL. |
|---|---|---|---|
| 22 | 47 | 38 | 107 chests. |

### EXPORTS.

TEA.—Shipments are going on actively, in order to obtain the Company's advances. Congous, of the Souchong kind, are to be bought at the prices paid by the East India Company.
SILK MANUFACTURES.—Former orders are being completed, but no fear of no new orders of any consequence having been given. Several ready made articles have been offering in the market during the last few days, which no doubt could be obtained at somewhat less than our quotations. Orders coming in slowly, wages are likely to fall, and prices to become somewhat cheaper.

## LITERARY.

*( From the Indo Chinese Gleaner. )*

### EMBASSIES FROM CHINA TO JAPAN.

Extracted from the Chow-hae-too-peen, in 22 vols. being a detailed account of the depredations of Japanese pirates on the Chinese coast, with maps thereof; together with various opinions interspersed, concerning the respective advantages and disadvantages of the coasting or inland navigation, &c. &c. written about A. D. 1570.

The first intercourse between Japan and China, that is on record, took place after the conquest of Corea by Han Woo-te, Emperor of China; about a hundred years before the Christian era The Japanese are then said to have sent tribute to China.

The First Embassy from China to Japan, was sent from Wei, one of the six Dynasties, in the sixth century; some gold, embroidered silk, a sword, and a mirror were the presents: from that period to the reign of Kea-tsing, (1570) there were twenty-three different Chinese Embassadors sent to Japan.

The number of tributary Embassies from Japan to China, within the same period, and according to the same authority amount to sixty-six! The Yuen Dynasty rejected one, and one in the time of the Ming Dynasty was a false pretext.

The fourth Embassador was well received, and the King of Japan is reported to have expressed great pleasure on seeing him, and to have affirmed, that he had heard the fame of Suy, (meaning the then Chinese Dynasty) "a highly polished and righteous nation." The Chinese Embassador on his part proclaimed the universal benevolence of his master, and declared that the Emperor of China knowing that the King of Japan, wished to be civilized, had sent him to declare his Imperial Majesty's command to that effect. The King of Japan is said to have sent an Envoy bearing tribute back with the Chinese Embassador.

The next Embassy from China was sent by the Tang Dynasty, A. D. 630. The Embassador and King wrangled about the ceremony, which led to the Embassador's return, without having communicated the orders of his Court.

The Tang Dynasty seems to have sent no more Embassies to Japan. The sixth one mentioned did not take place till the Tartar Dynasty Yuen, about A. D. 1290.

The first Emperor of this Dynasty, sent a trusty Embassador to cultivate an amicable intercourse with Japan. In his letter, he said, that the sages considered the world as one family, but if all the members had not a friendly intercourse, how could it be said that the principle of one family was maintained.

If, however, he added, this overture was rejected, and the use of military force preferred to amicable intercourse, the King of Japan would do well to consider it.

The King of Corea sent an Envoy with the Chinese Embassador, but they both returned without effecting a landing The same Emperor and his successor sent ten different times to Japan. The second, third, fourth, and fifth times were simple Envoys; the sixth, eighth, and ninth times were military expeditions intended to conquer Japan. The last Envoy of that Dynasty was a Buddha Priest, who never reached his destination.

The second Embassador remained in Japan six months, without effecting his purpose. The third was not received, nor his letter. He on the other hand, seized two Japanese and brought them to China.

A fourth Envoy was sent the following year to return those two persons. This Embassador was attended by a military escort for his protection The Emperor said in his letter, that he had always heard the Japanese were a nation which knew what was becoming, and that, as they were now his neighbours, he would expect them to send an Envoy back with his Embassador to cultivate friendship: if contrariwise, the King chose to make preparations for war, he might follow his own pleasure, and look to the consequences.

A fifth Envoy was sent with no better success than the former, and the next year a large armament was prepared and sent with the assistance of Corea. There were three hundred transports, with provisions and water, and nine hundred vessels, containing 15 000 men. They plundered the western coast of Japan and returned.

The next year, another Embassador was sent without effecting any good purpose.

Five years afterwards an Embassador was again sent, who with his whole retinue were murdered by the Japanese!

This occasioned a fresh armament to be prepared. It consisted of 100,000 men.* The Emperor in his manifesto to them stated, that, as the Japanese sent Envoys to him, he had sent Embassadors to them, but the Japanese had detained his Embassadors: he was therefore compelled to take the present step. He told the Commanders not to murder the Japanese unnecessarily; as it was a well known saying, that to obtain a territory without inhabitants was useless.

The expedition arrived on one of the northern Islands on the coast of Japan. A storm arose which destroyed many of their boats. Most of the officers ran away with the remainder, and left the men to shift for themselves. They were preparing to cut down timber and build new boats when the Japanese set on them, and killed 30 000 and carried off a great many captives. On a second attack, they killed all the Tartars, Coreans, and men of Han: saving alive only the Tang-jin, of whom they made slaves. Of a hundred thousand men, only three men ever returned!

The same Emperor endeavoured to raise another army and build a new fleet, to attempt a second time the conquest of Japan, but was unsuccessful.

The Buddha Priest was the next Envoy from China but his Embassy, failed and no more were deputed till the commencement of the Ming Dynasty, about A. D 1390, after which time the Japanese by incessant descents on the coast of China, from Canton to Peking, seemed to revenge themselves for the attempt of the Tartars on their coast.

The first Embassador of the Ming Dynasty was sent to invite the Japanese to come to China. The Embassador represents his reception as very forbidding at his first arrival in Japan, till he wrote to the King, who in reply, expressed veneration for China, but the invasion of the Tartars was not forgotten. However as the present Envoy was not a Mung-koo, he would hear what he had to say.

The Chinese state, that he answered the King thus;—"I am not an Envoy from the Mung-koo Tartars, but from "the sacred Son of Heaven, the holy and Divine Emperor." If you choose to rebel against him, and disbelieve me, you may first kill me, to prevent the subsequent calamity that will overtake you; but the army of my Sovereign is Heaven's army, of which there is not one man, but is able to withstand a hundred enemies; and the ships of my Sovereign are able singly to fight a hundred Mung-koo armed vessels; and further, "Where the decree of Heaven is, what human power can oppose it?" After this hectoring speech, the King of Japan, it is said, lowered his tone and entertained the Embassador with civility.

The next Embassador carried an Edict to the King of Japan respecting the pirates who from his territory, plundered the coast of China.

And three years afterwards, the Emperor Hung-woo sent a Buddha Priest to deliver an Edict to Japan, the object of which was, "To command that nation to venerate Buddha." The Priest received very full instructions from the Emperor, as to the six points on which he should insist; in which the first was to be the ancient royal law of "Universal and equal benevolence to all, whether remote, or near at hand."

The Priest, who was a man in high reputation previously to being sent on this Missions, is said to have fulfilled his task with fidelity and success.

The next Embassador, (about A. D. 1420,) was an eunuch; who went thither to purchase rarities. He went from the well known port, called Ning-po. The Japanese at first entertained him at Court with civility, but subsequently began to display different counsels; and the eunuch made his escape by means of a woman, who piloted him out to sea and enabled him to return in safety.

During the same reign, viz: that of Yung, a Japanese pirate was taken prisoner, and his life being spared by special orders from Court, an Envoy sent to Japan with him; taking at the same time an Imperial letter of remonstrance; which the King of Japan received in good part; and on his death, the Chinese sent an eunuch as an Embassador to unite in mourning for that event, and in order to exhibit benevolent feelings.

The last Embassy from China mentioned by our author, occurred about A. D 1555, which was one of remonstrance on the subject of Japanese pirates, who infested the coast of China.* The Japanese are reminded of the severity of their own laws, by which it is said, a man who steals a fowl or a dog, which it is said, a man who steals a fowl or a dog, is condemned to death; and yet they connived at the most cruel and unjust piracies by which they plundered and murdered, & violated the defenceless inhabitants along the whole extent of the Chinese coast.

* Kæmpfer says, the Japanese record that there were 240,000 men. The Chinese account is made probably true: for warriors generally over-rate the numbers of their conquered foes, for a very obvious reason not much to their credit. Dr. Franklin remarked that the abettors on war and the murderers of thousands, were not satisfied with the actual blood-shed, but commonly exaggerated it.

## CORRESPONDENCE

### TO THE EDITOR OF THE CANTON PRESS

Sir,—Being a complete *nullius addictus* kind of man, I am, with your permission, as much your correspondent as ever, and am moreover very sorry to find, that in your eagerness to abating one nuisance, you will do nothing towards removing the other. I would join you in any endeavour to induce the Emperor of China to adopt the principle of free trade, by removing the Hong's exclusive privileges;—This must be done by him, but as regards the Tea men it could only have been, and can only be done, by ourselves.—It is however too late to correct one evil, that of assisting to fill their pockets, by the anxiety to "make hay while the sun shines," as evinced in the double tide working ever since the settlement. I would have joined trith one of the party, I have joined them also in the rush; after the month is out, I hope there will be a little breathing time, and while we are laying on our oars, I also hope that you who may be called one of the helmsmen, will reflect and see, if you cannot alter the course, for what I deem the general good. Let the Tea men by all means, do what they like with their own, but let us, Whig, Tory or Radical, do the same, and consider as our common property, all the extra profits we are by disunion of action diverting from our own into their pockets. Down with the contracts, I say with H., down with the Hongs, I say with you, but I ask both you and H. to say, down with every thing, which is likely to lead us on to a too probable loss.—Let every thing be done which H. recommends, for the next season, but let us endeavour also at curing the evil of the present one,—I beg to disclaim having preferred any accusation, my argument was put hypothetically, and I am sure you will agree with me, that an epithet, less dignified than free Trader, should be applied to any one forfeiting his word.—I am one of your readers,

NOBODY.

Mr. Editor,—There appeared a very severe attack against dealers in Opium, attributed to Archdeacon Dealtry in the Hurkaru Newspaper, and republished in the Canton Repository for March. The Repository, with great fairness, in the Dec. Number published a defence of Opium by "a Reader."

I think the argument there used might have been pushed further with advantage to the question: it's tendency, without repeating the words, is to show, that the abuse of any good by the few, forms no argument against it's proper use by the many.

If Salomon *poisoned* himself by taking 700 wives besides other inmates of his household, is marriage therefore with a single wife to be prohibited? who was at fault here? was it not Salomon? were the King of Egypt and the fathers of the other wives guilty?

Suppose the worthy Archdeacon just to have married an old gentleman to a young girl, and received five gold mohurs for the ceremony; how would he like a friend coming up to him and saying, "how could you be so wicked as to poison that old skeleton of 70, by uniting him to that lovely girl of 17?!!." The Archdeacon would indignantly reply, "*Poison* him! he *poisons*, himself," "I merely perform an official duty for my fee, and failing my doing so, some other Clergyman would, and failing that, the old Gentleman would arrive at the Person by some less lawful mode."

I am deeply impressed that every production of the Earth is meant by Providence for some healthy useful end; if vegetable fruits and juices are abused, woe be to the abuser and the punishment he must suffer; if wisely used, they afford health and happiness.

If the noble and useful horse is made the implement of gambling by Chifney and the Duke, are all the world therefore to walk on Foot? Shall the hardy peasant no more be called to his early labour by chanticleer, because cockpits and cruel heels exist?—Shall the Hungarian shepherd lose his companion and his guard, because Bulldogs are fought in Smithfield?—Away with such dreaming theories; but supposing Opium an evil; let us put the test of money to the sincerity of the parties crusading against it.

England, when she abolished slavery, paid the owners of the slaves 20 millions; now let us begin with them who should set an example: the *Clergy of India the stronghold of Opium*, let it run sign a petition to the Court of Directors to put down the growth of Opium, at least on their Territories and say, as this will be a severe cut on the Hon. Court's revenue, they, the Clergy of India, hereby offer the Court, if their Petition is granted, the *entire half* of all their future salaries, to go for help the injured revenue. This offer being accepted, we Opium agents, may then consider as to giving up the trade and losing our commission.

AN OPIUM AGENT.

Canton, 29th Dec. 1836.

Dear Mr. Editor.—You will find in the second volume of Van Braam's History of the Dutch Embassy to Peking (which I send herewith) some rather curious remarks made as long back as 1793-94, on the injustice and bad offices of the Consoo fund. How true the prophecy has proved many can bear witness. It is to be hoped that the time named by the Dutch Envoy has arrived.—Your's,

Canton, 28th Dec. 1836. H.

*From van Braam's Dutch Embassy to China*

*p. p. 23 & 26.*

From the tenor of the *Fan-tcheng-tang's* discourse this morning, I see plainly that the court is not acquainted with the underhand dealings of the Mandarins at Canton; and I doubt not but the merchants who manage the affairs of the Cohong are concerned in those intrigues. It is certain that even in London Arnold never sold a watch for three hundred and seventy five livres, and that no Chinese merchant could be able to procure one at Canton for less than six or eight times that sum. But too for less than six or eight times that sum. But too for less than six or eight times that sum. But to pay their court to the Mandarins, and particularly to the *Hoo-poo*, who is a kind of god in their eyes, and who is charged by the Grandees of the Empire to procure them European merchandize, they part with commodities at a price inferior to their value, and give receipts which are sent to *Pe king* with the articles purchased. Hence it results that the Emperor and the great personages about court are perfectly ignorant of the real price of things executed by the celebrated artists of Europe. If, indeed, it were otherwise, would the Prime Minister have told us with so much candour what he had paid for his watch and other trinkets which he showed us with that simplicity which characterises truth.

I must observe that the Ministers of State never accept a present from any one whatever, without the express permission of the Emperor. It is consequently proper that they should have receipts for every thing they procure.

But it is well known that the *Cohong* has a particular fund at Canton, arising from the duties laid on all goods imported or exported by Europeans, except woollen cloth and other manufactured articles. These duties were established in 1719 by the *Tsong-tse*, for the following reason:

An English ship of war, called the Seaborne, commanded by Captain Panton, being come to Canton to enforce the definitive recovery of what was due to British merchants from three or four great Chinese houses which had failed; a recovery which the English supercargoes were never able to effect by their own applications, it was thought proper to lay on a tax for ten years in order to extinguish the debt. But the impost has survived the motive of its creation, the duties still continue to be received.

It is from these receipts that the merchants, without any loss to themselves, affect to be generous, and give the Mandarins the most valuable things for a trifle, being sure to find in the fund a ready indemnity.

It is, then, easy to conceive that the great presents made by the merchants to the Mandarins, cost them absolutely nothing; but that they are made at the expence of the European, whose merchandize still continues to be oppressed by a tax which ought no longer to exist. It is surprising that a general demand for its suppression has not been made; for although this impost appears indirect, its effect is not less real than that of an impost upon bread which falls upon the poor although they buy it of the baker, who says not a word to them of the tax.

I think, however, that every representation would be useless unless it were supported like the demands of the English) for such Mandarins and merchants find in this abuse the means of satisfying their desires after gain. It would, indeed, be impossible for the latter to comply with the interested views of the former if some abuses were done. A system of corruption, so well contrived must necessarily continue to exist, and to acquire new strength every day, till it reaches those limits when the abuse becomes monstrous and pernicious to the extreme, both to commerce and traders, to all call for reform in a manner too imperative to be despised.

## EXTRACTS

*From the Quarterly report of the Ophthalmic Hospital by the Rev. Dr. P. Parker.*

No. 1531. Disease of the eye in process, &c. Chang-ahe, aged 36, of Nan-king. Her case is introduced, not as such, on account of the disease of the patient. On the 10th of October, an officer sent his compliments and desired me to see his wife who had an affection of the face, intimating also that it would be most agreeable to meet me in a boat. The boat was appointed, and the next morning a servant of the House came to wait on me. A splendid boat had been provided in front of the foreign factories, with carpets and brilliant chandeliers, tea, sweetmeats, &c. &c., every thing in due order for the occasion. An officer of high rank stood at the door. Stepping upon the boat, a servant took the umbrella from my hand and held it over my head. The officer and his wife were each accompanied by three or four personal servants, male and female, who seemed to be regarded as friends and members of their family, beside other supernumeraries. He was an active and apparently intelligent man. Having the Emperor's name mentioned, &c. I was made to know why, and I was informed that my patient was of *imperial blood*. Her female attendants were all of Tartar descent. It immediately occurred that her features resembled the likeness I had previously seen of Canton ware. Her dress was splendid. Her head was decorated with flowers, and abundance of gold. Ornaments of various kinds were suspended about her person, among which were some superb specimens of topazes, rose quartz. No rouge was upon her face, and her feet were of natural size. The females that attended her were not much inferior to her in the richness and elegance of their persons and dress. For six months this lady had suffered much pain in the left lower jaw, the face was swollen, and an abscess of the alveola process was formed. Several of the teeth were loose. Two of the lower double teeth were extracted, which afforded her immediate partial relief. She complained of rigors that occurred at 3 o'clock every night. The symptoms have been palliated and she was once reported convalescent, but soon after had a relapse. She is still under treatment, the nature of her disease being explained and she apprised from my first seeing her that it would require time to effect a cure.

*The South Sea Expedition.* The Washington Globe gives the following announcement of the measures which are in train, for carrying into effect the projected expedition for exploring the Pacific and Southern Oceans:

We learn that the President has given orders to have the exploring vessels fitted out, with the least possible delay. The appropriation made by Congress was ample to ensure all the great objects contemplated by the expedition, and he Executive is determined that nothing shall be wanting to its suc-

the expedition, in every respect, worthy the character and great commercial resources of the country.

The frigate Macedonia, now undergoing thorough repairs at Norfolk, two brigs of 2 0 tons each, one or more tenders, & d a store ship of competent dimensions is, we understand, the force agreed upon, and to be put in a state of immediate preparation.

Captain Thomas Ap C Jones an officer possessing many high qualities for such a service, has been appointed to the command; and officers for the other ves els will be immediately selected.

The Macedonia has been chosen instead of a sloop of war, on account or the increased accommodations she will afford the scientific corps, a department the President has determined shall be complete in itsorganization, including the ablest men that can be procured so that nothing within the whole range of every department of natural history and philosophy shall be omitted. Not only on this account has the frigate been selected, but also for the purpose of a more extended protection of our whalemen and traders; and to impress on the minds of the natives a just e ception of our character, power, and policy. The frequent disturbances and massacres committed on our seamen, by the natives inhabiting the islands in those distant s as, make this measure the dictate of humanity.

We understand also, that to J N Reynolds, Esq. the President has given the appointment of corresponding Secretary to the expedition. Between this gentleman and Captain Jones there is the most friendly feeling and harmony of action. The c ordiality they entertain for each other, we trust will be felt by all whether citizen of officer, who shall be so fortunate as to be connected with the expedition. *Boston Daily Advertiser 16th July.*

## YANKEE EDITORS.

Editor James Gordon Bennett was assaul ed in the streets by a rival Editor, James Watson Webb, of the *Cour er and Enquirer*. The former gives the following opening of this affair:—"It was about half past two o'clock—the sun was shining brilliantly—the sky was clear—and no doubt the angels and spirits in Heaven were looking down through that azure sky, to witne s how brutal—how mad—how villainous—how cowardly—how ruffianly it was possible for one man in New York to make himself. As soon as I found myself attacked, I turned upon him. His superior personal strength, which God Almighty in his wisdom has given him for some inscrutable purpose, was altogether too powerful for me to contend with. The great crowd of brokers and others who collected around, cried out 'Shoot him Bennett,'—'Shoot the d—d rascal,' —'Shoot him down, he deserves. it.' I wish I had had with me my good pistols, which I kept loaded in my office. After a scuffle we were separated by the crowd. My damage is a scratch of about three-quarters of an inch in length, on the third finger of the left hand, which I received from the iron railing I was forced against, and three buttons torn from my vest, which any tailor will reinstate for 6d. His loss is a rent from top to bottom of a very beautiful black coat, which cost the ruffian 40 dolrs. and a blow on the face, which may have knocked down his throat some of his infernal teeth, for anything I know. Balance in my favour, 39 dollars 94c. As to intimidating me, or changing my course, (proceeds Mr. Bennett,) the thing cannot be done. Neither Webb nor any other man can or shall intimidate me. I tell the honest truth in my paper, and leave the consequences to God. Could I leave them in better hands? I may be attacked — I may be assailed—I may be killed—I may be murdered, but I never will succumb; I never will abandon the cause of truth, morals, and virtue. It is not, nor never was, in James Watson Webb to intimidate or frighten from the exercise of his right, James Gordon Bennett. If the public authorities d o not choose to protect the peace of the city, and re sure peaceable men in the enjoyment of their rights, I shall carry arms for my own protection. Hereafter I shall be obliged to carry weapons to defend my person, and if he gets killed in the street the blood be upon his own head." After insinuating that his antagonist is mad, the writer in the Herald proceeds—"Out of pity to the poor maniac, I shall today make application to the commissioners of Bellevue Asylum, and humanely request Mr. John Targee, the worthy head of that establishment, to take him into custody—to give him good lodgings—to treat him kindly—and by all means to have his head shorn, and every bit of his whiskers shaved off. With the help of Heaven and topical bathings, I may be the means of restoring poor Webb to his long lost senses. May God Almighty grant it! Amen." The writer, after modestly comparing himself to Socrates, goes on to sing of the inward promptings of his "I hear a voice, as it were, from heaven, by morning noon, and night, crying me onward in the cause of truth morals, and civilization. In the mazes of Wall-street—amid the solemn chantings of Trinity—in the gallery of the Tabernacle, with all the pretty milliner girls in town fishing fog lovers—at the kissing church, No 11. Sullivan street, in the midst of the very smack—nay, even at that graceless fellow's theatre Hamblin the humbug—this voice is continually sounding in my ear, like the distant voice of many waters, almost articulated into words "Go on; the day of another Athenian civilization is at hand—a new Athens will again arise in another land: the barbarian and brute, who wears whiskers, and attempts to beat down truth, will himself be struck to the earth."—*New York Herald.*

*Portuguese Opinion of English Taxation.* — A Lisbon paper has the following paragraph:—"Wretchedness of the people of England!!—The amount of duties paid by the English to quench their thirst exceeds the entire revenue of Bavaria. The tax upon tea yields as large a sum as six millions of Neapolitans pay to Francis I. For the luxury of sugar they pay more than twelve million Americans pay for all their imports. To be allowed the use of soap they pay a sum equal to what the Pope spends upon himself & his army of cardinals priests, and soldiers. The privilege of receiving thro' their windows the light of the day is loaded with an annual tax equal to the whole revenue of the King of Hanover; and, in fine, the taxes upon *thirst* alone —upon brandy, rum, wine, &c, are greater than the whole sum paid by *fifty millions* of Russians for the benefits of a *paternal despotism*!—*Ibid.*

---

*Sandwich Island Gazette 19th November*

Articles made and agreed on at Honolulu, Island of Woahoo, this 14th day of Nov. 1836.

Art. I. English subjects shall be permitted to come with their vessels and property of whatever kind to the Sandwich Islands, they shall also be permitted to reside therein as long as they conform to the laws of these Islands and to build houses and warehouses for their me chandize with the consent of the King, and good friendship shall continue between the subjects of both countries, Great Britain and the Sandwich Islands.

Art. II. English subjects resident at the Sandwich Islands are at liberty to go to their own country or elsewhere either in their own or any other vessel, they may dispose of their Effects Enclosures, Houses, &c, with the previous knowledge of the King and take the value with them without any impediment whatever; the land on which houses are built, is the property of the King, but the King shall have no authority to destroy the houses or in any way i fringe the property of any British subject

Art. III. When an English subject dies on the Sandwich Islands his Effects shall not be searched or touched by any of the Governors or Chiefs, but shall be delivered into the hands of his Executors or heirs if present, but if no heir or executor appear, the Consul or his agent shall be executor for the same; if any dis ute arise relative to the deceased, the Governor of the place shall resort and do all in his power to compel the debtors to pay their debts to the heir or executor or the case if no heir or executor appears, and the consul is to refer the King of the death of every British subject leaving property upon the Sandwich Islands.

TAMEHAMEHA III.

ED. RUSSELL, Captain of
H. B. Majesty's Ship Actaeon.

---

# CANTON PRESS,

31st December 1836.

As is customary we live to our friends and readers the compliments of the season on entering on a new year, and our sincere thanks for the support this paper has met with since it's establishment, which support our friends will, we hope continue to give us, whilst we continue to devote our attention to most of the todes important to our commercial community. The circulation of a Canton paper necessarily is comparatively small, but we have already been enabled on the commencement of this our second volume, from the increased number of our subscribers, materially to reduce the subscription price, and to change the shape of the paper to it's present form, an arrangement, we flatter ourselves, which has met the wishes of our readers.

In recapitulating the events of the year most important to our community, we may be allowed to congratulate them that, though not subject to any authority, another year of the Free-trade has passed by, in which not the slight st misdemeanor on the part of foreigners has occurred to cause disturbance or d fference with the local Government; a circumstance no doubt chiefly to be attributed to the very good and judicious discipline of the ships at Whampoa, which has shewn itself hitherto to be as effective as that of the ships visiting the port under the Company's monopoly. In this circumstance our Captains will we hope persevere, so as not to cause the people even the making an excuse for traders to be fulfilled.

One of the most remarkable events that has occurred during the year well worthy of serious consideration, and one having much within it, to attention to be paid by the Imperial Government upon this Opium trade, is the question now under discussion whether it is to be entirely prohibited or to be legalized. Great and violent seem to be the contentions on both sides, and it is impossible to say how the struggle which of the parties will ultimately prevail. One thing seems certain namely that the hitherto thriving smuggling trade at Lin in, will with never way to question may be decided, suffer considerably, at least for some time to come. It has indeed now been supposed that the Government was unable to prevent the smuggling at Lin in, but it's absence to all appearance during this month proves the contrary, as not to the 4th only 111 chests had been delivered, instead of about 1500 chests which would have been the average quantity for three weeks. We cannot close this report to the Emperor, which the Imperial commissioner, now here is to make will fail to decide the question as to the importation of Opium.

The Company's Finance Committee in their meetings of it's operations during the year, and has by the frequent and sudden changes of tactics, succeeded in causing considerable embarrassment, and in depressing the prices of British manufactures as well as raising the produce of this country; thus causing loss to the free-trader far beyond the profit of about 15 per cent, which the Company gain upon their Exchange speculations. We have just learned that from this day, for the pre-ent at least, the Company's treasury is closed against the receipt of Cash for Bills on Bengal. We sincerely hope that, next year, we may congratulate our neighbours that this establishment has been done away with.

The chief clog on the prosperity of our trade is the state of the Co-hong, and of the Consoo fund. This unsatisfactory state has however not arisen from the opening of the China trade, but owes it's origin to a far earlier period, though the free-trade may hasten a crisis, which once over, may placed it on a much more advantageous footing. So much has lately appeared in our columns on this subject, that we refrain from entering again upon it, expressing merely our conviction that a radical change must sooner or later take place.

# THE OPIUM TRADE.

Our readers will, in another column, find a letter from "An Opium-Agent" elicited by two articles which appeared in the *Repository* for November and December, respecting the moral guilt incurred by the China merchants who deal in Opium. The first of these articles professes to be a communication made to Archdeacon Dealtry of Calcutta, under whose patronage it is issued from the Church Mission Press there, and was reprinted into the Repository. We doubt not that the writer of those remarks was sincere in believing Opium, to be a source of great evil, and that his denouncement of the traffic in it, in no measured terms, is equally sincere, but his zeal has made him represent the misery resulting from the use of Opium in, what we think, by far too black colors; we think that the subject of which he treats did not call for language either so strong, nor so bombastic, nor do his remarks to our minds justify him to speak with so much self complacency of his own powers of argument.

Of what we call unnecessary strong language we give the following as a sample "when powerful "patronage general example, rooted custom, and "the love of lucre, are all arrayed together in the "cause of vice, the battle of truth against such a "host must be a long and arduous combat." The "champions (of the Champions of truth) if at "length he could to may be wilfully distorted, however sound, may be ridiculed however unanswerable. Upon abstract principles men will not reason at all. Of those who are able to reason, how few reason correctly! ere ee!"

The following is of the bombastic kind. "These "failure (of the advocates of truth) may retard "the success, but only make her own sober triumph "more glorious, when *goddess like*, she descends "into the *arena of mans conscience*." We need hardly observe that these last similes seem to be ill chosen, conscience has no arena, conscience is supposed always to point out the right path, and can therefore not be at issue with herself.

The other extract which shews that the writer has no contemptible opinion of his powers, is the following. "And if a few remarks, purposely brief, "(he might almost say *purposely inconclusive*, "for he would fain stimulate discussion by a *show* "*of weakness*, rather than be fled from, and left "conqueror of an inglorious field, to which the "enemy would return as soon as he moved, off) if "these brie observations prompt but one inquiry, "awaken one suspicion of guilt, excite one effort on "the part of the able and benevolent, to trace to "it's very source *a torrent of evil of which the worst "desolations of war or of famine, are*, he verily "believes, *but feeble in comparison*; if such may "be the result of these pages, the writer will be "truly blessed in his humble endeavor to do good."

Such exaggerations as the last in italics are brought forward by a writer who assures us that he desires nothing but truth, who moreover gives us a palpable hint that he is one of the very few who both "*can and will* reason correctly, in spite of prejudice and bias." There are some we believe, who would gainsay that the smoking of Opium has raised many natives of this country, but this only in consequence of too great indulgence, but that these instances are more numerous, or even as numerous, as those we see in Europe of misery and bodily ills consequent on the over indulgence in the use of spirits or wine, we doubt very much, nay, calculating the quantity of Opium consumed in this populous Empire, it will be found that the quantity which falls to the share of *each* individual is very small indeed, nor is it easy to imagine that so small a portion (not more than one tenth part of an ounce of the purified gum for every individual) could be so effective as to cause worse desolations than "war, pestilence or famine" The real truth we believe to be, is, that the immoderate use of Opium is confined to comparatively few, and that the vices of the people use it in no other way than a sober man in Europe would now and then take a glass of wine or even spirits, without thereby injuring his constitution or his good fame. Let those who so much decry the use of Opium, and read from whose writings it would appear as if the whole population of China were nothing but Opium debauched wretches, let them come to this country and they will find that no where is an apparently more acutely and healthy population met with, no where more general habits of industry and no where are the mass of the population more orderly and well behaved. In stating this we do not mean to be the apologists of the use of Opium; far from it, we wish that the Chinese would do without it, as it undoubtedly causes much individual misery and ruin; but this cannot be laid at the charge of those who sells the Opium, and we believe it will be found on a impartial investigation that the general evil resulting from the Opium-trade overbalances it's evils. The traffic in Opium, from the large revenue therefrom derived, enables the Indian Government to lessen the taxes of the land cultivator in general, whilst the cultivation of the drug affords a livelihood to an immense number of ryots; the extent of trade to China gives employment to shipowners and seamen, and assures to the Capitalist a profitable return of his investments; not to speak here of the 15 per Cent realized by the Company over and above their Opium monopoly, by their speculations in Exchange by way of China; this latter however we will not now insist on, as such speculations ought not to be made by the Bengal Government. Opium is a source of profit not only to India, but to numerous British merchants here as well as at home, and if Opium were not imported into China, we should find it difficult to prosecute even our export trade to the same extent as we have hitherto done, unless we drained Europe and America of Silver.

The writer of "the remarks on the Opium trade" labours hard to prove from Holy writ, that the smoking of Opium is there prohibited, though he candidly avows "that he does not expect the Bible to make mention of Opium and of the Linzin smuggling station, by name," and we shall conclude our remarks by extracting the following, which will no doubt appear rather "far fetched" by our readers.

"He who shuns not the temptation, invites the "crime; the crime is *theft*; and the law of God "says, "Thou shalt not steal.' Does not the "Opium smoker permit his depraved appetite to "steal away his reason, his health, his peace of "mind, his bodily rest, his time, his money, all hope "for this life or the next?"

The writer in Calcutta winds up with the following:' How long is a whole community of British "merchants to be content *with earning the price of* "*blood, because if they do not, others will in their* "*stead?*"

We request our neighbours seriously to consider this last question.

---

November 19th 1836. While standing in for the Palawan Coast, having the starboard tacks aboard wind N Easterly, ships head E S E, and going 5 knots per hour, at 11.30 A. M. saw rocks under the ship's bottom, apparently having 7 a 8 fathoms water on them. Put the helm down, and sent a man in the chains to sound, but before he could clear the lead, for that purpose, we were off the shoalest part: got a cast 15 fms rocks. The ship missing stays stood on E S E, and kept the lead briskly going, for the distance of 3 miles, gradually deepening to 37 fms hard rocky bottom.

We then had irregular soundings of 33.30.27.33 fms another mile, when we suddenly got off the bank, and could get no soundings with 100 fms line: distance ran from the shoalest part of the bank to its edge: S S E by E 4 miles, allowing one point for leeway. At noon made the shoalest part of the Bank to be in Lat. 10°. 30' North; and Longitude by chronometer corrected a few days previous by a sight of the Royal Captain and Bombay Steed's. 117 °. 30' East. There was no appearance of broken water from the mast head, no unusual swell on the bank, and probably it may not be dangerous. The unsettled appearance of the weather, prevented me from examining; it more particularly with the ship's boat. As this appears to be a new discovery, I named it Lord Auckland's Bank.

JOHN WILLIE.

*Commander Ship Lord Auckland,*
of Calcutta.

The above has been kindly communicated to us by Capt. Willie, relating to the *discovery of a shoal bank in the Palawan Passage, China Sea.*

We hear that a grandson of Howqua and a mandarin of some rank, have been sent to Macao to enquire of Capt. Elliot, H M. Senior Superintendent, what his object is in his intended visit to Canton, and of what nature the powers he has over H B. M. subjects Capt. Elliot's answer is to be forwarded to Peking, and the Imperial Government's orders are to be received before the Local Government can give a decisive answer to the Superintendent's application.

The letter from "Nobody" to which we alluded in our last, will be found in another column. He very justly says that the evil of which he complained, viz: the high prices obtained by the black-seamen, it is now too late to correct; this was brought upon us chiefly by the determination of the Finance Committee to discontinue advances on shipments after the 31st of December, and if the merchants or ships agents would at all avail themselves of them, they must make their purchases before that time. Of this Tea-men were well aware, and forced the high prices accordingly, and if the Company's advisers continue to interfere with the Canton trade it is quite probable that in future seasons the Tea exporters will be equally ill treated. The Company's term for advances has now passed over, and the eagerness for shipment at present prices will during the next few months no doubt considerably abate, and if the Tea-men have not driven timely bargains, they may yet have to submit to a considerable reduction. Let the efforts of the Press as well as of other individuals in Canton be directed towards the Company's establishment here being given up, and we shall then be better able to oppose extortion attempted by the Tea-merchants.

---

By the *Oneida* from South America and the Sandwhich Islands, we have received the numbers of the Sandwich Island Gazette, a weekly Journal lately established there, and of which we published the prospectus some time ago. We have extracted from the latest of these papers (of the 19th Nov.) the treaty of amity concluded between the King of the Sandwich Islands and the British Government, and should be glad to have it in our power to give more copious extracts, but the total absence in these papers of local intelligence of general interest, of which no doubt much may be given from these interesting Islands prevents us. We would recommend to the Editor of that paper, if he wishes for readers beyond his own immediate neighbourhood, to devote a portion of his paper to a description of the Islands of the state of society there, and to many other topics which would be highly appreciated by readers every where.

We observe from the Indian papers that Chambers of Commerce have been formed both at Bombay and at Madras.

We are obliged to H. for his communication; the extract from Mr. Van Braam's book will be found in another column; that traveller understood well the nature of the Canton fund, and his prophecy pronounced forty years ago, is near being now fulfilled.

By the *Lady Hayes* we have received the *Singapore Free Press* to the 17th Nov., completing our file to that date, of which we give some extracts. *No Chronicle* later than the 29th October has yet reached us.

A friend has favored us with the loan of a New-York paper of the 14th July brought per Dorothea, from which we have extracted the account of the projected South sea Expedition.

We have been requested to state that the signature "Fooshunjee Hormusjee" was affixed by mistake to the notice in our last paper of the death of Motychund Amichund.

## OFFICIAL NOTICE.

To His Britannic Majesty's subjects in China.

DE-PATCHES have been received from the Right Honorable the Secretary of State for Foreign Affairs, signifying the abolition of the Office and Salary of the Chief Superintendent of the Trade of British subjects in China.

His Majesty's Government has been pleased to appoint Captain Charles Elliot R. N. to perform the duties of Chief of the Commission, from this date.

Macao, December 4th 1836.

By Order of the Superintendents of the Trade of British subjects in China.

EDWARD ELMSLIE
*Secretary & Treasurer.*

## OFFICIAL NOTICE.

CONSIDERABLE inconvenience and public expense having been incurred, by reason of the imperfect and ex parte manner of certain British merchant vessels quitting and leaving behind in this place, men belonging to the said vessels; Notice is hereby given, that this practice is contrary to Law, and that the offence may be prosecuted by Indictment or information at the suit of His Majesty's Attorney General in the Court of King's Bench at Westminster, as if it had been committed at Westminster in the country of Middlesex; and it is now declared, that the Superintendents will take measures to institute proceedings against any master or masters of British merchant vessels who shall offend in manner aforesaid in future.

By Order of the Superintendents

EDWARD ELMSLIE.
*Acting Secretary and Treasurer.*

April 15th 1834.

### NOTICE.

THE Co-partnership hitherto existing under the firm of Markwick Edwards & Co. ceased this day. All Persons having claims against the said firm are requested to forward them, and all Persons indebted to the same are requested to pay the amount to the undersigned.

ROBT. EDWARDS

Canton, 31st Dec. 1836.—No. 3 Imperial Hong.

N B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER.

BOATHIRE IS PAID BY THE SELLER.

Notes. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camlets, Saltpetre, Ginseng* and other Goods on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometime discharge at Macao or translip their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary Stationery, Cutlery, Crockery ware, &c.* for foreigners consumption, are sold at Auction, duty paid.

*Note. Aloes,* and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk* piece goods &c, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

The London Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.787 1736 of a Tl. per cubit.
2nd „ „ „ 1200 do. & under 1600 „ 0.7221091 „ „
3rd „ „ under 1200 do. 0.5063341 „ „

N B The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or 13ds head in Bridge; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4.5 0 to $ 4329; 2d class from $ 3260 to $ 3720; 3rd class from $ 3700 and under. The Cumshaw or Present Fee is paid by all vessels 1600 Tacls or $ 2223. Linguists fee $ 17.35 and Comprador's fee $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riverladen ships are charged only about $ 1300 in lieu of measurement &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

Cotton Manufactures.—The demand for them continues languid.

Woollens.—In consequence of several forced sales of both Longells and Spanish Stripes these articles are still more depressed.

Betel nut.—We hear of some sales at our quotation.

Peppers,—and Tin continue at their nominal high prices.

Cotton.—There have been sales of several parcels of all descriptions of Cotton during the last week, but at a decline of 2 @ 3 mace, and as the deliveries are small, there is not for the present much prospect of improvement, money being very scarce.

Opium.—Our quotations are quite nominal, and there have been no transactions, the trade being still suspended. A report has reached us of the seizure of a smuggler in the river, it is said with a few chests of Opium and other goods, but the particulars have not reached us.

The deliveries to the 22nd were,

| Patna. | Benares. | Malwa. | Total. |
|---|---|---|---|
| 23 | 48 | 39 | 110 chests. |

### EXPORTS.

Raw Silk.—There has been a good deal of activity in this article, exporters being anxious to avail themselves of the Company's advances.

Tea.—We have not to notice any alteration in prices during the past week. Shipments have been going on actively in order to procure the Company's advances.

Silk Manufactures.—Nothing is doing in them; the prices demanded by the merchants are much higher than exporters are willing to give, and if no fresh orders arrive shortly, a decline may be expected.

# STATEMENT

## OF THE QUANTITIES OF TEA AND SILK EXPORTED TO GREAT BRITAIN

## LITERARY.

*( From the Indo Chinese Gleaner. )*

HISTORY OF THE INTERCOURSE OF FOREIGN NATIONS WITH CHINA. FROM A TOPOGRAPHICAL ACCOUNT OF CANTON.

In the time of Hwang-te, (about 2200 years before the christian era,) a foreigner came from the south riding on a white stag and offered as tribute a cup and skins.

In the time of Hea, islanders brought as tribute, flowered garments.

In the time of Shang, (B C. 1700) from the east the Yue-gow, who e hair was cut short, and their bodies decorated, brought cases made of fish-skin, sharp swords, and shields.

From the south they brought pearls, tortoise-shells, elephant's teeth, peacock's feathers, birds, and small dogs.

In the time of Chow—when he conquered Shang, (about 1000 B. C.) the intercourse with eight barbarous nations was opened.

In the time of western Han, (about 200 years before the Christian era.) persons came from Canton, Loo-whang-che, and other nations in the south. The nearest was about 10 days' journey, and the most remote about five months. Their territories were large and populous, and they had many unusual commodities.

The Emperor Woo-te, ( B. C 120 ) sent able Embassadors to the different mercantile countries, where they obtained bright pearls, gems, curious stones, various curiosities, yellow gold, &c. They were well entertained where they went. And from that time the above articles continued to flow into China.

In the time of Kwang-woo, ( B C. 100 ) the barbarians brought horses. Ma yuen erected brass stakes to prevent the ingress of the southern and western foreigners. The nations on the westward changed their names about this time.—Teen-cho, Tsin, and other nations from this time came by sea, and much intercourse was kept up with Canton.

In the time of Suy, ( A. D. 600. ) Embassadors were sent to the surrounding nations.

In the time of the Dynasty Tang, ( A D. 700, ) a regular market was first opened at Canton, and an officer sent to receive part of the profits for Government. The largest ships that came were called single-masted ships, and contained a thousand Po lan. (Po-lan was a foreign word and denoted 200 catties, hence they contained 200,000 catty.) The second size were called cow-headed ships, about one third as large as the others.—The Emperor required them to bring camphor and other fragrant substances.

In the time of Queen woo, (A. D 709,) one Looyuen-tseun, a Too-tuh attempted to seize by mistake some foreign goods from a vessel: the Captain in a rage killed him.

In the time of Shun-kwa, ( about A. D 1200. ) the officer appointed to remain at Kwang-chow-foo, first exacted two candareens duty.

The foreigner's resident at Manchoy, (Canton) received from the Chinese, metals, silks, gold, &c. in return they gave Rhinoceros' horns, elephant's teeth, coral, pearls, gems, crystal, foreign cloth, paper, red wood, medicines, &c.

A Board of Revenue was established at the capital; foreigners were ordered to bring their goods to Kwang-chow, and no commerce allowed, but what was carried on by Government capital. Afterwards, any goods were allowed to be sold in the market, except curious gems and the 10th of the value was required as duty. It amounted to several times ten thousand taels, and was distributed for the support of the Hean magistrates.

In the time of Tae-ping, (1800) there was a Kwang-chow-foo, who knowing the abundance of vessels that came to Canton, could not restrain his avarice. He made a statement to his superiors complaining of good and bad goods being blended together, and begging that for the time to come they might be separated. One year there was a failure in the amount of the duties, an investigation instituted, and a stop put to the evil.

In the second year of Ta-kwan, the provinces of Che-keang, Fo-keen, and Kwang-tung were appointed for the reception of foreign ships. An additional officer was appointed at Chin-chew (Tseuen-chow.)

In the third year, the foreign merchants wished to go to other ports and gave a bond, that they had no prohibited articles. They were allowed to do so, and arms given them for their defence.

In the fourth year of Ching-ho, the ship captains sent tribute of gems, rhinoceros' horns and elephant's teeth.

In the first year, of Keen-yen, there was an edict, saying, that many useless things were brought; from that time, precious stones for rings, also cat's eyes &c. might be bought with money—and that if foreigners should be defrauded, the Chine e would be severely punished. It was however allowed to the officers of Government, to accept of elephant's teeth, and the horns of the rhinoceros.

At this time it was found, that there was a scarcity of metals, from so much of them being carried out of the country—and though the laws were severe against it, the wicked arts practised were beyond the reach of detection.

In the time of Ying-tsung and Shun, (in the 14th century) the trade was twice stopped, and again re-opened the ensuing year.

It was fixed that the foreign nations should bring tribute e ery three years. The regulations at Canton were made extremely strict. The ships bringing tribute were to land their goods and wait till the harvest was over.—One hundren and twenty houses were built for the accommodation of foreigners.

In the 12th year of Ching te, (about A D. 1550.) foreigners from the west called Falanke, (French) said, that they had tribute—abruptly entered at the Bogue; and by their tremendously loud guns shook the place far and near. It was stated to court, and an order returned to drive them away immediately and stop the trade. After this, little tribute was brought to Canton; it being carried to Fokien. The Foo-yuen of Canton afterwards wrote to court, and obtained permission to open the trade

The Se-yang-kwo (nation of the western ocean, Portugal) is very large, and situated near the country of Fo, where all the foreigners meet: it is distant from China, a hundred thousand Le. Their country produces fragrant wood, cloth of different colours, pepper, &c.

In the first year of Yung-lo, (1348, according to Duff) the King of Portugal sent an Embassador; three years afterwards he sent an other with tribute. The Emperor wrote to him, constituted him the King of Kou-le and gave him a silver seal. In the fifth year, he ordered his eunuch to send him some silk for his officers.

In the sixth year of Kang-he, an Embassador was sent with a letter written on golden leaves—a picture of the King—a sword adorned with gold, and a scabbard of gold and gems. A letter-box of amber, a coral tree, and coral beads; amber beads; ta-le-yang (woollen cloth) two pieces; ten elephant's teeth, four horns of the rhinoceros; fragrant wood, medicines, rose water, and four decorated screens. They offered to the Empress, a large looking glass, coral necklace, 4 strings of amber beads, rose water, and other perfumes.

The Emperor graciously rewarded them by silver and eighty pieces of silk, &c. To the Embassador he gave 68 pieces of silk, and a hundred taels. To the second in the Embassy, 18 pieces of silk, 50 taels. To the Priest, 18 pieces of silk, and 50 taels. To the 19 servants, each 10 pieces of silk and 20 taels.

In the 59th year, another Embassy was sent—In the 9th moon, the King of Portugal sent a Te-hea-sze, (Minister of State) with tribute. In his retinue were 20 persons.

In the 3d year of Yung-ching, the King of the Church, ( the Pope ) sent an Embassy with a great number of presents; globes, snuff, pearls, amber cups, &c. &c Also in the 4th year, an Embassy was sent. The Emperor wrote the Pope with his own hand, which produced another letter in a bag of golden thread.

The Ho-lan (Dutch,) who are called Hung-maou, (red hair, the name now applied to the English) in ancient times did not come to China. In the winter of the 9th year of Wan-lee, (about 1580) two or three large ships came to Macao; the people's clothes were red, their bodies tall, and their hair red. Their eyes were blue and sunk in their heads. Their feet were one cubit two tenths long. They frightened the people by their strange appearance. The foreigners at Macao asked who they were. When their reply was translated, it appeared that they said, we are not pirates—we bring tribute. But as they had not been here before, nor had any letter, the officer at Macao refused to receive them.

The Officer of the duties called the Captain into the city and detained him a month, when he was sent back to his ships. The foreigners at Macao, would not allow them to land, and they began to go. It was afterwards heard, that one Manloea waited till the ships returned, when he secretly put all the people to death

In the 10th year of Shun-che, they sent an Embassy, which was received in the 13th. The Emperor in consideration of the difficulty of the voyage ordered them to come once in 8 years with tribute.

In the 3d year of Kang-he, they sent a King of the Ocean (an Admiral) to assist against the pirates in Fokien, with a request to trade. They were ordered to come to trade once in two years. In the 3d year they again sent the King of the Ocean to assist at Fokien. In the 5th year, they were prohibited from coming, because they came with tribute only once in eight years. In the 6th year contrary to law, they sent tribute by the way of Fokien. In the 25th year, they requested to be allowed to bring tribute every five years. They were allowed then to go to Fokien. They formerly brought silver plates, saddles, &c &c. but afterwards were allowed to bring only coral, ta-le-yang peo-ke, (woollens,) clocks, camphor, amber, muskets, and flints.

## MISCELLANEOUS EXTRACTS

### THE LAND OF LIBERTY!

BURNING A MAN ALIVE.

The following account of the horrible scene at St. Louis, Missouri, in the United States, is communicated in a letter dated St. Louis, April 28, published in the (Boston) *Evening Gazette*:—

"I have returned from witnessing the most horrid sight that ever fell to the lot of man—viz., the execution of Lynch Law! upon a yellow, by the execution of Lynch Law! upon a yellow, by the horrible means of a *slow fire*. The cause of this almost unprecedented execution I will now briefly relate. Deputy Sheriff Hammond, while endeavouring to arrest an offender, was, by the above mentioned yellow fellow, defeated in his intent. During the scuffle the prisoner escaped. Mr. Hammond then arrested the yellow fellow for his interference, and took him before a Justice of the Peace, by whom he was committed. While conducting him to gaol, accompanied by our constable Mr. Mull, the prisoner drew a knife and plunged it into the constable's side. Upon witnessing this, Hammond sprang at the prisoner, who now turned upon him and inflicted a terrible and mortal blow; the point of the knife struck him on the head, passed through his throat, completely severing the jugular vein; he staggered a few paces and fell dead. The prisoner then fled to a yard or passage way, but being brought to bay by his pursuers, and still retaining his knife, he swore he would kill the first man who attempted to arrest him. His pursuers, perceiving his threatening manner, backed out, with the exception of one, who seized a rail, broke it over his head, which slightly stunned him, but soon recovering he resumed his menacing attitude, when a powerful and courageous man, but just arrived, seized upon a stone, and hurled it with herculean force, striking him upon the shoulder, and dislocating that limb. His arm dropped useless at his side, his knife fell from his grasp, and he was immediately arrested, bound, and carried to prison.

"We must now return to the dead and wounded. During the time occupied in the pursuit of the prisoner, the news of the affray had spread over town, and the crowd around Mr. Hammond's body was joined by his son, an interesting lad about 11 years of age, whose loud and heart-rending lamentations infuriated the already excited spectators. They swore that the murderer should not live another hour. This resolution once formed, they proceeded to the gaol where the prisoner was confined. Being too strong for the officers, who could not, under existing circumstances, make much resistance, after forcing three doors, they reached the cell that contained the murderer, and led him forth amidst the shouts of the multitude. None few endeavoured to quell the tumult, but to no purpose. The friends of Mr. Hammond (and there were many, for he was universally beloved and respected) were determined on revenge—a revenge that may seem to you unwarrantable, but take the case home to yourself—conceive your own brother in the situation of Mr Hammond, and you will find some palliating consideration to abate the horrid character of this transaction.

"The mob conducted the murderer to a pasture at the back of the city, with the intention of hanging him up, but some among them cried out, burn him!' The horrible suggestion was immediately caught at. The moon had now risen bright and clear, the evening was calm and beautiful, too fair a night for the appalling spectacle that was about to be witnessed by at least 500 of our most respectable citizens. They chained the murderer to a tree, and the cry arose, 'let the fire be slow!' They piled shavings and rails round him until they reached the height of about two feet and a half, a match was applied to the shavings, and the murderer commenced singing a hymn, which he continued until the heat became intense, and then those few half smothered words escaped him, 'God take my life!' I had pressed forward, until I stood in front of the sufferer. I could not move—it seemed as though some horrid fascination chained me to the spot, and I witnessed all his agony.

"Never martyr suffered more courageously. Not one single scream escaped him; his chest heaved with the most intense agony, yet all he said was, 'God take my soul!—God take my life!' in accents so low that none except those immediately about him could catch the sound. He had been burning about 15 minutes, when some one said, 'He feels no pain, he is too far gone.' He immediately answered, 'Yes I do feel it!' Never, never can I forget his looks, when with the utmost difficulty he uttered those few words. The fire was so slow that his legs and feet were burnt almost to a cinder before his other parts were to any degree affected. The tree to which he was chained was in full blossom, and seemed to smile upon the horrid deed. The horror of that scene can never be effaced from my memory. I imagine a human being chained to a tree—a slow fire ursing around him—the boiling blood gushing in torrents from his mouth—his legs burnt to a crisp—yet his head moving from side to side and occasionally a half-uttered groan. But I will not, I cannot further enlarge upon a sight so horrible—I feel a sickness at my heart, a dizziness in my head, occasioned by witnessing that terrible sight; but I was rooted to the spot—I could not withdraw my eye from the sight before me."

*Morning Herald, July 14. Singapore Free Press.*

### FRIGHTFUL SHIPWRECK

*( From the News, June 20. )*

The following account is so like one of the powerful but horrible inventions of modern fiction, that we have for some days hesitated to give it a place in our columns. It appeared in the *Limerick Star* of the 14th inst. and having been since copied into several respectable journals without contradiction, the harrowing conclusion is that the unparalleled horrors of the narrative are facts. The statement is understood to be taken from the lips of one of the survivors.

The *Francis Speight*, a fine vessel of 315 tons burden, laden with timber, sailed from St. John's, Newfoundland, on the 11th November. The crew amounted to fourteen men, with the Captain and mate, mostly Irish, and four boys. At three o'clock in the morning of the 3d December, an alarm was raised by a cry and confusion on deck. The vessel it appeared suddenly broached to, and by like a log in the trough of the sea, while the waves broke frightfully over her; the Captain could not get the men to obey directions; nor even when she was filling could he get them to work the pump. In less than an hour she lay on her beam ends, the greater part of the crew saving themselves by climbing to the rigging. Two men were drowned in the forecastle, and the mate in the after-cabin, into which he had gone accidentally only a few minutes before. The Captain and a man named Morello now got to the fore and main-masts, and cut them away; the mizen topmasts went with them over the side, and the ship immediately righted. As soon as she righted, being already filled with water she settled down in the sea, and there was scarcely any portion of her to be seen, except the poop and bulwarks. No situation could be more hopeless or miserable than that of the unfortunate crew, standing ankle deep on the wreck, in the depth of a winter's night, and clinging in the darkness to whatever was nearest, as sea after sea rolled successively over them; but they knew not the full horror of their condition until the dawn. They then discovered that their provisions had been washed overboard, and, as the hold were filled by the sea, they had no means of coming at any fresh water. The gale continued on unabating through the morning, and the dreadful swell every now and then swept over the decks, so that for safety as well as for shelter, they gathered into the cabin under the poop. Even here she was to deep with water, a dry plank could not be found on which they might lie; their only rest was by standing close together, huddled up, and leaning against one another. About ten o'clock forenoon a vessel was suddenly descried, and it was thought possible her course might be near them; but she stood far away beyond the reach of signal, and was soon out of sight. That day and the next passed away without the slightest change in the weather. On the third it began to moderate, during the whole of which period they remained standing in the cabin, leaning against one another, or against the ship's sides, unable to take rest or sleep. Their greatest suffering was hunger and thirst. There were fifteen hands alive, and not one had tasted a morsel of food since the wreck; for drink they had three bottles of wine, found in the cabin; this was served out in wine-glasses at long intervals. There was some occasional rain, which they were not prepared at first for saving, getting but a scanty supply by holding out the cover of a tureen. In seven days after the appearance of the first vessel, another was seen on the weather quarter, outward-bound and only four miles north. The hopes of the crew were again revived. An ensign was hoisted on the mizen-mast, and part of a sail; the day was very clear, and she could not but see it, at least the wretched men thought so—but she bore away as the former had done, and was soon lost to their view. Despair was now in every countenance. How they lived through the succeeding five days it would be very hard to tell, but no one tasted food; some few endeavoured to eat the horn buttons off their jackets, the only substitute for nutriment that occured to them. There was no means of taking fish, and though birds were sometimes seen flying past, they had no means of bringing them down. As their suffering increased, they lost all command of temper, and became cross and selfish in the extreme—such as were strong securing a lying place on the cabin floor, and pushing aside those who were weak, to shift for themselves as they could. On the 19th December, the sixteenth day since they had tasted food, the men were talking in groups, and something seemed to be in agitation amongst them. 'The Captain addressed them; he said they were now such a length of time without sustenance, that it was beyond human nature to endure it any longer—that they were already on the verge of the grave, and that the only question for them to consider was, whether one or all should die? That at present it seemed certain that all must die, unless food could be procured; but that if one died, the rest might live until some sail came in view. His opinion was, that one should suffer for the rest, and that lots should be drawn between the four boys, as they had no families, and could not be considered so great a loss to their friends as those who had wives and children depending on them. The lot having been cast, it fell upon a poor boy named O' Brien. The poor fellow heard the announcement without uttering a word. His face was very pale, but not a feature of it was changed. The men told him to prepare for death, and the Captain said it was better it should be done by bleeding him in the arm, to which the poor fellow made no objection. The Captain then directed the cook to do it, telling him it was his duty; he strenuously refused. He was, however, threatened with death himself if he could not submit, and at last consented. The boy then took off his jacket, and after telling the crew, if any of them ever reached home, to tell his poor mother what had happened to him, courageously bared his right arm. The cook then cut his veins across twice with a small knife, but could bring no blood, upon which there seemed to be much hesitation among the men as to what could be done. They were relieved by the boy himself who desired the cook to give him the knife. The Captain recommended him to try the left arm, which he accordingly did. He attempted to open the vein at the bend of the elbow, but like the cook he failed in bringing blood. A dead consternation now fell upon all, but in a minute or two the Capt. said, "This is all of no use; it is better to put him out of pain by at once bleeding him in the throat." At this the lad for the first time looked terrified.

and begged hard that they would not do so, but give him a little time, he said that he was cold and weak; but if they would let him lay down and sleep for a little, he would get warm, and then he might bleed freely. To this wish there was some expression of dissent from the men, and the Captain said "it was useless leaving the boy this way in pain, and that it was best at once to lay hold of him, and let the cook cut his throat." The wretched victim now rose, and driven to extremity, opposed working himself up to resistance, and declared he would not let them; the first man he met, who laid hands on him, he would assuredly, and haunt him till his death. The poor boy was, however, soon cut down, and the cook was again called upon to put him to death. The man now refused more strenuously than before, and another altercation arose; but seeing that his own life would absolutely be taken instead of O'Brien's if he persisted, he at length yielded. Some one brought him down a large case-knife, with which, pale and trembling, he stood over the shrieking boy, who was still endeavouring to free himself from those who held him. The horror-stricken man over and again endeavoured to summon up hardihood enough for the deed; but, when he caught the boy's eye, his heart always failed him, and then he looked supplicatingly to the men again. The cries and threats were, however, loud for death—he made a desperate effort—here was a short struggle, and O'Brien was no more! As soon as this horrid act was perpetrated, the blood was served to the men; but few of them refused to partake of it. They afterwards laid open the body and separated the limbs; the latter were hung over the stern, while a portion of the former was allotted for immediate use. Shocked as they were at the heart-rending and appalling scene they had just witnessed, the gnawing hunger upon them was so raging, that almost every one, even the boys, partook more or less of the horrid meal. This was the evening of the 16th day. They ate again late at night, and some greedily; but the thirst, which was before at least endurable, now became craving, and as there was no more blood, they slaked it with salt water. They then lay down to rest, but several were raving and talking wildly through the night and in the morning the cook was observed to be quite insane—his eyes inflamed and glaring, and his speech rambling and incoherent; he threw his clothes about restlessly, and was often violent. His raving continued during the succeeding night, and in the morning, as his end seemed to be approaching, the veins of his neck were cut and blood drawn from him. This was the second death. On the night of that day, another man became mad, and a boy on the following morning, they were both so violent that they were obliged to be tied by the crew, and the latter was bled to death in the cook, by cutting his throat. The man died unexpectedly, or he would have suffered the same fate. Next morning the Captain came off deck and feeling too exhausted to keep a look out any longer, desired some one to take his place above. Two men went up very soon after; they thought they could distinguish a sail, and raised a shout of joy, upon which those below immediately came up. A ship was clearly discernible, and apparently bearing her course towards them. Signals were hoisted with as much alacrity as the weakness of the survivors would allow, and, when she approached, and was almost within hail their apprehension of her passing by, like the former vessel was so great that they held up the hands and feet of O'Brien to excite commiseration. The vessel proved to be the *Agenora*, and American. She put off a boat to their assistance without hesitation although the weather was so rough at the time, and there seemed to be such an apprehension of its swamping, that the crew came out in their shirts. The survivors of the *Francis Paight* were all at length safely got on board, and were treated with the utmost kindness.

*Singapore Chronicle.*

## CAPTAIN HORSBURGH.

*(From the China Repository for December.)*

The following remarks, signed Nauticus, we read once with much pleasure, knowing that they came from one than whom no other person is more competent better qualified to speak on the points under consideration. He says:—

"The press in Canton with disinterested zeal has most ably advocated the endeavor to keep alive the memory of Captain James Horsburgh, by some work of public utility—emblem of his labors in the cause of science and navigation. *Finis coronat opus.* If your would give the subject a place in your pages, it would be of essential service in not only strengthening and confirming the efforts of your contemporaries generally, but particularly in America, where the name of Horsburgh is justly appreciated; of this a strong evidence is shown in the early and generous manner in which the cause has been adopted by her citizens now resident in Canton. It has been assigned as a reason why no edition of the Directory has been published in America that the press there held such a work sacred to the objects and emoluments of the author. Truly therefore may America be called his friend.

"It is much to be regretted that no materials have been given in any of the periodicals yet arrived here, to assist you in giving interest to what can now be known of him chiefly in his wonderful work. I knew him only through many conversations at the India House and occasional chance-meetings; but I never left him without a strong and increased impression of respect drawn from his kind manner and especially from that single mindedness, which seemed to form a marked feature in his character. I have it from a friend, an old resident here and one of his great admirers, that he came to this country quarter-master in one of the Company's ships, the Circencester, captain Thomas Robinson, and that in the same ship he went home as a passenger at the same commander's table. So that he came in at the lowermost, and went out at the cabin window. The ascent of the ladder, not unfrequently makes the climber grow giddy at the top. Not so with Horsburgh. The manner in which he bore his rise added one more to the store of his merits, his rise of distancing from their number. The motto he has chosen for his great work, may show how his mind was imbued. I deal no farther with this than to point out to you an excellence which, beyond any other, I am sure, will give him a claim on your respect. His habits seemed to be all of the most simple and industrious kind; and I think I have heard him say, not many years before his death, that he walked every day to his home in the country, some four miles from the India House. This spirit of preseverance, even in small things, may be cited as cause and effect of that unwearied diligence, that laborious research, and above all, that ardent, even jealous love of truth, which enabled him to benefit the world by one of the most valuable and useful productions ever issued from the press. There is almost a spirit of adventure manifested in the recital of his own remarks, which might have justified the adoption of another seaman's motto, Palconer, omitting allusion to the catastrophe. He seems to have sailed with a prophetic eye to his future fame, and to have braved the dangers which beset his track, in order to make the risks incurred by himself sources of safety to others. This may be shown in the frequent groundings and strikings recorded of his ship, the 'Anne.' *'Nullum quod tetigit non ornavit,'* has been said in praise of some man of eminence; of Horsburgh it might be paraphrased, *nullum quod non-stravit non tetigit—so many were his collisions with hidden dangers.*

"A word on the subject of a light-house, as being considered by many the best calculated memento to honor the name. It would be difficult to fix on any work more cosmopolitan in its nature—a great desideratum in recording services given to the world at large; nor perhaps could any plan be found more akin to the nature of those services. Where ever erected it would be hailed with thanks by all steered by its friendly ray; and in proportion to the stress of the need, would be the gratitude to the name, which in death, as in life, has ever been the seaman's guide. The follower of Zoroaster might suppose the soul of his friend to tenant the light hung out for his direction, and to all time would take a religious interest in rendering the fire perpetual. Bombay was his home in the east, and we may hope the future collections in that quater will show in what estimation he was held by the princely subscribers to all objects of public utility there residing.

"The site of the light-house or houses (for I hope there will be many) must be left to future decision. The paramount object now is to call the world's attention to the question and to swell the list of contributors. To this, Mr. Editor, you will give essential aid if you will favor the cause. Should the Straits of Malacca be selected, or any place within their government, the East India Company, whose valued servant Horsburgh was, will, with their accustomed bounty, give every facility and take on themselves, no doubt, the charge of maintenance. In short, at home and abroad, we hope there may be but one universal alliance, and that all will concur in honoring him who has so much benefitted them.

I am &c.

NAUTICUS."

*Canton December 6th* 1838.

We have only space to add, that public meetings have been held; a committee of correspondence appointed; and something more than $4000 already collected, in Canton. The Committee consists of the following gentlemen, namely, W. Jardine, L. Dent, Captain J. Hine, W. S. Wetmore, J. H. Astell, M. J. S. Van Basel, Thomas Fox, Framjee Pestonjee, and Wm. Hoskett, honorary secretary; they have sent forth a circular, which has appeared in the Canton Register and the Canton Press, both of which papers give the subject their entire approbation. Pedra Branca, at the entrance of Singapore Strait, has been named as the site for one of a series of light-houses, which it is hoped may ereiong rise in the Eastern seas.

## CORRESPONDENCE.

### TO THE EDITOR OF THE CANTON PRESS

Mr. Editor,—After the scramble created by the operations of the Hon. Company's finance has abated and given us breathing time my attention has been called to the recent alterations of the British Government here, in H. M. Commission and on reviewing the whole operations of the Home Government, I have come to the conclusion that the Minister at the head of the Foreign Office, my Lord Palmerston must not only be one of the most self conceited men now in existence, but that he must have a supreme contempt for public opinion, and which last is hardly accordant to the spirit of the age. I give my reason under, and when they are perused, I hope to have the majority of your readers acquiesce in the justice of my two leading demands.

A Council at Brighton in January 1839 got up, under my Lord Palmerston's advice, the skeleton machinery of laying a duty on the trade in Canton river, and creating a *Master Intendant* in a foreign Port the proposed Master Intendant being our present Senior Superintendent; from this wild, illegal and oppressive scheme, Lord Palmerston was beaten, and by order in Council (Feb. 7th at St. James) it was annulled one month after being created.

Next our cause Lord Napier and however opinions may differ as to his acts, all must admit his mission was a failure, and none can deny that mission emanated from Lord Palmerston—such want of success—such want of knowledge of the people to be dealt with, attended by so much private suffering would have made any except a very presumptuous man pause as to his own knowledge of the subject—does he defer in consequence of repeated failures to the opinions of others better informed, and deeply interested? Let us see!—Very soon after Lord Napier's death a petition to His Majesty was signed and sent home by certainly a large majority of all British Subjects here, and no petition or document was sent home or prepared on this subject by the minority.

This petition, amongst other prayers, strongly requested that any future Representative of His Majesty should be desired to communicate either with Peking, or *not with or through* the Hong-merchants here who are our oppressors.

This petition further earnestly prayed His Majesty not to send here as his Representative any person who had been unfortunate enough to be insulted in his own person by the Chinese. As if in contempt of public opinion, this successful Chinese Negotiator, Lord Palmerston, appoints as H. M's Representative a person who has been more publicly and grossly insulted than any one in our day by the Chinese, knocked down, beat, trampled on, and his uniform torn off his back.

And this Representative, so used, with a singularly happy association of ideas, is made the channel to public as well as private degradation; by my Lord's order to place his Majesty's correspondence with China at Howqua's feet.

His Majesty's representative does obey his master's orders, and is rejected with contempt.

I first request to know of your readers if I have made good my charge against Lord Palmerston of self-conceit and disregard of public opinion.

I next ask the foreigners here *if our monied interests and relations with Chinese are in a state to admit of such fooleries?*

Canton, 6 Jan. 1837. A READER.

## CANTON PRESS,

7th January 1837.

Aming, partner of the twelfth Hong, established at the beginning of last year, was lately taken up on suspicion of having smuggled Sycee silver out of the country. After about a fortnight's detention in the city, where he was examined, and as it is said very ill treated being made to kneel on chains, and bambood, he has been found guilty of the charge brought against him, and is now, preparatory to the sentence of the law being passed upon him, doomed to wear the cangue, a wooden collar of great weight, for two days exposed successively at the doors of the different Hongs, a punishment which the unfortunate man is to suffer during upwards of twenty days, after which period he will probably be banished to Tartary.

The punishment this unhappy man suffers, seems to be disproportionate to the crime, and is all but capital punishment, as he may probably not long outlive the sufferings he has already undergone, and are still before him. A few days ago he was at Howqua's gate, and two men supported the cangue which, we are told, is very heavy.

We learn that at the interview Capt. Elliot, H. M. Superintendent, had with the Chinese Officers, who went to Macao for that purpose, he was informed that his answers to their questions would be sent to Peking, for his Imperial Majesty's consideration, and until his pleasure be known, Capt. Elliot is not to go to Canton.

We read some time ago in the *Singapore Free Press* of 27th October, that the ship *Friends* had seen between Pedra Branca and the Bintang shore, numerous bales of Cotton floating on the sea, and that several of which the marks were given were picked up by the Captain. The *Singapore Free Press* is correct in the conjecture that these bales were thrown over board by some ship that had grounded, since we have been informed that these bales were part of the Cargo of the *Lord William Bentinck*, which vessel having got a ground near Pedra Branca, was obliged to relinquish part of her cargo to get off again.

We have in former numbers several times alluded to the manner in which teas are shipped from here, and how much trust must, under the present regulations necessarily be reposed in the Hong merchants and their servants, a trust which, while these merchants were rich, was seldom or never violated, they being not so prone to temptation, and being allowed a regular and fair profit upon the teas shipped through them, they would not try to obtain more by unfair and fradulent practices; nor was the business transacted under the Company's monopoly either as pressing or as extensive as it now is, and the teas being shipped at regular and fixed periods, the very regularity prevented extensive frauds. But *tempora mutantur et nostrum in illis*; We have heard of late of several instances where teas on arrival in England turned out to be of very different quality to what they were described in the Invoice and in the Certificate of the Company's teataster, and that their value which ought to have been 2 *s.* 6 *a* 8-*d.* was hardly equal to 1 *s.* 3 *a* 3. *d* per lb, thus causing to the importer a loss of 50 per cent, with but a remote chance of being able to recover the difference from the Hong-merchant through whom the Teas were shipped under a fictitious denomination and at a price exceeding their market value probably by near 100 per cent. It is not to be supposed that the Teataster, whose duty it is to appraise the teas in order to secure the Company from loss on advances made on them, could so far mistake the quality of the tea as to grant a document on which the shipper here would be enabled to receive much more than their value in the London *market*, nor is it so difficult even for one little practised in the different qualities of teas not to know the lowest quality of Congo from the best. It follows therefore that both purchaser and teataster have been deceived by a false muster, and that tea very different from that contracted for, has been shipped by the Hong-merchant or for him by his servants; similar tricks have been detected of late, and if no more satisfactory mode of shipment is devised, it will become necessary to open the chests as they reach shipboard, until when, though the purchaser's property, they are entirely under the controul of the Hongs, where they may be changed without the fact being found out until their arrival in England. The very large quantity of teas which, in order to obtain the Company's advances (open only to the 31st Dec. last for such for which Bills of lading had been signed by that time) has we fear given but too much facility to this kind of cheating, and though this has been found out in some instances, it is not impossible that more cases of this will come to light after arrival of the goods in England. We have of course not the means of knowing whether this fraud has been committed with the connivance of Hong merchants or whether only their servants are guilty of cheating, and the former only of gross negligence, in not taking better care of property entrusted to them; thus much however is certain that shippers of teas ought to be very careful which of the Hongs they entrust with the shipment of Teas or with any other goods.

We have several times spoken of the necessity there is that foreigners should have their own Godowns, or if that be denied them, that Custom houses be built by the Chinese in which all goods both for importation and exportation could be deposited under lock and key, the latter to be in the keeping of the foreigner to whom the goods may belong. The greatly increasing trade, and the state of many of the Hongs, call loudly for this measure, as also the danger we are now in from fire; this latter would be much lessened by being on the other side of the water so as not to be near to any combustibles in a northerly direction, from which the wind blows strong almost continually during 6 months of the year, and which has since the great fire in 1822 often again threatened the destruction of the foreign Factories, the whole of the suburbs and the city itself being to the northward of our houses. We scarcely need recommend to the Chamber of Commerce to take into consideration by what means Godowns exclusively for the use of the foreign trade may be best obtained, every one connected with trade here, being well aware of how desirous their possession would be.

We hear that a fire has destroyed one of the Emperor's palaces in Yuen-ming-yuen.

We direct the attention of our readers to a letter from "a Reader" which will be found in another column. Many are the grievances of which we have to complain in our commercial intercourse with the Chinese, and we entertain but scanty hopes that they will be redressed by H. M. Superintendents of Trade at Macao; their appointment seems to be of so incongruous a nature that if they ultimately do any good it is more than we expect.

### OFFICIAL NOTICE.

PURSUANT to Instructions from The Right Honorable the Secretary of State for Foreign Affairs dated in London on the twenty eighth day of May in the Year of our Lord one thousand eight hundred and thirty six, Public Notice, is hereby given that from the date of this Notification, the Powers of the Superintendents of the Trade of British Subjects in China, over British Subjects and ships are extended so as to include Macao and Hong Kong.

And the Authority of the Superintendents over British subjects and Ships is to be considered to extend to Macao and to be of equal force and validity, being exercised within the same extended limits, as it had hitherto been, within the limits of the Port of Canton.

All this without prejudice to the just rights, authorities and Sovereignty of the Government of Her Most Faithful Majesty The Queen of Portugal at Macao, and the authorities thereto subject.

Given under our hands and seal of office at Macao in China this thirty first day of December in the Year of our Lord one thousand eight hundred and thirty six.

CHARLES ELLIOT, } *Superintendents of the Trade of*
A. R. JOHNSTON. } *British Subjects in China.*

NOTICE is hereby given that the undersigned will receive sealed Tenders of Cash for Bills of £1000 (payable at thirty days sight) to sets of £200 each on the Right Honorable The Lords Commissioners of His Majesty's Treasury on or before 12 o'clock the 14th Instant.

Macao 2nd January 1837.

ELWARD ELMSLIE.
*Secretary & Treasurer to the Superintendents.*

P. S. Please to Superscribe the word "Tender" on the envelope of the letter.

### NOTICE.

THE Undersigned have established a house here in connexion with Robert Wise, & Co. Liverpool, Robert Wise, Partnership & Co London, and the firms of Robert Wise Hollidae & Co. at Manila, Singapore, Batavia and the Cape of Good Hope.

ROBERT WISE, HOLLIDAY & Co.

Canton 1st January 1837.

### NOTICE.

THE interest of SAMUEL RUSSELL and AUGUSTINE HEARD in our house ceased on the 31st December 1836.

RUSSELL & Co.

Canton, January 2nd.

### OFFICIAL NOTICE.

To His Britannic Majesty's subjects in China.

DESPATCHES have been received from the Right Honorable The Secretary of State for Foreign Affairs, signifying the abolition of the Office and Salary of the Chief Superintendent of the Trade of British subjects in China.

His Majesty's Government has been pleased to appoint Captain Charles Elliot R. N. to perform the duties of Chief of the Commission, from this date.

Macao December 14th 1836.

By Order of the Superintendents of the Trade of British subjects in China.

EDWARD ELMSLIE.
*Secretary & Treasurer*

### OFFICIAL NOTICE.

CONSIDERABLE inconvenience and public expense having been incurred, by reason of the improper conduct of certain masters of British merchant vessels in wilfully leaving behind in this place, men belonging to the said vessels, Notice is hereby given, that this practice is contrary to Law, and that the Offence may be prosecuted by indictment or information at the Suit of His Majesty's Attorney General in the Court of King's Bench at Westminster, or if it had been committed at Westminster in the country of Middlesex, and it is now declared, that the Superintendents will take measures to institute prosecutions against any master or masters of British merchant vessels offending herein in future.

By Order of the Superintendents.

EDWARD ELMSLIE.
*Acting Secretary and Treasurer.*

April, 14th 1835.

**N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.**

Note. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camlets, Saltpetre, Ginseng* and other Goods, on which the Duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pictures &c, Confectionary Stationery, Cutlery, Crockery ware*, &c., for foreigners consumption, are sold at Auction, duty paid.

*Note. Alum*, and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk* piece goods &c., are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1200 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd ,, ,, 1200 do. & under 1600 ,, 0.7221091 ,, ,,
3rd ,, ,, under 1200 do. 0.5067341 ,, ,,

N B The cubit in 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or other head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3760 to $ 3780; 3rd class from $ 3200 and under. The Consulage or Present Fee is paid by all vessels 1600 Tuels or $ 2225. Linguists fee $ 17.14 and Comprador's fees $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riveleen ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

Very little is doing in all denominations of Imports; money being very scarce.

Cotton Manufactures.—continue dull, and the demand for Long-cloths and other descriptions of white goods is very limited.

Cotton yarn.—has declined 2 a 3 dollars, and even at the reduction it is difficult to effect Sales.

Woollens.—Span. Stripes and Cambleets almost unsaleable except at a great sacrifice; Longells are rather advancing.

Straits Produce.—We have had a few supplies of pepper and though we have not heard of any actual sales, prices continue steady at our quotations. Betelnut is rather declining. Of Tin the prices continue *nominally* the same.

Cotton.—There has been very little doing during the last week, and it would be difficult to effect sales at our quotations. *Madras*, is most depressed at present.

The clearances in December were,

| Patna. | Benares. | Malwa. | Total. |
|---|---|---|---|
| 3714 | 15344 | 2252 | 21310 |

leaving a stock of 40,787 27,993 18,179 86,959 ms.

Opium.—There is no change in the Opium trade, our quotations are therefore quite nominal, there being no transactions, and no present indication of any relaxation in the measures of the Government. For deliveries see above.

### EXPORTS.

We have no alteration to notice in the state of our market for Silk Manufactures, and Raw Silk continues at the same prices.

Tea.—We have heard of a few Chops Congous of Souchong kind having been sold at the quotations. The fine kinds of green teas are readily bought at our advanced prices.

## LITERARY,

*Extract from the Sae Kwo Cae.*

*"Annals of the three Kingdoms."*

Kwan Luh passing through a field, one day, saw a young man guiding the plough. He stopped a side upon the path and after attentively examining his features he said. "Young man, what may be your eminent surname and how many years have you numbered? The young man replied "My surname is Chaou, my name, Yen, and I am nineteen years old; dare I presume to enquire who is addressing me?" Kwan answered "I am Kwan Luh; I see the death vein prominent between your eyebrows; ere the sun sets thrice you die. You are young and well favored, but your days are number ed."

Chaou immediately returned home and told his father what he had heard. The father upon hearing this, ran after Kwan and overtaking him fell down before him and bowed his head to the ground and besought him to return and save his son from death. Kwan replied "If heaven wills that he die how can I save him?"

The father cried out "he is my only son, I pray you preserve him to me." At this time Chaou came up and joined his father in entreating Kwan to save him from death.

Kwan, being moved at the devoted affection of the father for the son, said to Chaou "Tomorrow prepare a bowl of pure wine and a snow-white venison pie, and with your father repair to south hill where you will see two men sitting on a stone, under a large tree, playing at chess;—these men alone can save you."

"One of them will be sitting with his face to the South and will be clothed in white; this man has a very forbidding countenance. The other facing the north and clothed in red, has a mild and benign appearance. Wait till they have finished their game and then offer them the wine and venison cake. After they have eaten and drank their fill, salute them and beg for a further extension of life But be particular not to mention that I sent you to them."

The father and son then thanked Kwan and begged him to remain some days with them. On the morrow they prepared the wine and venison pie and repaired to the South Hill, where they saw the two men sitting on a stone underneath the shade of a large tree playing at Chess. Chaou presented the wine and pie to them which they, now familiarly chatting and now resuming their game, soon finished, when Chaou fell down before them and prayed to be allowed a longer stay on earth. They were greatly surprised at this; and he in the red garment said to the other "I know that it is Kwan Luh who has sent this man hither, but nevertheless now we have eaten of his venison and drunk of his wine, we must grant his request." The other, upon this, took the book of destinies from under his vest, and after attentively perusing some of the pages, turned to Chaou and said "you are destined to die in your nineteenth year, but I will place the character nine before the nineteen thus extending your life to ninety nine years."

Return to Kwan and tell him never again to teach any one to oppose the will of heaven or to endeavor to change its laws."

The man in red then wrote the Character *nine* before the *nineteen* against Chaou's name in the Book of destiny and they both vanished.

On looking up Chaou saw them riding up to heaven on a white stork. F

*From the Sandwich Island Gazette.*

*Produce of the Sandwich Islands.*

For the information of our readers abroad, we subjoin a memorandum of several articles of merchandize which may be among the productions and exports of these Islands; though we cannot yet furnish statistics of quantities, neither prices current for the market, yet it may be interesting to some to know the names merely of the productions of this group.

*Hides and Cow Skins.*

*Salt.*—In large quantities for export.

*Arrow Root.*—Superior quality

*Tapas.*—Native cloth, used for sheathing vessels and covering the roofs of houses.

*Mats.*—Native mats, very scarce

*Boards.*—A few boards are sawed at Rawaii, but not many.

*Tobacco.*—Tobacco grows without cultivation and considerable quantities have been exported from the Islands: large lots might soon be obtained with a little assistance from agriculturists.

*Fire Wood.*—Large quantities of fire wood are disposed of, in this market, and the shipping, and to families, &c.

*Beans.*—Beans suitable for vessels' stores are frequently to be had, in limited quantities.

*Rafters*, for house frames.

*Knees.*—Hard wood knees, for boats and vessels.

*Castor Beans*, for making Castor Oil, may be had in considerable quantities, Superior Castor Oil is now made at Oahu.

*Cotton.*—Cotton by the cargo, ought to be obtained at Oahu; some exertions are progressing, which will soon open the door to this staple.

*Sugar.*—Some lots have been sent from the Islands, and sugar plantations are starting up with good earnest.

*Molasses.*—Where sugar is made Molasses must be abundant of the quality of S. I. Molasses, —it is splendid.

*Coffee.*—The Coffee plant the Vine abodeed here is called first rate, the outs-tands be now fully proved. In a short time it will, without doubt, be forthcoming in large lots.

*Indigo.*—It is a proved fact, that Indigo, of a prime quality, may be easily raised at the Sandwich Islands.

*Sweetmeats.*—Good Sweetmeats are made here, of several sorts.

*Corn.*—Indian Corn is raised.

*Point Oil.*—It is manufactured from the Kukui or Candle nut, in large quantities. —it is used, and exported.

*Koa Wood* resembles mahogany and is very excellent for furniture.

*Beef and Pork.*—These articles are packed here.

*Sole Leather, Calf Skins, Goat Skins, &c. &c.*—Skins and Hides are tanned and dressed, at the Sandwich Islands, in various modes, and the quality of the Leather has been proved to be good.

*Moss.*—A species of Moss, called Pulu, is found here, and is used for stuffing for beds, &c. &c.

*Sandal Wood.*—Quantity very limited.

*Red Ochre.*—A red earth, which answers for paint, with very little preparation, and is exceedingly abundant.

*Chalk.*—A plenty of Chalk is found at Oahu.

---

*Butler's Coffee House.*—The well known Mr. John Butler has opened an "ordinary," in Warren square, in this town;—this *gentleman's* style of cooking so aptly suited to the taste of the most dainty epicure,—will insure him a large share of public patronage: His house is crowded every night with the *fashion and ton* of Honolulu, and we believe he owes no small proportion of the friendship thus, him by the lovers of good living, to the superior quality of his *spruce beer*.

**☞** *Notice to Foreign Editors.*

We take the liberty of forwarding a number of our files to Editors in Europe, the United States, China, Chili, Peru, New South Wales, and in numerous other directions; in so doing we are actuated by the desire to increase the usefulness of our journal, and we hope to be able to contribute our share to the stock of circulating information abroad while we shall merit reciprocity from our brother editors: All who may receive our early numbers may depend upon a regular continuance of their files for the first volume of the Gazette; and we request most ardently a privilege upon their exchange lists.

Desirous, likewise, (who is not in these days,)—to get into notice, we hope our brethren abroad will occasionally remark upon the existence of our humble journal, on this little speck in the Ocean.

Honolulu, Oahu, Sand. Islands } Most Respectfully, The Editor.

Sept 24th. 1836

*Population of the Sandwich Islands.*—The prosperity of states may be estimated by the number and increase of their inhabitants; for if the population is as large as the capacities of the soil can sustain, we infer that a wise government and sound laws have existed for a long period. Can we apply this principle and declare the Sandwich Islands in a prosperous condition? We fear, not. The population of the group was estimated, by Cook, at about 400,000, and Mr. Ellis states that no voyager is more remarkable than he is, for accuracy. In 1832 the population is set down at 130 814, and in 1836, at 108 393, showing a decrease in the last four years of 21,421.

What is the cause of this remarkable decrease? Is it that savage man falls before the advance of civilization, as seems to be the case both in North and South America; or is it attributable to devastating epidemics, to infanticide, or degrading vice; or is it owing to an unwise policy?

*New Roof.*—We have been kindly furnished with the following observations, from the Journal of Capt. Brewer, ship Rasselas; they were made on a voyage from China towards Kamschatka, in 1835.

"At day light, saw from the top sail yard, a cluster of Rocks, just above water, bearing about North, at half past 8. A. M. passed to the westward of them, at the distance of about one mile. They formed nearly a circle; and perhaps, a cable and a half's length in diameter—on the south side, it appears to be bold, but on the north there was much broken water. The highest rock was about 10 or 12 feet high, but many just in the wash of the water. I have passed within 15 miles of them, three times before, on different voyages, but never saw them; nor do I find them on any of my charts, or in Bowditch's Navigator. As there is a great deal of fog in this neighbourhood, in general, I conceive them to be very dangerous, as they can be seen but a very short distance, in rather weather, from the deck. When abreast of them, I could see South Island bearing about South by E. and Chiango Sima, bearing N. by W. both at the same time, from the topsail yard. Their lat. (the Rocks,) I made, 31° 54 North and long. 140, 20, East.

*Note.*—The last voyage, (to the Becket,) I saw large quantities of rock weed, when these rocks were to the Eastward of us. I should not be surprised were there more of them in the neighbourhood."

*Dogs.*—What a perfect nuisance are those abominable beastly imitations of the canine species, yelping dog, which infest our village; such a rawboned, skinny, wretched looking assortment of ghosts ought to be banished from our society, in these regenerated times. It takes three of them to raise a growl, and six to bark, and then each yelping cur of them is obliged to lean against a fence; will any one have mercy on our nerves, and buy their skins at a shilling a piece?

---

**Recovery of Pallee.**

We give the following extract of a letter dated the 6th instant, regarding the ravages of the disease which has broken out at Pallee, which has been kindly sent to us.

"It is unnecessary to write too much, the long and short of the story is that of the population of Pallee one fourth have died, two fourths have left the town, and of the other remaining portion numbers are daily dying and leaving the place The disease is most dreadful and is beyond all description like the visitation of old, such is that, which has fallen on us here; no one here thinks of property, if they can escape with their lives people are contented, no one can be found to lift up and carry away the dead, and *those who go away also* die be it known to you that Pallee is deserted. Write no more about affairs here; the father no longer looks on the son nor the son on the father. When one dies in a house all others die also.

The description of the disease is as follows: a lump rises in the groin and goes to the lower part of the belly; lumps and swelling also arise on the neck and go to the throat. The person attacked generally dies on the following or third day of being attacked."

And we take the following notice of the same subject from the *Courier* of yesterday;

"The report we published in our last of the appearance of the Plague at the great commercial town of Pallee, it will be observed, is confirmed by an official despatch to the Governor General's Agent in Rajpootana. At least, the disease which has broken out corresponds in its principal features with what is commonly known as the plague, and is equally fatal.

It is satisfactory, however, to learn that it does not appear to spread although the inhabitants of Pallee have left the place, and are scattered over the adjoining country. There is reason to hope, therefore, that should it be the dreadful scourge supposed, it will in this instance, as in many others, vanish under the influence of a tropical climate.

Pallee, it is true, is beyond the northern tropic, and the cold weather is approaching; but on the other hand, the plague does not appear to extend under any circumstances in India. Cases of its appearance in a modified form in various parts of the country, and, we understand, even in Kattywar, within the last 20 years, are on record, and yet it has never spread. Besides, the trade with the ports in the Red Sea and Persian Gulph, in which the disease has raged with the greatest violence, has continued from time immemorial without any precautions having been taken until those adopted by our Government. So the cause of contagion in this country, therefore, what it may, the fact is tolerably well established, and we believe is generally admitted. We would by no means, however, argue against the adoption of precautionary measures. Situated as Pallee is, on the principal route between Western India and the Punjaub, and Afghanistan, and forming, as it does, the chief mart of the commerce between those countries, few spots exist from which infection would be more rapidly communicated, and the strongest measures would be warranted to guard against the possibility of its being carried to other places."

---

PALLEE *from Correspondent.*)—The following I heard to day from a person just arrived from Joudhpore that the Hakim of Pallee, of whom honorable mention was made, has fled from his Government to Joudhpore and taken sanctuary with the Nath John Mandore.

The movers of Hadjee Patteo Alley, cotton printer and resident of Bombay just returned from a visit to Calley, the seat of the plague in question put to him on the subject of the sick prevailing there are the following, the questions I need not insert, you will guess their scope from the nature of the replies. Puttee Alley Hadjee togvitur. "I went from Bomar to Pallee eight days ago. I returned this afternoon (8th September) I remained in Pallee only one evening and one night, and left it on the following morning. The sickness had commenced forty five days before. It begins like a fever with cold shivering, which is followed by great heat of body, and delirium; on the 2nd swellings appear in the groins and neck under the ears. The disease goes on increasing in severity till the third day when death takes place. If the sick person hold out beyond the third day, he generally recovers. One man in ten or twenty recovers.

Some die from the violence of the fever, before any swellings appear.

At first the sickness appeared only among the cotton printers, who are Mussulmans and of whom there are about 500 families in Pallee. Ten or twelve of them died daily. It then attacked the Bunnahs Brahmins &c. and the deaths now amount to one hundred or more per diem. Mochees (shoe makers) Cachees (basket makers) and Telees (oilmen) have not yet suffered from the disease."

Here follows a pleasant fable regarding the origin of the disease viz.

"A Faqueer who lived a mile from Pallee had some cows which fed in the neighbouring jungle. Certain homes also, the property of the Sirkar, grazed in the same place. A quarrel arose between the servants of the Sirkar, and the Faqueer's people, and the latter were forbid to feed cattle in the aforesaid jungle. The Faqueer, thereafter, was carried before the Hakim of Pallee, who gave him much abuse; whereupon the Faqueer wounded himself in the groin with a knife, sprinkled the blood with his hands and cursed him. Some of Hakim with his blood and cursed him. Some of the townspeople advised the Hakim to bestow 200 Rupees on the Faqueer wherewith to feed other Faqueers, and thus avert the consequence, of the curse which had been pronounced. The Hakim not only refused to adopt this advice, but abused the Faqueers still more. Upon this the Faqueer stabbed himself in the throat, and desired that he might be buried alive, which request was immediately complied with. While being buried the Faqueers cursed the town of Pallee, and declared that it should be depopulated. From that day the sickness began to prevail."

A great many people with their families have fled to Joudhpore and other towns and villages of Marwar. I was told that from one to two hundred carts leave the place daily.

The sickness is on the increase. Twelve hundred persons or thereabout have died of it.

Pallee contained about 12,000 inhabitants of whom 1300 have died, and 9000 have fled. There are now not more than 2000 in the place.

On account of the sickness, business is at a stand still.

The disease has appeared in Soojit a town 10 kos east of Pallee. In no other place has it appeared, as far as I know.

Five persons who had fled from Pallee, died in Soojit and four Bannias inhabitants of the latter town."

"The inhabitants of Pallee have adopted no means for preventing the disease from spreading, nor can they use any remedies for its cure. All they do is to propitiate their Gods by Poojahs."

The Takoor of *Auet* does not permit persons who had fled from Pallee to enter his town, but has pitched tents for their accommodation outside. The Maharaja (Maun Singh) has issued orders that all such persons be permitted to enter and dwell wherever they please.

From the fear of infection only a very few of the deceased's nearest relatives convey the body to the grave or funeral pile. Formerly sufficient wood for burning one body was procurable for 2 or 3 Rupees. Now the same quantity cannot be had for less than from 13 to 20 Rupees. It is brought from Soojitand other places to Pallee. The covering of the Corpse not is used as a substitute for wood. About eighty persons had died, on the day I arrived in Pallee."—*Agra Ukhbar September 26th.—Bombay Courier 7th October.*

---

*Commerce of the United States.*—We have received from a friend at Washington, (says the Boston Courier) the Report of the Secretary of the Treasury, embracing the annual statement of the Commerce and Navigation of the United States for the year ending Sept. 30, 1836. The aggregate value of imports,

| | |
|---|---|
| during that year was, | Sp. Drs. 140,000,000 |
| Of which was free of duty, | 77,000,000 |
| Paying specific duties, | 26,127,000 |
| Ad valorem duties, | 44,013,000 |

Some of the articles of principal value imported were the following, viz:—specie, gold, Drs. 1,000,739; silver, 10,900,000; teas, 6,500,000; coffee, 10,713,000; silk piece goods from India, China, &c. 1,022,971; silks and all manufactures of silk not from India, 14,036,000; worsted stuff goods, 6 540,070; linens, bleached and unbleached, 5,220, 568; flannels, bockings and baizes, 899,702; carpeting, 321,812; cloths and cassimeres, 7,005,150 other manufactures of wool, 2,075,000; manufactures of cotton, dyed and printed, 10,610,700; white, 2,722,491; hosiery, 902,500; wool not exceeding 8 cts. per lb. 388,630; do exceeding 8 cts. per lb. 1,146 771 lbs. Drs. 699,087; spirits, from grain, 989 238 gallons, 414,395; from other materials, 2,405,901 gallons, 1,211,129; molasses, 18,971, 602, gallons, 3,076,179; sugar, brown, 711,000, 880 lbs 8,751 ;076; white, 14,929,750 lbs. 1,088, 700.

The value of foreign goods re-exported during the year, was Drs. 20,804,895. Of this amount, Drs. 12,760,830, were of goods imported free of duty, and Drs. 6,338,700 were entitled to drawback. Of this amount of exports Drs. 635,679, were in gold specie, and Drs 3,126,495 in silver; tons, 926,510, coffee, 1,333,777, manufactures of wool, 224,89[illegible]. Of cotton, dyed, 2,976,036; white, 1,193,321; and sugar, brown, 244 176; 306,196, lbs.

The value of domestic produce exported was Drs. 101,180,002. Of this, the produce of the sea amounted to 2 174,404, viz: dried fish, 783,000; pickled fish 224,630; whale and fish oil, 773,000; spermaceti do, 52,631, &c. The produce of the forest, Drs. 5,397,006.

Of the products of agriculture,—the produce of animals amounted to Drs. 7,901,826, viz: beef, 648,161; pork, 1,716,739, &c. Vegetable food, Drs. 4,383,997, viz: flour, 3,304,777; rice, 9, 210,577, &c.; tobacco, 8,220,877; cotton, 68 601, 307; manufactures, soap, shoes, furniture, hats, &c. 2,943,809; cotton goods, 2,956,691, viz: cotton piece goods, printed, 397,417; and white, 2,356,000. Gold and silver coin, 700,000.

## GENERAL CHAMBER OF COMMERCE.

On Monday last the 9th inst. a General Meeting of the Chamber of Commerce was held in the Hotel of Messrs. Beaufoid & Marks, to take into consideration the proposals for it's constitution as drawn up by the Committee. The following are it's rules as they were approved of at the meeting, being with but a few emendations such as they were originally laid before the meeting. W. S. Wetmore Esq., Deputy Chairman of the Committee, in the Chair.

## Constitution of the Canton General Chamber of Commerce.

1

The object of the Canton General Chamber of Commerce is to promote the general interests of the trade of the Chinese Empire, and classify useful information on all matters connected with its commerce, and to establish a court of arbitration, for the purpose of adjusting all commercial differences and disputes which may be referred to it.

2

All merchants established in China, and others interested in trade, are eligible at its formation, to become members of the Chamber on the payments of the following entrance fee, and annual subscription, while resident in China, payable in advance, which sums shall be devoted towards meeting the current expenses of the Chamber.

Entrance Fee for each Firm $50. Annual subscription $30. Entrance Fee for each Individual $25. Annual subscription $15.

3

All candidates for admission subsequent to the establishment of the Chamber, shall be admitted on having been proposed by two members of the Chamber.

4

All visitors to China interested in trade may become honorary members for three months on being proposed by a member of the Committee, and seconded by another; no honorary members being entitled to vote.

5

The affairs of the Chamber shall be managed by a Committee of thirteen to be elected by ballot from among them, the members at a General meeting, a qui each firm belonging to the Chamber shall have one to vote and each individual one vote, on this and all other questions submitted to a General meeting, but not more than two individuals of a firm shall be entitled to vote for any question, and for the purpose the Committee shall consist of the following proportion of each nation:—

| | | | |
|---|---|---|---|
| English | 6 | Dutch | 1 |
| American | 4 | French | 1 |
| Parsee | 2 | Open to any nation | 1 |

6

Members shall not be admitted to vote by proxy, but all route subscriptions, fees, &c. are in arrear.

7

It shall be imperative on parties elected to serve, under penalty of case of refusal of $100 for each year, when the party shall be again eligible, and in the same manner liable to the fine declining service, unless in all cases a reason be assigned that is satisfactory to the Committee.

8

The annual General meeting for the purpose of electing the Committee shall be held on the first Monday in November, and the members of the former Committee shall go out annually by lot, but be eligible to re-election; and to give new parts to the permanency of each one, it shall be maintained, that it shall not be compulsory on a member to serve two years successively on the Committee if re-elected.

9

No two members of the same firm shall belong to the Committee.

10

The Committee shall meet by ballot their Chairman and Deputy Chairman, who shall ex officio preside at all General meetings of the Chamber, but they shall never both be of the same nation.

11

Five members of the Committee shall form a quorum, who shall meet on the first and third Saturday of every month. At the transaction of general business, but all questions shall be decided by the majority, the Chairman, for the time being, having in addition, two double the vote of the ordinary members. In the unavoidable absence of both Chairman and Deputy, a Chairman for the occasion shall be chosen from the Committee assembled.

12

It shall be imperative on the Members of the Committee to attend, meet in order to constitute a quorum, failing which a fine of $5 to be paid to the Treasurer of the Chamber unless a satisfactory reason be assigned or a substitute provided.

13

The Chairman or Deputy shall have the power of calling a meeting of the committee when he shall see occasion, but it shall be imperative on him to do so on a requisition being made to him from two members of the Committee; but it is required that notice of such meeting and the purport be particularly expressed and that such notice shall be delivered in writing at least three days before the meeting, unless on occasion of emergency, when it may be dispensed with.

14

On all questions a majority on a division in Committee shall have a right to state their reasons of dissent in the records of the day's proceedings, stating they may wish to do so, provided the same be done within forty-eight hours of the closing of the meeting, and a certified copy of such dissent, shall be granted to them if required.

15

H. B. M.'s Superintendents, all Consuls and the H. E. I. Co.'s Finance Agents shall be considered *ex officio* honorary members of the Chamber.

16

In case of any vacancy in the committee, it shall be filled up *pro tem.* by the Committee until the General Meeting on the first Monday of November, when the person so elected shall vacate his seat.

17

With the view of facilitating and expediting the business of the Chamber, the General Committee may when desirable divide itself as follows:—

Committee of Correspondence
" of Arbitration
" of Management

18

The Committee of Correspondence shall take charge of all correspondence with foreign associations, with the Hong merchants, the Chinese Government, and any other parties with whom it may be desirable to communicate. It shall also superintend the preparation of all statements connected with trade &c.

19

The Committee of arbitration shall be elected by ballot every two weeks but their power shall be continued so long as business brought before them shall be unsettled. It shall appoint its own Chairman & confine its functions to cases where its interference and advice are requested; and on no occasion shall it proceed on any case unless both the parties give an obligation that they will abide by the decision of the Committee; and, should the dispute relate to a sum of money, the whole, or such part thereof as the Committee decide, shall be paid into the hands of such parties as they shall name before they may decide to investigate the case. In particular cases they shall be authorised to accept security.

20

The Chairman, or Deputy, *ex officio* shall preside over the Committee of management, which shall take cognizance of all things connected with the funds or expenses of the Chamber; and provide a suitable place for the meeting of the Committee.

21

A Secretary and other officers as requisite shall be appointed by the General Committee at fixed salaries, subject to the approval of the next general meeting.

22

An office shall be open daily from 10 to 4 where the Secretary shall attend, that he keep a journal of all proceedings prepare statements of trade, and be ready to communicate with any members of the Chamber who may desire information or access to the records of the office.

23

Communications of every description shall be referred and answered through the Secretary, of Chairman when requisite.

24

The Chairman or Deputy, or in their absence any three members of the Committee, or six members of the Chamber shall be empowered to convene a General Meeting, the Secretary giving the purport for which such meeting is called three days previous to the day of meeting.

25

Funds to provide a suitable rupee shall be raised, and to defray requisite expenses shall be raised in the following manner:

1st. By entrance Fees and Subscriptions.

2nd. By Fees and Fines on arbitrations, and references, as the Committee may hereafter determine.

3rd. By voluntary gifts and contributions either in money, notes, books, or any thing which may be useful to the Institution.

4th. By fees for certified copies of the records and other documents in the archives of the Chamber.

26

All orders for payment shall be signed by the Secretary and countersigned by a member of the Committee of management, and all accounts shall be audited annually and submitted for the inspection of the members of the Chamber.

27

In special cases the Chamber reserves to itself the power of expulsion of any of it's members by a majority of four to one concurrent by ballot at a general meeting convened for the purpose.

28

These rules may be altered by a majority of two thirds at any general meeting convened for the purpose; fourteen days previous notice being given by the Secretary of the alterations intended to be proposed.

29

In the event of any question arising as to the construction or application of the Foregoing rules, the Committee shall be empowered to decide the same, submitting the matter to the next general meeting of the Chamber for it's final decision.

30

The General Committee shall make such regulations and bylaws, as shall future regularity, expeditiously, and despatch.

# CORRESPONDENCE.

Communicated.

## TO THE EDITOR OF THE CANTON PRESS

Mr. Editor

This subject appears to me calling doubt to what is essentially just, that is that the Hong merchants who fail, leave no acknowledged burden on the Creditors of this fund to the amount of their debts, that is on the Senior Hong-merchants. If any fact was wanting to this discussed question, the following one of itself would settle the point. A few Hong men in difficulties, paid towards liquidating Conqua's debts $4,000,000—can any law, unmen of divine, justify this labouring Hong for being in his distress from that class of senior merchs to the as subjects to administered to them? In other words, do not $4 millions paid to Chun qua's creditors for a portion of the labouring Junior Hong's deficit?

Leaving this fact to speak for itself, I most humbly advise those interested to press the collectors of the Hoppo's revenue to engage now to *take* and *use* they are liable for; as I have had a variety of cases some the Citizens willing to plead when the matter was instant and consequence, and the public voice raised to that they afterwards always intended and did shrink from it.

The magnitude of the evil asks for it; and some public documents from the Hong-merchants *denying responsibility* might be brought in as a strong argument seven years hence against payment, when as all the creditors could show this was a private acquiescence.

My voice is therefore for some public deed of the Consoo or Vice-Roy bearing on the subject and put into English in print so that he who runs may read

12th January, 1837. Your's,

A READER.

# CANTON PRESS.

14th January 1837.

Our Correspondent "a Reader" touches on a subject of great importance to the foreign community, namely the liability of the Co-hong or rather of the Consoofund for the debts of individual Hong-merchants to Foreigners, a subject on which we have more than once called the attention of the public, particularly in our Nos. of 3 on of 10th and 24th December last year, when on, with the assistance of old Correspondent Mr. Inquisitive, most of the documents relating to this question. We carefully set forth with Hoqua's decree that it is but just, that the Junior Hongs who have contributed to the Consoofund in order to pay off debts contracted by former bankrupt Hongs, should have a claim about that fund to enable them to satisfy their creditors, and that it is very desirable, that the Consoo-fund be held answerable; at the same time, from the official Correspondence which we published on the 10th December last, it appears that the Vice-Roy allowed a number of new Hongs to be established in succession, and of the great understanding that the Co-hong was not to be held answerable for their debts in case of failure, but that either one or two individuals of the Co-hong should guaranty them. If the conditions under which the new Hongs were avowedly established are to be acted on, it becomes a question as to who has guaranteed the Hong of Hing tai, to which we presume our Correspondent alludes, and whoever he be, he must be held answerable, and if he, as necessarily must be the case, (Hing-tai's being the first of the newly established Hongs) be one of the Senior merchants, in case of his not being able to pay Hing-tai's debts, those debts having become his own, then the Co-hong and Consoo-fund become liable. We confess that the mutual liability of the Hong-merchants is a question of considerable difficulty, and one that will probably not be decided by the abstract merits of the case alone; we are therefore far from assuming a decided tone as our Cotemporary, the Register, does in his last number and should like to know the authority on which he assumes it, this being the fourth decision on the same subject, each differing, at times nearly, and at others very materially, from the opinion now expressed. Being on this we have gave the extracts from the four numbers of the Register, in the hope that they may assist our readers to come to a conclusion.

"*As the whole of the Foreign trade of China is a trade of sufferance only*—unprotected by treaties or leagues of, the empire and only tolerated by receipts from Peking, or proclamations by the officers of Canton, and constant reclaims from the *diverging* body of official or licensed merchants—it is our opinion that the transaction of 1829 and the letters from the Hong merchants of 2nd March, and 25th April, 1830 (*Vide* C. R. Vol. 3d. pages 65, 66) are proof sufficient that the corporate pecuniary responsibility of the Cochong is the answer of singular contract of bona donis exists no longer."

*Colonial Register, 6th November.*

"*As to the Consoo fund*—it is a three, a nine or a nonentity, an finish—and it's very name difficult to be spelled with the e."

"We use the sounding and thought (*and still to) exercise* (!) so, did thus secure each other by a kind of free and easy subsidy: Howqua, Mowqua, Puankhequa, Gaqua (and Mowqua the eight remaining names are not *three-quarters* old), of course, have not any claim on its funds, and consequently are not a party to the five as *Hong*—

*Ibid. 20th December.*

"Responsibility of Hong Merchants.

We beg permission to be allowed to correct an error into which we fear our former remarks on the number of the means of the Hong who have contributed to the Consoo We have been informed that the three senior of the junior Hong-merchants, Hoag-ta, Ming qua and Sau-qua, were made to contribute to the debts of their senior brethren before they had been made three months, and continued contributing till the final settlement of the debts; and further, that after three year's probation they only paid a few of money to the hoppo for using his influence with the authorities in Peking to get them enrolled on the list of senior, or responsible, merchants." *Ibid. 3d January.*

"With reference to what we have already said on the subject of the liability of the Co-hong, we beg to state,—as we feel this to be a most important matter and therefore particularly so as connected with the present state of the Foreign trade, that the yearly arrival of the British merchants this fare out had hitherto many undoubted sources of authentic information on the Chinese system of trade open to them, that we have followed up our publish enquiries on the subject and have been informed, by the best authority, that the Joint liability of the Cohong is fixed the strongly on the sure foundation of Chinese law and custom to be shaken; and that it is a liability of hongmerchants themselves have not started a doubt about, and shall defend, in practice, dare to decline, if they either valued their personal safety or the preservation of their families and property.

With this assurance impressed on our mind, we think we may congratulate our fellow countrymen that China is not entirely without it's Bankrupt laws." *Ibid. 10th January.*

It is sometime since we have heard of that part of the crew of the Fairy, which, gaining the China shore, were by the Chinese authorities sent to Fuhchowfuh, where they, as appears from some official Correspondence, have ever since resided. The Governor of Fuhkien has lately reported to the Canton Government the arrival of these strangers and that he is desirous of sending them on to Canton, after having taken their depositions, which has hitherto been but imperfectly done, from not having any good interpreter at the Governor of Fuhkien has therefore requested that a Linguist may be sent to him from Canton; this the Viceroy has granted, though it is probable that on arrival the Linguist, instead of interpreting, will have to make his own story, the sailors probably not knowing English; as far as these sailors were able to make themselves understood, the account they have given to the Chinese authorities respecting the fate of the Fairy, agrees with those formerly received, viz., that the Manilla seamanships, after murdering the Captain and the boy, embarked the other part of the crew into a boat, and then set sail with the vessel.

We have heard that the owners of this ill fated vessel have applied to the Captain General at Manilla to give them his assistance in case the vessel should have been taken to any part of the Philippine Islands, whilst the Captain General has obligingly promised to give us for as he him say, but the efforts of the Manilla Government have hitherto, we believe, not met with success. In fact probably the shoalness after reaching Luzon, they have run the vessel on shore or sunken her, after securing her spoils.

It is said that the Imperial will regarding the Opium trade has at last been received by the Viceroy, in answer to the latter's report on the subject. The imperial document declares the views Ke-shen-sze taken in favor of the suppression of Opium as unobjectionable, and that in future every possible means are to be taken to prevent this trade altogether. It is probable that this strict prohibition is merely provisional, to make a fair trial, whether or not, the Imperial Government can effectually exclude Opium. We have since the beginning of last month seen, that the local Government, were really anxious to do so, can prevent the smuggling trade, the deliveries in the first 4 days of January having been two chests only. This stoppage of the trade will, we imagine, however not be of long duration, as probably the Government Officers whose official salaries are too small to live upon, cannot possibly long do without their accustomed bribes. We hear that no difficulties in the delivery of Opium are experienced on the Bocca-tigris, and that people there are not even aware of the prohibitory measures used.

The dependents of the Hong-merchants have been alarmed by a regulation from the local Government that the names of all purser's (i. e. clerks) and even of the coolies employed in the different Hongs should be given in order the better to enable the Government to keep them under surveillance, and to prevent their smuggling.

The outside merchants have also spoken much against their inclination, been favored with exposal a—tion from the local Government, and in their report on that 4 Mandarin of roots rebuke us to search their shops, in the shorter they make with foreigners in such articles as are exclusively by law confined to the Cohong. Such mention generally are taken by the Government officers to obtain bribes, and in consequence of their intended visit, a good deal more of the outside dealers are employing at present the benefit of country air, or as the Chinese say "to ascend the *hop*" which in English is synonimous with, have run away. It is said that the local Government intend to alter the system on which these outside dealers have hitherto been permitted to transact their trade, and that, in order to facilitate the Custom's controul over them, every five neighbours in a street are to be answerable each for each other's conduct, a plan which possibly may shew the trade where could likely again into the Hongs than it has been for some time past.

It appears that one of the means resorted to by the Government to prevent the smuggling of Opium is Shuhs, to to it *stop* the smuggler by "sunset." The instance of arrest and *chastisement* of a foreigner who is said to have been made by a Shuh at Heangshan behind the Government, but this smuggler, it appears, has after resisting the arrest which Shuh, in like into close contact with the authorities than the people of his calling is desirous, since Shuh seized her than, thus giving a startling intimate of Chinese and habits of shop-*ping* City, in which Opium used to be sold has often been seized and sealed up.

We give in another part several extracts from the *Sandwich Island Gazette*, of which the French Corvette La Bonite brought us the 1st of November, & shall in our next paper give a few others, for which we have no room this week. We have received the Editor's Circular to the Newspapers in the different parts of the world, asking for an exchange, and we shall send him our papers whenever opportunities occur, which we are sorry to say, are but scarce. From one of the extracts we give it will be seen that the *tea* and *fashion* of Honolulu are fond of good living, since cooking seems to rank among the fine arts, as *gentlemen*, of we believe the Gazette, cultivate the culinary art to provide the *à la* (for a consideration in money we presume) with dainty dishes and *spruce beer*.

The *Raphaëtes* from Bengal has arrived in the eastern passage and not by way of the Straits, bringing dates to the 19th October. From a price current of 15th October we extract the following:—

Opium; the market has been much agitated since the receipt on the 13th inst. of intelligence from China via Calcutta. Prices have been run up to Rs. 1110 per chest for delivery in February, and to Rs. 1120 @ 1130 for delivery in December. The advices state that the drug was likely to be allowed by the Chinese to be imported on payment of a duty. Cotton.—Appears giving way a little and being of inferior quality is likely to continue. Prices about 165 @ 178 for Broach.—Rs. 150 @ 155 for Cutch & of Dholera and Rs. 135 for Cumpta &c. Sugar Candy: Contracts for expected arrivals have been made at Rs. 74 per maund. Freight to China 20 @ 24 Rs. per Candy."

An endemic had broken out in Pallee, a district in which much Opium is grown, and a considerable portion of the inhabitants had meddle thereto with it, whilst the greater part had fled. We extract from the Bombay Gazette an account giving the cause to which this illness is attributed by the fanatic population. In Bombay a good deal of malignant fever prevailed, particularly affecting the Parsee population.

*Monument to Capt. Hedley.* We see from the *Canton Register*, which paper publishes a list of the donations to this monument of gratitude to the memory of this navigator, that in China the subscriptions amount to the very considerable sum of Sp. Drs. 6191.—We see among them two sums of 500 Drs each. The example set by our neighbours still, we hope, be followed in other parts of the World.

We received the letter from "a Parsee Merchant" at too late an hour to give insertion to it, but shall do so in our next.

## DIED.

At Macao, on Friday night the 6th instant Mrs. Bower, aged 23 years.

## NOTICE.

We the undersigned, having been called upon by Mr. A. V. Cortella for the purpose of surveying the Portuguese Barque "Tranquilidade," reported on board this day for the purpose.

Our examination the vessel is sound and staunch built vessel, and has just undergone a thorough repair, new coppered, sheathed, and doubled in the bends; she is well found in ground tackle, and safely fit for the worthy risk.

Macao 6th Dec. 1836. J. Ricketts, Lieut. Hamilton.
Carpenter,
Robert Wemyss,
J. Hudson,
B. Hamilton.

## OFFICIAL NOTICE.

PURSUANT to Instructions from The Right Honorable the Secretary of State for Foreign Affairs dated in London on the twenty eighth day of May in the Year of our Lord one thousand eight hundred and thirty six, Public Notice, is hereby given that from the date of this Notification, the Powers of the Superintendents of the Trade of British Subjects in China, over British Subjects and Ships are extended so as to include Lintin and Macao.

And the Authority of the Superintendents over British subjects and Ships is to be considered to extend to Macao and to be of equal force and validity, being exercised within those extended limits, as if had hitherto been, within the limits of the Port of Canton.

All this without prejudice to the just rights, authorities and Sovereignty of the Government of Her Most Faithful Majesty The Queen of Portugal at Macao, and the anchorages therein subject.

Given under our hands and seal of office at Macao in China this thirty first day of December in the Year of our Lord one thousand eight hundred and thirty six.

CHARLES ELLIOT, } *Superintendents of the Trade of*
A. R. JOHNSTON. } *British Subjects in China.*

## NOTICE.

THE Undersigned have established a house here in connection with Robert Wise, & Co. Liverpool; Robert Wise, Farbridge & Co. London, and the firm of Robert Wise Hollidat & Co. at Manilla, Singapore, Batavia and the Cape of Good Hope.

ROBERT WISE, HOLLIDAT & Co.

## NOTICE

THE interest of SAMUEL RUSSELL will Act-for-Him Heard in our house ceased on the 31st December 1836.

RUSSELL & Co.

Canton, January 2nd.

## OFFICIAL NOTICE.

To His Britannic Majesty's subjects in China.

DESPATCHES have been received from the Right Honorable The Secretary of State for Foreign Affairs, signifying the abolition of the Office and Salary of the Chief Superintendent of the Trade of British subjects in China.

His Majesty's Government has been pleased to appoint Captain Charles Elliot R. N. to perform the duties of Chief of the Commission, from this date.

Macao December 14th 1836.

By Order of the Superintendents of the Trade of British subjects in China.

EDWARD ELMSLIE.
*Secretary & Treasurer.*

## OFFICIAL NOTICE.

CONSIDERABLE inconvenience and public expence having been incurred, by reason of the improper conduct of certain masters of British merchant vessels in wilfully leaving behind in this place, men belonging to the said vessels; Notice is hereby given, that this practice will continue to Law, and that the Offence may be prosecuted by indictment or informations at the Suit of His Majesty's Attorney General in the Court of King's Bench at Westminster, as if it had been committed at Westminster in the county of Middlesex, and it is here declared, that the Superintendents will take measures to institute proceedings against any master or masters of British merchant vessels who shall offend herein in future.

By Order of the Superintendents.

EDWARD ELMSLIE.
*Acting Secretary and Treasurer.*

April, 14th 1836.

Longuas fee $ 1744 and Comprador's fees $ 50. Also Pilotage $ 66, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

Cotton Manufactures.—Nothing doing in almost all descriptions of Imports; the want of money, the Chinese new year coming on, and of credit among Chinese dealers, causing a complete stagnation.

Pepper.—maintains it's high price, and we have heard of sales at our quotations of the article on arrival; considerable parcels are expected by the next ships from the Straits.

Woollens.—The reports from the Interior continue unfavorable, and sales cannot be effected at our quotations.

Betel Nut.—Quotations continue the same, but late arrivals have affected the demand.

Cotton.—is much depressed, and our quotations are 2 a 3 mace lower than last week.

Opium.—Nothing doing, and our quotations continue nominal. The deliveries to the 8th inst. were 1 chest of Patna and another of Malwa.

### EXPORTS.

Silk Manufactures.—Nothing doing in them; some ready made articles are offering in the market, but at prices not sufficiently low to tempt purchasers.

Tea.—We have no alteration to notice in prices.

Errata.—In our commercial remarks, Imports, in our last number. 17th line, read *Bengal* instead of Patna; *Bombay* instead of Benares; *Madras* instead of Malwa; and in the following line, instead of Drs. read *bales*.

## LITERARY.

*( From the Indo Chinese Gleaner. )*

FIRST SETTLEMENT OF THE PORTUGUESE IN MACAO

Extracted from a Chinese topographical account of Heang shan, the district in which Macao is situat

Haou king-gaou (Macao) on the north side lies toward Tsing chow Hill; on the south it looks towards Shin-tsze-mun (Cross harbour). It is situated in the midst of dashing waves; immense fish rise up and plunge again into the deep; the clouds hover over it, and the prospect is really beautiful. In the middle of the Dynasty Ming, the Portuguese borrowed the use of the place and have increased considerably in the space of several hundred years. The indulgence of our abundant Empire has overshadowed and surrounded them. Hence they have stood in awe of our majesty and felt our goodness. They passed the ocean myriads of miles in a wonderful manner, and small and great coiled under the renovating influence of the gracious sun of the heavenly Empire.

Macao is distant from the village of Tseen shan yu le (about 4 miles). The road to it is along Ah mun; it appears as the root of the Leen flower. The spot on which the foreigners live then have called The scarf of the Lotus flower," from its being situated by hills.

At first the foreign ships had no fixed anchoring place. They chose bays along the coast which were denominated Gaou. As for instance, in the district of Sin-ning, Kwang-hae and Wang-tung were considered as anchoring places. In Heang shan, were Leang-pe haou-king, (or Macao) and Shih-tsze-mun, (the Typa.) In Tung kwan district, were Hou-tsze-mun, (the Bogue) Tan-mun and Ke-tse.

On the 33d year of Kea-tsing (about 1460) of the Dynasty Ming, a foreign vessel approached Macao and said, that she had met with a gale, was leaky, and the articles of tribute which she brought were wet; they wished to be allowed to dry them at Macao. Wang-pe the officer on the coast, permitted them to do so. At that time they had merely 20 or 30 mat sheds. But the merchants, scheming after gain, gradually brought tiles and wood, and stone, and converted the sheds into houses. Thus they were collected; obtained a place of abode; they then dwelt there and gave a rent. From this time, all the other anchoring places were deserted and Macao only resorted to by the foreign ships. They were not allowed much more than half a mile (towards the interior.) In the 2d year of Wan-lech (1570) a barrier was built, and officers set to guard it.

On six days every month the gate was opened, and yearly a quantity of rice sent in. On the days on which the gates were opened, officers attended to examine what passed. — After the business was over, the gates were again shut. There was a market place railed in; and on the right and left at the gates written; "Dread our greatness, and respecour virtue."

In the 40th year of Wan lee, (1601,) an officer on the coast requested the Viceroy and Foo-yuen, to engrave on a stone, the five following prohibitions.

1. All old or new foreign merchants, who shall as heretofore breed up Japanese slaves and send them away in foreign ships to sell them—the persons at the head of affairs for that year shall give information, that they may be taken and be punished according to martial law. If those persons conceal it, they too shall be severely punished.

2. No foreign merchants, either old or new, are permitted to buy Chinese boys or girls. If any dare to offend, they will be taken and punished.

3. Foreign ships bound for Macao, are permitted to enter immediately and wait to be measured. If they anchor at Ta-tenou-hwan, or at Ma-kow without-side, it will be considered as obstinate disobedience, and their ships and men, and goods, will be taken, burnt and destroyed.

4. All goods shall be taken to the city and publicly sold, that the duty may be paid. If any be smuggled, they will be seized, and the amount given to the informer.

5. The houses which have been built, may be repaired, but no new ones hereafter built—if a brick, or a beam be added, they will be pulled down and burnt.

In Macao, there is a Portuguese officer to attend to the affairs of Macao; there is also a linguist and a translator; papers are sent up to the Heen of Heang-san. He calls the Portuguese officer before him and gives him a licence to act. For upwards of eighty years, the foreigners who came to Macao lived in peace and prosperity. Their population also increased. In the 8th year of Yung-ching, (about 1730) there were in Macao, 317 foreign men, and 663 male slaves. There were 1,397 foreign women and 900 women slaves. The ground rent paid into the Too-ching-sze's treasury, was 500 taels.

The foreign dress fits close to the body; the sleeves are tight; the buttons close to each other; they throw a large cloak over all. The foreign hat they call "Chapew." It is beaten out into three corners, and is of a black colour. They put false hair on their heads and then put on the hat. To take off the hat, scrape the foot and shake their hands, constitute their mode of salutation.

They value girls and dislike boys; hence they are glad when a girl is born. When she is of age, the father and mother choose a partner for her, and communicate their intentions. If she consent, she gives her ring as a pledge. It is then mentioned to the priest, who inquires if there be no ancient relationship. If none he allows their union.

At the time of marriage, the go-between leads the man and woman to the temple, and the priest says to them: "Will you afterwards repent of your being made husband and wife?" They reply, No, never?" The priest then recites a prayer, and orders the bridegroom to take the wife's house—where an entertainment is prepared. The father, mother, and sisters take the wife to the husband's house, where also an entertainment is prepared. This they call exchanging seals.

They receive the religion of Teen chu. (the Lord of heaven.) When their father or mother dies, it is announced to the priest, who tolls the bell to declare the ascent of the spirit to heaven. They open a grave in the temple and place a coffin. The priest goes to the house and with the relations and friends conveys the body to the temple, where it is put into the coffin and covered with earth. Prayers are recited, and the relations and friends all disperse. The sons and daughters return home, when the dead and do not go out for eight days—they light no fire, nor dress any food.—Friends bring them meat and drink. When eight days are expired, they go and return thanks. Black clothes are for mourning. Their customs are liberal. They have many temples Pan-pa, St. Paul's, &c. They have a temple for the sick, for nuns, for Chinese, for lepers, &c. St. Pauls is the principal one.

The e were formerly three Chinese offices, there is now only the Hoppo's. There is a Council Chamber, where all Chinese civil and military officers who go to Macao sit. The foreigners sit to order. After tea, if they wish to say any thing, the linguist explains.

In the 1 th year of Kang-he, the rooms over the gate at the temple, fell down from age. Shin-lang-hae, the Heang shan Heen, rebuilt them, and added by the side two rooms for officers.

The Macao foreign ships were, by the Viceroy Kung restricted to 25 sail. They left in the 3d moon, and returned during the 5th and 6th.

On the 27th of the 7th moon of the 44th year of Keen lung. (A. D. 17 6) the Viceroy and Foo-yuen adopted the following regulations, respecting Macao and ordered, that they should be engraven on two stones, in Chinese and Portuguese, and placed in a public street, that all persons both Chinese and foreigners might know the regulations and conform to them.

1. Hereafter, persons (Chinese) who have violated the laws shall be sent to their native place, and their relations shall give bond for their good behaviour.

2. Hereafter, the fast boats, tanka boats, &c., shall anchor before the Custom House, to prevent their smuggling, bringing children to sell; or ferrying Chinese to worship at the Portuguese temples.

3. The black people shall be obliged to buy with ready money, and the Chinese shall not purchase any thing from them.

4. If the Chinese shall be found at night in the streets without lanterns, they shall be delivered to the Te-paou, or constable, who shall bring them before the Chinese magistrate. The Portuguese soldiers shall not extinguish their lanterns, and charge them falsely. If in a hurry, they (the Chinese) go abroad without a lantern, or offend through ignorance, they shall not be fined. If in opposition to this, they be beaten, it shall be represented to the King of Portugal.

5. If any foreigner shall be guilty of a capital crime, he shall be tried by the Heen and foreign head man unitedly.

6. If any Chinese shall incur a debt to foreigners or offend the laws, it shall be represented to the Chinese magistrate, and he be requested to prosecute. The Portuguese shall not detain or imprison him, shall not insult or beat him. A violation of this shall be punished according to law.

7. They shall not build any new houses—only repair the old. If they built new houses or temples, they shall be pulled down, and the proceeds given to the Mandarins.

8. Neither foreigners, nor Chinese shall buy or sell children.

9. The blacks shall not entice the Chinese to be thieves. If the Chinese be concerned with them, the Portuguese shall not punish them—but deliver them over to the Chinese magistrate. If the Portuguese refuse to deliver up the black to trial, the Portuguese head shall be punished.

10. The Portugues e prostitutes shall not secret Chinese offenders. Nor shall women be hired out: the Chinese and Portuguese shall both be punished.

11. The Portuguese shall not go without the boundaries of Macao, under pretence of shooting; alarming the villagers, or insulting the women.

12. The Chinese shall not adopt the Portuguese religion. If they do,—the offender, the head constable, and the Portuguese head shall all be involved. This paragraph the Portuguese head has requested to have omitted in the tablet written in foreign letters.

*Translated for the Canton Press.*

### EXTRACTS FROM THE SAN KWO CHE.

"Annals of the three Kingdoms."

In the village of Chung there lived three brothers who were never free from sickness.

They one day agreed to go and ask Kwanluh why they were thus severely visited.

He, on being questioned by them, thus replied. "Your house is haunted by the ghost of a woman the inhabitant of a grave hard by. I am not quite certain whether she was your grandmother or the second wife of your uncle.—The reason why she haunts the house is as follows:—

Some years ago when the land was a prey to a raging famine this woman begged a few measures of rice of you, which you, in the hardness of your hearts, refused to her, and upon her importuning you, you seized her, put her in the well and threw a large stone on her head which killed her.

Her spirit having accused you, at the gate of Heaven, you have been visited, as a punishment, ever since with a lingering disease, which is incurable by mortal means."

---

One day an old woman, in the village of Heang came in great distress to Kwanluh and told him she had lost her cow and begged him to devise what course could ever regain it.

He taking pity on her, arranged his tablets and after consuming a little, said to her:

"Go immediately to a shed on the northern bank of the river and you will see seven men preparing the meat for their next meal: the whole of the flesh and skin will be there."

The old woman did as he was told and lo! she found it all as Kwanluh had predicted.

The seven men were sitting before a large fire on a table cooking the meat, the whole of which with the skin was still there.

She immediately went and gave information of the robbery to the magistrate who had the whole of the men apprehended and punished.

### SANDWICH ISLANDS.

### WAIMEA.

The following valuable original paper, by "Pomahubulator," needs no preface by us; we leave our readers to welcome it, as we do, to our columns.

Mr. Editor,

I send you for perusal, and, if you choose, for insertion, a notice of the District of Waimea, on the Island of Hawaii, the materials were gleaned on either a visit or two ago, during a short visit to that place, and are, I trust, correct; if you consider them worthy of insertion, I hope they will be but *the first* of a series of sketches, which may serve to make the resources of the Islands better known.

PERAMBULATOR.

Waimea is a district of Kohala, one of the six great divisions of Hawaii, consisting principally of a large expanse of table-land, bounded on the North by the mountains of Kohala, on the South by the lofty Mouna Kea, Easterly by the woody regions of Hamakua, and on the West stretches down to the sea side, including an extent of coast from North West of Kawaihoe to some large Koa trees, (Acacia Oriensalis.)—near Kuiholo where runs the line of separation between Kohala and Kona.

The surface of the country is *comparatively* level, and generally rocky in greater or less proportion according to the age of the lava, of which the whole island is composed; in some parts the rocks look as if they were ejected but yesterday from the fire, black and bare, without a single blade of grass, or a solitary lichen; while in other parts there is a light soil of several feet deep, consis ing apparently of decomposed volcanic mud. The north-eastern part is the most fertile, and the only part cultivated, the plains being for the most part covered with long rank grass, with but little wood.

The Northern mountains rise to be height of 8,000 feet or more, and are thickly wooded, abounding with large trees of various kinds, but the largest and most plentiful is the Olea rehia; here this species of Eugenia appears generally to take root on the top of the fern trees at a height of 20 or 30 feet from the ground, the roots shoot down ward and reach the earth the fern tree thus transplant on gradually decays and leaves the tree supported on a number of arching trunks with a vaulted space beneath, which, with a little trouble forms a good shelter for the benighted traveller, or wandering wood-cutter.

Much rain falls in these mountains, which, on this side, descends in three streams to the plains below; the first descends at the north-east extremity of Waimea near Pukapu; it is small, but seldom fails; it divides into two small rivulets, one, running easterly toward Hamakua, is soon lost in the swampy woods, the other, westerly along the plain. The second is on the north parts, and descends at Waikoion, passes by the Mission House, through the village scattered about the neighbourhood, and taking a south-west direction, passes by Lehue on to the sea, which however it seldom reaches, except after heavy rains, it then flows into the sea between Kawaihae and Puako; it is the largest stream, and waters the whole of the cultivated parts; the source of this stream is near the head of the valley of Waipio, whence it pursues its course through impassable woods, till it begins to descend to the plain, when its course becomes tortuous through a deep ravine, between two spurs of the mountain, their sides nearly perpendicular, being thickly covered with wood in the height of many hundred feet; the bed of the stream is broken and rocky, here forming a series of beautiful cascades, sweeping over and around stupendous rocks, there turning a projecting point, resting in a deep still pool—tumultuous and turbulent it pursues its romantic course to the plain. This stream formerly abounded with water fowl, especially ducks. The third and most westerly stream, descends to the plain at Kenali, by a majestic fall of near 100 feet, and although a considerable stream at first, is soon lost in the arid soil of this part of the plain, when after much rain, it reaches the sea; it is a little to the northward of the other.

These three streams water the parts capable of cultivation at the foot of the hills, which are carefully preserved from the encroachment of the cattle with which the plain abounds, by a high strong stone wall many miles long.

Just below the woods, cultivation commences, with little trouble the natives might always have abundance, but with true indian improvidence, they prefer to trust almost entirely to the natural productions of the hills, such as wild plantains and bananas, wild turnip, sweet potatoes, raspberries, strawberries;—Mau. (Solleria Cyathifolia.) Ki, (Dracena Terminalis.) and other roots and herbs are are only in times of scarcity. There are some fields of upland Taro on the sides of the hills, but the numerous acres of cleared unplanted ground that show the former extent of cultivation, tell a woful tale of diminished population or of hereditary idleness.

One of the spurs of the mountain has been for years partially cultivated by an old man partially blind; he has been accustomed to ascend the dangerous path, burn the exuberant vegetation, clear the land on the ends of the precipices, plant, attend, and reap the produce by himself alone and every formerly to carry it a distance of 12 miles over that almost track-less hills to Kawaihae, to buy fish and salt; on one occasion he laid down his bundle and in searching for it, missed the path, (no where more than a foot broad) and was nearly starved in the hills before his brother, who went to seek him, found him.

To the N. E. of this the country is more fertile, the sides of the hills abounding in that plant so valuable to the natives, the mamaki. [ *Urera sessilis.*]—Without the exclusive the country is abandoned to the wild cattle which are large and numerous, and have afforded an inexhaustible revenue to the chiefs for some years past; they are scattered about in herds enjoying the fine pasturage which the plains afford. At Lehue and in other places, bullock-catchers are stationed, who for a pesos as they are styled, for catching bullocks at different places on the foot of Mouna Kea, on the Waimea side of the plain; they are built of immense pens of hard wood, with cross bars of the same, and are fastened together with strips of raw hide; they are of various dimensions.—From the entrance of the pen are two diverging fences built of the same wood, extending from a quarter to half a mile in length; into this funnel a herd of wild cattle are driven by a number of horsemen, and propelled on, until they enter the pen, the entrance of which is immediately closed; a man on horseback then enters the pen, with no other weapons than his knife, and a lasso, single cut those which he requires, throw his noose, failing never, and, with admirable courage and dexterity throws the bullock down, and either hamstrings or goads to another pen, or dispatches him immediately. Those which are intended to be tamed are fastened to a post and fed until they quietly all w the approach of their keeper, they are then tied by thongs of hide to the hinder of a tame one, and suffered to go at large; by the time the thongs chafe off they are supposed to be sufficiently domesticated.

It is difficult to conceive a situation of greater danger than that of the bullock catcher when he rides into the pen, amid-t a herd of wild bulls;—their enormous size, savage disposition, activity and strength, seem to preclude the possibility of his escaping with life; but habit destroys fear. The most here frequently ride carelessly in, irritate the already savage beasts, laugh merrily at their furious charges, while with watchful eye, and well disciplined horse, they nimbly evade them, and as they madly rush by them aptly throw the noose over their horns and by a few skilful evolutions of the horse entangle their legs with the lasso and cast them bellowing to the earth; one or more assistants instantly seize a hind leg, the tail, or a horn, and the animal is either bound or butchered with facility.

These bullocks are the offspring of those left here by Vancouver, they are found grazing in very large herds on the sides of the mountains; within the last few years many thousand have been caught: The bulls are generally killed for their hide and tallow, the flesh is generally wasted; part of the cows are slain, but their flesh is either eaten or jerked for the Oahu market, or packed in barrels for ship use; the rest of the cows and calves are sent by ship loads to Honolulu. Some oxen are broken to after the spanish fashion to draw immense loads in rude carts adapted to the roughness of the country and badness of the road.

Scattered about the plain are numerous sepulchral caves filled with mummies, the bodies are found lashed on to the small biers used to this day for carrying the dead, enveloped in numerous folds of a thick kind of Kapa called *pa*; placed beside them is a small calabash of *poe*, the principal food of the native; a gourd or cocoa-nut shell of the same, or salt, and a stick of sugar cane; the bodies all have their entrails removed and some the brain also, the limbs are invariably bent behind on the back, or some other unnatural position, they are of a light buff colour, and weigh from 20 to 30 lbs; frequently bundles containing the bones of one or more children, are found placed on the breast of the female, and those who had been fishermen had sometimes a canopy of nets over their bier.

These parts of the plain adjoining Hamakua, are better wooded, having a park-like appearance, with numerous herds of wild cattle, and many wild hogs, which are either caught in pit falls, shot, or speared

by the natives; higher up the mountain the timber increases in size, being interspersed with *Ohia*, (*Eugenia*) *Koa*, (*Acacia falcata*) and *Naiko*, (*Myoporum Tenuifolium.*)

The western part of the district remains to be noticed. This consists of a gradual descent of about 10 miles to the sea side; it is entirely composed of an uneven rocky waste, covered with long grass; this barren tract is unincumbered and uncultivated, rain seldom falls here, and, besides the grass, nothing is seen to vary the monotony until you approach the coast, when the eye is only relieved by the yellow blossoms of the *Nohu.* (*Tribulus.*) A road has lately been made from the plains to Kawaihae, by clearing away the stones, and covering the surface with long grass; this is the work of convicted offenders against the laws; the road terminates at Kawaihae, near a large temple built by Kamehameha, the first,—of which more hereafter. There is an anchorage for vessels and a harbour for small craft. At this place, and at Puako, about 8 miles to the south, are shipped off the cattle, and other produce of Waimea, for Honolulu; the anchorage however is bad, and vessels are frequently blown off by the Mumuke, or strong North East Wind.

This place, (Kawaimea,) however barren, has its attractions for the natives, and foreigners; for the former it has it's salt works and is the best place to purchase fish on the whole Island; for the latter, it has it's salubrious climate, and tepid Baths:—but a few years since this was the headquarters of the chiefs, consequently the metropolis of the Island; now, heaps of stones thrown into confusion by earthquakes, mark the sites of the houses.

In this district you may find almost every variety of climate, from the ovenlike dryness and heat of Kawaihae, to the cold wet rawness of Pukapu, and the freezing snows of Mouna Kea; but as there is but one inhabited spot inland, the observations here made must be supposed to refer to that. The thermometer, under the shelter of a house, ranges during the spring and summer months between 66° and 75°, but if exposed to the wind and rain, the evaporation will frequently cause it to fall as low as 41°:—This place as a residence is in many ways unpleasant; during a great part of the year it rains abundantly, with much wind,—a nasty drizzling soaking rain,—a pure Scotch mist. During these times, which not unfrequently last for several weeks, exercise out of doors, is extremely unpleasant, and to an invalid impossible.—at other times during the dry seasons, walking is equally disagreeable, for, from the lightness of the soil, you sink ankle deep, at every step, and if you are bold enough to face the wind, you get your eyes filled with dust, which the wind whirls along in clouds; cold and chilly, you seek repose and shelter in a house, warmed by a charcoal fire, but here a greater torment awaits you, for the hereditary tenants of Warmea are large, numerous, and hungry, and their bite is more like that of a leach, than a flea.

As the clouds roll along the vast expanse of the Pacific, they strike the bold coast of Hamakua, 2000 to 2300 feet perpendicular above the sea, they there discharge their contents, and as the country rises toward the centre of the island, the wetter it becomes, but the instant the descent commences, the quantity of rain diminishes, so that at last the sea shore on the western side, which slopes gradually to the waters edge, is left dry and barren; the earth becomes very much heated, and being seldom cooled with rain, preserves an even temperature of about 80° average the year throughout, with a degree of dryness almost incredible: The only water to be procured here is brackish and very warm; it oozes out from beneath the rock at low water mark along the whole coast.

The population of Waimea is far from being numerous, its numbers are constantly fluctuating, corresponding with the movements of Governor Adams Kuakini, who frequently resides here; many foreigners have lately gone to reside there, principally attached to the cattle farms, or mechanics, whose services they require. Leather is made in quantities equal at least to the consumption on the Islands, Waimea harness and Waimea shoes, are notorious for their strength and durability. The articles principally exported are Live stock, Salt, and Jerked Beef, Hides, Tallow, Leather, Mamaki Kapas, Moa plank, &c. &c.

---

To CAPTAIN T. H. JOHNSTON, late Commander of the Lowjee Family.

Canton 16th January 1837.

Dear Sir,

As you are about leaving China, on your way to Europe; we are unwilling to see you leave us without having expressed our friendship and esteem for you, and our feeling of gratitude for the kindness you have invariably shewn to individuals of our nation, whenever opportunities offered, many of the undersigned, being under personal obligations to you for acts of friendship and civility received by them or their friends at your hands.

As a proof of the grateful sense we entertain of the kindly solicitude you have ever shewn in behalf of ourselves and our property, which latter has, during many years of your active life, been entrusted to your care, we have subscribed the sum of Two hundred Pounds to be remitted to our friends Messrs. Forbes, Forbes & Co., of London to be laid out by them in the purchase of a piece of plate, which they will present to you on our part, and of which we beg your acceptance, hoping that it will continue, during many years, to remind you of the heartfelt esteem and gratitude entertained for you by your Parsee friends in Canton.

Wishing you a speedy and prosperous voyage, and hoping soon to see you again amongst us, we shall ever remain,

Dear Sir,

Your sincere & obliged friends,

Dadabhoy Rustomjee, Nanabhoy Framjee, Burjorjee Manackjee, Jamonjee Nesserwanjee, Dossabhoy Rustomjee Sett, Furdoonjee Hormusjee, Nowrojee Cursetjee, Ardaseer Furdoonjee, Tamoojee Rustomjee, Framjee Dadabhoy, Bomanjee Manackjee, Bomanjee Horsungjee, Dhunjee Byramjee, Framjee Jemsetjee, Sapoorjee Dhunjee, Wookerjee Jemsetjee, Cowasjee Sapoorjee, Cursetjee Dhunjeebhoy, Muncherjee Jemsetjee, Dinbar Durabjee Pallonjee Nesserwanjee Patell, Hormusjee Jamsjee Nadershaw, Pestonjee Cowasjee Sett, Cursetjee Nesserwanjee, Pestonjee Nowrojee Pochajee, Sorabjee Cursetjee Metta, Dhunjeebhoy Muncherjee, Rustomjee Burjorjee Mody, Cowasjee Eduljee Beaney, Heerjee Jehangeer, Dhunjeebhoy Nesserwanjee Cama, Pallonjee Dorabjee, Merwanjee Tamoojee, Dadabhoy Hormusjee Cama, Dorabjee Nesserwanjee Cama, Framjee Heerajee, Cowarjee Jeevajee, Bomanjee Jemsetjee, Jemsetjee Rustomjee Eranee, Sereerjee Rustomjee Eranee, Burjorjee Framjee, Nesserwanjee Bomanjee, Jamsetjee Nowrojee.

---

SHIP CASTLE HUNTLY,

2nd. Ba', 18th January, 1837.

To DADABHOY RUSTOMJEE Esq.

Canton.

My dear Sir,

As your signature stands first to a letter of yesterdays date, signed by forty four other Parsee Gentlemen, I beg through you to convey to them the very great gratification I have experienced from the receipt of it.—

Any little services and attentions I may occasionally have had in my power to shew to my numerous Parsee friends were in themselves sources of gratification to me, but to find that they have been so highly appreciated and so munificently acknowledged gives me a heartfelt pleasure that any language in my power to make use of would fall far short of expressing.

The very handsome token of your and their kindness and esteem, for which I beg you and they will accept my sincere thanks, will ever be regarded by me with sentiments of pride and self gratulation as a proof of the many warm friends I leave behind me, but with whom I hope in a few short months to renew that intercourse of friendly feelings which I have ever felt towards them, and which it has been my good fortune to inspire on their part. Again begging you to convey to my friends the sentiments I have endeavored to express and with every feeling of esteem and regard,

I remain,

My dear Sir,

Your most faithfully,

T. H. JOHNSTON.

---

# CORRESPONDENCE

TO THE EDITOR OF THE CANTON PRESS

SIR,—I am sorry to have to trouble you with the following complaint, but I hope that if you publish my letter the same may not occur again.

The Captain of the "*Euphrates*" arrived on Sunday last at Macao, and landed all his letters at one time; they were sent to the shop or tavern of the Post-Master; those for Europeans were picked out, and forwarded by the first boat sailing for Canton, the St George; but the letters for me and my countrymen were detained, and not forwarded by the same boat, they were applied for by me, but a sum of eight dollars for postage was demanded and paid before the letters were delivered up.

Now, Mr. Editor, I will thank you to inform me whether the demand for postage money is just, for the Post office incurred no expence in obtaining the letters from the Euphrates, as the Captain brought them on shore in his own boat; and we should also be glad to know why our mercantile letters were selected for detention before those of our neighbours.

I remain, Sir, Your most obedient Servant

A PARSEE MERCHANT

Canton, 13th January, 1837.

---

"*Ad captandum Vulgus.*—"

We some time since published a document translated from the Chinese, in which a quack doctor puffed his plasters well enough to be thought a disciple of Rowland, Warren or Meghi; but a friend has obligingly put into our hands a few days ago the following extraordinary advertisement of Mr. CHARLES VERREY recommending his teas, viz. the HOWQUA'S MIXTURE and HOWQUA'S SMALL-LEAF GUNPOWDER TEA, the former being a mixture of 40 varieties of *rare* black teas,' and the latter, similar to Constantia, Tokay, Johannisberg, Chateau la Rose, Pajarete, and other wines, being produced on one estate only, and what is more and truly annoying to the many exporters of tea from here, only one, and that a Captain late in the H. E. I. Company's maritime service, has the privilege of seeing these teas home. Our Chinese quack may go and hide his diminished head, and let Rowland, Warren and Meghi shake Mr. Verrey cordially by the hand; he deserves to be an honorary member of that far famed triumvirate.

"*Ce monde est plein de fous et qui n'en veut pas voir.*

"*Doit se renfermer seul et casser son miroir.*"

---

AS SUPPLIED TO THEIR MAJESTIES.

## THESE TEAS.

*HOWQUA'S MIXTURE, (a)mixture of Forty Varieties of Rare Teas, all Black,) at 6s. per lb. is 8s. the Catty Package.

HOWQUA'S SMALL-LEAF GUNPOWDER TEA, (grown only on one estate,) at 8s. 7½d. per lb. is 11s. 6d. the Catty Package.

*Each of the above Teas are sold in the Original Chinese Catty Package, containing* 1 lb. *and ½d nett of Tea.*

The NOBILITY and GENTRY are respectfully advised, that the SOLE IMPORTER of the above Fine Teas, (a Commander in the H. E. I. Company's late Maritime Service,) having, since February last, discontinued supplying them to the Proprietors of the *Pantheon*, *Oxford Street*, has this day appointed

Mr. CHARLES VERREY, THE SWISS CONFECTIONER,

No. 218, REGENT STREET,

His Sole Agent for the sale of them at this, the West of London, where, on Monday next, the 30th of May, they may be had *Genuine as Imported.*

* Howqua is the chief of the twelve celebrated Canton Hong Merchants who monopolize the Chinese Trade. The Tea above mentioned is Howqua's favourite mixture for his own especial drinking. There are upwards of two thousand different chops of Tea grown in China, all varying in quality from each other. This mixture comprises above forty of the very best, or as they are there termed, First Chops, and is grown only on particular farms in the province of Kiangnan.

"Such of our readers as are fond of that social beverage, a cup of really good and genuine Tea, are recommended to make trial of Howqua's."—*Brighton Gazette, October 30, 1835.*

"Howqua's Mixed Black Tea.—The reputation this Tea enjoys we can venture to say, from our own knowledge, is well merited, and we can safely recommend it to our readers as a most agreeable and economical beverage."—*Brighton Herald, October, 31st. 1835.*

"One trial of Howqua's Tea will convince the most sceptical of its supericrity over all others; and there is no doubt but it must soon become decidedly the favourite Tea of the public generally."—*Brighton, October, 20, 1835.*

These were the first particular Teas supplied the Public direct from the Importer.

These are the only particular Teas that ever received such public praise.

And these are the only particular Teas of which it can be said their Majesties drink.

CAUTION! Those who have tasted, as also those who may desire to taste these Teas, which, from their peculiar excellence are now supplied to their Majesties, are cautioned against being *misled* by Tea *of a totally different character*, which is now under the assumed title of "Howqua's Mixture," and in packages imitated from those of the Advertiser, but containing 1 lb. only, offered to the Public on the very same counters of the Pantheon Bazaar, Oxford Street, on which the original and only genuine Howqua's Teas, in Chinese Catty Packages, were lately sold, as supplied by the Importer, who has, since February last entirely withdrawn himself from all connection with the Proprietors of the Pantheon Bazaar.

---

# CANTON PRESS,

21st January 1837.

Our Cotemporary in his last number, where he says that the Hong merchants have never practically denied their joint responsibility, is not quite correct. By practically not denying liability, our Cotemporary, we suppose, means to say that the Co Hong has always paid the debts of the insolvent of their body, but this has only partially been the case. When the debts of the Chinese to British subjects in 1780 amounted to about one million of Pounds Sterling, it was only by very strong representations, backed by the *Seahorse* man of war, that the local Government promised to see justice done to foreigners. The Consoofund was then established for the express purpose of paying these debts, but they were too considerable, and only about 80 per cent were recovered; here therefore we have the first *practical denial* and we hope it may have been the last, though we must confess that with the Vice-Roy's letters before us, and the Hong-merchant's letter expressing their non-liability, we fear that it will be difficult to get the old Hongs to pay for the new. Whatever may be the different opinions on the subject, it is plain that it is very desirable that the question should be settled decisively in one way or the other, so as no longer to mislead persons trading with the Hongs, possibly under a wrong impression as to their liability or means. We suppose that the now fast approaching Chinese new year will bring the question to an issue, and hope that the old Hongs will then continue, as our Cotemporary says, "not to attempt to shirk it" (i. e. their mutual liability) but "freely and openly admit it."

---

By the *Tyrer* from Liverpool we have received some English papers to the 3rd August. In the House of Commons, the amendments of the Lords on the Irish Church Bill, have been rejected by a majority of 29.

N. M. Rothschild of London died on the 28th July at Frankfurt in his 59th year.

General Bugeaud has obtained important victories over the redoubted Arab Chief Abdul Khader, whose power has been almost entirely broken.

Affairs in Spain are by no means favorable to the interests of the Queen, and her residence at La Granja even has been threatened by the Carlists, in consequence of which the Queen has returned to Madrid. General Cordova has been dismissed from the command of the army, which has been conferred on General Sarsfield. The British Legion was in a state of insubordination, and General Evans as well as most of his officers disgusted with the treatment they had met with from General Cordova and the Spanish Government. Many soldiers of the Legion had deserted to Don Carlos.

General Evans, who was repulsed in his attack on Fontarabia, is seriously ill. It was expected that if a French Legion of 10,000 men to be enlisted voluntarily, could not be collected, 10,000 French troops would be ordered to march into Spain, to support the Queen.

The following was yesterday received at Lloyd's.

"British Consulate office Coyumbo March 25, 1836.

"Sir,—I wish to acquaint you, for the information of the Committee for managing the affairs of Lloyd's, that underwriters should be careful in insuring copper ores on board vessels loading the same on this coast, as there are some which are extremely dangerous to both the safety of whatever other cargo the ship may have on board, and likewise to the ship, as the enclosed document will prove." (Signed) Chas. Chamberlain, Consul.

To Wm. Dobson Esq, Lloyd's.—*Morning Herald 3rd August.*

The document referred to in this letter, too long for us to extract, stating that several Gentlemen, at the request of the Brit. Consul, surveyed the cargo of the *Richard Bell*, consisting of Copper ore which they found heated to 132°. Fahrenheit, and that on digging one foot deep into the ore, and leaving the thermometer in this hole during 5 minutes, the quicksilver rose to 161°. The cause of this heat is attributed to the great quantity of sulphur contained in the ore, and to it's having been shipped in a humid state.

A militia or "garde nationale" is being organized in Turkey, and the Sultan is generally present at the reviews.

An Englishman has lately arrived in Wurzburg, (Bavaria) with an intention to buy 1500 live foxes, to convey them to England. He is said to have received this commission from some lovers of the chase in this country. *Morning Herald.*

The Treasury (formerly the Regency Palace) at Lisbon was consumed by fire on the 14th July last, but owing to the assistance of French and English marines ordered to the spot by their respective commanders, the neighbouring houses were saved from destruction. Prince Ferdinand has deferred for the present his intended tour through the interior of Portugal.

The Prince of Orange was expected shortly to visit England. This seems to confirm the report of the marriage between the Prince's second son and Princess Victoria.—*Ibid*

*Important to Mariners.* Antwerp, July 20th. Notice has been given by the Minister of the Interior, that the light on the Pharos off Ostend, will be extinguished from the 15th of August next, till towards the 15th September following, when it will be replaced by a laminar fire of the third class, which, to bring it in harmony with the system generally adopted by the Commissioners of Lighthouses in France, the lights on the coast of the Atlantic, the channel and the North sea, will be fixed. A fire on the Light-house off Dunkirk being to be replaced by a light of short eclipses.—*Ibid.*

A tooth of Napoleon Bonaparte, extracted by Mr. O' Meara, was sold at the public sale of his effects for £7.17. 6d., and the instrument with which it was extracted fetched £3. 3s.—A few lines in the Emperor's handwriting sold, after much competition, for eleven Guineas; a lock of his hair for £1. 2s. *Atlas.*

We hear that there is actually a Company which undertakes to convey travellers from London to Paris for nine shillings. *Ibid.*

An American paper states that the fashionable damsels of Philadelphia wear their dresses so tight about their shoulders that they are obliged to unhook them to sneeze.—*Ibid.*

---

Our Correspondent "A Parsee merchant" directs our attention to an irregularity he states to have occurred in Macao in forwarding letters destined for Canton, delivered by a Captain of a Ship to one of the owners of the Passage boats, or, as our Correspondent terms him, the Postmaster, a title we presume given in consequence of the late Lord Napier having entrusted the forwarding of English letters to his care. We have as yet heard only an *ex-parte* statement of this affair, and must confess that as it is represented to us, it appears to have been a strange dereliction of duty in the "Postmaster" to have given the preference to any class of letters which had been confided to him; and that he should have thought himself entitled to the postage of letters, which he had omitted to forward in due time, when these letters were claimed by the parties interested, is still more unaccountable.

We hear that the Parsee merchants have addressed a complaint on the subject to H. M. Commissioners at Macao, before whom we imagine the subject will be investigated.

H. M. Superintendents have issued a Circular to request that a meeting of British merchants resident at Canton be held, to lay before it the question, whether it be thought expedient that a Committee of British merchants be appointed to correspond officially with the Superintendents. A meeting was accordingly held last night, but too late for us to be able to give a report of the proceedings.

On Sunday night at about nine o'clock some of the inhabitants of Carpenter square were alarmed at the report of an explosion, and on enquiry it was found that combustibles had been collected in front of one of the Carpenter's Shops, and that the explosion had been of gunpowder, with which the combustibles were to have been ignited, and would have been, but for the fortunate interference of the neighbours. It is said to be a common practice for Chinese robbers and vagabonds to fire houses in the hope of plun e

---

*Peking Gazette, 9th month 7th day, October 16th, 1836.*

The following Imperial Edict has been reverently received.

Yihsang has presented a report to the following effect:

"The Barracks have been burnt down, owing to the negligence of the Officers in charge of them: I humbly request your Majesty not to look over such neglect."

"It appears, that, the Barracks called Lungtseuen Kuh, (The dragon of the rippling stream) having caught fire, the Officers and men occupying them, cowardly rushed forth the and abandoned them, making no efforts to save them."

"Let Shingtsin, the General Commandant and Yihchang &c. his subordinates, be arrested and confined until the Board have deliberated on their punishment."

Respect this"

On Thursday night a chimney in the house of Messrs. Daniell & Co. was observed to be on fire, but engines promptly arriving on the spot, the fire was extinguished without having done material injury.

We hear that one of the midshipmen of the French Corvette *Bonite*, whilst walking on the Lappa, an island opposite Macao, was assailed by a Chinese mob, knocked down by a stone, and when, on recovering from the blow, the young man offered a sum of money to the Chinese to ferry him to Macao, they preferred taking his money without rendering the service required, and robbed him of every thing he had about him.

We copy an address of the Parsee merchants, to Capt. T. H. Johnston, on his sailing for England in the Castle Huntly, and Capt. Johnston's answer to his Parsee friends, thanking them for the very kind some manner in which they have expressed their friendship for him.

We have been requested to state, that the shoalest part of the bank in the *Patawan passage, China sea*, is not, as erroneously stated in our notice of it in our paper of 31st December last, in North Latitude 10° 20', but in N. Lat. 10° 44'.

NOTICE is hereby given that the undersigned will receive sealed Tenders of Cash for Bills of £ 1000 (payable at thirty days sight, in sets of £ 200 each) on the Right Honorable the Lords Commissioners of His Majesty's Treasury on or before 12 o'clock the 30th January 1837.

Macao 19th January 1837.

EDWARD ELMSLIE.
Secretary & Treasurer to the Superintendents.

P. S. Please to superscribe the word "Tender" on the envelope of the letter.

NOTICE.

THE SECRETARY of the BOOK SOCIETY OF CANTON will be obliged to any person who will give him information concerning the following volumes which belong to the Society.

1st January, 1837.

NOTICE.

We the undersigned, having been called upon by Mr. A. V. Cortella for the purpose of surveying the Portuguese Barque "Tranquilidade," repaired on board this day for the purpose.

On examination she proved a sound and staunch built vessel, and has just undergone a thorough repair, new coppered, sheathed, and doubled in the bends; she is well found in ground tackle, and sails, a very fair sea worthy ship.

Macao 8th Dcer. 1836.

Carpenter.
Robert Wemyss,
J. Hudson,
B. Botelho.

*OFFICIAL NOTICE.*

PURSUANT to Instructions from The Right Honorable the Secretary of State for Foreign Affairs dated in London on the twenty eighth day of May in the Year of our Lord one thousand eight hundred and thirty six, Public Notice, is hereby given that from the date of this Notification, the Powers of the Superintendents of the Trade of British Subjects in China, over British Subjects and ships are extended so as to include Lintin and Macao.

And the Authority of the Superintendents over British subjects and Ships is to be considered to extend to Macao and to be of equal force and validity, being exercised within these extended limits, as it had hitherto been, within the limits of the Port of Canton.

All this without prejudice to the just rights, authorities and Sovereignty of the Government of Her Most Faithful Majesty The Queen of Portugal at Macao, and the anchorages thereto subject.

Given under our hands and seal of office at Macao in China this thirty first day of December in the Year of our Lord one thousand eight hundred and thirty six.

CHARLES ELLIOT. } *Superintendents of the Trade of*
A. R. JOHNSTON. } *British Subjects in China.*

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camblets, Saltpetre. Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary Stationary, Cutlery, Crockery ware,* &c. for foreigners consumption, are sold at Auction, duty paid.

*Note. Alum,* and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk piece goods &c*, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd " " " 1200 do. & under 1600 " 0.7211891 " "
3rd " " under 1200 do. 0.5062341 " "

N B. The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3760 to $ 3780; 3rd class from $ 3200 and under. The Comshaw or Present Fee is paid by all vessels 1600 Tuels or $ 2225. Linguists fee $ 1734 and Compradore's fee $ 50 Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON GOODS.—are less enquired for, as the Holydays approach. COTTON YARN has been selling as low as $ 35 a 37, and without demand.

WOOLLENS.—Some large sales of both Longells and Spanish stripes have been made during the week, and among the Chinese they are selling under our quotations.

PEPPER.—is's nominal quotations have suffered a slight decline.

BETEL NUT.—our quotations it is difficult to obtain.

LEAD.—and TIN PLATES are at little demand at our prices.

TIN.—there is none in the market.

COTTON.—Our quotations will show a serious decline in all descriptions, and even at these rates prices are quite nominal, it being impossible to effect sales, from the approach of the Chinese new-year, and the scarcity of money.

OPIUM.—The only transactions we have to notice are the deliveries of one or two small parcels to the Junks outside, and some small sales at Macao. The restrictive measures of the local authorities and mandarins are still rigidly perserved in, and nothing further has transpired regarding the legal admission of it.

The Lintin deliveries to the 15th were,
Patna, 123; Benares, 30; Malwa, 89; Total 242 Chests.

### EXPORTS.

RAW SILK.—*Thatlee and Taysaam* have declined a little, whilst price for Canton Silk remain as before.

SILK MANUFACTURES.—We hear of no transactions; prices not being yet low enough to tempt purchasers.

TEA.—The lower qualities of *Congou; Souchong kind, Ankoi* and *Twankay* are cheaper than before. Our higher quotations are nearly nominal for all descriptions, few of good quality being now procurable. Congous of Fokeen Bohea quality are offering at 16 Taels. Souchong Congous below contract quality could possibly be bought under the quotations.

# THE CANTON PRESS.

VOL. 2d. No. 21. CANTON, SATURDAY, JANUARY, 28th, 1837. No. 73.

*From the Newyork Gazette and General Advertiser of 11th August.*

## FROM TEXAS AND MEXICO.

The New-Orleans papers to the 27th ult. received by mail yesterday furnish various details from Mexico respecting the affairs of that distracted country, but no one particularly of events relating to Texas. We annex all the accounts which possess any interest.

The editor of the Bee, who has perused a number of letters from Mexico says, excitement is following excitement, and convulsion succeeding convulsion, and none can foretell the consequences. Nothing will save Mexico from a bloody civil war of some duration, but the placing the reins of Government in the hands of her most intelligent and prudent men. The "Pronunciamento" issued by the State of Oajaca in favor of the Federal Constitution is said to be signed by all the authorities in that section, that unless a general co-operation in that section, that unless a general co-operation in that section, that unless a general co-operation

alarmed by the cry of breaker on the weather bow, bearing N. N. E. passed within a cable's length to leeward of it a small patch breaking violently, supposing it to be one of those small detached patches marked within the line of soundings; stood on with caution. At 9. 30 P. M. breakers reported on the ice bow bearing east; two small reefs in the line of N. E by E. and S. W by W.; stood on with a hand at the mast head. At 10 P. M. a breaker reported a head, hand's stationed to tack; but afterwards said to be a sea top, which proved to be an occasional break and broke the second time close to the bow. Tacked and stood to the westward. Strong N. N. W. wind night dark. At 10. 45 P. M. breakers were again reported bearing W. by S. and fearing we might not weather them, kept away W. S. W., soon found we were under the lee of an extensive reef, the breakers being visible along the weather beam. At 11. 30 the water becoming discoloured and perfectly smooth, with a strong smell of kelp. The lead getting foul in steamping to sound, hauled main sail up and bore up south. At midnight breakers being again reported a head, hauled for sail up and bore to, head to the nrd. in 25 fms. Drifted to s'd, west with the current into 45, 50, and 53 fms. At 2 30 A. M. weather having cleared up, Lat. by mean of stars alt. 9. 55, Long by China and stars altidudes 117. 35, placing us within the reef we had weathered at noon. At 3 A. M. breakers were visible on lee quarter, bearing south in two small patches; filled main yard and set the jib head N. E. At 4 30 A. M. the moon rising and throwing a reflection thro a cloud deceived us into a shoal close on the lee shore, had just time to haul the fore and main tacks on board and weather it; tho' within a few yards of the shoal we could not hear the breakers, no sounding's at 60 fms. At daylight found ourselves between two reefs about ten miles apart, with a broken reef of detached breakers connected under water close to us, over which we passed twice in 12 and 14 fms. The high land of Palawan just visible, bearing S. E. At 9. 45 being abreast within a mile of the north end of the middle reef, made it in Lat. 10 2 N. and Long. 118. 21 E. At 3 P. M. Ologoan bay being open under our lee with a falling glass, foul-wind, and unfavorable current, bore up and anchored under Harbour Isd. in 18 fms., the Isd. bearing N. by W. This bay is represented in the charts, full of Islands; I could find none, but Harbour Isd. and two small rocky Islets, one at the bottom of the bay and one on the east side. Harbour Isd., connected as the main on the west side by coral reefs. In directing to the anchorage in Ologoan Bay, pass on either side of three peaked Isles, and on the East side of Harbour Isd., which is about 2½ miles in length N. and S., and not more than 100 yards wide in any part; and anchor from ½ to 1¼ miles from its south end, shutting in the entrance by bringing the south end of Harbour Isd. on to East Point of the bay, but do not stand higher up, the bay being formed of a bed of Coral Rock, with from 5 fms to 2 feet water on them, and the whole of the shores of the bay are lined with coral reefs. We saw no trace of any inhabitants. Plenty of timber, and from the mountainous shores, no doubt, water may be found in plenty. There is an inlet to the westd., just below harbour isd., of 5 or 6 miles in length with 18 fms between the coral banks, but not more than ½ a cables' length wide from reef to reef, and another at the top of the bay to the S. W. had the appearance of a river. But having lost one of my quarter boats in a gale in the bay of Bengal we could not venture far out of sight of the ship; it blew hard all the night of the 4th, & the morning following, but fell calm in the evening. We tried the echo with an eight pounder gun, which was beautiful, being a perfect calm. The shelter is admirable; tho' blowing fresh the water was perfectly smooth. In standing out of the bay the morning of the 6th with a light S. E. wind, intending to keep near the land to have the advantage of the land breeze, found there was a reef running out about four miles in a north west direction off Ologoan point. In laying down the Latitudes & Longitudes for the advantage of my nautical friends, I can speak with some confidence as to their correctness, having passed within a mile of the Royal Captain Shoal at noon two days before, and also communicated with Captain West of the Trusty since my arrival, who also made the south end of the breakers the same day, and our observation agreeing and in placing them separately will enable those to mark them on their charts to do it more easily.

| | Lat. | Longi. |
|---|---|---|
| North end of reefs, outer reef | 10. 04 N | 118. 16 E. |
| middle reef | 10. 02 „ | 118. 21 „ |
| inner reef | 10. 04 „ | 118 27 „ |
| South end of outer reef | 9. 55 „ | 117. 55 „ |

The other two reefs I could have no opportunity of judging their southern extent, & must now close my long letter Mr. Editor, but cannot, without acknowledging my most grateful thanks to the Lord for our preservation and fulfilling his word "Thou will keep him in perfect peace whose mind is staid on Thee *because* his trust is in Thee". Had it remained squally and thick, nothing could have saved us from destruction. But he who can still the winds and the waves could clear the cloudy canopy of the sky, and tho' it shewed us the surrounding danger, could still the mind by saying "fear not, it is I." On that it were in more of my sea faring brethren to have this confidence; they would soon find all the burthen of the command borne for them. I remain,

Yours faithfully,
GEORGE CRIGHTON,
Master of Ship Cordelia.

MEMORIAL FROM THE GOVERNOR OF KWANGTUNG TO THE EMPEROR RESPECTING CAPTAIN ELLIOT'S COMING TO CANTON.—forwarded about the 18th January.

* * * * * *

Further; of all the foreign barbarian merchants, who have been allowed to frequent the port of Canton, the English have had the greatest trade. Hitherto they have had a Company, and their trade has been controlled by four principal merchants (1st, 2d, 3d and 4th *taupans*). Their ships arrived during the seventh and eight months annually; and, having finished their barter, left the port within the first and second months of the following year; after which, the *taupans* requested a passport and went to Macao, where they remained till the seventh month, when they again requested a passport and proceeded to the provincial city to transact their business. Such have been the regulations.

Upon the dissolution of the Company's factory, the *taupans* ceased to come hither, and its affairs were placed under the management of other men. And Governor Loo, having reported the case for the information of the throne at Peking, received an Imperial edict requiring him to order the Hong-merchants to command the remaining members of the factory to send a letter to their country, so that other *taupans* might be sent to Canton to control the affairs of commerce, as hitherto. This imperial edict was obeyed, as it appears from the records of my office.

During the eleventh month of the current year (the 16th of Taoukwang) I received a petition from the English barbarian, Elliot, dated at Macao, in which he stated "Hitherto we have received reports from my countrymen, requiring me to go over to Canton in an official "capacity to control my country's merchants and seamen there; and at the present time there being many "ships in port, and many merchants and seamen in "Canton and at Whampoa, who are ignorant of the laws "of the Celestial empire; and being really afraid that "troubles may arise, I beg to be permitted to go to "the provincial city, to control them."

The phrase, "official capacity," in the petition, is equivalent to "barbarian Chief," to which different from that of the *taupan*. With an view to ascertain, what might be the official character of the said barbarian; whether he really came for the simple purpose of controlling the merchants and seamen, and to regulate the trade; and whether he had any credentials from his country—these points not being sufficiently manifest—I immediately dispatched a messenger, in company with Hong-merchants, to Macao, there, in concert with the local civil and military functionaries, to investigate the matter. On his return the messenger reported, that he had executed his commission, and examined the several points in regard to the said barbarian Elliot, who made the following statement:

"My name is Elliot; I am an English officer of the "fourth rank. In the autumn of the fourteenth year "of Taoukwang, I arrived here in a cruiser, which "was duly reported by the pilots. During the two "years while residing at Macao, I have been engaged "in signing the passports of English ships bound "homewards. And now the Company's factory is not "re-established, and no *taupans* arrived; but, having received admiralty from the great minister of my king, "directing me to control the affairs and seamen, "and not to manage the commercial affairs, and also "credentials; I am instructed thereby to proceed to "the city in an official capacity; and, in case of difficulties among the merchants or seamen, to control "them," &c.

Moreover, the messenger ascertained that the said barbarian, Elliot, brought with him one wife and a child, and that they all were their resident in Macao; and that all the foreign barbarians of other countries, as well as those of his own, testified that Elliot was a very quiet man, who attended only to his own affairs. Such was the messenger's report.

Upon examination, I find that since the dissolution of the English Company's factory, no Taupan has arrived here; that, for the last year, the said barbarian Elliot has been engaged at Macao in signing the passports of English ships homeward bound, and quietly attending to his business; that the arrival of ships from his country being frequent, and the merchants and seamen numerous, it is necessary without delay to have some one to oversee and keep them in order; that the said barbarian has received credentials from his country, with instructions to control its merchants and seamen; and that he is really the same as the taupans, though the name be different—it is merely substituting one barbarian for another; which change, as it leads to no evil consequences, I suppose may be allowed.

In accordance with the regulations for the taupans, who were permitted to come to the provincial city to transact their business, I have ordered the said barbarian to remain at Macao, till I have represented the case to court, hoping that, by the imperial favor, his request will be granted. Thereupon I will confer with the hoppo, and direct him to issue a passport for Elliot to come to the provincial city; that in future he may reside alternately in Macao and Canton, according to the old regulations; but in going and coming he must not exceed the limits, loitering about or procracting his stay in Canton. And again I will issue orders to the civil and military officers, and to the hong merchants, to keep a constant watch over him; and if at any time, he departs from his duty, or enters into any plots with traitorous natives, or by any secret schemes contravenes the laws, they must instantly expel him from the country, in order at once to eradicate the roots of the evil.

Whether it be right or not to grant his request and adopt these regulations, I earnestly beg his sacred Majesty to determine; and for this purpose I present this memorial, I wait for my instructions.

# CANTON PRESS,

28th January 1837.

We give below a resumé of the proceedings at the meeting of British merchants from which it will be found that a Committee to correspondend officially with H. M. Superintendents has been appointed, and the following Gentlemen have been elected to compose it, viz: Messrs. L. Dent, Ja. Matheson, T. A. Gibb, R. Turner, and R. Blenkin. We are ignorant what the objects are, to attain which H. M. Superintendents are desirous to enter into official communication with the British merchants resident here, nor do we know of what nature the powers with which Capt. Elliot is invested; but we see nothing in the arrangement to make us anticipate any danger as likely probably to result from it, as the correspondence will be one conveying information merely to H. M. Superintendents on passing events, which their residence at Macao necessarily precludes them from obtaining personally. The British community by merely entering into communication with Capt. Elliot, does not pledge itself to any thing, and if in consequence of the correspondence any important steps are to be taken with regard to the Chinese or their government, it remains open to the British merchants to decide for themselves, the Committee not being entitled to correspond with the hong-merchants or local authorities without the previous consent obtained at a General meeting. "Dust and ashes" a correspondent of our cotemporary seems to anticipate that this Committee and the General Chamber of Commerce can not co-exist, but we really see no good ground for his apprehension; the objects of the Chamber of Commerce are of a purely commercial character, and as such cannot possibly come into collision with the Committee on account of their official correspondence, which as stated before, will probably confine itself to informing the Superintendents of passing events. Or even if the British community were called on to express the views they take of our present political relations with China, and of the means by which they may be ameliorated this would not bring the British community into collision with the Chinese authorities, as we conceive those 1000 British merchants never would sanction the step for the Committee even to confer with the Superintendents, to address the Chinese Government. If there is cause of complaint, let the Chamber of Commerce lay it before the proper authorities; or let the Superintendents alone remonstrate with the Government; the merchants here ought not to mix themselves up in the affairs of the Chinese with the deputies from the British Government.

We observed that our Cotemporary expresses his astonishment that the American Consul is not one of the members of the Committee of the Chamber of Commerce, while the French and Dutch Consuls are, and asks the reason of it. Our cotemporary is mistaken to think that the French and Dutch Consuls are of the Committee as consuls; they are members of it merely as french and dutch merchants, and liable, like others to be annually elected. The American Consul like any other Consul is admitted an honorary member of the Chamber, but of the Committee he can only be, when elected to serve as an American merchant.

## MEETING OF BRITISH MERCHANTS.

A meeting of British merchants resident in Canton was held on Friday last the 20th inst., at No. 1, British Hong, in consequence of a letter having been received from H. M. Superintendents in Macao, calling upon the merchants to declare whether or not a correspondence between them and the Superintendents was desirable, and if it was, to elect a certain number of Gentlemen to form a Committee of correspondence.

Mr. Jardine having been called to the chair, and Mr. Blenkin having been asked to act as Secretary, some conversation took place between Mess. Dent, Innes, Lindsay and others, after which it was agreed, that the question "Is it desirable or not that a Committee of Correspondence be established" be simply put to the vote, without any preliminary discussion. The votes were with the exception of one (Mr. Keating's) in favor of the establishment of a correspondence with the Superintendents. The reasons which as Mr. Keating stated, induced him to deprecate all official correspondence between the British merchants and H. M. Superintendents were, that their power had hitherto been so very limited, and their interest with the Chinese absolutely none, they were so feebly supported at home, that no good could arise to the commercial community by identifying itself with the Superintendents. Besides Mr. Keating wished to know, what the specific objects of the Superintendents were in desiring a correspondence, and what the authority which the home government had given them over H. B. M. Subjects in China. The Chairman declared himself unable to answer these questions; Mr. Keating, having made use of expressions liable to give personal offence, he was called to order, and would probably not have been suffered to proceed, but for Mr. Innes observing, that every one ought to be heard, and particularly those of the minority.

The principal question having been disposed of, the manner of effecting the correspondence was discussed, and Mr. Lindsay proposed that "six British merchants be elected by ballot, and that of these H. M. Superintendent should chose three, who were to constitute a Committee of Correspondence." Mr. Dent seconded this motion, although conditionally. Here followed a good deal of desultory conversation, and Mr. Wm. Cragg was heard to object to that part of Capt. Elliot's letter where it is proposed that secrecy may, when deemed expedient, be enjoined on the Committee.

Mr. Matheson having addressed the meeting at some length, moved as an amendment to Mr. Lindsay's motion, "that five British merchants be elected by ballot to form a Committee of Correspondence, not subject to the approval of H. M.'s Superintendents."

Mr. Innes in seconding Mr. Matheson's motion, made some observations as to the necessity there was of the Committee acting conformably to public opinion.

Mr. Lindsay expressed his conviction that three individuals were sufficient number, and it appeared to him unnecessary that their acts should be influenced by public opinion, it being probable that three individuals commissioned by the community and approved of by the Superintendents would know well how to use the power confided to them; he, individually, disregarded public opinion in Canton.

Mr. Bell in an able speech vindicated the influence of public opinion, and deprecated the exclusive system advocated by Mr. Lindsay; saying that he would support Mr. Matheson's amendment, of having a Committee of five instead of three.

Mr. Dent next spoke in favor of Mr. Lindsay's motion which, we believe, had undergone some alterations, and on the meeting being about to vote,

Mr. Turner observed that as the question was one of considerable difficulty, and too short notice having been previously given, he had not been able to form an opinion, and therefore moved that the meeting be adjourned to some future day.

Mr. Dent seconded this motion, and

Mr. Innes opposing it, the meeting was adjourned about ½ past 12, by the majority of one, to be continued on the following monday. Mr. Dent then moved, seconded by Mr. Bell, that the thanks of the meeting were due to the Chairman for the very able manner in which he had conducted the affairs of the evening.

On Monday, the Chair having again been taken by Mr. Jardine,

Mr. Lindsay said that he wished to withdraw his original motion, and that the now proposed with the concurrence of Mr. Matheson, that three British merchants be elected by ballot to form a Committee of correspondence. Mr. Matheson seconded Mr. Lindsay.

Mr. Layton next addressed the meeting at some length, and proposed as an amendment to Mr. Lindsay's motion, ten resolutions, which with a few alterations were agreed to, and which will be found below in the Secretary's minutes of the meeting.

## MINUTES

Of the adjourned Meeting of British Merchants, held this day at No. 1 late Company's Factory.

Present Messrs. Jardine, Douglas, Innes, Gray, Layton, Turner, Bell, W. Cragg, Robertson, Gemmell, Holliday, D. Rustomjee, Lindsay, L. Dent, P. Stewart, Wallace, A. Matheson, Gibb, J. Matheson, and W. Blenkin.

The Chairman stated that M. Lindsay was desirous, and Mr. Matheson had assented to withdraw the proposal and amendment made by them respectively at the previous meeting on Friday last; which was put and agreed to.

Mr. Lindsay then proposed the following resolution, and was seconded by Mr. Matheson.

As it is the desire of H. M.'s Superintendents to establish a convenient mode of communication with the British Merchants of Canton, that three be selected by ballot, to form a Committee of correspondence, when Mr. Layton moved an amendment, seconded by Mr. Gibb, the following Resolutions, which were put *seriatim* from the Chair and agreed to, with only two dissentient voices; namely:

Resolved,

1. That a Committee of five Gentlemen be chosen for the purpose of corresponding with H. M.'s Superintendents, and that the Committee be called "The Committee of the British Residents in Canton appointed to correspond with H. M. Superintendents."

2. That a member of the Committee be appointed Secretary.

3. That the members of the Committee shall be elected by Ballot, and continue in office until the first monday of October next.

4. That the Ballot be taken tomorrow at eleven o'clock at the hotel of Messrs. Stanford & Marks, and that it be open for one hour.

5. That two members of each firm shall have the power of voting, and one vote to each individual British Merchant; and that two Scrutineers shall be appointed to take the Ballot.

6. That Mr. Matheson and Mr. Gibb be Scrutineers.

7. That the several members of the Committee shall immediately upon their election being declared, communicate the same to H. M. Superintendents, and express their readiness to commence the duties of their situation.

8. That whensoever the Committee shall deem it expedient to take the sense of the British community upon any subject, it shall be competent for them to call a general meeting for that purpose.

9. That the Committee be instructed not to enter into any correspondence with the Chinese Authorities or Hong Merchants, either in conjunction with H. M. Superintendents, or by themselves alone, without an appeal to a general meeting.

10. That in the event of any vacancy in the Committee, the same shall be immediately declared by the remaining members, and a general meeting shall be called for the purpose of electing a new member.

Canton January 23rd 1837.

(Signed) W. Blenkin. Hon. Secty.

---

For if any of our readers will recollect a season equally or more disastrous to the shipping in the China Sea, than the last six months have been. We have before had the unpleasant task to record severally the total loss of the *Susanna*, *Hormanjee Bomanjee*, *Hamondy*, *Margaret Graham*, *Admiral Baikee*, *Fair*, *Alexander*, *Ville d'Oleron*, to which long list we may add the loss of the *Coldstream* in the British channel her cargo having been insured here the news of which reached China within the last 6 months only. We have now to add to these, two other losses, viz. those of the *Victory* and *Susana*, which though not totally lost, have sustained much damage nor is it known whether they will ever be seaworthy again, and will cause a very heavy disbursement to the underwriters. For particulars of these two accidents we refer our readers to another column, having been kindly favored with extract from the logbook of one ship, and with Capt. Morgan's letter, and survey held upon the other.

---

We have pleasure in being able to lay before our readers the Viceroy's report to the Emperor regarding Capt. Elliot's coming to Canton. It is a document which no doubt will be read with considerable interest, and being so very favorable to a residence of H. M. Superintendent in Canton, it is probable that the Imperial court will coincide with the Viceroy's suggestions. It is true that the style of the document is anything but complimentary to Capt. Elliot, and we suppose that the account of the interview between Capt. Elliot and the Hong merchants and other Chinese military and civil officers at Macao is rendered with the want of truth which frequently distinguishes Chinese official documents. From this report it would appear that the functions H. M. Superintendents intend to discharge, are such only, as in other countries, are confided to Consuls.

The *Onyx* which lately arrived at Manila, left Liverpool, we hear, on the 14th or 16th of August, and Gibraltar on the 19th or 18th September. Very few letters by her have as yet reached Canton, but letters from Manila state that the Queen of Spain had proclaimed the constitution of 1812. Whether any change had taken place in the Ministry which may have replaced Mendizabal at the head of affairs, we have not heard, but it is reported that in consequence of this radical change of internal politics, the Queen had gained great strength, and that most of the Provinces before in Don Carlos' interest had given in their adhesion to the Queen's Government, and that Don Carlos, unable to maintain himself any longer in the northern provinces, had engaged a vessel in which to leave Spain. This intelligence differs widely from the July report from Spain, and we sincerely hope it may prove true.

A new Governor of the Philippine Islands, General Espeleta, a relation we believe of the present Governor, was to embark at Cadiz in all September, to proceed to Manila.

We hear of no English news of public interest by this conveyance.

The *Hope* brings dates from Newyork to the 12th August.

NOTICE.—The interest of Mr. John Templeton having ceased on the 30th June last in our business, the same will in future be conducted under the Firm of MIDDLETON & Co.

JOHN TEMPLETON & Co.

Canton, 29th January, 1837.

NOTICE.—The Copartnership hitherto existing under the firm of Markwick Edwards & Co. ceased this day. All Persons having claims against the said firm are requested to furward them, and all Persons indebted to the same are requested to pay the amount to the undersigned.

ROBT. EDWARDS.

Canton 31st Dec. 1836. No. 3 Imperial Hong.

NOTICE.—ROBT. EDWARDS respectfully informs his Friends and the Public that the Business hitherto carried on under the firm of Markwick Edwards & Co. as Auctioneers and Commission Warehouse Keepers will be continued by him.

Canton, 31st. Dec. 1836. No. 3 Imperial Hong.

NOTICE is hereby given that the undersigned will receive sealed Tenders of Cash for Bills of £ 1000 (payable at thirty days sight), in sets of £ 200 each) on the Right Honorable the Lords Commissioners of His Majesty's Treasury on or before 12 o'clock the 30th January 1837.

## SHIPPING INTELLIGENCE.

ARRIVED.—Amer. *Italy*, Comeraie, *Hond.* and *Rhea Prebble*, Corker, from Manila.

SAILED OR DESPATCHED.—Brit. *Viscount Melbourne*, Thomas for London. *Lord Wm. Bentinck*, Hutchinson, for Calcutta. *Ottos*, Ager, for Liverpool. *Strathfieldsaye*, Jones, for London. *Cordelia*, Creighton for Liverpool. Dutch, *Dantzer*, Abdoll, for Amsterdam. Amer. *Antwerp*, Rathbone, and *Levant*, Dumaresq, for New-York. French Sloop, *La Bonite* Vailant, Commander for Cochinchine.

PASSENGERS per *Viscount Melbourne*: Mr and Mrs Whiteman and family.

The *Victory* from Singapore sprung a leak and put into Manila, having thrown great part of her cargo over board, and the rest much damaged.

The *Pearce*, from here to Bombay struck on a rock near point Romania, and was to prevent her sinking, run on a mudbank in the harbour of Singapore. For particulars we refer to our this days paper.

The *Runnymede* was at Manila by the last advices and may be daily expected here.

The *Onage* reports that Capt. Linnes of a Spanish ship had arrived at Manila from the Sooloo Island; and reports that he had seen some Lascars and Manila men, who had a large quantity of gold and silver, the former in bars with Chinese characters; one of the men had remitted $1500 to his relation in Manila. Capt. Lowes having been long away from Manila but not heard of the Fairy being lost. It is probable that these seen are of the crew of that unfortunate vessel.

The *Canton*, *Prince Regent*, *Inglis*, *Wm. Jardine*, *Hashemy*, *Neptune*, and others are loading fast for Great Britain.

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camlets, Saltpetre, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary, Stationary, Cutlery Crockery ware, &c.* for foreigners consumption, are sold at Auction duty paid.

### RATES OF INSURANCE AT CANTON.

On first class vessels in the 10ds Canton and Union Offices of China, & care vs Agents of Offices established in Calcutta and Bombay.

| GOODS TREASURE | | GOODS TREASURE | | GOODS TREASURE | |
|---|---|---|---|---|---|
| Bombay | 2 | Singapore | 1 ½ | R.Sea Hamburg | 3 2½ |
| Ceylon | 2 | Manila | 1 | Spain or Portugal | 3 2½ |
| Madras | 2 | Malacca | 1 | America U States | 2½ 2 |
| Calcutta | 2½ 2 | Penang | 1½ 1 | Chili or Peru | 3 3 |
| Rangoon | 2 | Batavia | 1 | Mexico | 3 3 |
| Mauritius | 2 | Gt. Britain via S. | 3 ½ | E.coast of China | 1 p m |
| Austr. in | 2 | ,, direct | ½ 2 | Lintin &c. | ½ ½ |
| Sand. Islands | 2 | France | 2½ 2 | | |

Note. Above rates are from 20th Oct. to 20th April annually; during remaining 6 months the premiums are somewhat higher. Risks on Blacks are $ 9 per Cent per annum, $ 4½ for 6 months; $ 2½ for 3 months and $ 1 per month.
The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measr. 1600 cubits & upwards pay 0.7874256 of a Tl. per cubit
2nd ,, ,, ,, 1200 do. & under 1600 ,, 0.7221091 ,, ,,
3rd ,, ,, under 1200 do. 0.5067341 ,, ,,

N B The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or other head in Ships; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 1300 to $ 1320; 2d class from $ 870 to $ 879; 3rd class from $ 570 and under. The Comshaw or Present Fee is paid by all vessels 1600 Tuns or $ 2223. Linguists fee $ 1733 and Compradore's fee $ 50 Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riccinden ships are charged only about $ 1300 in lieu of measurment &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON GOODS:—Cotton Yarn remains the same, only and the lower numbers are saleable, even at the present reduced prices. Fine white and all descriptions of grey Longcloths are in good demand.

WOOLLENS.—The market for Spanish Stripes and Longells continues very depressed, so much having been, at one time, pressed on the market; and as speculation may be induced by the low prices, an advance may be looked for after the holydays, when the scarcity of money will not be so severely felt.

RICE,—is very low, and sales, at our quotations, are difficult to effect.

BETEL NUT.—has given way a little.

PEPPER.—In spite of the loss of the large quantity on board of the Victory, the prices are lower than before.

METALS.—Iron is declining and Lead is not in brisk demand at our quotation.

COCHINEAL.—is only saleable for exportation.

BIRDS NESTS.—in no demand, except for the finest quality.

CASSIA.—is owing to the vigilance of Mandarins difficult of shipment at Lintin.

COTTON.—Considerable sales were made during the late depression, and the purchasers are now endeavoring to support the market which has rallied 2 a 3 mace, and should we have no arrival for 2 to 3 weeks, it is expected, present rates will be obtained with, perhaps, some further advance. Madras however has not partaken of the improvement.

OPIUM.—We have little to add to our last report: the sales at Macao continue, but on a very limited scale and also small deliveries to Junks, and a few chests, it is said, are likely to be cleared before the holydays for the Canton Market, by connivance of the Mandarins who receive a heavy bribe per Chest. Nothing further is yet known of the intentions of Government.
The deliveries the 22nd were,
Patna, 122; Benares, 47; Malwa, 95; Total 263 Chests.

EXCHANGE.—our quotations are altogether nominal from the scarcity of money.

### EXPORTS.

RAW SILK.—Little or none of good quality is procurable, the lower descriptions are now offering at a reduction on our lowest prices, from the anxiety to realize before the new year.

SILK MANUFACTURES.—Several parcels of ready made goods are offering at lower prices than our quotations.

TEA.—There has been little doing during the week, except in *Skins, Imperial* and *Gunpowder*, for which there has been some demand during the last few days.

## LITERARY.

*( From the Indo Chinese Gleaner. )*

A curious Imperial Edict has been lately received from Court, which is as follows: "I the Emperor Keiking, with feelings of great veneration have examined the genuine records of the transactions of my late father Kien-lung and find therein inserted, that in the 6th year and 7th month of Kien-lung the Imperial pleasure was respectfully received to the following purport:

"I, the Emperor Keen lung, consider that in yielding protection to the world, and in seeking for the rules of lasting tranquility and good order, it is most necessary to regard fundamental principles. In order to frame rules of good government ere the country is in anarchy, to protect the nation, before it is in danger, it is necessary to consider as fundamental the heart and usages of mankind. If men's minds are upright, the public morals will be correct; the Court will be uncorrupt; and the national prosperity will be eternal. My family has received the throne by the gift of heaven, (or in the course of nature.) My grand father and father were eminent for their great virtues and benevolent minds, the influence of whose example, has gradually extended throughout all the world. They were certainly both of them princes such as are rarely seen in the world. I have in succession received the dominion of the Empire, and both early and late with unwearied effort have read the history of the ancients, as time has rolled on. In shewing affection to the people, and being diligent in the affairs of government, there are few that can be compared to my ancestors, who have accumulated so many virtues, and attended to the welfare of the people with so much care. In their palaces there were no intriguing female favorites, who falsely accused the innocent; or eunuchs, who interfered in the management of the affairs of Government: at Court there were no royal relatives who usurped the authority of great statesmen; abroad in the provinces, there were no violent or rapacious proceedings of the military; not only were there no such persons as these above mentioned, or no such affairs; but all incipient causes were removed. As was right, the renovating influence of instruction was generally diffused; the manners of men were raised to excellence, and the stability of the world made like that of the Tea Mountain. Now, I the Emperor with pure sentiments observe in silence the hearts and usages of men of the present day, and find, that those holding official situations, although they are faithful, and keep their minds with sincerity and act uprightly, still none are to be found, who are entirely free from the wish to aggrandize themselves by gain; those in literary situations make it their study to follow the path of virtue and literary pursuits; but none are to be found in whose minds does not exist, the wish of obtaining their promoting by under-hand or rash measures; the common classes have all of them what is sufficient, and gradually advance towards excellence and probity, but there are none who attain to perfect substantial purity of conduct; the military possess valour and are skilled in military tactics, *but few are to be selected, who will risk their lives to attack a city.* I reflect on these things at midnight: I am diligent early in the morning, and anxious in the evening; the state in which I am resembles that of a person treading on a tyger's tail, or walking across unsubstantial ice: so great is my apprehension lest the power in my hands should stall to ruin, and affairs be destroyed. But it is not what I alone am adequate to undertake the management of, all officers of state holding situations at Court or in the provinces, (as important to the wealfare of the country, as my members are to that of my own body) should certainly keep in their minds the example of the four eminent statesmen of old, Kao, Kwei, Tseih, and Ke; they should dispel all thoughts of personal advantage, or difficulty in the discharge of their duties, and disdain the practice of acquiring ease by slothful indulgence. Therefore the success or failure of those employed in Government, the good or evil turn of men's talents, the prosperity or adversity of the people,—all these should be maturely deliberated on, and considered with anxious care. In the royal path of undeviating rectitude, although merit is not at hand, still if the work be not commenced, it cannot be completed. It chiefly consists in rectifying the heart, and in strengthening the fundamental principles. Do not view it only as a transitory (or visionary) scheme, but meditate upon it as in perpetuity. That my family may have unlimited prosperity, I really have earnest hopes. The Yin-king says: "In the time of tranquillity do not forget the hour of danger, when good order prevails, be not unmindful that anarchy may ensue." These are the means by which personal security may be ensured, and the Imperial family preserved. We, both Prince and Ministers should strenuously exert ourselves to this end. Respect this.

These sacred instructions of my father, are exceedingly luminous; looking up with veneration, I perceive that my Imperial father's thoughts were profound, and his anxious care extended to remote periods; he had the wish that good order should be preserved for 10,000 years. From ancient times to the present, whenever nations have enjoyed long peace, it has always been in consequence of paying attention to the minds and usages of men. The probity of men's minds and the purity of their customs, depends on the success or failure of good instruction; the immediate effect produced, bears no visible form; but it becomes manifest from small beginnings. Upon this, depends the very pulse, (or arteries) of the nation. You must not view it as a distant or unimportant matter. I the Emperor have succeeded to the throne, and am always tremblingly alive to the interest of my people; looking up, I reflect that my Imperial father when alive cherished with great care the several important subjects of the customs of officers of Government, the usages of the literati, the lives of the people, and military tactics; how can I presume in the present day to affirm that order is already securely established, and be unmindful of silently spreading a renovating influence, and gradually changing bad customs to bring about a never-failing tranquillity and repose; but the world is too extensive, and the people too numerous for one person to rule alone. What I hope is, that all officers of Government at Court and in the provinces, will attend especially to their particular duties, and regard national concerns, and those of the people, in the same light they do their domestic and personal affairs; that they should bear in mind that it is their duty to afford me daily assistance and to aid me unceasingly. When he who holds the situation of sovereign, possesses the resolution to preserve good order, those in official situations ought also to feel anxious care, lest unhappy by dangerous circumstances should ensue. I the Emperor have selected my Ministers from amongst many public officers, (to be as useful to me as the members of my own body are,) in the hopes that they will study to bring about future glory to the country. If the prince is to imitate the famous Yaou and Shun of old, it is also necessary that his Ministers should resolve to follow the examples of Kao-yu and Kwei, and always with sincerity of heart, faithfully lend their assistance in the affairs of Government; thus they will imitate the ancients, and when they enter into my presence will study to exert their fidelity, when they retire will endeavour to supply my defects. If they obstinately adhere to mere usage and are slothful and remiss in their duty, only desiring schemes for personal aggrandizement, then for every affair that is neglected, and for every person that loses the security of his life, the misfortune that results will surely be deeply buried, and hereafter bring ruin on the country. Your feelings cannot be compared to my constant and diligent anxieties for the welfare of the country. Now it is a known truth that the principles of men emanate from the Court, and the renovation of the public manners has its origin from those employed in official situations in the provinces. If the servants of Government at Court and in the provinces, will study by purity of character and by constant diligence to form schemes for the future greatness of the country, and do not merely devise plans of idle leisure and repose; if they endeavour to rectify what is wrong in the government of the country, and pay the greatest attention to the lives of the people, I have probable hopes that the foundation my family have gained in the government of the Empire, may not be eradicated for 10,000 years. Take this Edict and make it universally known. Respect this."

### MACAO.

Letter from the Aldermau charged with Chinese affairs to the Mandarin of Heang-shan, on the delay of goods coming from Canton to be laden in the numbered ships.

"I the Alderman, charged with Chinese affairs, Intendent, Mandarin of the district of Kao-Kim, make known to you, that the owner of Ship No. 17, and other merchants of Macao, whose vessels are in port, and who are desirous to send them away, have been informed, that such goods as have been brought from Chinese merchants to be shipped here, are not allowed to leave Canton. Now the numbered ships have all paid their port dues, and it is necessary they should be sailing, as, lying idly in port, they are of no profit to their owners, nor will they be able to pay their dues next year; in the mean while this prohibition appears to me to be spurious, and if so, it is necessary that I should be informed of the cause of this delay, which is equivalent to a prohibition of the Portuguese trade in Macao. This being a subject of much importance, I insist on receiving a speedy answer, that I may inform the merchants accordingly. Macao 25th November 1836. Signed. Paiva.

*The Vice-roy's answer, communicated by the Mandarin of Heang-shan.*

Hew, the Mandarin of Heang-shan informs the *Fei-li-to* (Vereador or Alderman), that he has received the following communication from his Exey. *Tung*, Vice-roy of the two provinces.—In consequence of the representation made by the Vereador of Macao, who requests that the Hoppo be applied to in order to allow the merchandize to be despatched from Canton without delay, to load the vessels waiting for it at Macao that they may set sail; being aware of their representations, I addressed the Hoppo, that he would immediately allow the merchandize to be sent to Macao; this the Mandarin of Heang-shan is to communicate to the Vereador.

In consequence of which the said Mandarin makes this communication to the Vereador, that he may promptly obey.

Taoukwang, 16th year, 12th moon, 7th day. (January, 13th 1837.)—*Translated from the Macaista Imperial.*

## CORRESPONDENCE

TO THE EDITOR OF THE CANTON PRESS.

PUBLIC OPINION.

Public Opinion, Mr. Editor, has become the Dictator, the Caesar of the present day; all yielding to it, nothing long resists it; where the Press pervades, it quickly subdues, and where the Press does not pervade, it slowly conquers.

The Engine controls equally a Lady's bonnet in Paris and the power of the House of Lords in London. Public opinion gives a revenue to Mahran greater than a Prince's and controls the Emperor of China on his barbaric throne.

These are undeniable facts, yet with this before us, it is difficult at first to perceive the reason why every thing contrary to such an overwhelming influence does not instantly conform itself to the power which must sooner or later redress it in it's taste. The cause is this: Public opinion is very difficult to collect and as long as designs of the interested can prevent it's being gathered into masses, it's force is lost. This difficulty is the cause of so long endurance of the House of Lords in England; this difficulty is the cause why one Tartar prevents 300,000,000 of Traders, his subjects, from following their wishes in exchanging freely the commodities of this fine Empire for those they want to get from Europe.

We are apt to hold in contempt such a mass of physical power for not on now having forced their opinion on *the one man.* Before holding the Chinese however too low, let us look at our own deeds here; when I say *our* I allude to those of the British merchants.

It is, I presume, an admitted fact, that we have been most slightly supported by the British Government, in short, that, except in mere name, they have utterly neglected us. What is this caused by? Is it disregard to Public opinion on the part of the British nation; or the House of Commons? *Not so!* but because *dissension amongst ourselves has prevented the possibility of a distant party arriving at what Public opinion in Canton really was.* Hardly in one measure have we been unanimous; I lay no blame that I am not willing to share—but having seen the want of success in division, I implore my resident countrymen to unite—forbear, yield, abstain from attendence of a meeting, do anything rather than divide. To enforce this argument on my brethen here, I quote a paragraph from the London Public Ledger of August, as to steam communication, which, I think, bears on the matter.

"STEAM NAVIGATION TO INDIA."

"On Wednesday a numerous deputation had an interview with the Chancellor of the Exchequer, in Downing-street, on the subject of establishing a steam navigation with India.

"The Chancellor of the Exchequer asked by what route they proposed to go?

"Mr. Hutt replied by the "Mediterranean, the Isthmus of Suez, and the Red Sea."

"The Chancellor of the Exchequer—What" does the East India Association say to the plan?"

Major Head said that the East India and China Association had been applied to, but that no answer had been yet received from that body. In confirmation, however, of the merchants of the city connected with the trade to India, he begged leave to present to the Chancellor of the Exchequer a document signed by the leading houses, members of that body, expressive of their opinion that if a regular and speedy communication by steam vessels between this country and India, *viz.* the Red Sea, were established, it would tend materially to promote the commercial interests of both countries, and be in various other respects productive of national advantages.

Lord William Bentinck could assure the Chancellor of the Exchequer of the deep interest which was felt all over India in favour of a steam communication between the two countries by the Red Sea. He attached the greatest importance to the present project. It appeared reasonable and practicable. He deemed it every way worthy of the consideration of his Majesty's government and the East India Company, and he earnestly hoped that it would receive their concurrence and support."

Now, Mr. Editor, there are points here, and vital ones too, which, if brought forward with temper, and foreign matter abstained from—every British and American merchant would join in.—Think on what a place of force we would stand, if we had the Minister of England asking as the Chancellor of the Exchequer does here: "What do the Canton Residen; merchants say to the plan?" Observe the Chancellor of the Exchequer does not first ask what the Hon. E. I. Company say to the matter, or what Sir John Cam Hobhouse and the board of control thinks, he says; "*what does the East India Association say to the plan.*" Here is an intelligent Minister of the Crown going in search of the unadulterated opinion of public opinion.

I entreat you Mr. Editor, to impress unanimity on your Canton readers; we are never too old to learn, and I see amongst us some fresh arrivals who seem perfectly to understand the value of

PUBLIC OPINION.

30th January 1837.

TO THE EDITOR OF THE CANTON PRESS.

Sir.—In the Reports of a Public Meeting lately held in Canton, I perceive that I am stated to have expressed a disregard for the Public opinion *of Canton;* now this being an inaccurate report of what I said, may I request that you will insert this letter in your next paper. My remark, I will not vouch for the precise words, they having been used in a hurried and somewhat irregular discussion was "that I had but little respect for what was called Public opinion, which I instantly qualified by explaining that I did not apply the words to the deliberate voice of Public opinion, the power of which all must admit, but to such as was merely arrived at from Public meetings." My remark was general and applicable to any part of the world, but had it been particularly applied to Canton, it would have been an insult to a community with which a residence of more than fifteen years has completely identified myself, and which comprises among its members many highly esteemed and valued friends. It is therefore a sentiment which I entirely disclaim either having felt or expressed.

I am,

Your obedient Servant,

H. H. LINDSAY.

H. M. Superintendents of Trade.

We published in our last the resolutions adopted at a meeting of British merchants held here on the 21st and 23d January in consequence of a requisition from H. M. Superintendents regarding the appointment of a Committee of correspondence as a means of communication with the Superintendents.

H. M. Superintendents have since circulated another circular, which will be found below, in which they approve of most of the resolutions come to, but insist that resolution § 3. should be rescinded. The following is the 8th resolution:

"That whenever the Committee shall deem it "expedient to take the sense of the British Community upon any subject, it shall be competent for "them to call a general meeting for that purpose," and that without the rescission of this resolution, and substituting others, no will be found in the circular, to which change three-fourths of those present at the former meeting must agree, H. M. Superintendents cannot enter into communication with the Committee of correspondence, and H. B. M. subjects would consequently be deprived of the benefit to be derived from H. M. Superintendents correspondence.

In consequence of this circular, which was not addressed to the newly appointed Committee of Correspondence, but to those present at the former meeting, another meeting of British merchants was convened on Monday night last at Mr. Layton's house, at which a majority of the former meeting attended.

Mr. Maclean having been called to the chair, Mr. Innes opened the business of the evening, by asking whether the Committee, authorised to correspond with H. M. Superintendents, had given notice to these latter of their appointment. This question having been answered in the affirmative by a member of the Committee then present, Mr. Innes proceeded to ask whether H M. Superintendents had acknowledged to the Committee the receipt of that communication, which question was answered in the negative. Mr. Innes then said that he thought the Superintendents had shown a want of courtesy in not replying to a body instituted at the desire of the Superintendents themselves, and in addressing themselves to the British merchants generally, though they had delegated five Gentlemen, in whom they reposed perfect confidence, to receive and answer all communication, from the Superintendents. He (Mr. Innes) could not agree to the 8th proposition being rescinded; he saw no good likely to result from observing secrecy; on the contrary, he conceived it to be the undoubted right of the individual British merchant to be informed of what was going forward affecting his own interests; he conceived the Committee appointed by the British merchants, as servants to the British community, and not to H. M. Superintendents.

After some further remarks from Mr. Innes, Mr. Maclean observed that the circular, the occasion of the meeting, had hitherto been seen and read by but few, he for one not having yet seen it and that it would be desirable to read it, before proceeding with the meeting, and that on that account, as there were many in the same predicament as himself, he would suggest that the meeting be adjourned to the following day, when a more numerous meeting might be assembled, and when the sense of the community might be better ascertained.

This suggestion was opposed by several then present, on the ground that the meeting numbered a great majority of those present at the former meeting, and that it would probably not be practicable at a future time to collect again so many as then present, as most residents were preparing to leave Canton for Macao.

During this conversation the circular of the Superintendents having been received it was read.

Mr. Bell said that he was of opinion that no communication should be received from the Superin-

pendents except through the Committee appointed by the general community, in which sentiment Mr. Innes concurred.

Mr. Layton then moved that the meeting be adjourned till 10 o'clock on the following morning, which motion found no support.

Mr. Innes read a communication from Mr. Dent, whom business prevented from being present at the meeting, authorizing Mr. Innes to object in his name to the withdrawal of the 8th resolution.

Mr. Gibb thought that the withdrawal of the 8th resolution would render the Committee of Correspondence the select Committee of the Superintendents and not that of the British Community.

After some further remarks from several persons present, Mr. Bell moved the three resolutions which will be found below, which motion was seconded by Mr. Innes and unanimously agreed to.

---

Canton, 20 January, 1837

At a Meeting of British Merchants held this evening at the house of T. H. Layton Esq. convened in consequence of a letter addressed by H. M. Superintendents of Trade "to the British Merchants established in Canton" dated Macao 26 January 1837.—Present.

A. C. Matheson Esq. in the Chair, Messrs. W. Bell, T. A. Gibb, T. H. Layton, W. Wallace, J. R. Reeves, A. Matheson, James Innes, W. Blenkin, W. Mc. Donald G. G. Nicol, R. Douglas, J. Middleton, J. Middleton Jr. J. Slade and W. Cragg Secretary.

It was Resolved;

1. That this Meeting regrets that the appointment of the Committee by "the General Meeting of British Merchants" held on the 23 d instant, for the purpose of corresponding with H. M. Superintendents of Trade, under certain restrictions and limitations, has not been recognised or acknowledged by the Superintendents.

2. That whilst we regret that objections should have been taken by H. M. Superintendents to the principle adopted and recognised by the Public Meeting of British Merchants for the guidance of a Committee, namely, that on all important points for reference should be made to their Constituents by the Committee;—the present Meeting feels itself imperatively called upon to declare its determination that having appointed a committee for the reception of information on matters of Trade and public interest from H. M. Superintendents, they cannot consent to receive any communication from the said Superintendents, excepting through that said stated channel.

3. That the foregoing Resolutions be communicated to William J. Prime Esq., through whom the letter of H. M. Superintendents was circulated.

---

## CIRCULAR.

**To the British Merchants established at Canton.**

Macao, January 26th, 1837

The Superintendents have had the honor to receive a Copy of Resolutions adopted at a public meeting of British merchants held in Canton on the 20th, and by adjournment, on the 23d instant.

They are of opinion that the resolutions with one exception are calculated to meet the single object they contemplated, or had any power to put forward a suggesting the appointment of a Committee of Correspondence, namely the establishment of a channel of communication between the merchants and themselves upon all public matters of general interest to the British Trade in China.

The excepted Resolution is the 8th.

When the Superintendents left it to the meeting to devise the manner of ascertaining the general sense of the firms upon all questionable subjects that might form part of any correspondence, it certainly did not occur to them that general meetings, to be called at the pleasure of the Committee, could by any possibility suggest itself as a convenient mode.

If this resolution were adopted by the meeting with any reference to that part of their circular of the 9th instant, the Superintendents are sorry they did not foresee such a contingency in order that it might have been effectually prevented.

There is yet time however to declare that in their own judgments the process described in the 8th resolution is quite unsuited to the transaction of the kind of business which it is the object of the resolution to provide for; and indeed that it is in several other respects so inexpedient as to be impossible of admission on the part of the Superintendents.

They must further observe that unless the course they now take the liberty to propose upon this point be acceptable to the merchants, the Superintendents will feel it their duty however reluctantly to relinquish the idea of a Committee of correspondence of the particular nature which they had proposed.

It is now solicited that the 8th resolution be rescinded, and that the following propositions be adopted instead thereof.

1st. Proposition.

"That whenever the Committee (not being enjoined to confidence by the Superintendents) shall desire to ascertain the general sense of the merchants upon the whole or any parts of any correspondence which they may receive from the Superintendents, or of any communications which it may be the intention of the Committee to transmit in reply, the whole or particular portions of such communications, as may seem necessary to the Committee, shall be forwarded to the respective Firms and merchants carrying on business on their own accounts, with a request that parties desiring to offer any remarks will be pleased to forward them (sealed up) to the Committee for its consideration."

2nd. Proposition.

"That the committee specify in all such cases "the number of hours or days during which it "will be prepared to receive any such sealed re"marks in consideration."

In order to save the merchants the trouble of any more public meetings upon this subject the Superintendents request that Gentlemen who attended the meeting of the 20th and 23rd. instant, will be so good as to sign their names in the respective columns hereunto annexed agreeably to their opinions.

If three fourths of the whole shall accede to the rescision of the 8th Resolution and to the adoption of the above propositions instead thereof, the Superintendents will proceed to correspond with the committee.

If three fourths of the whole do not agree to rescind the 8th Resolution and to adopt these propositions in its stead, the Superintendents can only once more express their regret that they are constrained by a sense of duty entirely to abandon a scheme which they had hoped might prove of general advantage to the trade.

They feel assured that it will appear to all practical men of business upon a moment's further consideration that to make this project work to any useful public purpose, so long as the 8th Resolution forms part of it, would not merely by a futile attempt, but an attempt productive of signally unhappy consequences.

In conclusion the Superintendents must respectfully but plainly declare that if it be determined to have a committee of correspondence of the nature which has been suggested, the Superintendents must completely reserve to themselves the discretion and the right to assemble a Public Meeting in any way connected with it, only whenthey may see fit to do so.

By order of the Superintendents

(Signed) EDWARD ELMSLIE.

*Secretary & Treasurer.*

---

# CANTON PRESS,

February 4 h 1837

We give above the account of a meeting of British merchants called together in consequence of the receipt of a circular from H. M. Superintendents, the object of which was in some measure to alter the constitution of the Committee of correspondence as appointed at a General meeting. We are glad to be able to lay before our readers a copy of that document, which has had but imperfect circulation, having been seen by five or six people only, and then stopped in it's career, without any one being able to account for it's sudden disappearance.

When we saw the circular, only four signatures of British merchants were affixed to it, and those four were opposed to the wishes of the Superintendents, and the result of the last meeting shews plainly that H. M. Superintendents will not obtain the desired number of signatures for enabling them to do away with the obnoxious clause, and substituting for it their own; we doubt indeed whether a single individual could be found to second their wishes. Many are the reasons which may be assigned, why the British merchants here should wish to be informed of subjects of importance brought before the committee by H. M. Superintendents, nor can the British merchants be willing to refer to Capt. Elliot as he demands, the right of calling a meeting to discuss matters of importance of which the committee may have been informed; whilst we on the other hand see but slight prospect of advantage from withholding the correspondence from the knowledge of the British community. One of the reasons, why secrecy in this contemplated correspondence is objectionable to many, is, that occasions may occur, when H. M. Superintendents may deem fit to acquaint the Committee with steps taken by the home government, which may materially influence the British political relations with regard to the Chinese, and in consequence of which British property here may be endangered, or otherwise partially affect the trade; of which the committee, who being composed of merchants like the rest of the community, having previous notice, which they are not bound, but even prohibited to communicate, will be able to take advantage to the detriment of their neighbours. Let us suppose for instance that the Committee receive intelligence, which by the way is not probable but nevertheless possible, that England was fitting out a naval armament to resent the insults her representatives have suffered at the hands of the Chinese; will the individuals of the committee not dispose of their property and that entrusted to them as they may deem prudent under such circumstances, and will they not do so to the disadvantage of their neighbours; or let us suppose that the Chancellor of the Exchequer thought that the present system of Tea duties did not work well, and that he, through H. M. Superintendents, wished to be informed of the best manner in which they can be altered, or if any reduction were contemplated on what descriptions they ought to be made; will not the individuals of the committee, who had given the desired information, enjoy an undue advantage over their neighbours, in being able to shape their speculations accordingly, bringing loss on others who were not in the secret?

These are objections to the desired secrecy, which, we believe will not be denied some weight

As to the expediency of corresponding at all with H. M. Superintendents, now that the manner in which such correspondence is to be conducted, has been more maturely considered by many, we have heard several of our neighbours express their conviction that it was not called for, and likely to lead to no good result; their reasons are the distrust with which the merchants here generally look upon people sent out in some official capacity from England, as likely to meddle with the Chinese authorities or with themselves, and thereby endanger the safety of the trade or subject them to severe pecuniary loss. This was the case with Lord Napier's mission, from which only evil resulted; and though this mission has, like the stream of the desert, diminished as it runs on, much activity, under the present political connexions between Great Britain and China, is more to be dreaded than wished for.

We have frequently heard it asked of late; "what are the powers given to the Superintendents?" and we must confess that we were not able to answer this question, and on referring to an extract from the order in Council by which the original Superintendents were appointed, we find that their functions have not yet commenced, or if so, not legally, as they, the Superintendents, are enjoined in this order in Council to make public the nature of the powers entrusted to them over H. M. subjects in China, and that only after such publication, their acts be considered legal. The extract is the following, from the Canton Register of 10th June 1834;

"The Superintendents are directed to compile and "publish for general information the several re"gulations; such publication to be deemed to be "legal and conclusive evidence of the existence "and of the terms of any such regulation. A copy "of the regulations is to be delivered to the com"manders of vessels as they arrive"

This extract is part of the first order in council by which H. M. Superintendents were invested with such powers and authorities as had been previously vested in the H. E. I. Company's Supracargoes, and we are not aware that the Superintendents ever caused any regulations to be published; they seem therefore not to have assumed authority under this order.

The second order in Council creates a Court of justice, with criminal and Admiralty Jurisdiction. This order in Council we presume, H. M's present Superintendents can not act under, the Commission having been materially changed, there being no longer three but only two Superintendents, the Office & Salary of Chief Superintendent having been abolished, according to the advertisement caused to be published by H. M. Superintendents, in consequence of despatches having been received from the Secretary of State for foreign affairs, signifying the same. This act of the English minister, appears to us contrary to the act of Parliament which says; "that it shall be lawful for His Majesty to appoint not exceeding three of H. M's subjects to be Superintendents of the trade" &c. &c., and further that one of them shall be styled "*Chief Superintendent*" The Office of Chief Superintendent having been done away with, the second Superintendent being merely appointed to perform *the duties of Chief of the Commission*, it follows that the appointments are different from those prescribed by act of Parliament, nor can the orders in Council addressed to three Superintendents in commission, apply to the Commission consisting, as it now does, only of two, the above as the order in council of 10th December 1833 appointing Lord Napier, and Mess. Plowden and Davis, expressly says, that any vacancy occurring in the commission shall be filled up on the spot. We presume that an order by the king in Council, can only be rescinded by a similar order, and such order, as the Act to regulate the Trade to China and India, directs, must be published in the London Gazette, to be considered in force.

We of course give these hints only to be informed by how far we may be correct, and in the hope of H. M. Superintendents publishing the nature of the authority and powers delegated to them by the Home-government, as we are convinced that the ignorance on these points of most of the British residents here is one of the reasons why they shew but little inclination to go hand in hand with the Superintendents in their late proposals. Without such publication we suppose it not binding on any British subject to acknowledge any official act of H. M. Superintendents.

---

We direct the attention of our readers to the letter from a correspondent on "public opinion" and on the necessity of unanimity among the foreign residents here. We concur with him in this latter, but really do not see the connection between it and public opinion. That dissension among *ourselves has prevented the home Government from forming a what public opinion in Canton really was*, was not exactly the case. Public opinion in Canton was divided, nor is it unusual to find men conscientious by drawing different inferences from the same premises; this was the case in Canton, and people in England did not know how to chose between *two* public opinions. That the difficulty of collecting public opinion is the cause of so long endurance of the House of Lords, is a fallacy in the argument of our correspondent, for he must well know, that on this subject the opinion of the whole country is as yet divided, nor do we, who do not trouble ourselves or our readers much with Europe Politics, venture to predict on which side public opinion will ultimately prevail.

We publish a letter addressed to us by Mr. Lindsay, regarding some observations reported in our last number as having been made by him at the first meeting of British Merchants.

We have seen a Gentleman lately from Cadix, whose account of the contending parties in Spain differs widely from that we gave as having come by way of Manila, in our last paper. It is true that the constitution of 1812 has been proclaimed in many provinces, and likewise by the Queen Regent, but not until her life was considered endangered by the Madrid mob, did she make this concession to the clamour of the people. Changes in the administration were of frequent occurrence, and even the highest military and civil officers were not exempt from the suspicion of treachery towards the Queens Government. General Cordova had been replaced in the Chief command by General Rodil, who, some 12 years ago ultimately surrendered the Fort of Callao in Peru to the independents, after having held it long with considerable bravery. The proclamation of the constitution of 1812, may have strengthened the number of the Queens adherents, but we are sorry to say that the report of Prince Don Carlos, not being able to hold out any longer, and consequently about to abandon Spain, has not proved correct. The war in the north still continues, with doubtful success. General Evans was much dissatisfied with the treatment he experienced from the Queens Government; many privates of his legion were returning to England, and others deserting to Don Carlos.

---

The following is the quantity of Tea and silk exported during the last month, as published by the Secretary of the Chamber of Commerce. In giving it thus to the Public we cannot but regret that the Chamber of Commerce does not offer such statements for publication to the public Press, but that they should be made a matter of private emolument. We should, had the information been offered to us, gladly have given it a place in our paper.

Quantity of Tea exported to Great Britain and Ireland in the month of January 1837.

| | | | |
|---|---|---|---|
| Canton Bohea | 361 Piculs | | |

---

The following was the stock of bonded Tea in London on the 1st of July last.

| | |
|---|---|
| Bohea, Canton | 7,327,000 lbs |
| " Fokien | 6,636,900 " |
| Congo and Caper | 33,832,400 " |
| Souchong | 1,392,300 " |
| Pekoe & Orange Pekoe | 1,830,600 " |
| Twankay | 5,219,100 " |
| Hyson Skin | 990,600 " |
| Hyson, Young Hyson, Imperial, Gunpowder | 7,118,900 " |
| | 59,276,900 " |
| Stock in outports assumed to be | 10,000,000 " |
| add to this the Teas of last season, not arrived, say | 5,000,000 " |
| the total of stock will amount to | 74,276,900 " |

Assuming the consumption at 40,000,000 lbs per annum, and that 9 months, reckoned from the 1st July, will elapse before the new season's Teas can arrive, my consumption equal to ..... 30,000,000 "

there will remain a stock of ..... 34,276,900 "

over and above the supplies of this season, which have hitherto, as will be seen from our statement above, been very limited, compared to last season's shipments.

---

We hear that a new Vice-regal Edict has been issued against the shipping at Lintin. The Mandarins continue as watchful as before against smuggling, and but very few have been the cheats of Opium which have deluded their vigilance, and made their way into Canton, although the Chinese great annual festival, the new year, begins to morrow and although it was confidently expected that more leviency would be shown on this occasion. It is not, Opium alone, but all such merchandize as, on account of too high duties, could not be sold at, or exported from, Canton, f. i. Cassia, Saltpetre, Spelter, Camblets and others, experiences the same difficulties. Whether Opium will eventually become a legal article of traffic seems to be as undecided as ever, and some time has now elapsed since we have heard of any Imperial rescripts on the subject. If the present state of affairs continues, the Cargoes of the Clippers now expected from Bengal, will meet with anything but a favourable reception.

---

### Anecdotes of Hwa-te, a celebrated Physician of the three Kingdoms (worshipped in Canton as a God.

Chinting, a magistrate of Keung-ling, being affected with a disease the symptoms of which are as follows: Palpitation of the heart, loss of appetite, overpowering dejection, and flushed countenance, sent for Hwate who gave him a draft which excited vomiting.

The patient, after throwing up three catties of red hen dee worms which kept in constant motion, recovered.

He enquired of Hwate "what is the reason of my being affected in this extraordinary manner?

The Physician replied "You have been accustomed to eat too much fish: in three Years the same disease will return with tenfold violence and will then prove fatal."

The magistrate three years after was attacked with the same disease and died, in the same village. there was a poor man who had a large tumour above, his right eye. Hwate on seeing it pronounced that there was an insect flying about in the centre.

At this apparently ridiculous assertion he was laughed at by all the faculty, but having prevailed upon the patient to submit to its being removed he made an incision with the knife, and as he had said, a small yellow bird flew out.

It is needless to say the patient immediately recovered.

F.

NOTICE.—SAMUEL WETMORE Jr., is this day admitted a partner in our establishment,

WETMORE & Co.

Canton, February 1st 1837.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

## WHAMPOA PORT CHARGES, &c.

| | | | |
|---|---|---|---|
| 1st class ves. measg. | 1600 cubits & upwards pay | 0.7874756 of a Tl. per cubit. | |
| 2nd " " | 1200 do. & under 1600 " | 0.7221091 | " " |
| 3rd " " | under 1200 do. | 0.566:341 | " " |

N B. The cubit is 14¼ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products—The largest class pay from $ 4340 to $ 4320; 2d class from $ 3720 to $ 3780; 3rd class from $ 3700 and under. The Compradore Present Fee is paid by all vessels 1600 Tsels or $ 2223. Linguists fee $ 1734 and Compradore's fee $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.'

# COMMERCIAL REMARKS.

## IMPORTS.

The market for all Europe goods, both Woollens and Cotton Piece goods is in the most unsettled state, from large sales being made by the Chinese to raise money for the settlement of their accounts, and our quotations must be considered quite nominal, purchasers daily submitting to a loss of 5 a 10 per Cent, in the resale in order to realize.

RICE,—is a little more enquired after, though we hear of no material improvement in price.

STRAITS PRODUCE.—Nothing doing in PEPPER or BETEL NUT. We have as yet had no arrivals of TIN.

COTTON.—The advance we reported last week has been supported, but the clearances are not large, owing no doubt to the Chinese holy days.

OPIUM.—There has been nothing done in the Canton market but the clearances alluded to in our last. No arrangements having yet taken place with the Mandarins, sales at Macao have, we understand, again commenced.

For deliveries in January see above.

EXCHANGE.—We do not consider it necessary to alter our quotation, although several transactions have been reported to us at rates fully 5 per Cent beyond them. This however is only temporary, caused by the present pressure.

## EXPORTS.

Owing to the Chinese holydays but little has been done during the week in TEAS and RAW SILK, and purchasers of SILK

# THE CANTON PRESS.

VOL. 2d. No. 23. CANTON, SATURDAY, FEBRUARY, 11TH. 1837. No. 75

## LITERARY.

*( From the Indo Chinese Gleaner )*

THE SYSTEMS OF FOE AND CONFUCIUS COMPARED. TRANSLATED FROM THE CHINESE.

*To the Editor, Sir,*

The following paper contains an address to the Emperor Ching tih whose reign closed in 1320. It was composed by the Chief Minister of State, Wan-yang-ming, esteemed a man of letters, and a philosopher; but it was never presented. After his death it was transcribed from his manuscripts, and published along with his other writings which fill eleven octave volumes, in the twenty eighth year of the Emperor Kang-he, by Chou-wan-tah. It seems that Ching-tih was much attached to the sect of Fuh,* and intended to send an Ambassador, with expensive presents, to confer of the nations of India, with the view of bringing a few of the most learned of the Buddhists into China, to explain more fully the doctrines of that sect. The object of this address was, to dissuade the Emperor from his purpose, and to induce him to follow the sect of the learned. If you think that it, with the notes and remarks which I have added, will afford any gratification to your readers, it is at your service.

"Since the 7th moon, I have heard it every where reported, that your Imperial Majesty intends to dispatch an Ambassador to a foreign nation, for the purpose of bringing from thence, more teachers of the sect of Fuh; and that the counsels of your ministers, which have been abundantly poured in, begging your Majesty to lay aside this scheme, have been all rejected. When I first heard the report I gave no credit to it, but after ascertaining that matters were really so, I felt highly gratified, as I perceived therein, the clear opening of your Majesty's immaculate wisdom and the rising bud of virtue and goodness. The counsels of your ministers without doubt, arose from their great fidelity, and extreme affection to your Imperial person; yet, they were not able to perceive, that your Majesty's views were founded in a wish to do good, and to practise immaculate virtue—a wish which they ought most certainly to have gratified, and by the streams have gone up to the source. But, as they merely stickled for the modes of expression common among the learned of the day, their eager strife to hinder your purpose was fruitless: and it was proper for your Majesty to reject their counsels, and throw them aside un-examined. My sentiments on the subject, are different from theirs: still, however, I fear, that your Majesty's attachment to Fuh, may perhaps, not yet have gone to its highest pitch. If your Imperial affection to Fuh, do indeed go as far as it ought, then you will not merely love the name, but also the reality—not only love the end, but also attentively seek the beginning;—thus you may attain the immediate excellence, even of Yaou and Shun! The abundance of the three† ages will return: how fortunate for the Empire; how felicitous to your Imperial Ancestors!

"I beg your Imperial permission to explain to your Majesty, the nature of a genuine attachment to Fuh. Your bright genius and sacred wisdom, even during the time of your Majesty's minority, extensively sowed the seeds of virtue through all the space within the four seas. But, since your accession to the throne, having had many unfortunate occurrences to regulate, there has been no leisure for your Majesty to investigate the doctrines of the Emperors, and three Kings,‡—those divine and spotless sages. Although at stated national feasts, your learned ministers have presented addresses, they were mere declamations on the transactions of former times, explaining things according to the letter only. How could these addresses, produced by the spur of the occasion, give an adequate view of the matter. On hearing them, your Majesty may have thought,—if the doctrines of the sages be only such as these, what marvellous pleasure can be found therein! Hence your Majesty's abilities, being diverted and turned to horsemanship and archery; the eye and mind being suffered to rove in pursuit of pleasure; and not finding elsewhere fit scope for the exercise of clear intelligence and powerful talents, your attention at length fixed on these. But how can it be for a moment supposed, that your Majesty's clear intellect, did not perceive that to rest in these, was both unprofitable and injurious! Wearied by such toilsome pursuits, clear and cull-ated thoughts at the rise of the morning, assuredly have produced a growing distaste for them, and daily regret for having wasted so much time therein. But, having none before or behind, on the right or left, capable of setting forth in a clear light to your Majesty, the doctrines of the divine and immaculate ones; hence your thoughts settled on the religion of Fuh —that sect which rose up in the distant countries of the west; supposing that its doctines were capable of inducing men to cleanse the heart, to exterminate the passions, and to seek to preserve themselves from alternate and never ending lives and deaths; and that they can produce in them, feelings of compassion, and general benevolence, which would lead them to seek to renovate the whole flock of living wretchs, to help them out of their multifarious troubles; and then lift them up on high to the land of pleasures. Your Majesty, reflecting, that the present calamity of the Empire every day increases; that thieves and banditti are grown furious, like the devouring flames: that the riches and strength of the country are exhausted; that the misery of the people is already extreme;—thought,—' if I can by devoting myself to the study of the doctrines of Fuh, save them out of these calamities, I shall not only nourish the animal spirits and preserve life; not only obtain happiness for myself as an individual; but also shall be able by these, to render the myriads of wretched people in the Empire, prosperous & happy. Hence, your Majesty has sent down an order, to issue out presents, and to send forth an Ambassador to a distant nation in the West, with the view of obtaining a fresh accession of well-instructed priests of Fuh; not fearing the distance of many thousand miles; not regarding the expence of many thousand pieces of gold; not sparing to risk the lives of several thousand persons; and not deterred by the lapse of several years, provided that so benevolent an object could finally be accomplished. For your Majesty's wish was, to cleanse away at once, all the errors of ancient customs, and bring back the nation to clear and exalted virtue.

"I beg your Majesty to try my words, comparing them with your own thoughts. Were not your Majesty's thoughts as I have represented them, assuredly then, the expressions—" the clear opening of immaculate wisdom and the rising bud of virtue," which I have above, are not mere unmeaning epithets employed for the purposes of adulation.

"If your Majesty be really attached to Fuh, permit me to beg, that you will not love the name merely, but also attend to the reality; not fix on the end merely, but also search on the beginning. If your Majesty truly desires to obtain the reality, and to search for the beginning; then I beseech you seek them not from Fuh, but from the holy sages; not among strangers, but in our own country. These are not mere words of course, employed to deceive your Imperial Majesty; in proof that they are not, I beg leave to give your Majesty, a view of both sides of the subject.

"Now Fuh is the sacred sage of foreigners. Our sacred sages are the Fuh of China. Among foreigners, it is highly proper to use the Religion of Fuh, in order to renovate and lead on the ignorant and obstinate. But in our middle nation, the doctrines of the sacred sages ought most undoubtedly to be embraced, in order that we may unite with Heaven and Earth, in the work of producing and nourishing all things; even as those who travel by land, use carriages and horses; and those who travel by sea, ship and boats. Now for us who live in China, to honor Fuh as our teacher, is just like a man employing a carriage and horses to cross the sea with. Had he even Yaou-fan for his coachman, and Wang-leang‖ to support him on the right hand, the chances are, that he would not only not make a speedy passage, but also have the misfortune to be drowned! still, horses and carriages are vehicles excellently adapted for conveying men to a distance; but here, being used out of their proper place, there would not be a fair opportunity for displaying their qualities and use, to advantage.

"Should your Majesty say, that though the doctrines of Fuh, are incapable of directing in the government of the Empire, yet perhaps, they may assist men in escaping the metempsychosis; that though they cannot be used to co-operate with the powers above, in the production and nourishment of all things; yet, they may at times be useful in leading on the flock of ignorant and stupid plebians.—well, even admitting these two things in favor of Fuh, still when one has obtained them, he has only got a few of the surplus threads of the doctrines of our sacred sages! If your Majesty do not believe this, I beg leave to compare them together. I have already in some small measure, practised the forms of the Fuh religion—I highly honored and sincerely believed it, and said to myself,—" I have penetrated wonderful mysteries!" Afterwards, however, when I beheld the majesty of the immaculate doctrine; I instantly began to reject the assertions of Fuh.

"I solicit permission to represent to your Majesty, not the defects and errors of this sect; but its best things. The western nations who accord with Fuh, consider Suih-kea¶ as the most honorable of all. We, in China, who follow the sacred sages, look upon Yaou and Shun as the most honorable of all. Let us then compare them

"That for which the people of the age most honor and love Shih-kea is, that he could so train to escape the transmigration, to rise above the vulgar, and to continue still to live in the world. But in the books of Fuh from beginning to end, all that is said in regard to the life of Shih kea himself, amounts to this, that he continued to teach his doctrines during the space of forty years, and that he died aged eighty-two. This was indeed a great age; but the years of Shun, were a hundred and ten—those of Yaou, a hundred and twenty: then in regard to sex, they were superior to Shihkea. Fuh manifested consummeration, literally gave to others, spared neither his head, brains, nor eyes, in order that he might deliver men from their miseries; his benevolence to the creatures was indeed great; but it was necessary for him first to cultivate supreme virtue on the top of the snowy mountains, and wander about from place to place, before he could arrive at this pitch of excellence. But Yaou and Shun, sitting in dignified ease, and without effort, caused every thing in the Empire to find its proper place. They luminously explained exalted virtue, in order to promote affection among the nine degrees of kindred. The nine degrees of kindred being then harmonised, they next smoothed and ruled their people. Their own people thus illuminated, they then attracted ten thousand countries towards them: the people storied in the change. The influence of their virtue extended to the highest point above, and to the deepest below, even to the grass and trees, birds and beasts!—there were none who did not participate thereof! Then in regard to benevolence to the creatures, they were superior to Shih-kea. Fuh delivered lives, opened the understandings of the blinded multitude, turned man against the use of wine, forbade murder, taught men to put away covetousness, and to exterminate angry passions; these god-like effects, how noble their use!—great indeed! Yet it was requisite for him to speak into their ear, and teach them face to face, before he could accomplish these. But the light of Yaou and Shun was diffused, like the morning rays, to the four quarters, extending to all above and beneath.

"By their sterling virtue, spontaneously and without speaking, they were believed; without moving, a renovation was effected; without acting, the age was perfected. Their virtue equalled that of the gods; their comprehensive knowledge vied with the brightness of the sun and moon; the regularity of proceedings, was like the successive and unerring return of the four seasons; their manner of dispensing good or evil to men, was just and equitable like that of the Moon. Thus their conduct was names are without comparison; how far above the ordinary methods of human acting!—in this also, they were vastly superior to Shih-kea.

"As to the transformations said to be effected by incantations, the legendary miracles, and the fabrication of monsters all which are employed to delude the stupid, benighted, plots you herd,—these indeed are what the enlightened of the sect of Fuh really abhor, and wish to exterminate; calling them, "devilish productions of alien religions, which are quite the reverse of the true principles of the sect." Now if a man ought not to accord even with that which the sect approves of, how much less, with that which it abhors, and wishes to exterminate!

"If your Majesty reasons that because Yaou and Shun are long since dead, therefore it is proper to go in search of the true way from the other party; then I beg leave to remind your Majesty, that Shih kea is also long since dead. If your Majesty says: "In the other party, there are of the origin of Fuh, capable of explaining his doctrines;" then I beg to ask: are there none in all our nation —a nation situated in the middle of the earth, able to explain the doctrines of our divine sages? But your Majesty has not yet sought for such men.—Let your Majesty but inquire, whether there be not more amongst your noble statesmen and able generals, possessed of talents which render them adequate to explain the doctrines of Yaou and Shun; and, on finding them out, daily inquire of, and discourse with, them: doubtless they will set forth the doctrines of the divine and spotless at once in so luminous and convincing a manner, that your Imperial Majesty will speedily and without fail, arrive at the pure excellence of Yaou and Shun. Therefore, supposing that your Majesty's extreme affection to the sect of Fuh, springs from a genuine wish to discover the good way, I have ventured to entreat your Majesty, not to love the name merely, but also to seek diligently the reality: not to regard the end only, but assiduously to search for the beginning also; and that if your Majesty truly desire to seek the reality and beginning, not to seek them from Fuh, but from the spotless sages; not from foreigners, but in our own country. These I beg to as are your Majesty, are not unmeaning words of vain adulation, employed to deceive your Majesty.

"Could your Majesty be persuaded to love our sacred Sages, with the same ardor with which you love Fuh—to seek the doctrines of Yaou and Shun, with the same earnestness with which you seek those of Shih-kea; then there will be no necessity to send over many thousand miles of sea, to the happy land of the West, you will find it near, before the eye! There will be no need to spend many thousand pieces of money, to risk the lives of many thousand persons, and to wait for several years, before the object be gained;—no: without even so much as moving a single particle of dust, and still intimately associated, like a snap of the fingers, you will reach the sacred spot: marvellous and god-like power, will in a moment effect whatsoever your Imperial wishes require.

"These are not high sounding assertions, made for the purpose of imposing on your Majesty. Should your Majesty inquire into the foundation of my assertions, they will all be found capable of proof. I adduce the testimony of Mung-tsze, (i. e. Confucius,) who says: "The very moment that I desire to be virtuous, the attainment is made;" and—" but for one day to resist corrupt propensities, and revert to the proper use of reason, and the whole Empire will return to virtue;" this testimony also of Mung-tsze, (Mencius) who says, " All men may attain a degree of virtue equal to that of Yaou and Shun." Can it then be supposed, that these sacred ones wished to deceive us? I beg your Majesty to reflect again and again on this matter. Try, by asking your noble ministers; and if, on examination, it be found that I have spoken falsely, I desire to suffer the death appointed by law for those who commit this crime.

"I am ignorant, and fear I cannot escape your Majesty's displeasure. Humbly perceiving in your Majesty's mind, the bud of Imperial virtue, without adorning, I instantly leapt for joy, and hastened to prepare and present this address, the intention of which is to follow out and strengthen your Majesty's purpose; hoping your Majesty will condescendingly examine and adopt its suggestion;—then how happy for your Imperial ancestors and the district gods! how happy for the Empire! how happy for myriads of succeeding ages!"

The above is a free translation, and contains a tolerably fair specimen of the mode of reasoning common among learned men in China, on subjects of a moral or religious nature. Right ideas of their ancient sages, extraordinary partialities, conveyed of every thing that is Chinese, most ready method of argument, and a taint of unbelief in Confucius in every thing sacred, pervade the whole piece.

These Deism and Sceptism. Admitting the idea of an exclusive religion, and admit that one quite sufficient, may here find examples in the state of the systems of China under whatever form, that admits implied consideration of the doctrines of their religion for universal adoption, has presented Papal writers in general from framing an exclusive creed opposite countries, as the sphere of its operation. They have little idea of a system that claims the world as its province; and the fallacious, pub-lian arguments, here urged against the sect of Fuh, are likewise urged against Christianity.

The original possess much merit as a Chinese composition: the translation gives a very inadequate idea of its elegance and force.

Yours truly,
TOO-YU.

## EXTRACTS

CHEAPER NATIVE THAN SPECIE.—In former days almost the whole trade of this country with the East Indies was carried on with specie. In making up a voyage, it was necessary to take a sufficient amount of silver dollars to buy a cargo of the expensive commodities of the East Indies. When the vessel arrived in India, however, it not unfrequently occurred, that those articles were unexpectedly dear, and the sum of the market such, that it would be more advantageous to lend with the cheaper commodities of coffee or sugar. The dollars however, were there, and the proceeds of them were to be brought home.—Now and then the proprietor sent a voyage and took the specie to themselves. It was always necessary to get it insured, therefore in addition to the danger of pirates, the other dangers of the seas, and the enemy could sometimes swallow a ship and deposit the specie home: the treasures of of its "deep and secluded caves." The dollars in China were many of them brought into gods, and many of them equally presented to popular devotion, falling of consumption, found their way to England, to do the inglorious service of paying for manufactured goods, and expelled by a good many of them came around to our shores again in payment for our imports.

Within a very few years past an easier and safer method has been devised for remitting the dollars home. The bills of the United States Bank drawn on their banker in London, have been taken instead of specie, and found to be quite as good for the purpose, though they cannot be made into gods, they can be sent to England, and are even better for ever purposes than dollars. Many recently if good solvent merchants have made direct arrangements with some well known banking house in London, and obtained a letter of credit or authority to draw bills, for an amount equal to probable exigencies. These letters of credit are again found in China to be a good article. The shipowners of the ship is then embarrassed by a surplus of dollars, or of funds, he looks at the market and buys a cargo worth fifty or two hundred thousand dollars, just as he thinks best for the interest of his owners. For this purpose draws the banker amongst our first cost to his commission. The bills are drawn at six months' sight, so that there is time enough to put the banker in funds after the ship gets home. In this manner of conducting the business, the merchants of the united States have a decided advantage over all the nations of Europe, nothing to lose. No insurance is necessary, for no risk is run. The heavy premium of the bullion is this. Our cotton goods to England. English manufactures go to India, and the produce of all India are brought to the United States, and a bill of exchange or letter of credit passing from hand upon the circle, settles the whole matter better than silver dollars when they went the usual round. This is a fair sample of the ease and usefulness of credit, whether on a large or a small scale. The saving by this new shape of the trade, goes to lessen the price of the commodities imported, and heightens the price of those exported, and this eventually finds its way to the producer of the export and the consumer of the import. These are the powers, therefore, and not the metallists, who are benefitted by the use of credit.—*Journal of Commerce.*

INGENIOUS AN ADVENTURE.—A tall six foot er, with a spice of oddity and humor in his ph z, and a breast-pin of the morning sun side in his bosom, walked into the office the other day, leading by the arm a rustic bella' as ever perpendicular, stood fresh on a water lilly. Being an inner sheet observer, as Jo h Downing would say, we "kinder blushed" —Now for a scene: thought we. "Here you the head man here? Ahem' head man! oh—you mean the—marriage collector!—the—the——I—ahay *found* it so awkward—he means the—the head eater (*sugar* editor)"——Oh—oh understand now—you've brought us a lot of wedding cake—has—well—marm, we are pretty much all head eaters at that."—The remainder of your jobolication—I'm spoken. Out and out nice business and quite yet—ah, ah, ah, ha!—Yet see, Mister, I thought as how I'd just fetch my gal in to me, (putting his mouth cloth to our ear, and then screaming as if we were deaf,) to see your printing offs go, and hind a scrypsh her like, you know." "My dear fellow, we am not deaf," said we, screaming in our turn at the top of our lungs, and hetching up a dictionary——"Ask pardon, I've just been taking it with a deal man Jakes—may be

When Taglioni in Paris, some time ago, was dancing as *Sylphide*, a Gentleman, sitting in one of the boxes near the Theatre, was so charmed with her performance, that he suddenly tore a bouquet of flowers from the head of a lady next to him, and threw it to the dancer, to the astonishment of the audience and no doubt to the great annoyance of the plundered lady.

Letters from Batavia mention that the Postage on news papers there has been reduced to one third of the former charge.

The following is an abstract of N. M. Rothschild's will. To his widow he leaves £20,000—per annum his house in Piccadilly as likewise the house he bought of Princess Amelia, all his furniture and plate; £125,000 to each of his daughters; £1000 to each of his wife's brothers, and £40 to each of her sisters. He has further bequeathed £10,000 to Barth. Cohen, one of the executors, and his four sons are residuary legatees in equal shares.

In case of the Misses Rothschild not marrying, they are to receive £80,000 on attaining their 24th, and another £30,000 on attaining their 40th year. Mrs. Rothschild is the one most favored in the will. His business is to be continued at least during five years by his four sons, under the advice of their uncles.

---

The *Hooghly* from Sydney and Manila has brought papers from the former place to the 24th November, in which we find little of sufficient interest for extract. Temperance societies seemed to begin to prosper in that Colony, and we find the names given of five whalers sailing from Port Jackson on temperance principles. The number of members belonging to the different temperance societies amounted to between 8 and 900. The following is an extract from the Colonist."

"For the last ten or twelve years the two great settlements of New South Wales and Van Diemen's Land have been gradually acquiring importance in the public estimation at home. The numbers of respectable emigrants who have arrived during that period can hardly have left a single parish in the three kingdoms that has not some one or more of its inhabitants interested in the welfare of some friend or connexion in these regions. To the personal interest which this circumstance must create so extensively among our countrymen at home, we are to add the more general interest which the British people must take, as a public, in settlements, which, from the rapid augmentation of their Imports and Exports, present now very considerable items in the trade of the British Empire, and are yearly increasing in these respects with a rapidity which would, on more reference to the progress of the old American plantations, appear astonishing—and is only not astonishing when we consider that with unprecedented success the Australian settlements have had unprecedented means of securing it.

The present, however, is an era in the history of Australasian countries. Closed up in Van Diemen's Land some of its more enterprising inhabitants make an unlicensed settlement on the coasts of the neighbouring continent, taking with them large flocks of sheep and an invaluable stock of the right sort of *experience*. The seat of their occupation is speedily converted into an offset of the New South Wales Government, and we have already in that quarter the nucleus of a thriving colony.

Further along the coast the Spencer's Gulf Company, lured by the growing wealth of the old colonies, have formed their first settlement; and though believing their plans to be faulty and impracticable, and that in consequence much individual distress and possibly ruin will result from an obstinate adherance to them, we see in that quarter a *beginning*, the end of which, we doubt not, will also be another thriving colony of Englishmen. Swan River and King George's Sound have been settled for some years now.

The increased political importance we oh the extended limits of the British settlements—four distinct Governments—will give to the Australasian territories, is a subject with us of much congratulation; and there is a satisfaction, less ardent, but more intensely felt, in the distant prospect which the imagination paints of the new and flourishing people, with their towns and their villages, their shipping and their commerce, hereafter to come into existence in the still desolate wilds of the *Terra Incognita*."

---

## PEKING GAZETTE.

*From a correspondent.*

The Peking Gazettes last arrived contain little that can be called late information. But from the less important edicts and memorials, things very characteristic are often to be gleaned, however uninteresting the details may otherwise be. The latest numbers of the Gazettes that have been published in Canton are of date the middle of November.

*Ke-ying*, the imperial commissioner who was recalled from Kelung, in consequence of some offence of which he was found to have been guilty, in his office of Commandant of Peking, has been reduced from the first to the third degree of rank, and is to receive appointment as Vice-president of one of the administrative Courts or Boards. Several offices which he previously held being all vacant, promotion is afforded to many in the higher ranks of official employment. The commander-in-chief in Mantchouria, and the Commandant of Chingtoo in Szechuen, both of them, equally with Keying, members of the imperial family, are removed from the situations they have occupied, the first to supply Keying's place in Peking, the other to take the chief command in Mantchouria; and several other changes follow in the train of these.

Much has been said of the absence of hereditary rank in China, and we have lately seen it represented, that even members of the imperial kindred descend, in a few generations, to the level of the common people. This is far from being the case. We cannot now stop to prove our assertion; but many extracts that have at different periods been made from the Peking gazettes serve plainly to show that the imperial kindred, however distant the relationship between them and the reigning sovereign, enjoy numerous privileges. In one of the Gazettes now before us an instance of this nature occurs. A police messenger was sent to the house of one of his privileged class, to apprehend two individuals who had put themselves under his protection. The messenger was resisted, and when he produced his warrant, he only the more enraged this hot-blooded descendant of the virgins of the 'snowy mountains.' The messenger was beaten, plundered, and at length sent before a magistrate, for having endeavored to perform his duty. The case was represented by a Censor to the emperor, and has been referred to the jurisdiction of the Court of the Imperial Household, conjointly with the Board of Punishment.

*Canton.* An officer in the commissariat, now deceased, is found to have been a defaulter to the amount of nearly 7000 Taels. According to the Chinese law his family is compelled to pay; and they being unable, all his relatives are required to come forward and make up the amount. Amid all its pretensions to paternal kindness, the Chinese government appear often to assume the character rather of an unmerciful creditor.

---

# CANTON PRESS,

February 11th 1837.

We have several times already called the attention of the public to the crowded state of the foreign Factories, and to the fact that the increase of trade causes annually an increase of foreigners engaging in it. In our paper of 24th September we stated that, exclusive of the foreigners in Macao, the residents in Canton numbered 227. The Anglo-Chinese Calendar for this year informs us that the total number of residents now in China is 277 of which 45 live at Macao and Lintin; there appears consequently to have been an encrease of 22 only to the number of residents in Canton; but the real encrease has been much more considerable, in fact double that number, as we shall presently show. The Anglo Chinese Calendar of 1836 included in it's directory the names of 28 Parsees and other native merchants from Bombay, whilst the one of this year has only 6; such names, a decrease which has probably been occasioned by the earlier departure this year of most of the Bombay merchants, who pay their annual visit to Canton, and whose names do consequently not appear in the Calendar, thus making their number appear on the decrease which is not actually the case. Deducting then the Parsees, most of whom are more migratory than the rest of the foreign community, it will appear that on the 1st January 1836 there were 141 European foreigners in Canton, and on the same day of 1837 the number was 186, shewing a real increase of 45 individuals. Before this accession to our number, houses in Canton already were extremely scarce, and rents had begun to rise in consequence. The ground on which the Factories stand is too closely occupied by buildings to allow of any additional houses being built upon it, and hitherto the Chinese have not thought proper to grant an extension of our premises, nor has the Hong merchant, who occupies one of the foreign Factories, been prevailed on to quit it for the use of foreigners, although in so doing he would probably realise a much higher rent than what he can now value his premises at. It was to be one of the objects of earliest consideration for the Committee of the General Chamber of Commerce, to try to obtain more space for us, and we hope that something may already have been done to prepare the means obviating this growing nuisance of being so closely packed, and of paying exorbitant rents for miserable accommodation.

We are perfectly aware that the difficulties which the jealousy of the local government will probably oppose to what they would consider as an encroachment of the foreigners, and as likely to lead to the so much dreaded increase of intercourse with the redheaded barbarians, will be difficult to overcome, but we trust that these obstacles will not be unsurmountable, and that wisely directed exertions and perseverance will at length prevail. We believe that the local Government has not yet been applied to on this subject, but if such application is intended, the ground near the river westernmost at the extremity of the Factories, facing east, and now occupied by eating houses, and duck and geese magazines, seems to be the most eligible, nor do the houses now on it appear to be worth much. On the score of expense there would consequently not be any objection. The chief objection that foreigners may raise to this situation, is the great danger from fire to which the neighbourhood of Sha-ming exposes it; but we presume that the Chinese would enforce police regulations, to remove all or the greatest part of that floating population to some more distant spot. To the east of the Factories, divided by a narrow Creek only, are many of the Hongs of the security merchants, and it would consequently not be practicable to extend our habitations in that direction; nor would it be desirable to do so in a northerly direction, the foreign Hongs being already too deep for a free ventilation, and we should thereby be brought into even closer neighbourhood with the dirty habitations of the Chinese artizans, from which, at present a narrow lane of 6 or 7 feet wide protects the Factories to the north. The bringing out the front of the Factories to the southward, and thus approaching the banks of the river is objectionable, as it would curtail the *pleasures* of the Reposidentia walk, and would be liable to the same objections as extending the foreign houses in a northerly direction, namely, the increased difficulty of ventilation.

It is therefore only to the south and west that an extension of our premises is desirable, and should, on application to the local Government, a refusal be received we would then propose, that if Minqua cannot of his own free will be prevailed on to remove his *pesades* to some other place, this infringement of the few privileges foreigners enjoy here, should be pointed out to the local government, which can hardly fail to accede to the justice of our demands in this instance.

---

H. M. Superintendents have informed the community of Canton by circular, that Mr. Morrison, Chinese interpreter to the Commission, is now resident in Canton, and will obligingly render his services available to the General Chamber of Commerce. Though Mr. Morrison, when applied to heretofore for translation of documents, has ever been willing to render his knowledge of the Chinese language as useful to his neighbours as possible, this communication from H. M. Superintendents deserves the warmest thanks of our community.

H. M. Superintendent, Captain Elliot, has addressed a note to each individual of the Committee of correspondence, acknowledging receipt of the letter addressed to H M. Commission, but declaring his regret of not being able to correspond with the Committee, though individally he entertained the greatest regard for it's component members.

The Chinese new year, the 17th of Tsou-kwang, began on Sunday last, and the Chinese festivities, &c, as is usual, still continued. A great many temporary theatres have been erected in which plays are performed from morning till night; and the least pleasing part of these holidays to the Foreign community is the incessant and stunning noise the Chinese contrive to make not only with their fireworks, but with all kinds of musical instruments among which the Gong is the most frequently and actively employed. The weather has been most propitious for the occasion; the temperature being, with an almost unclouded sky, unusually warm for this season of the year. At noon the thermometer in the shade was generally at 75° Fahrenheit; but few of the Residents here remember so mild a winter, we having, with the exception of the first days of January, experienced no cold of any duration. Last year in February we had a snowstorm and the thermometer during the first half of the month ranged between 41 and 50 degrees.

We have received a communication signed 'Marplot' but though we will by no means assert that we are capable of understanding the whole of its meaning, some parts of it appear to contain personal allusions, and we therefore decline giving it insertion.

The *Roman*, (Amer.) Capt. Benson from Newyork, has made, for this season of the year, an extraordinarily quick passage of 113 days only, bringing dates from Newyork of the 19th October, whilst our latest advices from England were at the time of her arrival by way of Halland of the 18th and from Holland of the 20th August.

The Champlain, Capt. Ritchie, left Liverpool on the 26th October and arrived at Lintin on the 5th February, completing her passage, in the, for this season of the year, unprecedented short time of 103 days. We have been favored with the loan of London and Liverpool papers from which the following are extracts being from October papers only, not having seen any of September. Affairs in Spain look as complicated as ever, and in spite of General Evans reported victory on the 1st October, Don Carlos' footing in the country seems to be firmer than ever. His General has beaten the Christinos near Malaga, so that the Carlists are no longer confined to the north of Spain.

Money was very scarce in England, The Bank had raised it's rate of discount to 5 per cent. 3 p c. Canada 87½ a 87¾. Markets unfavorable both to Silk and Tea.

Prince Ferdinand has resigned the command of the Portuguese army and his colonelcy of the 5th Cacadores, in consequence of the insubordination of the army, and of the privates having of themselves dismissed their officers. We find allusions made to a revolution that has taken place in Lisbon some time in September, and conducted by the military, but our files of papers being of October only, we do not find of what nature the revolution was.

A fire in Quebec has destroyed property to the amount of £75,000.

The British Legion under the command of General Evans has gained a victory over the Carlists on the heights of Ametza in which the Carlists are reported to have lost 1000 men in dead and wounded, whilst the loss of the christinos did not exceed 400.—

The french ministry was changed in September, Mr. Thiers, the ex Minister was travelling in Italy.

The Ministers of Charles X, have by order of Louis Philippe been released from their confinement in Ham.

Gomez, the Carlist General had taken the town of Cordova, and his troops had sacked it and murdered a great many inhabitants. After leaving the town he beat General Escalante within 12 leagues of Malaga.

Letters from Rome talk of the sudden disappearance of Don Miguel, and of the number of Spaniards and Portuguese refugees who formed his Court. It is reported that a French General, whose name, however, does not promise much success to the undertaking, and several German officers, form part of this new crusade, which has been preparing with great mystery. The late events in Portugal have damped the ardour of this enterprise, and given another direction to the efforts to raise a counter-revolution in favour of the usurper of the throne of Lisbon.

The Government have received an intimation from Genoa, that Don Miguel intends shortly to make a descent upon this country with about 300 men, among them some Italian soldiers who have been hired for this expedition, and that three vessels, two under Sardinian, and one under American colours, have been already taken up to convey them; that this attempt at restoration is chiefly fostered by the Duke of Modena, who in the event of its succeeding, has promised to bestow the hand of his daughter upon the Don. Two vessels of war, the corvette Don Pedro I. and Scorpion brig are lying out in this river, and are to sail in a few days to watch their movements. *Lisbon 15th October*

The French Government now does assist the Queen's Government in Spain, three battalions of the *Legion d'Algiers* having passedon the 23d September through Lerin on their way to the main body of the Constitutional army, between Lodosa and Logrona.

We see from the papers that Mad. Maliban de Berlot, has died, but do not meet with any notice in what manner the musical world were deprived of this distinguished singer. A subscription was to be set on foot in Brussels to erect a monument to her memory. We subsequently find that her death took place in Liverpool, during the musical festival there, at which she was engaged to Sing.

HORRID BUTCHERY.—The following is an extract from a recent letter from Buenos Ayres "A most horrible scene took place in one of our public squares a few days ago. Seventy-two unfortunate Indian soldiers having been tried and condemned for mutiny, were brought out and shot. In case that life should not be extinct, their throats were also cut. They were carried away by oxen and sevens from the place of execution, and thrown *into a ditch dug on purpose for their reception*. The streets were absolutely streaming with blood, and presented a most frightful spectacle. One Indian, not having been quite killed, rose up from the heap of wretches, and vented imprecations on his slaughterers. Some soldiers immediately despatched him with the butt-end of their muskets."

"A telegraphic despatch, dated Bayonne, the 18th inst., states that Rodil was marching on Cordova. He was on the 19th at Daymies. Another despatch, date, the 20th, states that Gomez had quitted Cordova, after having possessed himself of several millions of reals, three pieces of cannon, and bringing off 1,000 recruits, armed with the muskets of the National Guards. He was at Montilla at the moment when one of his columns defeated Escalante. On the 11th he was at Pieros. It was reported that Alaix had come up with his rear-guard. Espinosa was still on the 6th at Carmona. Seville was in terror. The Andiense Royale (the Judges of the Royal Court,) had left the city. The troops from Cadiz had not arrived, owing to their want of sens."

The change which the affairs of Spain had undergone and were undergoing had excited much speculation on the continent. From nearly every quater we find repeated, that the moment when Don Carlos shall have possessed himself of the capital city of any province of Spain, *the Northern Powers will recognize and support him* and one of the papers before us affirms that he is about to make a dash at Burgos.

---

### *Insurrection at Mozambique.*

By private letters dated the 22nd of June, intelligence has been received of an insurrection in the capital of Mozambique, in which the government of Donna Maria had been overturned, either as is said with the mere object of plunder and massacre, on the part of the insurgents, or with the intention of declaring in favour of Don Miguel. It appears that the plot originated with some of the officers of the fort St. Sebastian, in conjunction with some Portuguese prisoners banished to that province, and that having captured and imprisoned the governor, they had been in possession of the town and forts from the 9th of May to the 14th of June. On the 14th, it is said, that a plan was on the point of execution for plundering the town, murdering the governor and Europeans, and of making off in the vessels in the harbour, in a similar manner to the dreadful scene acted last year at the Cape de Verd Islands,) when providentially His Majesty's brig Leveret, in search of slave vessels on the coast, sailed into the harbour. A requisition was immediately made to the commander, Lieutenant Bosanquet, for assistance, which was promptly acceded to, and by his advice the plan of a combined movement of the Portuguese troops and the men from the brig was formed, to be put into execution the ensuing night. This movement was happily effected with such secrecy and precision, that by the following morning the forts had been regained, the governor released, and the lawful authorities reinstated without bloodshed, and before the people of the town were aware of what was going forward. Lieutenant Bosanquet and his crew retained possession of the custom-house and place for two days, till tranquillity was perfectly restored, and has since sailed for the Cape of Good Hope, carrying with him the principal insurgents, namely, the lieutenant-colonel and lieutenant of the fort, and nine soldiers, who are to be sent prisoners to Portugal. He is also the bearer of despatches to that government.

A serious contest has arisen between the Ottoman Porte and the representatives of France and England, not only upon the increase of the tax on the exportation of silk, but upon the principle which causes these constant exactions, and the effect they will produce upon European commerce in Turkey. It is well known that the chief of the customs, after prohibiting the colonial coffee, which is in such consumption in the East, has done the same by the Asia Minor silk, which is an article of even greater exportation than the former. The Porte has been obliged to accede to both articles, but has not yet indemnified the merchants who have experienced considerable loss by this event. The chief of the customs is nothing but an instrument. Whilst the French and English merchants were deprived of the purchase of these silks, considerable quantities were sent by the Russian ones to the manufactories of Moscow. By a manifest violation of all treaties, the increase of the exportation tax was not applied to them. At the very same time that the ambassadors were promised the redress of their wrongs, the custom-houses of Scala Nova, Mecelin, and Trebisonde, were preventing the sailing of their vessels by new exactions. No commercial system can be founded upon a base which is both arbitrary and restrictive. It is to be hoped that the Sultan will at length put an end to such proceedings.—*Courrier Français.*

On Wednesday last the 8th inst. at about 8 o'clock in the evening a fire broke out in the suburbs of Canton, near the place of execution, but was soon got under, having destroyed about 30 small houses.

CANTON GENERAL CHAMBER OF COMMERCE.

The rules and Records of the Chamber are open to the members every day excepting Sundays; and the Secretary will be in attendance from 12 till 3 o' Clock.

By order of the Committee,
WILLIAM SCOTT.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1660 cubits & upwards pay 0.7874756 of a Tl. per cubit.
2nd " " " 1200 do. & under 1660 " 0.7221091 " "
3rd " " under 1200 do. 0.5062341 " "

N.B. The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from @ 43.0 to @ 4320; 2d class from @ 3240 to @ 2700; 3rd class from @ 2700 and under. The Comdr. or Present Fee is paid by all vessels 1660 Tons or @ 2223. Linguists fee @ 1125 and Compradore's fees @ 56. Also Pilotage @ 68, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Rice laden ships are charged only about @ 1300 in lieu of measurement &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

Owing to the holydays we have but few remarks to make on the state of our market, which has with but slight except.ons been totally inactive.

This has been particularly the case with Imports, and we have but few transactions of notice in them.

Rice.—It is expected that it will shortly somewhat recr ver from the low prices of our quo ations, which are lower than what they have been during a series of years.

Cotton.—A few sales were effected immediately before the new year at full prices, and the market is expected to open firm if no new importations arrive.

Woollens.—The accounts from the interior are favorable, but further heavy supplies just arrived will probably check any rise in prices, particularly of Broadcloths and Longells.

Lead.—Iron and Copper of good quality in good demand.

Opium.—Very little, with the exception of the Chests delivered for the holydays, to which we alluded in our former reports, has been doing in this drug. The Mandarins are still troublesome, but it is now confidently reported that an arrangement has been effected between the smugglers and mandarins, which will come into operation in a few days; few or no brokers have yet made their appearance. The deliveries up to the 8th have however been more considerable than during any week during the past two months. They were.

Patna 131, Benares 83, Malwa 86, Total 240 Chests.

### EXPORTS.

Teas.—There has been considerable demand for green Teas for the American market. The teamen do not yet seem disposed to give way in the black teas to any extent. The advices from England brought per Champion to the 20th October, are anything but favorable to *New Silk* and Tea. The former is quoted 2s a 22s 6d for Tsatlee, and consignees of the latter complain of the quality of last seasons shipments, prices having given way considerably.

Exchanges.—both on Bengal and England, remain in an unsettled state. Bills are offering at more favorable rates than our quotations, but money continues exceedingly scarce.

# THE CANTON PRESS.

VOL. 2d No. 24. CANTON, SATURDAY, FEBRUARY, 18TH, 1837. No. 76.

## PLAN FOR THE BANK OF INDIA.

1st. A Joint Stock Company to be formed in Great Britain, to be entitled the "BANK OF INDIA," and to be incorporated by Charters from the Crown and the East India Company.

2d. The Capital to be £3,000,000, divided into 30,000 shares of £100 each. £10 per share to be paid on the allotment, and £15 per share more on obtaining the Charter from the Crown, the remainder as soon as the money can be beneficially employed, but not in greater instalments than £10 per share, nor at less intervals than three months between each instalment. 15,000 of the shares to be reserved for distribution in India.

3d. The Bank of India shall have its chief office in London, and the management be vested in a board of twenty-four Directors, each Director to hold not less than 40 shares. The Directors, first appointed to remain in office five years, from the 1st January following the date of the Charter from the Crown, with power to complete their number in case of vacancy during that period.

4th. The management in India to be confided to a Board of nine Directors at Calcutta, with subordinate Boards at Bombay, Madras, and at other places where Branch Banks may be established. The first Directors in India being appointed by the Direction in London, and subject to their control.

5th. After the lapse of the time appointed, the Directors in London to go out of office in rotation, one-third each succeeding year; but to be eligible for re-election by a majority of the Proprietors. The holders of

| | | |
|---|---|---|
| 5 Shares, | and less than 15, to have | 1 vote |
| 15 Do., | and less than 40, | 2 |
| 40 Do., | and less than 80, | 3 |
| 80 Do., | and upwards, | 4 |

6th. After the lapse of three years from their appointment, the Directors in India to go out of office in rotation, one-third each succeeding year, and to be eligible for re-election by the Proprietors in India, voting in the same manner as in London; *but the elections in India to be subject to the approval and confirmation of the majority of the London Direction.*

7th. Natives to be eligible to be elected Directors in India.

8th. The Bank of India to confine its business to Banking exclusively—that is, to receiving Deposits and keeping Cash Accounts, granting Cash Credits for a limited time, and with approved security, Discounting Bills. The issue of notes payable on demand, and in gold or silver, as may be hereafter determined, *the purchase and sale of Bills of Exchange, and the granting of Drafts and Credits, by the establishment in London, on the several establishments in India*, and *vice versa*. The Bank is not allowed to make advances on landed or other immoveable securities, nor upon growing crops, nor to act in a mercantile capacity, by undertaking the shipment or sale of goods.

9th. Quarterly Accounts to be transmitted by the Boards in India to the Directors in London, and Accounts and Reports of the Finances of the Bank to be annually made by the London Board to all the Proprietors.

10th. The following gentlemen to act as a Provisional Board of Directors until the Charter from the Crown be obtained, without which the Bank of India will not be constituted. The Provisional Directors, after the Charter is completed, to be permanent, according to article 3.

---

*To the Honourable the* COURT OF DIRECTORS *of the East India Company.*

HONOURABLE SIRS,—A Meeting of Members of the East India Houses, and others deeply interested in all measures having a tendency to affect existing relations with that country, was held on the 10th instant, for the purpose of taking into consideration documents purporting to be a Prospectus and General Outline for the Establishment of a Bank connected with India; which document having been read and considered, the Meeting were of opinion—

That various projects for the formation of an Anglo-Indian Bank being already in agitation, and the formation of such Establishment being in their opinion inevitable, in the present state of the public mind, they consider it their duty, as well as their interest, to endeavour to avert the evils which would infallibly result from such a measure inconsiderately or injudiciously framed, by lending their aid to the formation of a Bank adequate to all the existing wants—which, by confining its transactions strictly to Banking principles and business, will insure stability and success.

The Meeting were of opinion, that a Bank formed on such principles, and with such views, to be denominated the "Bank of India," established by Act of Parliament, having a Charter from the East India Company, and possessed of adequate capital, would under judicious management and control, become an instrument of general good, by facilitating the employment of a portion of the redundant capital this country, for the general improvement of Indian Commerce, giving stability to the monetary system of India, preventing those occasional fluctuations to which it is at present subject, and also by affording the Company facilities and advantages in their future financial arrangements.

Influenced by these considerations, the Meeting nominated the undersigned as a Committee, to communicate with your Honourable Court, for the purpose of ascertaining how far the proposed measure would meet with the concurrence of your Honourable Board. We have, accordingly, the honour to submit herewith, a Prospectus of a Bank, subscribed to by many of the Houses engaged in the India and China trade, and other parties. We beg to solicit the favour of an early reply, and to state, that should further explanation be required we shall be ready to attend your Honourable Court, whenever we may be honoured with an intimation to that effect.

We have the honour to be,
Honourable Sirs,
Your most obedient, humble Servants,

LONDON, 12th *May*, 1836.

---

31st *May*, 1836.

*To the Right Honourable* SIR JOHN CAM HOBHOUSE, *Bart., President of the Board of Control, &c. &c. &c.*

SIR,—Is the Directors of the East India Company may not feel disposed to incur the responsibility of sanctioning a measure of such vast importance as the establishment of a Chartered Banking Company for British India, without the previous concurrence of the Board of Control, we take the liberty to submit herewith, copy of a letter we had the honour to address to the Honourable Court of Directors on that subject, and of the Documents which accompanied it.

Circumstances having rendered it expedient that the Prospectus should be submitted to their consideration as early as possible, the limited time at our disposal prevented our then obtaining the signatures of all the respectable parties connected with the trade of India who approve of the general principles upon which it is proposed to found the "Bank of India," although we trust we may venture to affirm, that the many very eminent and responsible signatures attached to it constitute a sufficient guarantee for the character and stability of the proposed Establishment. We nevertheless deem it our duty to keep the prospectus open for the signatures of those who had not then an opportunity of subscribing it; and copies have, by particular desire, been forwarded to the principal outports and manufacturing districts, which, we are assured, will in a short time be returned very numerously and respectably signed.

We should only unnecessarily occupy your valuable time and attention, by attempting to set forth, in a letter, all the advantages which, whether as regards this country—India—or the future financial arrangements of the East India Company—we anticipate, from the establishment of the proposed Bank, possessed, as it will be of adequate capital, and subject to judicious management and control; but if you will be pleased to honour a Deputation with a conference, and name the earliest time when it will suit your convenience to receive it, we trust we shall be able to satisfy you that our anticipations are well grounded.

When we shall have ascertained that the Board of Control and court of Directors concur in opinion with the respectable parties, so deeply interested in the Trade of India, who have signed the Prospectus, as to the advantages which may reasonably be expected from the establishment of the proposed Bank, we shall be prepared to submit a list of names for Governors and Directors, which we trust will prove as satisfactory to those authorities, as we feel assured they will be, to apply to the Crown for a Charter, and proceed to draw up the details for the general conduct and management of the "Bank of India."

We have the honour to be, &c.

INDIA ROAD, *June* 3, 1836.

GENTLEMEN,—I have been favoured with your letter, dated the 31st ult. enclosing for my consideration copy of a letter which has been addressed by you to the Court of Directors of the East India Company, relative to the proposed establisment of a Chartered Banking Company for British India. I have reason to believe that you will shortly receive a reply from the Court to the communication you addressed to them; and as that reply has the concurrence of this Board, it will not be needful, that I should at present enter further into the very important subject to which your letter and its enclosures relate,—I am, &c.

(Signed) J. C. HOBHOUSE.

LONDON, 21st *June*, 1836.

JAMES MELVILLE, Esq. *secretary to the Honourable East India Company.*

SIR,—We have the honour to acknowledge the receipt of your letter of the 16th inst. which we deemed it our duty to lay before a Meeting of those interested in the proposed Bank, convened for that purpose on the 18th inst.

Encouraged by the favourable opinion expressed by the Honourable Court, of the advantages which may be expected to result to India from an enlargement of the system of Banking, on sound principles, and persuaded the Court would view with favour the adoption of measures calculated to obviate the delay which the position of the East India Company, with respect to the Bank of Bengal, and the contemplated reference to the local authorities there must unavoidably involve it was unanimously resolved, at the meeting above mentioned, that we should immediately adopt the necessary steps for ascertaining whether any objections existed on the part of His Majesty's Government to the grant of a Royal Charter of Incorporation for this country to the Bank of India.

In accordance with that resolution, we have this day addressed the Chancellor of the Exchequer; and, as our letter contains a full exposition of the views and intentions of the parties interested, we deem it our respectful duty to hand you herewith a copy of the same, for the purpose of being submitted to the consideration of the Honourable Court, and in the hope that it will meet with their approval.—We have the honour to be, &c. &c. &c.

---

*To the Right Honourable* THOMAS SPRING RICE, *Chancellor of the Exchequer.*

SIR,—We beg to submit to your consideration the inclosed Prospectus for the establishment of an extensive Banking Company, in connexion with British India, together with copies of our correspondence with the Honorable Court of Directors, and the Right Honourable President of the India Board, on the subject.

It will be seen from this correspondence, that the President of the India Board concurs in opinion with the Board of Directors, as to the advantages which may be expected to result to India from such an Institution, founded on sound principles; but that, "as the Bank of Bengal has long acted under "charter from the Company, the Court wou'd not "think it right to adopt any opinion upon a pro- "position involving the interests of that Institu- "tion, until the proprietors shall have had an op- "portunity of offering their observations upon "what is proposed, nor until the Court shall have "ascertained the views of the Indian Government "on the subject."

We feel persuaded that the Indian Government will concur in the liberal view taken by the authorities at home, and be desirous of obtaining for India, as early as possible, the important advantages that country must necessarily derive from the establishment of an Institution which, by the introduction of ample capital, available on reasonable terms, will give an impetus to the progress of agricultural and commercial improvement, conducive alike to the happiness and prosperity of the people, and to the augmentation of the Government revenue, while the confidence that this large capital and abundant resources cannot fail to inspire, will give a stability, security, and regularity, to the monetary system throughout British India heretofore unknown. Nor will it escape observation, that such an establishment must prove most serviceable to the East India Company, as a safe and easy channel through which the necessary remittances to Europe may at all times be regularly effected, as well as a source to which they may hereafter look for pecuniary aid in cases of political exigency. However proper the reference to India, as contemplated by the President of the India Board and the Court of Directors, may be, yet it must involve considerable delay, which may be indefinitely protracted, should the Proprietors of the Bank of Bengal, as it is not unreasonable to suppose, *desire to retain, as long as possible, the exclusive advantages which they have at present*, by raising questions calculated to prolong the correspondence between the local and home authorities, during which much valuable time will be lost. It was therefore unanimously resolved, at a meeting of parties interested in the proposed Establishment, which took place on the 18th instant, that the Committee which has heretofore conducted the correspondence now submitted to your consideration, should proceed to the attainment of the only remaining preliminary measure which it appears necessary to establish, prior to the formation of a Board of Directors, and regular enrolment of shareholders; and we have to state, that the object of our present address is to ascertain, whether His Majesty's Government will grant to the Bank of India a Charter of Incorporation from the Crown for Great Britain, limiting the responsibility of the shareholders, and enabling them to sue, and be sued, through their officers, *but without any exclusive privileges, which it is by no means their desire to seek.*

*That no misapprehension may exist as to the views and intentions of those for whom we act, we beg respectfully to state, that although the existing high rate of interest and great profits of Banking, heretofore almost monopolized by the Bank of Bengal, clearly and unequivocally demonstrate the ample field which India offers for the profitable employment of a much larger amount of capital than it has hitherto been able to command, and abundant occupation for more Banking Establishments than at present exist; that nevertheless the Bank of India has no desire, if it can be avoided, to enter into competition with the Bank of Bengal. What they propose is, to offer to incorporate or amalgamate the Bank of Bengal with the Bank of India, on such terms as the Indian Government, to whose decision they are willing to submit, shall pronounce to be fair and reasonable.*

Unincorporated, the promoters of the Bank of India would enter on such a negotiation at a great disadvantage; but possessed of a Royal Charter, and recommended by the Court of Directors to the favourable consideration of the supreme Government, as they have reason to except they will be, they will proceed to India in a position to enter on the negotiation in their corporate capacity, more on a footing of equality; and should the proprietors of the Bank of Bengal deem it inexpedient, or more for their interest, to continue as they are, we cannot be thought unreasonable, in expecting to obtain from the supreme Government, so soon as any existing engagements they may be under to the Bank of Bengal will admit, a Charter for India on the same terms as the one held by the Establishment. We confidently trust, therefore, that we solicit from Government no more than has been so recently accorded to the Colonial, and other Banking Establishments of a similar nature; and as we shall be perfectly prepared to comply with all the conditions required on such occasions, our request for a Charter of Incorporation will be readily granted.

Although the Prospectus has only been privately submitted to those more immediately interested in the Trade of India, the signatures already attached to it include, it will be observed, many of the most eminent and influential commercial Establishments both in London and in the country—names surpassing, we will venture to affirm, in wealth, influence, and commercial knowledge, what has ever before been appended to a similar document; and judging from the interest it has already excited amongst those to whom it has become known, we feel confident, publication would insure for it the signatures of almost every individual possessed of capital connected with India.

We are instructed to state, in conclusion, that the parties whose signatures are affixed to the Prospectus, have come forward to countenance this important undertaking, under the expectation of obtaining a Royal Charter of Incorporation; and we think it right and respectful to state explicitly at the outset, that without the protection and confidence which such a Charter would give, we should not be disposed to invite the public, or to embark ourselves in an undertaking of such magnitude, and without those wholesome restrictions, which it would be as much the duty of a watchful Government, as it would be our desire to see placed upon those who may hereafter have the direction of this great Institution.

---

## EXTRACTS.

*From the Asiatic Journal for October.*

CHARITIES AND CHARITIES.—Within the London bills of mortality there are 302 places of public worship; 1,030 seminaries of education, including 237 parish charity schools; eight societies for the express purpose of promoting the learned, the useful, and polite arts; 123 asylums and almshouses for the helpless and indigent, including the Philanthropic Society; 30 hospitals and dispensaries for sick and lame, and for delivering poor women; 791 friendly or benefit societies, and institutions for charitable and humane purposes; which several institutions are supported at the almost incredible sum of £9,000,000 per annum.

WOMANLY FORTITUDE.—"Lemon."—An officer of the "Lagan" gunbrigade to write the following particulars, and have them published in a London paper. It is an anecdote of the battle of the 3rd October. "The adjutant of the 4th British regiment was seated on his horse when a cannon ball struck the animal's head, which it completely shattered, carrying part of it right through the body (through which the ball passed also, and came out at the hip), afterwards carrying away the thigh of a Chasseigorri who was near the spot, and severely wounding a poor Irishwoman (a soldier's wife) in the thigh also. The poor woman had an infant in her arms, which was flung to a considerable distance, but not hurt. The mother was severely so. The adjutant escaped with no other harm than the fall from his horse. He describes the sensation he felt as though his arms and legs were lifted up and down in the way the wooden toys are which one was accustomed to be amused with when a child—wooden clowns whose arms and legs are gratuitously moved up and down by pulling a string. An officer who was hard by, told me that the noise made by the cannon ball as it rolled through the horse's intestines was of a most extraordinary nature, such as he had never before heard."

THE LIVERPOOL EXPLOSION.—*Jem Gomez* was examined on Monday, charged with having put into the Liverpool Post-office the letters which by their explosion wounded Barrett, the letterstamper, and were probably intended to slay the Governor of Havannah, to whom the letters were addressed. The brother of the Solicitor to the General Post-office went down to Liverpool as soon as the diabolical attempt was made known, and after making the necessary inquiries, discovered that the prisoner had lately arrived from America, and had gone to London. He followed, found, and arrested him; pistols loaded and a sharpened dirk were found upon him, and a seal corresponding to that on one of the letters addressed to Havannah. He was examined in private, and remanded for a week.

HINT TO HORTICULTURALISTS.—An interesting improvement in the mode of transferring plants, which thrive best in a humid atmosphere has recently been communicated to the Society of Arts. They are merely planted in a box filled with moist earth, and covered with a glazed frame, rendered as air-tight as possible. Captain Mallard, R.N., filled several cases with ferns and flowering plants, at Sydney, some of which had not previously been introduced into England. The thermometer, when the plants and flowers were placed in the case at Sidney, stood at 90 and 100. In rounding Cape Horn, about two months after, the thermometer was observed as low as 20, at 8 p. m., and the decks were a foot deep in snow. A fortnight after they were in the harbour of Rio Janeiro. In crossing the line the thermometer rose to 120, and on the arrival of the ship in the British Channel the thermometer was as low 40. The plants were not watered and received no protection, either by day or night, and yet were found to be in the most flourishing condition after eight months' confinement.

THE ROYAL PRINTING OFFICE AT PARIS.—According to the last inventory that has been published of this establishment, it contains the types of 88 founts of oriental character, which comprehend all the known alphabets of the nations of Asia, ancient as well as modern. There are sixteen alphabets of

different European nations who do not employ the Roman characters, and of these latter the establishment possesses 46 complete founts, of various forms and dimensions. All these founts weigh at least 828,000 pounds. The consumption of paper at the Royal Printing office in a single year amounts, at an average, to from eighty to a hundred thousand reams per day, which are printed for the use of the several public boards. The number of workmen employed regularly is from 350 to 450.

THE EFFECT OF REVOLUTIONS ON THE MONEY MARKETS.

GAZETTE DE FRANCE.—The causes of the depression of the European funds are worth investigating from their singular interest; in doing so we must be careful not to attribute them systematically to Stock exchange operations; their rise and fall are results of the actual march of events, not only in Spain but throughout Europe. Some precise notions on this important fact will probably appear curious to our readers. The mass of debts contracted and inscribed in the great European states amounts to more than 37,000 millions of francs:—Great Britain, 21,000,000,000; Holland and Belgium, 4,000,000,000; Spain, 2,000,000,000; Ditto, 2,000,000,000; France, 4,000,000,000; Russia, 1,000,000,000; Prussia, 1,000,000,000; Austria, 1,000,000,000; Portugal, 1,000,000,000; Denmark, Bavaria, Wirtemberg, Baden, Sweden and Norway, Piedmont, and the Papal States 750,000,000; Naples, 500,000,000. Total, 37,250,000,000. The monetary capital of the principal countries of Europe was lately estimated at five thousand millions of francs:—France, 2,200,000,000; Great Britain, 1,000,000,000; Spain, 450,000,000; Holland and Belgium, 300,000,000; Austria, 275,000,000; Italy, 250,000,000; Prussia, 220,000,000; Germany, and Switzerland, 210,000,000; Portugal, 130,000,000; total, 5,155,000,000. From this must be deducted 500 to 600 millions, the total of the sums exported from England between 1816 and 1825, and absorbed by the loans to Mexico, Chili, Poyais, Peru, Australia, Guatimala, and Guadalaxara; and 400 to 500 millions exported during the last few years to Russia, Spain, and the United States of America. There remain then 4,000 millions of specie against 37,000 millions of paper, representing the totality of the floating public debts of Europe in circulation in every market. The revolutions, then, which at the present moment agitate Spain and Portugal are grave events. They begin to paralyze, and may suddenly render null, 9,510 millions of these paper currencies. Going further back, we find that the crisis of 1825 had been induced by the losses resulting from the depreciation of a nominal 1,000 millions of loans made in England between 1818 and 1825 by the Spanish Americans. At the present day the matter is more serious, for there are 4500 millions of Spanish and Portuguese obligations in peril by the fact of the actual changes in Spain and Portugal. But the danger does not stop here. These perturbations of existing order are, according to English politicians, possible in Poland, in Switzerland, in Piedmont, at Naples, at Rome, in Belgium and in Holland, if the Spanish revolution realize its object. France herself, in spite of the efforts of the ministers, may be agitated. Any one of these cases failing out, here are the consequences. There are immediately 10,000 to 15,000 millions of paper derived of *points d'appui*, of all possibility of negotiation; then comes that conflagration of public credit so much dreaded, and which was foretold by Napoleon. National obligations fall lifeless and rush beneath them all the markets of Europe. Let us sum up the foregoing statement. The *maximum* of European specie is 4,000 millions. With this is to be sustained the currency of 37,000 millions of public funds, and 20,000 millions of bank stock and bank notes, shares in canals, railroads, &c., as well as all the paper in circulation. Thus, 57,000 millions of obligations issued in paper, threatened to the extent of full a third with total ruin by the success of one of the revolutions which has burst forth, are arrayed against a mere 4,000 millions of specie; and observe that at a least one half of this specie would retire from circulation were any such financial crisis to manifest itself; The crisis with which the markets are at the present day menaced would thus be far more serious than that which visited every seat of business in 1825, an epoch in which the English three per cent. fell 19 per cent. Men of reflection and information in the higher walks of banking business all share in his apprehension of approaching difficulties; the nearest evidence presents itself to their eyes of a financial crisis. Here are some facts which bear upon this subject. Several companies of capitalists, of M. Rothschil at the head of them, had proposed to the Neapolitan government to undertake the conversion of the debt of the kingdom of the Two Sicilies, now at five per cent, into a three per cent. stock. A contract had been drawn up, and was about to be signed with MM Rothschild and the company; they have, with reference to existing circumstances, renounced it. Nevertheless, the advantages offered are considerable; in their opinion the funds are in peril. The Russian government, which in late years had so positively refused all propositions for loans which had been submitted to it at 113f. for an annual interest of 5f., has just changed its mind, and that with some degree of uneasiness. It has sent to Frankfort and Amsterdam the Rothschild of Russia, M. Stiglitz, the court banker. This personage, who arrived a few days ago, is commissioned to renew negotiations for the proposed loan, which the Russian minister, contrary to the wish of the Emperor Nicholas, had rejected upon the first overtures; but now it is no longer possible for Russia to contract, even at 50f., for an annual interest of 3f.

*From the Asiatic Journal for August.*

CHINESE TARTARY.

In a memoir on Chinese Tartary and Khoten, by Mr. Father, Persian Secretary to the Bombay Government, compiled from information obtained from intelligent natives of that country, are the following statements respecting the opinion entertained by the people of the Chinese Government, and the means by which Europeans can gain access thither:

The Chinese government is represented to be very popular, at the present time, throughout these countries. There seems to be nothing in its system calculated to emanate, or productive of advantages tending to conciliate the people to subjection to foreigners. The chief dislike, with which the Chinese are regarded has been latterly much increased, in consequence of their carrying on vast works of fortification, and building walled towns, by the forced labour of the natives. The Asiatics, who are, chiefly, &c. are said to occupy, by the natives who had passed through India, nearly the same political position under the Chinese residents, or Umbans, and stand in the same relation to them, as they supposed the Nawabs, Rajas, &c. of this country do to the residents of the English government, the Chinese interfering little in the direct management of the people, and leaving to the native princes the administration of the government and laws. Tax revenue, however, is realized entirely by the Chinese, the princes, &c. having large landed assignments.

It is known at *Yarkand*, that India is governed by a nation of Europe (Feringh); and, it is said, that the Chinese entertain a high notion of the power of the English, which they view with feelings of apprehension, connected with an idea, that is prevalent in the country, of its being destined to fall into their hands.

It is said, that provided a person would dress as a native, allow his beard to grow, and accompany pilgrims on their return from Mecca, there would not be much difficulty in penetrating into Chinese Tartary; but that the easiest way would be by way of *Kokan* and *Aushgar*, as large kafilas of merchants pass that way. The person must, however, be able to speak Turks, as very few of the natives of the country understand Persian; whereas, in the *Kokan* country, in Independent Tartary, the population of whole towns speak nothing else. It would not be difficult for the individual to go even to *Peking*, in China. All that is requisite is to get a pass from the governor, by paying a few tenkeels to the Chinese officers, giving out that his object is trade. My informants stated, that some years ago, a European made his appearance at *Yarkand* in a native dress. He was discovered accidentally, and brought before the governor, who threatened him with torture if he did not confess who he was; but assured him that he would be well treated, if he spoke the truth. He admitted that he was a European, and was sent out of the country.*

ACHEEN.

Nacoda Hadjee Mahomed of the Barque *Hamoody* of Tellicherry which arrived here from Acheen on Tuesday appeared at the Police Office on the 23rd. instant and stated that on the occasion of his touching at Teluksamoy about twelve days previously for a supply of water, a boat from the Barque *Johar*, belonging to and commanded by, the Raja Muda of Acheen, then at anchor in the roads, came off to the *Hamoody* and carried away the Nacoda and his Kranny for the purpose, as it was alleged, of receiving and conveying a letter to the address of the Governor of these Settlements, and immediately on their arrival on board of the *Johar* they were confined in the hold and informed that unless the sum of 5,000 dollars was paid down, the *Hamoody* and her cargo would be confiscated, because she sailed under British colours and the *Johar* was interdicted from entering the port of Penang, for which she had loaded a cargo, but on her passage the Raja had received a letter from a native merchant here announcing this prohibition. The Nacoda and his Kranny, after a detention of two days without any food, importuned for their release, declaring they had no money; the sum of 500 dollars was then demanded, which was subsequently reduced to 400, but unable to satisfy the amount, a quantity of salt was offered in lieu and rejected on the plea that the article did not suit the market.—The Raja Muda it appears then threatened to bring on shore and confine 130 pilgrims, passengers on the *Hamoody*, if a sufficient sum of money was not forthwith raised amongst them, which at length was collected to the extent of 300 dollars, and paid to the Raja's Offices, who in addition thereto carried off two coils of rope, a cutlass, the gold handle of a kris, some pieces goods and the ship's long boat, which latter was however restored when she was about quitting Teluksamoy.—The Raja afterwards informed the nacoda that he might on his arrival at this port make these particulars known and that if the *Johar* was permitted to come to Penang, the money and goods would be returned to the nacoda; otherwise the Raja would treat all vessels under the British flag in a similar manner

[*P. W. Island Gazette, Nov. 26th*]

We understand there is some probabily of a work being restored to oriental literature, possessing pre-eminent interest for the Asiatic philologist, being the 'Arabian Night's Entertainment' *complete* in the original Arabic.' The history of this classical specimen of colloquial Arabic is exceedingly curious. Though the name by which the work is known 'the Thousand and One nights,' indicates the number of sections into which the work was originally divided, it appears that the most profound scholars of the east knew nothing of any part beyond three hundred, and two hundred only were published, until the recent labors of Professor Habicht of Preslau, added one hundred more to the series. The late Major Macan when he returned to England with Lord Combermere, learned from a celebrated continental orientalist, that a manuscript copy of this work, *complete*, had been for some centuries in the possession of a noble Arab family in Egypt, but that *he* had been unable to induce the proprietor to allow a transcript to be made. Major Macan succeeded in effecting this, through the medium of influential persons after infinite trouble, and he brought it out to India with the intention of editing it. The premature death of that accomplished orientalist, has prevented this. We trust, nevertheless, that a work which possesses such strong claims on the attention of Asiatic scholars, and which has a charm even under the disadvantages of translation, of which few books can boast, will not be lost to the world. The M. S., in four large and beautifully written vols., is lying at Saint Andrew's Library, for public inspection.—*Bengal Hurkaru Aug. 13. Sing. Free Press, 15th December.*

* Journ. Asiat. Soc. of Bengal, Dec. 1835.

# CANTON PRESS,

February 18th 1837.

It was with considerable surprize we read the remarks of our Cotemporary, the Register, on the meeting assembled some time ago at Mr. Layton's in consequence of a Circular received from H. M. Superintendents at Macao, which circular with the result of the meeting we published a fortnight since.

The reason why our Cotemporary did not at the time give publicity to those proceedings, was that the meeting at Mr. Layton's was, as he alledges, composed of juveniles; these juveniles have since grown a fortnight older, and so have the proceedings, and the Register alike averse to young people and fresh news, has in his last number copied from us the very things which he did not consider worth notice as coming from minors.

Any one, not present at the meeting alluded to, reading the Register of the 7th, would think that a parcel of boys had met together to plan some frolic of which their seniors were not to be informed, or from which the seniors had at all events been excluded, and that the execution of that frolic was not worth the notice even of the parents or schoolmasters of the assembled. How much then will the reader be astonished to be informed that the meeting was composed of the majority of British merchants established here, who had met to discuss a point of much importance to their and their constituents interests; that several were present whose grey hairs proved their being minors no longer; that there were present at the meeting, with but few exceptions, members from every British commercial house in Canton; and that the resolutions passed at that meeting were signed by 21 British resident Merchants.

We are thus particular in contradicting the statement of Mr Cotemporary, because it is of some importance that the public should know, that it was not, as the Register insinuates, merely a small number of young, factions and unimportant merchants of Canton, who differed with the Superintendents, as to the principles on which a Correspondence with the lattter should be carried on, but on the contrary almost every British resident merchant in Canton.

The Register says that the Gentlemen at the meeting were "*juveniles, both in age and standing*;" we have before said that grey heads were present, and they are not an attribute of youth; that the majority should have been young in their commercial station here, is surely not to be wondered at when it is recollected that the present trade in Canton is not yet three years old, and that with the exception of four or five houses, India Agents during the Company's monopoly, all the other merchants established themselves after the abolition of that monopoly; but members of every one of those older houses even were, with one solitary exception, present at the meeting, and no dissentient voice was heard against the resolutions agreed to.

We hope our cotemporary will, in his next paper, correct his misstatement, that wrong inferences may not be drawn from it.

---

We have republished from a Pamphlet "Remarks on the proposed Bank of India" by an India Merchant, its propectus and some of the Correspondence which has taken place preparatory to it's establishment. The length of the "Remarks" prevent our publishing them likewise and we must therefore content ourselves with a short outline of them.

The writer is by no means favorable to the proposed establishment, as in his opinion India does not require an advance of so large a sum of money as 3 Millions of sterling to foment her commercial and agricultural industry, and as proof of it he states that the rate of interest at which money can be obtained in Bengal on unquestionable security, is by no means very high; the Government loans bear only 4 per Cent interest and are negotiable at one to two per Cent discount; the Bank allows only four per cent on permanent deposits, discounts Government and Salary bills at the same rate, and advances money on stock at five per Cent; that this indicates that there is capital in India waiting more favorable employment, and that the high commercial rate charged is more owing to the risk and peculiar nature of the transactions, than to the want of money.

The writer then points out the dangerous influence the Bank of India might exercise, connected, as it proposes to be, with the Government, transacting its pecuniary affairs and remitting the annual three millions Sterling, which India has to pay, to England. The power thus entrusted to a few individuals over the money market of India would be exercised to the disadvantage of the private banker and merchant, who, unable to contend against a body of such immense pecuniary resources, would be prevented from employing their Capital as they had done heretofore to advantage. The Bank of India, in remitting the 3,000,000 in Bills on England, secured by merchandise, either from the Presidencies or by way of China, would be able to regulate their exchanges arbitrarily, not having to encounter competition, and thus impart unusual insecurity to the transactions of the merchant.

The writer further remarks on the "preposterous absurdity of a bank *for* India, chiefly held and entirely governed by British interest; of a supreme board of Direction sitting in London, while the monetary and commercial system, submitted to their controul, are in India, and at a distance of 12 month's communication." He further says, speaking of the Government remittances "under the local Government of India and Finance Committee of China, this money is impartially dealt out to the Commercial Community; but the same equitable distribution could not be expected, when left to a Bank, the Directors of which were partners in London houses of Agency."

---

The new Governor of Macao arrived there on Sunday last, in the Port. Ship *Resolute*, and was saluted from the Forts.

It was reported that a Sailor belonging to an American Ship had by accident shot a Chinaman and killed him: and that several American vessels about to sail hastened their departure. If the report was true, the matter must have been compromised, since we hear of no obstruction to the American shipping.

We have per *Brilliant* received Singapore papers, the *Free Press* to the 29th, and the *Chronicle* to the 24th December. The *Emily Taylor*, from Singapore 10th January has since come in, but has brought us no papers, nor have those per *Red Rover* yet been delivered.

The *Red Rover* from Calcutta 6th January, is the first arrived of the Clippers of this season. We have been politely favored with the following extract from a letter.

Calcutta 6th January 1837.

Our first Opium Sale of the season took place as was announced on the 4th instant, when the quantity put up and the result, were as follows.

| | Chests | Highest | Lowest | Average |
|---|---|---|---|---|
| Patna | 4,970 | 1685 | 1365 | 1613.3.7 |
| Benares | 1,991 | 1505 | 1455 | 1480.13.7 |
| Half Chs | 4 | @ 730 each | | |

After the first few lots, the biddings became very animated and in the first division of Patna, ascended rapidly to the extreme above mentioned; the second half opened at 1610 and ranged pretty uniformly between 1605 and 1625.—The Benares from the first four lots, continued steady throughout at 1455 a 1465.—The native speculators bought comparatively little, though their biddings had a considerable influence on prices, which were also materially affected by the large funds to be remitted hence to China.

---

It was known on the night before last that an Edict from the Emperor, in answer to the Vice-Roy's report on the Opium question, had been received, and being by the Chinese thought favorable to the legal importation of the drug, a good deal of speculation was caused in consequence. We have been fortunate enough to obtain a copy of the Edict itself, and now give the translation. We see nothing in it to justify a hope of the legalization of the Opium trade, and if the Chinese Opium dealers, view this document in the same manner, we suppose that the arrangements between the Mandarins and them, which we have good reason to know were nearly agreed on, will be immediately concluded and that the illicit trade will continue to go on much as heretofore.

The following is the Edict.

On the 29th day of the 12th Month (26th January,) the grand Council of state received the following verbal commands from his Majesty.

A report has this day arrived from Tang and his colleagues, presenting the results of their mutual deliberations to directe l removing the baneful effects that arise from opium having pervaded the Country. By the prevalence of opium throughout the empire, there has been occasioned a daily decrease of our fine silver: being now desirous to exert ourselves entirely to stop up the source of this evil, the only sure mode of proceeding is utterly to prohibit the exportation of sycee silver. If by diligent and rigorous watchfulness, in the places whence the silver is exported, and at the points by which it necessarily must pass, we can deprive both the traitorous natives and other barbarians of all opportunity of exercising their artful devices, it is clear that we may thus gradually close up the breach and prevent further exportation. The said governor and his colleagues have been able to perceive this and point it out in their memorial. Let them join heart and hand to enforce vigilant and faithful observation—to punish all traitorous natives who combine with the foreigners in illegality,—and entirely to hinder foreign merchants from gratifying their avaricious greediness; and let it be their grand object wholly to prevent the exportation of our fine silver. Their labors must be productive of some fruit; they must not attempt to get off with mere empty words; but having the name of exerting themselves, they must prove the reality of their exertions.—Communicate these commands to Tang and Ke, and let hem enjoin them also on Wan. Respect this.

---

We find the following notice in the '*Journal Asiatique*' for February. "The London Bible Society has published in Petersburg a translation of the *New Testament* in the Mantchu language, by M. Iapposoff. It has been printed under the superintendence of Mr. George Barrow, and forms a handsome volume, on paper imitating the Chinese.

CHINESE EXTRACTS.

*Translated for the Canton Press*

Once upon a time Seunkeun sent a present of 40 Peculs of Oranges to his friend Tsaotsao who dwelt at Rekeun.

The coolies who carried the oranges feeling fatigued, put down their burdens at the foot of a hill. While they were seated there, resting themselves, an old manblind of one eye, and lame of one leg came up to them. On his head was a white bamboo hat, and his body was covered with an old tattered gown.

Making a low bow he thus addressed them "You appear to be much fatigued, allow me to assist you in carrying the oranges."—The coolies joyfully accepted his polite offer, and he alternately relieved each of them. It was remarked that while he assisted, the burdens lost much of their weight.

When they had walked five miles the man stopped and calling aside the servant, in charge of the present, said to him. "My surname is Cho my name Tse, I belong to the same province; when you see Tsaotsao tell him that the old man Chotse sends him greeting."

On the arrival of the oranges at Rekeun the servant presented them at the Palace of Tsaotsao; who immediately plucked the skin off one but found no inside; he tried another which turned out the same; he then tried several others but they were nothing but skin. He immediately ordered the servants to be brought before him and angrily demanded of them why they brought orange skins? They tremblingly denied all knowledge of the matter, but attributed it to the old man, their adventure with whom they related to Tsaoutsao who would not give credence to their story but ordered his servants to bring Cho Tse before him.

At this moment a servant entered the room and said "there is an old man outside who calls himself Cho Tse and wishes to pay his respects to your Excellency."

Tsaotsao replied "let him be admitted."

The orange carriers immediately Cho Tse entered the room recognized him as the old man they had met with on the road.

When he was upbraided with raising devilish charms to deprive the oranges of their insides he laughed outright and to prove his innocence he took the skin off one which turned out a very fine one.—Tsaotsao tried one but with no better success than before.

Surprised and vexed he begged Cho Tse to explain the reason of the phenomenon, but the latter avoided answering the question.

Dinner was then served up, and to the dismay of Tsao Tse, Cho Tse drank 3 Jars of wine and eat a whole sheep without being the least inconvenienced.

*( To be Continued. )*

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER. BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camlets, Saltpetre, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton* &c. sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pictures &c, Confectionary Stationery, Cutlery Crockery ware, &c.*, for foreigners consumption, are sold at Auction duty paid.

*Note. Alum,* and *Cassia* are procurable cheaper at Lintin, Macao, &c; and *Raw Silk, Silk* piece goods &c, are sometimes shipped thro' the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7874756 of a T. per cubit.
2nd " " " 1200 do. & under 1600 " 0.7221691 " "
3rd " " under 1200 do. 0.5062341 " "

N B. The cubit is 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tither head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3700 to $ 3780; 3rd class from $ 3240 and under. The Consulage or Present Fee is paid by all vessels 1600 Tons or $ 2223. Linguists fee $ 173½ and Comprador's fees $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riceladen ships are charged only about $ 1300 in lieu of measurement &c.*

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Longcloths, bleached and unbleached, of good quality continue in fair demand.
WOOLLENS.—There has been some enquiry for *Spanish Stripes* but we have not heard of any sales. *Longells* remain dull as before.
RICE.—is in better demand, and prices have improved a little during the week.
STRAITS PRODUCE.—is declining. *Pepper* difficult of sale at 8½ a 9 $ Betelnut at $ 3, with further supplies reported at hand.
COTTON.—We have no transactions to report, business in this article not being resumed since the Chinese new year, and we fear the near approach of further importations from Bengal may check the demand that was anticipated.

The estimate stock consists of,

| | Bombay, | Bengal, | Madras, | Total. |
|---|---|---|---|---|
| | Bales 25,480 | 29,226 | 14,785 | 69,491 |
| The deliveries in | 5,813 | 15,261 | 3,394 | 24,468 |
| January being | | | | |

OPIUM.—The prospect of an early arrangement between the smugglers and the mandarins created some little demand in the early part of the week, and since then there has been great excitement within the last two days, caused by the arrival of an Edict from the Emperor regarding opium. Reports vary much as to its purport, but it seems commonly believed amongst the Chinese that it is favorable. Prices have consequently advanced $ 10 a 20, but speculators are cautious.
The new Bengal Opium has arrived by the Clippers *Red Rover* and *Antonio Perreira*, but we have no report of it's quality; it's cost is very high. The new Malwa may also be daily looked for, as we notice the Sir Herbert Compton had passed Singapore. The clearances have been good since the 1st being 201 Patna, 42 Benares, and 202 Malwa. Total 805 chests, which must however include the deliveries at Macao and those to the Junks outside.

### EXPORTS.

RAW SILK.—We have heard of no transactions of any consequence.
TEA.—Purchases of *Young Hysons* are said to have been made to some extent for America.

By order of the Committee,
Williamsfeate
Secretary.

# THE CANTON PRESS.

VOL. 2d. No. 25. CANTON, SATURDAY, FEBRUARY, 25TH, 1837. No. 77.

FROM DOCUMENTS RELATING TO OPIUM ETC.
Printed in Canton.

*Report in reference to the circulation of dollars in China.* August, 1836.

REPORT, made by the commissioners of finance and of justice in the province Kwangtung, to the heads of the provincial government, requesting that their excellencies, when replying to his majesty, will recommend that the use of foreign money be still sanctioned, as being suitable to the position of foreign affairs here: but that all exchanges for, or clandestine exportations of, sycee silver be disallowed.

Foreign money is brought from the lands of the distant barbarians; and is essentially necessary to the mercantile classes trading in all the provinces along the coast, who, for their daily supplies of food and other necessaries, are dependent on the facility of exchanging this money, and on its general circulation. It is not, therefore, to be dispensed with for a single moment. In Kwangtung, Chekeang, Fuhkeen, and Kwangtung, or, if it do occasionally extend, in the course of trade, to adjoining districts (for this is a circumstance not wholly to be avoided); yet in cannot circulate much farther inland than a few hundred miles. As to the provinces lying northwards, the two provinces of 'the Lakes' (Hoonan and Hoopih), Szechuen, Yunnan, and Kweichow, this money does not at present circulate in any of these: and if perchance a few specimens reach those places, they are prized merely as curiosities; or, if it be attempted to force them on the market, they can be exchanged only at a discount, and even then with difficulty. How can it be supposed, therefore, that this money will immediately spread itself into universal circulation?

Having taken this general view of the subject, we will turn to the representation made by the Censor Shin Yung. In this representation, he expresses his apprehension that the low standard of foreign money must render it difficult to be exchanged for sycee silver at a fair and regular rate; and on that account, he requests that the inhibition of the money may be made a subject of consideration. This recommendation is doubtless the result of anxious attention to the policy of government, and serious regard for the interests of the people: but arguments are not wanting in favor of the circulation of money, so far as regards the eastern and southern provinces.

The places where foreign ships anchor are also the places where foreign money is scattered abroad. The supplies of provisions furnished to them comprise minute and multifarious details; their expences include numerous items of a very varied character; and many small sums are paid by them, as the hire of labor, or the price of articles. Not a day passes without money being used for one or other of these purposes. It becomes, then, a matter, of necessity that they should bring foreign money with them, to meet these various expences; and hence in happens that the market prices are regulated by dollars, it being found highly convenient to value goods by them. The people among themselves, also, gladly fall in with such an arrangement. finding it to be advantageous. From which it is clear that *the inhabitants of the coast* cannot well be deprived of the foreign money.

Again, native merchants, trading by sea along the coast, when they travel, carry their money with them. If these have to carry the government (copper) coin, the expense of so doing will be a heavy tax upon their small transactions; and if they carry gold or silver to sea with them, they have reason to fear lest they be found guilty of contravening the prohibitions of government. It is therefore impossible for them to do otherwise than carry foreign money with them, it being necessary that they should have such money in order to make purchases. And hence it is evident that the *native mercantile classes* along the coast cannot dispense with the use of foreign money.

Further, as to the foreigners, they import foreign money into Canton as a medium in which to pay the prices of commodities purchased by them. The amount of such importations is variable and uncertain; and whatever balance they may have remaining is either employed, on perceiving an advantageous state of the market, in making additional purchases, or is spent in a more abundant and luxurious supply of the daily necessaries of life. For in the love of much money, and of good prices, the flowery people and barbarians are altogether like-minded. We see, then, lastly that the *foreign merchants* of other countries are likewise unable to dispense with the use of foreign money.

We are informed that there are silver mines in England, and America, and Spain. Although the pattern after which the money of each country is made differs, yet the degree of purity is nearly the same with all, being above ninety per cent. touch, as compared with the sycee silver of China. We see, then, that though they be left to follow their own methods, yet the foreigners do not draw their materials from this country. And in commercial intercourse, so long as each holds its due place, the foreign money is the same as though it were issued from the mint of the palace itself.—Our empire is separated from the foreigners by ten thousand miles of sea, over which they cross to present things of value and to offer tribute. and for their doing this, established regulations exist. Since, then, to present themselves here, and to make offerings has been so long their practice, that time has rendered it equal to an ancient rule that they should do so, —what cause can there be for apprehension of any consequences that may arise from permitting them to bring such things as will be most advantageous and profitable to them?—It is most truly said in his sacred majesty's edict, that the circulation of the foreign money in the east and south is not a thing merely of yesterday. The right mode of acting is, to establish *rules* and *limits*, so as to bring upon the same level the wishes both of our own people and of those from afar. But were the foreign money permitted to be circulated even in all the provinces, it would not be prodnctive of the slightest injury to China.

The great objection to the use of foreign money is this, that with it no regard is paid to the weight of metal, or the degree of purity. In Canton this was formerly the case, also. But at a later period, as a precaution against fraud, foreign money began to be stamped and chopped to mark the degree of purity,—and to be weighed, in order to ascertain the quantity of metal. The money so stamped is in general circulation in the markets, where it goes by the name of 'broken pieces;' and when it is exchanged for sycee silver, a cent 3 or 4 taels per cent. are added to make amends for the inferiority in touch. But in Kwangsan and Chekeang no money is in circulation but such as is bright with a new smooth face. At present the 'broken pieces' of Canton, when paid in exchange for new faced money, pay a premium of no less than 6 or 7 taels per cent. And crafty dealers, having many clever devices for obtaining gain, raise the price still higher, whenever the supply of this new-faced money is insufficient. Of the manner in which the money circulates in Kwangsan and Chekeang, at the present time, we are ignorant.

Should the imperial pleasure be declared in favor of the circulation of foreign money, it ought to be required, in all the provinces, that the money be paid by weight and that prices be no longer rated by the *number* of dollars; that foreign money, when exchanged for sycee silver, whether such money be in broken pieces, or in whole bright-faced coin, shall always pay a premium per cent. to make up the difference of purity between it and sycee silver; and that foreign money shall never be allowed, on the contrary, to bear a premium, when given in exchange for sycee silver. With regard to native counterfeits and adulterated pieces of money, the shroffs in the market places are so expert in discovering and picking out such, that it is quite unnecessary to think for the people on this point, or to make any rules or restrictions with reference to it.

The purity and weight of the silver being in this manner rendered subject to trial, the crafty deceitful character of the foreigners will have no room for exercising itself in petty arts. But the importance of the custom-house restrictions is such as to call, in a still greater degree, for prohibitions, —prohibitions, namely, of the exportation of sycee silver. It is our duty to request, that, in all future commercial dealings with foreign merchants, no persons be permitted to mix up sycee silver in the payment of any balances due to such foreign merchants, or to sell any sycee silver to them for their every-day use; that voluntary engagements to this effect be filed by all the hong merchants, both the senior merchants and the others; that, if any of these infringe this regulation, they be rendered liable to severe punishment by fine or transportation; and that if any shopkeeper, or any other of the people, transgress it, such transgressor be made liable to a punishment one degree more severe. The officers and men in charge of custom-houses and passes, as well as those in command of naval vessels at sea, should be required to keep guard in constant succession, the latter always cruising about. When the foreign ships are returning from hence, officers and men should be bound to search faithfully; and in case of their discovering and making seizure of any sycee silver, and sending the offenders to meet their trial, they should be rewarded by a gift of all the silver so seized. Should *any* dare to protect and wilfully connive at any transgression of the law, and should such connivance be discovered by the transgressor being elsewhere apprehended, inquiry ought to be made as to the places through which the transgressor had passed, and the officers and men at those places ought to be dealt with most severely. If regulations be made of this clear and determined nature, all will then be convinced that the purpose is to uphold them.

The luxuriance and splendour of this central nation are such, that its own native treasures are exhaustless, and it values not things of foreign and distant extraction. The would-be-clever arts of the outermost barbarians it reckons as nothing and of no worth. These arts can therefore be productive of no detriment to the policy of the government, while to the people they appear not unattended by some advantage. It is our duty, therefore, to request, that your excellencies will implore his majesty of his heavenly favor, to sanction the continuance of foreign money in circulation in the sea-board provinces, its circulation being suitable to the position of foreign affairs, and convenient for the people. As in duty bound, we have consulted together, and lay before your excellencies the result, awaiting your decision as to its correctness thereof, preparatory to a full memorial to the emperor.

## OBITUARY.

By the death of the Rev. Edwin Stevens, which occurred on the 5th ult., the cause of Christian benevolence in the East has lost an active agent, a faithful and able supporter. Firm, constant, and persevering, his great and steady aim was to do good others. Those who knew him best, esteemed him most. He arrived in China, as Chaplain to the seamen in the port of Canton, on the 26th of Oct. 1832; and, with a few occasional interruptions, continued to perform the duties of that office till his death. He was the seaman's friend. Many of the masters and sailors esteemed and loved him much, as he did them. Clearness, force, and great plainness characterized his preaching. During his residence in this country, besides performing his other duties, he made considerable progress in the acquisition of the Chinese language, and had formed the purpose of devoting himself entirely to labors for the benefit of those who speak that language. He had already made two voyages along the coast of China, brief journal of which have been given to the public. On the 1st of Dec. last, he embarked for a third tuyage, which, it was hoped, would bring him in contact with Chinese emigrants in the Indian Archipelago. He arrived at Singapore, on the 15th of the same month, ill of a fever, which terminated with effusion upon the brain and death. The intelligence of his sudden death reached this place two days ago. His age was 34years, 6 months, and 1 day.

Canton, February 20 h, 1837.

---

Some friends have requested us to give insertion to the following, taken from a Bombay paper.

*Man that is born of a woman is of few days and full of trouble; He cometh forth like a flower and is cut down; he fleeteth also as a shadow and continueth not.*

Died at his family residence in Cowasjee Patell Street in the Fort on Monday the 24th instant, Dady Cursetjee Ardaseer Esquire Son of Cursetjee Ardaseer Dady Sett Esquire in whose firm he was also a partner. Within a brief space Death has been busy in this family; the young man full of hope and pleasing prospects, and the aged matron enjoying in the decline of life the dawning happiness of her numerous progeny have both been borne to the sad and silent tomb. The subject of this notice, a Grandson of Ardaseer Dady Nasserwanjee Sett, one of the most distinguished Parsee Merchants of the time in which he lived, partook in no trifling degree of the commercial spirit of his family, and was, after passing several of the earliest years of his short life in his father's establishment, admitted by him as a partner at the age of 21. In the interval between that period and his premature death in his 26th year, Customship as in the case of the commercial community of Bombay, he had gained the esteem and regard of all who had his acquaintance, by his unswerving adherence to truth, his never violating a promise, as well as by his prepossessing address and the suavity and gentleness of his manners. In every matter relating to business he was his father's right hand—the prop of his old age, whose heartrending grief at being spoiled of the treasure of his house, is necessarily aggravated by the melancholy circumstances which attend this event.

Although the deceased had for several months past been labouring under partial attacks of the disease which terminated his existence, it was not till within the last three weeks that it assumed that decided character which his skilful medical adviser in vain attempted to overcome. A stroke of paralysis which seemed but the herald and precursor of his death so agitated and alarmed his aged mother, who had for upwards of a year been in a feeble state without any disorder which confined her to bed, that after a few hours illness produced by grief for the state in which she saw her son reduced, she suddenly expired on Tuesday the 17th exactly seven days before the demise of the lamented friend whose qualities this obituary but feebly commemorates. Hundreds of Natives of all classes from the highest to the lowest attended to perform the last sad duties to his remains which were deposited in the Cemetry of his ancestors in Chowpatty. Tears and lamentations were every were heard in the street from which the funeral procession set out, and from the universal grief which pervaded the Parsee community, a stranger might have thought that they deplored a national calamity rather than the loss of a private individual.

Numbers of European Gentlemen connected with the most respectable Mercantile Firms in the Island visited the House of Mourning to offer that condolence and consolation to the bereaved father which their sympathy with his grief for the loss of one whose good qualities they had had many opportunities of observing, rendered them capable of affording. Exclusive of a large circle of relatives, a wife and infant daughter, are left to lament his untimely loss, and if the testimony of one who knew him well in life, may be given of him in death, many even in a distant land who had only the benefit of a casual and passing acquaintance with him, will read this announcement of the death of DADY CURSETJEE ARDASEER with feelings of grief, and lament that the chill frost of death has nipped in its pride a blossom of such luxuriance of promise.

---

THE REPOSITORY ON OPIUM.

We find in the Chinese Repository for last month, two articles directed against the Opium trade, one of which signed V. P. M. informs the public that the sum of $ 500 have been placed in the hands of the Editors of that publication, to be awarded for the best essay on the Opium trade, "showing its effect on the commercial, political and moral interests of the nations and individuals, connected therewith, and pointing out the course they ought to pursue in regard to it." The time for receiving these essays as well as the umpires will be named by the Editor of the Repository at some future time. We are glad to find an individual spirited enough to sacrifice so large a sum in order to arrive at a clearer insight into the merits of this question, and hope that able pens may be found to contend for the prize, as well as impartial judges to award it; but the writer of the letter alluded to has thought proper, while offering this money, to prejudice the question which he wishes to be candidly discussed, and attacks some remarks we made some time ago upon a letter on this question, published in Calcutta under the auspices of Archdeacon Dealtry. We should not have noticed this but for the gross misstatement V. P. M. allows himself to make of what we then said, and wan's misrepresentation, whilst he affects to have nothing so much at heart as truth. We never *lauded the use of Opium*, we never "*expressed that we wished the Opium trade might cease, because of the individual misery and crime*," nor did we "*assert*," *that all it's evils are overbalanced by the general good it works on political economy*," we merely said that we believed that an impartial investigation it would be found that the general good overbalances the evil. An opinion thus expressed cannot, we think, be called an assertion. We shall not now enter again on the question whether the Opium trade is or is not an evil, we shall confine ourselves merely to a few remarks on the letter of V. P. M. and not *magnate* in doing so. The writer who wishes to elicit sober truth, who offers an award for being put in possion of that truth, anathematizes such as might not consider the Opium trade as greatly pernicious, and uses the following expression "if "otherwise, if our character must continue to be "associated with Opium and the smuggler, then "has Christianity in us a difficulty to surmount "more potent to nullify all her efforts. then all "is that the policy of the *prince of darkness* has yet "devised to hold China in Chains. God forbid that "he should *thus* conquer." We are not in the confidence of his clownfooted majesty, and consequently are not aware of his device with regard to China, and under a great disadvantage encountered to V. P. M., but seriously, we should like to know whether the use of such *diabolic* is soberly discussing a question.

V. P. M. makes a long extract from a letter received from a friend, to illustrate the foolishness of a man's laying out his money in Opium smoking, but his illustrations are singularly unhappy. We give them as follows.

"For instance, a man fond of noise and excited agreeably by the hearing of it, buys a quantity of powder, and touches fire to it. He experiences an extinction of that amount of property. Although the powder-maker and the merchant gained by the transaction their pay, if it has not benefitted the man, to him it has been a total loss; and if the sale of it was no more profitable than would save him the sale of some useful article, it has been, as matter loss to the community. And if by the explosion the man is burnt, partially loses his reason, is taken off for a time from business, and confined by sickness to his bed, must have nurses, physicians, &c., the loss is still increased. And if he never recovers fully his wealth, or reason, suffers in his social affections and moral sensibility, becomes less faithful in the education of his children, and they are more exposed to temptation and ruin, and he is never again as able or willing to be habitually employed in productive labor, the nation loses equal to the amount of all these put together. And if his example leads other men to spend, and to suffer in the same way, the loss is still further increased, and so on, through all its effects.

"Suppose that man, instead of buying the powder, had bought a pair of shoes; and that the tanner and the shoemaker had gained in this case, what the powder-maker and the merchant gained in the other; and that by the use of the shoes, though they were finally worn out, the man gained as much as he gave for them; without any loss of health, or reason, social affections, or moral susceptibility; and without any of the consequent evils. Who cannot see that it would have increased his wealth, and that of the nation without injury to any, and have promoted the benefit of all.

"This illustrates the principle with regard to opium. A man buys a quantity of it, and smokes it; were he would be, as in the case will every man, in no respects better without it. It is to him an entire loss."

Why, if a man is fond of noise, and can afford to pay for it, should he not indulge himself, why not buy the powder and puff it off; as to the employment of the money not being profitable to him, we deny that inference; he wished for pleasure, and thought the pleasure worth the sacrifice of part of his property. That accident should occur, and he be hurt in consequence, has nothing to do with the question; we might as well assume that the shoes which the other man bought, pinched him and chafed the skin of his feet, that he became lame in consequence that the doctor was called, that inflammation succeeded, and that the leg had to be amputated. Who of the two in the latter case will have made a better use of his money, he that expended himself with the powder, or he that had his leg for having bought a pair of shoes? It is to[illegible] say that the man, because nothing remained to him after the powder was burnt, had no return for his capital; he bought pleasure, in such shirts, whilst the other's shoes may have procured him pleasurable feelings for the time they last. d. V. P. M. illustrations will therefore not hold good, independent of the odd way of looking money by the use of snuff, though we must say that he who indulged in equibs and crackers, instead of buying shoes, was, if he was in want of the latter, and if the purchase of the powder precluded him from the possession of them a very improvident person.

---

LA BONITE.

*Translated from O Macaista Imparcial of 16th February 1837.*

Official Correspondence between the Custom[illegible] and the Alderman charged with Chinese affairs.

relating to the ill-treatment of some french officers belonging to the french sloop of war *la Bonite*, at Pacsan (the Lappa) by the Chinese of that place.

*The Cantang's Letter relating to the visit to him of some frenchmen.*

Kew, the present Cao-tang of the town of *Hiong-shan* to the Alderman charged with Chinese affairs.

It is a fact that strangers resident in Macao, not only such as are newly arrived to transact their business in Canton, but also those who have been longer there with the same object, and who come here for a temporary stay, will always, whenever any thing happens to them, be the matter great or small, go themselves to complain before the tribunals of the mandarins. I have received express orders from my superiors that all their complaints be made through the Hong merchants, and not to allow them to enter our tribunals, which latter is in disobedience to the established laws. If the strangers resident in Macao have any representations to make to the chinese authorities, they must first apply to the Alderman charged with chinese affairs, and the latter must then address me on the subject; and this must be done in order to shew respect to the said Alderman, and obedience to the laws of the Empire. Now, at 8 o'clock of the 6th day of this moon, some five frenchmen, whose names I do not know, entered my house, and I not understanding what they said, and their entering my house without permission, being altogether contrary to the Laws of the Empire, ordered my policemen and the porter to expel them. They returned on the morning of the following day, accompanied by 6 or 7 persons more, and said I know not what; their language being different, so that they could in no wise be understood, to enable me to examine what they wanted of me, I ordered them away. As these strangers have no knowledge of the laws and statutes of this Dynasty, I direct this letter to the said Alderman, that he may inform those persons, that, should they again come to Macao, and have any complaints to make, be they great or small, they must clearly explain them to him, that the Alderman may address me on the subject, to enable me to take the necessary steps; they must not again enter the public offices, contrary to the established laws. This I communicate to you on the 7th day, of the 12th moon, the 16th year, of Taou kwang.

*Letter from the Alderman, charged with Chinese affairs to the Cao-tang.*

I, the Alderman charged with Chinese affairs, *Mandarin Intendent of the district of Kao-king*, have to inform the Cao-tang, that the Commander of the French sloop, *la Bonite*, has represented to the Governor of this city, that on the fifth day, when one of his officers, in Company with Mr. Guillet (Missionory) went to take a walk at Pac-san (the Lapa), the Chinese of that place, to the number of about sixty, insulted him with wrongful language, threw stones at him, and ultimately pursued him with bamboos, leaving him after he had been severely illtreated, and after he had, in his flight, lost his hat, stick, and a dollar, which the Chinese stole; he, the Commander, consequently demanded of the Governor, to order satisfaction to be given for this insult, and the hat stick and dollar be returned; in consequence of this representation the Governor has ordered me to inform the Cao-tang of this incident, hoping that he will devise means to bring these offending Chinese to condign punishment, and that the stolen articles be returned to their owner. On seeing this, and conformably to your letter to me of the 13th instant, in which you inform me that all representations from foreigners in Macao, must be made through me, which I now do, I desire of the Cao-tang the earliest compliance with this just demand, assuring him at the same time that he will be held responsible for any disorder caused by the said Commander or his officers in consequence of his want of attention to this matter. I hope soon to receive the answer from the Cao-tang to my demand.

SEABRA.

Macao, 19th January 1837.

*The Cao-tang's answer to the letter of the Alderman.*

Kew, the Cantang, informs the Alderman, that he has received his letter (the contents of which he recapitulates, are omitted in this translation, Ed. C. P.) Seeing this, I ordered the Mandarin to call before him by means of the Police runners, the offending Chinese, to examine them, and to make them restore immediately the stolen things; the Chinese confessed having taken two hats and a stick, but not the dollar, and obediently delivered those things to the Mandarin, &c.

It remains for me to notice, that conformably to law, the French Ships of war must anchor in the outer seas, when they come to Canton, and not enter, and anchor within the district in order that none of their people may disembark, and cause disturbance on shore; now the Commander and other officers of the french sloop, *la Bonite*, disembark of their own free will, walk about and cause disturbance every where; they ought be sent back to their sloop.

Now, in the first instance I order that the two hats and stick, which have been found be given up to the Alderman charged with Chinese affairs; secondly, I remind him, to inform the said Commander and other officers, that they must remain within the limits of their duty, and not act against the laws by arbitrarily coming ashore, causing disturbances there by; the guilt of which will fall upon themselves.

13th day of the 12th moon, of the 16th year of Taou-kwang (21st January 1837.)

Wm. Marsden, Esq., LL. D F R. S, who recently died, in his 82d year, at Edge Grove, Aldenham, was author of several well-known works connected with the history and languages of the East. His family were of Derbyshire extraction, but he himself was born in Ireland, and went to India at an early age. Soon after his return to this country he published "The History of the Island of Sumatra." About 1795 he was appointed second Secretary to the Admiralty, by Lord Spencer. After his retirement from public life, in 1807, he resumed the studies of his youth, and has left behind him a number of publications which are well known to the Orientalist. Since the death of Lord Stowell he has been the senior member of the club which was founded by the great Lexicographer, Dr. Johnson. Edmund Burke, and Sir Joshua Reynolds and known by the honorary designation of "The Club." Mr. Marsden some time ago exhibited a not very common instance of patriotism, in voluntarily resigning a pension of £500, a year, which had been bestowed on him as the reward of his public service.

*Extracts from the Calcutta Papers.*

## AUSTRIAN CENSORSHIP.

In some other countries of the Continent the jealousy of the government is satisfied with the control of a single censor; but here I am told that no work whatever can be put to press until it has actually undergone the revision of three distinct officers. For example, the manuscript is sent first to the Office of Police, where there are censors appointed for every department of art, science, literature, politics, and religion. One of the censors, of course, immediately sits in judgment on the various passages of the work. This functionary having made his remarks upon the margin, it is next submitted to another officer to consider these remarks. If the work be political it is then sent to the Chancery Office; and if religious, to the Consistorial Office. On being sent back from either, it is then returned to the Office of Police, where it is again revised, and the passages that are permitted to be printed and those to be condemned, are finally fixed upon; when to crown the whole ordeal, it is necessary that either the Graff von Sedlmitzky or the Hofrath von Ohms, the two individuals at the head of the censorship, append their permissive seal of *imprimatur*. Only imagine a couple of cold hearted official aristocrats, invested with the power of wielding the mental energies of a great nation, and of keeping the whole intellect and imagination of Austria in such chains as they in their wisdom may think fit to forge! As a striking instance of the jealousy of the Government towards any thing appertaining to literature, I may mention, that a few years ago, when the leading literateurs of the city had, with unexampled cordiality, formed themselves into a society for friendly intercourse and conviviality, the police, with ut assigning a single reason, but from a belief no doubt, that assemblies of men, where full scope was allowed for the exercise of intellect, could neither love the character of a despotic power nor be favorable to its stability, openly declared hostility to this literary associa ion, and instantly put a stop to its further meetings.—*Strang's Germany in* 1831.

ATTEMPTED LAUNCH.—Two attempts were made, on the 24th and 26th, to launch the new clipper *Robroy* from Messrs. Ambrose and Co's building yard; but in consequence of some malicious person having driven a nail into the cradle, she was checked in her progress on the ways, and brought up close to the water's edge, where she will probably remain till next springs.

If it had been possible to 'annihilate time and space' for the nonce, the event noticed in the following article from the *Bombay Courier* of the 27th ult. would assuredly have received the honor of a niche in the Chronological Table of Events for the past year. We congratulate the Bombay community on the circumstance announced:

'A meeting of merchants, at which all the European firms in the Island, with two or three exceptions, were represented, took place yesterday at the office of Messrs. Skinner and Co. for the purpose of establishing a bank. Having been at it until a late hour, we have merely to state at present that a prospectus for the institution was agreed to upon the principles established for the Bank of Bengal; and that fifteen lakhs of rupees of the capital were sub-cribed upon the spot. The subscriptions would probably have been still larger, had not a resolution been adopted to restrict their amount to the sum specified—one half of the proposed capital—for the purpose of enabling parties who were not present to join, as well as to prevent any thing like the appearance of exclusiveness from attaching itself to the undertaking.

An account of the proceedings on the occasion, and the objects of the institutions will appear in our next. In the mean time we have merely to state that a provisional committee, composed of the following gentlemen, has been appointed to superintend an application for a charter, and to look after the interests of the subscribers until it is secured.

'Since the above was written, we are informed that five hundred and ninety one additional shares have been taken up. Nearly twenty-one lakhs, therefore, were subscribed during the first day. Subscription not were limited to two months. There can be no question, however, that the whole amount required will be taken up in a day or two.'

*From the Calcutta Literary Gazette.*

The Portuguese and the English do not associate much together; so that I can only describe the society constituted by the latter. Of course the number of English residents is very limited; consisting of His Majesty's superintendents and their families, the ladies of merchants in Canton, and one or two resident Merchants. A pleasanter or more hospitable society I have never met with. Great cordiality seems to prevail among the ladies, and as for the gentlemen, there are some most intelligent men among them, and those who come down from Canton are buoyant as school boys come home for the holidays. Some of them at least seem to leave care and business behind them and try to enjoy themselves. The ladies of course take the lead in doing the agreeable. It was my misfortune not to be in Macao at the gay season; but I have had many descriptions of it. Fancy balls and masquerades, and musical parties, are then the order of the day or rather night, and in the getting up and conducting of these entertainments, I am told, that great taste and liberality are displayed. The society is indeed small; but although there may be comprized in it, a few gossips male and female, chiefly the former; yet of the petty rivalry and malignity that so often prevail in such limited circles, I believe there is none in Macao. I made acquaintances there with some for whom I shall ever cherish the highest esteem and the warmest regard; and if it would not be an unpardonable breach of decorum, I would name some who are an honour to human nature; one lady in particular, ever foremost in acts of benevolence, ever ready to pour into the hearts of the afflicted, the balm of genuine sympathy—one of those who really,

Do good by stealth and blush to find it fame;

but I must not trespass on the sanctity of that diffidence and retirement I am so much bound to respect.

The climate of Macao, although it is very warm in the months of June, July and August, during the day, is on the whole exceedingly fine; the atmosphere is free from humidity and the nights are cool. The houses, though less substantially built than those of Calcutta, are many of them spacious and commodious, and the rents are moderate; for 50 dollars a month you get a capital house.

And as to one individual who resides at Macao, a passing tribute to his merit, may be excused as he is at once a public character and a public benefactor. I allude to Dr. Colledge. This gentleman is attached to His Majesty's establishment at Macao. As a professional man his talents are of the highest order; and they are rendered gratuitously available to every stranger who applies for them, with all the attention and tenderness which the highest remuneration could properly secure. But Dr. Colledge will not receive remuneration, though he will readily devote his skill and his time break his rest and risk his life in affording relief to suffering humanity. He has resided about ten years in China, having been attached to the Company's Establishment, and during that period he has restored above 4,000 Chinese to sight. As a member of society, he is beloved by all who have the happiness to enjoy his acquaintance. And now then adieu to Macao. Of the communication between that place and Canton, the scenery there &c. I may treat hereafter.

COSMOPOLITE.

# CANTON PRESS,

February 25th 1837.

In answer to the Register's remarks in his last number, where he states that the meeting of British merchants held some time ago, was irregular, we now publish the following letter from which it will be seen that the meeting was called in the regular way, though circumstances compelled it to be on very short notice. We should not have called on our contemporary, to correct any misstatement of his, had we not been certain of our correctness in this instance and we hope that with the document, we now give, before him, he will correct his former assertions.

## TO THE EDITOR OF THE CANTON PRESS,

My Dear Sir,—The assertion of the Register of yesterday not conforming to facts as to meeting at Mr. Layton's, I now narrate what is to my knowledge mis-stated, but I feel certainly not wilfully.

A Circular request for a meeting was sent round "to consider of Capt. Elliot's Circular communicated by Mr. Jardine"

The meeting was held that night at Mr. Layton's because a large portion of our company were going down for the holydays next day to Macao.

This Circular was sent round by *me first to* the Gentleman chosen by H M Superintendents to convey his circular to the merchants here. And after *to every person alluded to in Capt. Elliots Circular.*

I had my Circular back previous to the meeting, numerously signed.

Members of the oldest houses attended this meeting. My *own judgment* and *feeling* being quite with the resolutions of the meeting at Mr. Layton's. I was induced to take the step I did by many notes of my fellow merchants expressing a keen feeling of the slight and disrespect they had met with.

Your's truly,

February, 21st 1837.

A Coolie belonging to Minqua's hong, unable to discharge a debt of about 8 dollars owing by him, a few days ago attempted to evade payment by poisoning himself with Opium of which he swallowed a mace weight diluted in Samshu. This was discovered, and Doctors Anderson, Parker and Co's applied the stomach pump; the man is now quite recovered, though the large dose of Opium had already begun to operate; we hear that to prevent the man's falling asleep, he was walked up and down the hong during the whole of the night, guarded by other coolies, who whenever he showed signs of somnolency, kept him awake by means of pinchings, kicks an buckets of water. The poor fellow will probably not soon again attempt to poison himself.

Several rumours have been afloat about the legalization of the Opium trade, but none have, we believe, been traced to a satisfactory source: We remain on this subject as much as ever, in perfect uncertainty.

## PEKING GAZETTES.

Complaints of malpractices, pro forma reports, appointments, and condemnations, are almost the only subjects that appear in the gazettes last received from Peking. One subject of complaint is the prevalence of false coinage, or depreciation of the governmental money—the copper *cash*—by admixture with sand. Looking at this trivial coin (if coin it may be called), we can hardly suppose the advantage gained by depreciation and recasting of it, sufficient to induce many to be guilty of that offence; according to the report before us, however, it is an offence common in all the provinces. We fear that depreciation on the part of those whose duty it is to furnish good coin is not less common. The result of frequent examinations of the cash of various reigns proves, that since the reign of Kanghe and Yung-ching the quality and weight of metal has been constantly decreasing. An other subject of complaint is the mal-practices of subordinate officers of the six boards, their unlawful interference in matters which convern only their superiors, their receipt of bribes, and so forth. Riotous conduct and offences of men in the transport-boats, on the grand canal, are also complained of.

Among the subjects brought before his Majesty's notice is the decay of two officers of high rank, the commanders-in-chief in Che-keang and Fuh-keen; both of whom had risen from the ranks, and had seen active service in several parts of the empire. We learn also of the demise of one of the emperor's cousins, Meenmin, and of his nephew Yelishaou,

In the gazette of the 18th of November, his majesty, in reply to a representation from one of his officers, commands the use of a new preparation of gunpowder which owing to a changed in the proportions of the materials, is found to be stronger than the powder previously in use.

Several members of a secret association have been apprehended, and have confessed the evil nature of their habits and practices. The emperor is very severe towards offenders of this class, and commands the penalty of the law to be inflicted on them without any mitigation.

The degradations of officers and changes of appointment are to us foreigners of little interest; but were an accurate account to be kept of the offences for which officers are degraded, and of the different appointments held by many within very short periods of time, such an account would be far from uninteresting to a student of the Chinese national character.

## EXTRACT FROM THE CHINESE.

*Translated for the Canton Press.*

*(Continued from our last.)*

Tsao-Tsao asked him "Of what hellish spell are you master, which enables you to do what you please with impunity."

Cho-tse replied "I had studied necromancy three thousand years in the Gomei hills of Ka-ling in the province of Sse-cheun, when walking out, one day, I heard a voice, pronouncing my name, which appeared to issue from a stone in the wall. I searched about the spot thinking to find some one concealed but without success;—this happened several days till the wall was shattered by a thunderbolt and I found three books of divine origin, which I took from the centre of a stone. The title of the Boo a was. "The Elements of Invisibility."

The first volume treated of Divine invisibility, the second of Earthly invisibility, and the last of Human invisibility.

By the first volume I learned to ride on the coulds of heaven; and also derived the power of flying. By the second I was taught to render mountains and stones invisible; and by the third I am enabled to render myself invisible and also to cause any persons' death, however distant they may be from me.

You are now, my lord, about to be promoted to the highest rank below the throne: reign all your honours and follow me to the Gomei hills where I will initiate you into all the secrets of necromancy, and will place the three divine books within your reach."

Tsao-tsao answed him "I have a great mind to go with you, and would not hesitate, but unfortunately there is no one at court to supply my place."

Cho-tse smiling, retorted. "Is there no one at court but yourself capable of filling that office? do you not think that Leaou-pei the Emperor's uncle would be immediately installed in your place? If you do not resign and follow me, nothing but your death will satisfy me."

Tsao-tsao, was greatly enraged at this and accused Cho-tse of being in league with Leaou-pei to cause his resignation. He ordered the lictors to seize and flog him, which they exerted all their strength to do severely, but he would not move a muscle.—They then brought in a large wooden collar which they fastened round his neck with a large ironlock and having chained him they led him to prison.

Immediately the lictors left him, the centinel at the door saw the collar and chains fall down on the floor of their own accord.

When he had been kept in prison seven days without any food, Tsao Tsao sent an officer to see if he were dead.

The officer reported him in as good health as when he entered. Tsao-tsao then had him brought before him, and examined him if he were not hungry?

He replied: I can eat a thousand sheep a day and not feel satisfied, or remain years without any food and not starve.

*(To be Continued.)*

## BANK OF AUSTRALASIA.

## SHIPPING INTELLIGENCE.

ARRIVED —15th Brit. *Antonio Pereira*, Young, from Calcutta January 12th, omitted in our last. Brit. *Sir Herbert Compton*, Boulton, from Bombay. *Alice*, Wright, from Manila. *Bengal Merchant*, Campbell, from Sydney.

The *Ann*, Pybus, has, we suppose, passed on to the East-Coast, her destination from Calcutta.

The *Hoogly's* arrival was prematurely reported in our last shipping report. The *Amelia Thompson*, now in, was also reported before actual arrival.

SAILED or DESPATCHED.—Am. *Brooklyn*, Pearce, for Singapore. *Cynthia*, Graves, and *Panama*, Benjamin, for Newyork. Dan. *Nyden*, Burd, for Lombock. Brit. *Antonio Pereira*, Young, for Calcutta. *Neptune*, Williams, for London. Amer. *Emily Taylor*, Hallett, for Singapore. Brit. *New Grove*, Johnstone, for Sydney. Amer. *Eben Preble*, Crocker, for Newyork.

PASSENGERS — Per *Syden*: Mrs. Burd. per *Antonio Pereira*, Mr. W. P. Livingston. per *Panama*, Mr. W. S. Wetmore.

The *Syed Khan*, and the *Sir Herbert Compton* are to be despatched for Bombay in a few days.

The *Ardaseer* was to have left Bombay on the 17th December with 1620 chests of Opium.

Serious apprehensions are entertained for the safety of the *John Bannerman*, L. Wilson, which vessel left Macao Roads on the 17th December, and had not arrived in Singapore on the 25th January.

The Passages of the two first Clippers of the season, the *Red Rover* and the *Antonio Pereira*, have been nearly equal in length, the former leaving the Sandheads on the 10th and the latter on the 12th January, and arriving here on the 15th February, giving two days in favor of the latter vessel.

We notice the arrival at Bombay of the following vessels: *Golconda, Adelaide, Charlotte, Hannah, Lord Castlereagh, Wm. Nicol, Good Success.*

The *Lord Lowther, Asia, Prince Regent.* Ingles and others are loading for Great Britain.

LATEST DATES from ENGLAND 28th October P *Champion*. UNITED STATES 14th Oct. P *Roscoe*. CALCUTTA, 10th January P *Antonio Pereira*. SINGAPORE, January 25th P *Ann*. JAVA 20th December P *Delight*. MANILA 9th January. BOMBAY, 27th December via Bengal.

VESSELS EXPECTED.—From the Straits, *Cecilia, Peacock, Gallardon*. ENGLAND, *Sarah Barry, Triscilla, Falcon, Morrison, Psyche, Copeiar, Java, Mercury, Ann*. SYDNEY, *Moffatt, Lady Kennaway*. CALCUTTA. *Sir C. Malcolm, White Witch, Crawfurd Family, Rob Roy, Ann, Lon. don, Phlades*. MANILA, *Dos Amigos*. BOMBAY, *Cornwallis, Ardaseer, John Fleming, Good Success, Motherland Amherst, Goose on Finding.*

N. B. OF IMPORTS ALL DUTIES ARE PAID BY THE PURCHASER, AND OF EXPORTS BY THE SELLER.

BOATHIRE IS PAID BY THE SELLER.

NOTE. Opium can only be delivered at Lintin &c. where also higher prices are obtainable for *Camlets, Saltpetre, Ginseng* and other Goods, on which the duties at Whampoa are high.—Ships with *Rice, Cotton &c.* sometimes discharge at Macao or tranship their Cargoes, at Lintin &c. to other Vessels, bound to Whampoa, and thereby avoid Port Charges. The ship rents outside, and River Freights, are various and high.—Small invoices of *Wine, Beer, Pickles &c, Confectionary, Stationery, Cutlery Crockery ware, &c.*, for foreigners consumption, are sold at Auction duty paid.

*Note. Alum,* and *Coals* are procurable cheaper at Lintin, Macao, &c.; and *Raw Silk, Silk* piece goods *&c.*, are sometimes shipped there the latter Port to avoid double duties, chargeable on those goods, if more than 100 Peculs are required for the ship when at Whampoa.

| Australia .... „ | | „ direct .... | ½ 2 | Lintin &c... .... | 1 ? |
| Sand. Islands .. | | France .... | 2½ ? | | |

Note. Above rates are from 20th Oct. to 20th April annually; during remaining 6 months the premiums are somewhat higher. Risks on Blocks are $ 9 per Cent per annum, $ 4½ for 6 months, $ 2½ for 3 months and $ ½ per month.
The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class vss. measg. 1600 cubits & upwards pay $ 0.7874256 of a Tl. per cubit.
2nd „ „ „ 1200 do. & under 1600 „ 0.7221991 „ „
3rd „ „ under 1200 do. 0.5062341 „ „

N.B. The cubit in 14½ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremost to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products.—The largest class pay from $ 4300 to $ 4320; 2d class from $ 3700 to $ 3780; 3rd class from $ 3700 and under. The Canton or Present Fee is paid by all vessels 1600 Tons or $ 2223. Linguists fee $ 1734 and Comprador's fee $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Resident ships are charged only about $ 1300 in lieu of measurement &c.'

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—The better qualities of white and unbleached Long cloths continue in fair demand.

COTTON YARN.—Without any enquiry.

LEAD.—Is declining.

RICE.—Is without improvement in price.

STRAITS PRODUCE.—Pepper has been selling at our quotations, but the demand is not brisk. Bezoars rather improving.

TIN.—Quite nominal at our quotation.

COTTON.—Nothing yet doing, and the market in consequence may be considered rather declining.

OPIUM.—The excitement which we noticed in our last, has continued up to the present date, without anything certain being yet known of the intentions of government as to the admission of Opium. In addition to the edict published in our last number, we have seen another of the same date from Peking, ordering the importation of Opium for one year as an experiment, but we refrain from publishing it, from the belief that as it has not yet been acted upon, some discretionary power must be left to the local authorities, and that they have not yet come to a decision. Meanwhile the Lintin clearances are improving, being up to the 22nd.

Patna 410, Benares 136, Malwa 826½, Total 1372½ Chests.

We have received no report on the touch of the new Bengal drug, but the weight of the Patna varies from 120 a 122 catties, and it is said to be firm; of the Benares we have no account. The new Malwa is reported to be of good weight, but soft.

### EXPORTS.

RAW SILK.—The market remains completely inactive.

TEA.—With the exception of the purchase of a few green teas, for America thing is doing in the Tea market. The black tea-men continue to ask higher prices for Souchong Congous than exporters can afford to give.

*( From the Indo Chinese Gleaner )*

### Chinese Moral Maxims—invisible beings attend her.

From the Tae-shang kan-ying Book:

"Tae-shang said, neither happiness, nor misery have any door of access; men alone bring them on themselves.

"The retribution of virtue and vice, is as certain as that the shadow follows the substance; hence the heaven and the earth have spirits who preside over the faults of men, and according as men's crimes are great or small, decide and record, in order to fix the period of life. If the record be short, poverty and want are the consequence, if the record be long, sorrow and distress are the result. Men hate the wicked man; punishments and misery follow him; happiness flies from him; evil stars extend their baleful influence to him—when the number of his crimes is complete, he dies.

"Over every man's head are three spirits, and the Divine Prince of the North Star. These record men's crimes and vices, and decide the period of men's lives.

"Also, resident in every person, are three spirits of the body. These on every Kang-shin day, (once every two months,) start up to the heavenly powers and report men's crimes and errors. On the thirtieth day of each month, the gods of the family fires do the same.

"All who commit great sins, have twelve years of their life taken away. Those who commit smaller sins, have a hundred days taken away.

"Greater and smaller, there are in all several hundred sins—all who desire long life should be particularly careful to avoid them. If a course be right, advance—if wrong, recede. Do not tread in the path of wickedness—do not deceive yourself in a secret chamber. Add to your virtues and exalt your merits. Exercise compassion and tenderness to all creatures

"Be faithful to your prince; dutiful to your parents; elder brothers, be loving—younger brothers, be respectful. Rectify yourself, and reform others—and be merciful to orphans—pity widows—respect the aged—cherish the young.

"Animals and vegetables also should not be injured. Pity the vices of others—rejoice in the virtues of others. Relieve the necessitous. Save those in perilous circumstances. View the success of others as your own success—the loss of the others as your own loss. Do not exhibit the faults of others; do not proclaim your own good properties.

"Resign much, and take little. Receive insult without resentment; receive favour as if alarmed. Confer favours without seeking for a recompense. Give to persons without feeling regret afterwards.

"A good man is one whom all respect—providence protects him—happiness and honors follow him—all evil spirits flee from him. The soul of Deity surrounds and guards him. That which he would do shall be effected. To be a Shin-seen (a divine man of the hills) is that which he may hope for. He who wishes to be a Seen in heaven, must resolutely have performed one thousand three hundred virtuous actions. He who would be an earthly Seen must resolutely have performed three hundred virtuous actions.

"The opposites of these are—to feel a disposition to unrighteous conduct; to commit that which is contrary to reason; to possess talents for vice. To be cruelly unfeeling in injuring and distressing others—secretly to ridicule princes or parents. To treat with neglect a teacher—to rebel against those whom we serve. To deceive the ignorant—to slander one's colleagues. To be an impostor or deceiver. To oppose one's kindred—to be violent and injurious. To be obstinate and positive in one's own way. To put wrong for right, and false for true. To turn one's back on that which is right, and to fail in that which is proper. To illuse inferiors in the hope of acquiring favor. To flatter the great in order to ingratiate one's self. To be ungrateful for favors. To cherish unceasing resentment.

"To despise heaven's people (i. e. the common people, or the people in contradistinction from the rulers). To disorder the Government of a country. To reward iniquity; to punish the innocent; to murder for the sake of gain. To overthrow others, in order to establish one's self. To destroy those who have surrendered; to kill those who submit—to defame the upright, and drive away the virtuous—to insult the orphan, and ill-use the widow—to reject the law, and receive bribes—to make straight crooked, and crooked straight—to make a light offence heavy—to be enraged against a man condemned to die. To know one's faults and not reform; to know what is good and not do it; to involve others in one's own offence. To impede a good plan; to slander the sages and virtuous; to insult the moral and the good; to shoot with an arrow the birds that find the wood; to molest the insect. To alarm the bird on the branches; to close up the den of animals; to overturn the nests of birds; to injure the womb; to destroy the egg. To wish that others may love. To speak against the merits of others. To endanger others, and secure one's self. To insure the good of others, and advantage one's self. "To injure the public good for a private end; to avail one's self by stealth of the talents of others; to exhibit their deformities. To attack the secrets of others; to cause others to waste their substance. To separate flesh and bone (those nearly related.) To seize that which others love. To aid men in vice; to be ambitious of grandeur. To insult others, in order to obtain the ascendancy. To destroy the grain of other people To prevent people's marriage. To become proud in consequence of accidental wealth. To feel no sense of shame after receiving a lucky pardon. To exclaim against the good done by others, and deny one's own faults. To conceal a malevolent heart. To blast the hopes of others. To avail one's self of power to oppress others. When seeing the glory and honor of others, to wish for their disgrace. When seeing their wealth and abundance to wish that they may waste and scatter it. To see beauty and feel illicit desire. To be indebted to persons, and wish for their death. To do what is of no use. To sing or play on those days, on which the attending spirits make their report to heaven; to point unnecessarily at the rainbow or stars. To look long at the sun or moon.

"Such crimes as these are distinguished into greater or less, by attending spirits. When the measure of a man's crimes is full, death takes place—and after death, there is still punishment—misery is entailed on children and grand children."

*From Documents relating to Opium etc.*

### FOREIGNERS IN MACAO.

*Supplementary Statement from the Sub-censor How-kwa.*

Furthermore, in regard to the residence of the foreign barbarians at Macao, the prohibitory enactments are very full and clear. But I have heard that it has of late been usual for the barbarians to sit in large native sedans, and to hire natives to carry them: also to hire native females for purposes of prostitution, who are called 'To-fan.' Moreover, their merchant ships are not allowed by the regulations to discharge their cargoes clandestinely at Macao: but of late it has become customary for only those ships to make their anchorage at Whampoa which have return cargoes of merchandize to take away; while the others never enter the po t, nor announce their arrival These last send their finer and lighter goods, on board the boats called 'fast-crabs,' from Kum-sing-moon and other places, for sale. The coarser and heavier goods, they unlawfully send in cargo boats direct to the Stud-house (in Chinese 8 4) at Macao; after which they call upon the hong merchants to hire cheap boats to convey them to the provincial city, and exchange them for other goods,—thus not only evading the measurement charges and duties, but also avoiding examination on the part of the native authorities.

But the extreme case is this:—at Macao, on the outside of the gate called the Dutch-gate, are very numerous graves of the natives. In the second month of the present year the foreigners made a wide road there, levelling entirely the graves. The sub-prefect stationed at the place reported this to his superiors; and at his request a deputy was sent to visit the spot in concert with him, and to reprehend the foreigners. The e, however, would not make acknowledgment of their offence; and when the officers sent men to repair the tombs, they even led on their barbarian slaves, and beat the native police and people. Afterwards a despatch was sent to admonish them authoritatively; and then only they sent an address to the officer, making to conciliate him. Such outrageous overbearing, and lawless conduct arises wholly from this, that the local officers, thinking for ease or to be the most quiet policy, seek only to obtain present freedom from disturbance, and hence give occasion for being treated with slight and contempt.

Macao is within the jurisdiction of the Heang-shan, and on all sides it there are naval stations. For all its daily necessaries, it is compelled to look up to us. The compradors employed by the foreigners there, are natives to whom permits are granted by the government. Should, therefore, the least insubordination be shown by the foreigners, there would be no difficulty in immediately bearing their lives in our hands. I have been told that a former magistrate of that district, named Fung Chee, on account of the pride and profligacy of those barbarians, removed from among them all the native dealers and mercenaries, and allowed no commercial intercourse on the part of natives with them; till the barbarians, trembling with fear, were at once brought to order. This is yet in the recollection of the gentry of Heang-shan. Since a distinct magistrate could effect that much, would the barbarians dare even to move, if the great officers of the country would make a display of their police? Another instance occurs to me. The barbarians at Canton be it a quay, outside the city, a wash which went on for months without any hindrance put a stop to it. But when your minister Lin's colleague Chee Kwoching was at that time an hereditary prince, he went to the spot, set down his name there, and commanded the instant destruction of the wash; and the barbarians, subdued by his commanding firmness, dared not even to utter a word. Again, the year before last, when Lord Napier brought ships of war up to Whampoa, your minister Lee Kun, the governor, mustered a considerable naval force so as to present a close attention free of defence; and the barbarians were at once filled with dismay, repented their error, and requested a permit to leave the port. We see from these instances that the barbarians have never yet failed to succumb.

Now, to make ostentatious show of terror to, is in true, calculated to ruin affairs: but to pass matters over in silence is, on the other hand, calculated to nourish depravity. If the old regulations be not rendered conspicuous, and the prohibitions be not strictly enforced, those barbarians will end with doing whatever they please, imagining that there is no limit to forbearance. The barbarians, planning themselves on their great wealth, extensively practise bribery and corruption, and have many traitorous natives for their agents: and many of the police in combination with them. Hence, if a talented, intelligent, and determined officer were, in the first place, to punish severely the Chinese traitors, we may hope that he would thus be able at once to overwhelm the spirit of the barbarians.

This further exposition of my feeble and obscure views, it behoves me to add to my previous representation, and, prostrate, lay it before your sacred majesty, hoping that my sovereign will cast a glance thereon. A respectful memorial.

### From the Chinese Repository.

*Stillingia sebifera.* The Tallow-tree of China. The leaves of this specimen of the Euphorbiaceous family resemble in shape and contour those of the aspen or *populus tremula*, but are smaller and without that expansion in the leaf-stalk as remarkable in that favorite tree To those who are not acquainted with the aspen we may say, that the leaves are rhomboidal, or like the diamond pane of glass, in a cottager's window. They are of a pale and delicate green, and have two corners of the size some or diamond rounded off. There is something light and elegant about its aspect, whether it meets you in the diffusive form of a bush, or whether it rises to the height and consideration of a tree. Nothing that might be taken as an emblem of pride or ambition is to be found in this species. Sometimes in the humble form of a weed, it rears under the shade of a lump of granite, as others it helps to form a fence round an enclosure, and now and then overhangs the doorway of a cottage in the imposing form of a most beautiful tree. It is the nature of some plants and trees to be select in their choice of soil, so that they can only be seen in particular and often retired spots; but it seems to be the characteristic of this whole family to be in no wise scrupulous about either soil or situation, for they grow by the way side, or among rubbish, or wherever earth and moisture can supply them with a modicum of nourishment. This is the cause of great variety in their appearance, so that in the instance before us, a person who has seen a h n bour tree called stillingia sebifera, is by no means prepared to recognize it when it peeps from under a monumental stone in

the guise of a neglected weed. The spikes of flowers, which terminate the branches, are thin and pliant, and remind us of the barren flowers in some of the amentaceous family, such for example as the poplar and the sedge. Being small and of a greenish yellow, they do not attract the eye at first, but when looked at with a love for nature there appears something extremely neat and interesting in their figure. Upon this spike the flowers are ranged in clusters, consisting of five, six, or more individuals. Each minute cluster is bosomed in a small involucre or ruff of about five leaves or sepals, and is adorned on each side with a little knob or kidney-shaped gland.

In order to see all this, the spike must be placed under a good working microscope, and the parts be attentively and leisurely separated from each other; if not, it will appear to consist of a number of small yellow points, with little reference to either order or symmetry. Each small flower has a jointed stalk or pedunele, and a minute cup with an eroded edge, which contains a pair of anthers supported by a little pillar in the centre. The pair of anthers fills the cup. The florets come up in succession, as is usual in spikes, heads, and corymbs, and break off at the remarkable joint just mentioned to make room for their successors. The fruit is not a capsule as some call it, but a drupe, since in the strictness of botanical language a fruit where a nut is surrounded with a fleshy covering is a drupe. This covering splits into three valves when the nuts are ripe, which turn back in the semblance of rays and expose the white nuts in their centre. The nuts have that additional texture so note-worthy in the euphorbiaceous family, which in consistence and color resembles tallow, and burns freely when ignited, though held at a distance from the flame. The shell is hard and the nut oily, both of which kindle and burn with great readiness.

We may remark that each of the valves is composed of two small valves, a fact when taken by itself of no great importance, but by comparison we find it the case in other members of this family, so that it becomes one of the common marks of kindred, and consequently in a scientific point of view, a bond of union. We have touched upon some of the characteristics of a beautiful as well as a highly useful tree, and one that vouches for the goodness of the Creator, who, while he draws around us the curtain of night, that the burden may be taken from our eyes, has afforded to inventive man various means to lighten the gloom and cheer the melancholy of darkness.

The common way of obtaining the material for this light is, to put the ripe nuts into water, which, in the process of boiling, melts the sebaceous part, but gives it up when cool in the form of a crust floating upon its surface. This is to be sure an easy method, and one, like many other Chinese methods, that does not require much art of chemical skill to conduct it. And yet it contains a chemical fact, that water when heated will dissolve oily substances, which it will not do when cold.

## BENGAL.

NEWSPAPER POSTAGE.—Private letters from Calcutta assert, that the Customs and Post Office Committee have recommended to Government, to fix the postage on Newspapers at three annas each, without reference to distance; that some of the members wished to fix the amount at two annas, but that race was negatived. We have heard that one of the members was desirous of emulating the liberal example set by the Legislative Council at Ceylon, and actually proposed, that the postage on all Newspapers should be reduced to one anna.

We think it would be worthy of a liberal Government to offer an indirect premium on knowledge by reducing the amount of Newspaper postage, and we are convinced that ultimately the revenue would be increased by means of extended circulation. Many hundreds of individuals would take in a Newspaper but for the expence of postage.

A compromise of three annas would greatly benefit the Calcutta Press at the expence of the Mofussil, as the circulation of the latter, being on a great degree local, seldom extends beyond the neighbouring (300) four hundred miles, whereas one half the circulation of the former extends to stations beyond that two and half annas limit.

We shall defer our remarks till we gain further and authentic information of the measures likely to be advocated by the Customs and Post Office Committee; in the meantime we feel convinced that they will never propose or sanction any measure likely to injure the Mofussil Press. *Calcutta Courier 13th January.*

## CAPE.

### CAPTURE OF A SLAVER.

H. M. S. Liverey, has just arrived in Simon's Bay, and reports the capture of a Slaver on the Mozambique coast.—*South African Commercial Advertiser, Oct. 26.*

### DREADFUL MASSACRE OF CAFFERS BEYOND THE NORTHERN BOUNDARY.

We have been favoured with the following extract of a letter, which has been received this morning, on the subject of the massacre of Yellousa, a Caffer chief who, after the late plunder of the colony, fled with his share of the spoil to the unoccupied country to the northward.

"It appears true enough that Umyellousa, and more than nine tenths of his people, have been massacred by the Bechuana tribes. In fact, I hear that only seven or eight individuals escaped the slaughter, and those all wounded. Cousani (a Caffer formerly in the service of the writer) says that only three women and three men escaped from the attack, but two more escaped who were not present at the moment, and had been sent out on an errand. Of course every head of cattle were swept off. The attack was made before or about day light, after the Fetcani manner; every hut surrounded and set on fire, and the occupants butchered as they rushed out of the small and narrow door ways. The Caffers say, that even unborn children were ripped from the womb and stabbed; not even the young girls were spared, or such as were about marriageable and of value. What can more clearly show the character of the Aborigines of South Africa? The murderous work was executed for the sake of obtaining and securing plunder. No offence appears to have been given. The chief Chunongwo, (who murdered Capt. Stockenstrom's father and his clan of people dwelt apart from Yellousa, and a little further in the interior. Doubtless, every soul of them too has fallen, as a Bechuana host had gone to attack them at the same time, and no news has come down concerning them. Most likely no one has escaped to tell the tale. Yellousa and Chunongwa's people were, as the Caffers say, about as many as Eno's; that is about 1,000 or 1200, including women and children. It is astonishing how eight of Yellousa's people travelled naked and wounded nearly a month's journey from the Great River down to Xgolongxney, (near the Kabousie,) through an uninhabited country. Cousanie says, they made a sort of mats with grass to wrap round their bodies instead of karosses. It is supposed they must have subsisted on roots or game killed by the lions, &c."—*Ibid, Oct. 29.*

## SINGAPORE.

By the private correspondence which we have received during the week from Batavia we learn that intelligence had lately reached that place from Padang of the disastrous failure of a recent attempt of the Dutch forces in Sumatra under General Clarens, on the fort of Boonjol in the country of the Padries. The whole of the Europeans and native forces before the place were led up to assault after a practicable breach had been effected in the walls. But the enemy within were bent on a resolute stand. They permitted the Dutch troops to enter thro' the breach into the fort, when they opened a most destructive fire, and drove them back. The most undaunted exertions on the part of their officers were unavailing to induce their men to renew the attempt—of whom it is reported that a good many were in their flight cut down by their own officers, who themselves fell in numbers under the sabres and shots of the *Padries*, while standing in the breach and urging and exciting their men to the assault. By the Dutch report there were 150 rank and file, and 11 officers killed in this attack. They retreated on their own position, and General Clarens sent down an officer to explain their situation to Government—from which it may be concluded it was sufficiently perilous. We expect however to receive more particular details respecting this affair by the next arrival from Batavia. General Clarens, the officer in command of the Dutch forces is, we understand, a gentleman of very amiable character and much respected by our countrymen in Java, who no doubt would be pleased to see him engaged in a less questionable kind of warfare, and in more secure quarters than he now is, however qualified he may be in a military point of view to be at the head of such an expedition.

We learn also from a private source, that an officer in the Dutch army in *Java* (a Pole) was lately shot at Batavia by sentence of a Court-Martial under the following circumstances. He had represented to his Colonel that the latter was mistaken on something which he had advanced respecting soldier parade. This representation was resented in the most haughty manner, and with expressions of the most brutal insolence, conveyed in gestures as well as language, which excited the Pole to such a degree that he threw his cap in the colonel's face. At the Court-Martial which ensued he is reported to have said in reply to a suggestion that 'it was possibly accidental,' humanely thrown out by one of his brother officers who was sitting in judgement on him, "that it was purposely done to shew his contempt for a man who did not deserve to be respected." He was brought out to be shot in front of the Palace at Batavia—and went through the fatal scene with the greatest firmness, taking a kind leave of his brother officers on the spot where he fell.—*Singapore, Free Press 2d. February.*

## SANDWICH ISLANDS.

We have, by the *La Grange* received Sandwich Island Gazettes to the 14th January, and give a few extracts below. Accounts had reached Honolulu of a revolution in California, which country, in imitation of Texas, had declared itself in dependent of Mexico.

### *The New year and the Old year.*

The old year is "kicking the bucket" and the new year will soon dawn upon us;—many interesting reflections might be made at this period but as they will probably be made by the *fraternity* at home, and the papers containing them will be received here one of these days, the Oahu editor concludes to let the subject alone, and we think him wise for so doing, as he is but a poor smatterer at moralizing. One thing however we suggest,—will each of our patrons please to give the *Carrier* of the Gazette *one dollar*, as a new year's present?—"We pause for a reply!—

### A Blacksmith's Wife become a Queen.

It is a curious circumstance, that the present queen of the Sandwich Islands, was formerly, or rather is at this time the wife of a Russian blacksmith. An English vessel lying off what we usually call the Fox island, several years ago, one of the officers became enamoured of the fair spouse of a son of Vulcan there; and his passion being returned, contrived to smuggle her on board the vessel, and the captain, who, enraged at such a breach of faith and discipline kept her confined till they arrived at the Sandwich Islands where she was put on shore. The forlorn Ariadne, however found a Bacchus for her Theseus, a royal lover in the place of her lost lieutenant. The King of the Islands became enamored of the fair Russian, made her his wife and raised her to his throne. He was no every day King. He was a statesman, a hero, though we should call him a savage. He progressively created a navy of several well built frigates, taught his subjects to be excellent sailors, raised armies, subdued the surrounding islands, and at the close of a prosperous reign, left his possession and his sovereignty to his queen who now reigns as his successor. She is well obeyed by her subjects, possesses great wealth in flocks and herds, and rice grounds, and sends frequent presents to her former deserted husband, who continues to hammer horse's shoes in a Russian colony, while his faithless, but it seems not quite ungrateful spouse, stretches her sceptre over several prosperous Isles.

*Sandwich Island Gazette, December 31.*

## EUROPE.

*From the Spectator 29th October.*

The alarm and uneasiness which have prevailed for some time in the monied and commercial circles, have not subsided. It is generally understood that the harvest will prove to have been deficient, especially in Ireland. This must tend to raise the price of bread. On the other hand, trade is not so flourishing in the manufacturing districts as it was. Half the silk-weavers are said to be out of employ; and there have been some failures in Manchester. The New-York papers received two days ago, contain a letter from one of the first American houses in London to their correspondents in the United States, advising them of the determination of the Bank of England not to discount American bills of exchange, and recommending caution in sending out orders for the spring trade. The effect of this advice, if acted on, will be felt soon in the manufacturing parts of the country. The rise in the rate of discounts has a tendency, of course, to lower prices, and check trade; and it appears to be operating in that way to some extent. All these are symptoms of present and coming trouble. Undoubtedly, the commercial reaction will be felt less severely because its progress has been foreseen, and is gradual; but, looking to the condition of the manufacturing masses, it cannot be thought of without apprehension. Ministers, too, should remember that important political events may rise out of a commercial crisis. But do Ministers pay any attention to the signs of the time? The Member of the Cabinet who ought to be most attentive and alert, is employed in blarneying the Limerick electors, instead of watching the state of the Money-market in London.

The Manchester Festival Committee have resolved not to allow the disinterment of the body of Malibran, for the reasons stated in the following resolution, adopted at a meeting held on the 19th inst—

"That M. de Beriot having hastily quitted this town immediately on the death of Madame Malibran de Beriot, without having provided for the interment or disposal of the body, otherwise than by a written request to Mr. Beale to inter the same where he should think fit; and this Committee having cooperated with Mr. Beale to conduct the interment in such a manner as to evince their deep feeling on the occasion of a foreigner being left without her relations to attend her last rites, and their sense of her high professional merit; and the funeral having been conducted in all its circumstances in accordance with these sentiments, and the body deposited in a situation liberally granted for the purpose by the Warden and Fellows of the Collegiate Church, this Committee are of opinion that the disinterment and removal of the body would be in direct opposition to the wishes, and utterly repulsive and repugnant to the feelings of the public at large, as well as an ungracious return for the honours paid to the late Madame Malibran de Beriot."

The family of the Rothschilds have assembled at Paris. Their house it is said, requires reorganization, and Paris is henceforth to be he centre of their operations. The line of operation already extends to Constantinople, St Petersburg, and Madrid; and London is only a subordinate point from which their dealings radiate. We are rather struck with such a description of this great banking family, as giving to their proceeding a military character. At least they are described in military language; and we can conceive the Rothschilds running along their lines of operation, and liberating Prince Metternich at Vienna, or shutting up the Emperor Nicholas with his armies at St. Petersburg. Louis Philip they will be close to, and he will not be allowed to stir without their permission. We trace their power in his negotiations; two bankers connected with Switzerland have been sent to Berne. They seem to be more powerful than even was Bonaparte; for, by means of the sea, our brave sailors completely protected us from him, but they cannot keep out the Rothschilds.—*Courier.*

The Carlists have commenced an attack on Bilboa, under the command of Equia. This seems to indicate an intention of providing winter quarters for the troops in the Basque provinces, and an abandonment of the expedition against Madrid. The British Legion is in constant expectation of an attack on the lines before St. Sebastian, from Villareal, who will thus prevent any reinforcement of the garrison of Bilboa by General Evans. It is said that the Carlist artillery for the siege of Bilboa consists of eighteen pieces of cannon, and that a large body of the best men in the army have volunteered to storm the fortifications.

# CANTON PRESS,

March 4th 1837.

The latest Bengal papers brought by the *Waterwitch* we have seen are to the 17th January, and from Singapore we have received the *Free Press* of the 2d February. Want of local intelligence of interest has induced us to make copious extracts from these and the late English papers. The accounts the *Free Press* gives of the war waged by the Dutch in Sumatra against the Padries, are very unfavorable to the former, who still continue to render Sumatra a grave to Europeans by their desire of conquest in that Island. The number of soldiers sacrificed to the ambition of the Dutch Government, during a war, that with occasional intermission, has we believe lasted ever since the English returned Bencoolen to the Dutch, must be very great, and the result has by no means been commensurate with the sacrifice of life end means it has cost.

We give on the other side a statement of the quantity of teas exported to England since October last, from which it will be seen that the whole quantity hitherto shipped does not exceed 29 millions of pounds, whilst last year there were exported to England up to the end of this month, very near 46½ millions. Assuming that four or five ships more will leave this in the course of this month laden with 3 millions of pounds, the whole quantity shipped in this season will fall short by about 14 millions of pounds of that shipped during the corresponding season last year. The unfavorable accounts from England have no doubt been the cause of checking speculations in teas, and we hope that this prudence of the Tea Speculators will meet it's due reward, in causing prices at home to improve, which there is every reason to expect they will do, seeing that the this year's shipments will probably fall far short of the computed consumption. There are now altogether only four or five English ships at Whampoa waiting for freights, which are by no means freely offered.

We have heard nothing further respecting the legalization of the Opium trade, though the rumours that it is to take place for a limited period on trial are still afloat. It is supposed by many that the Imperial Government has left it at the option of the Viceroy, whether to allow the importation of Opium or not, and that he hesitates before he decides on any change, as he will be held responsible for the result of any measures he may take. This responsibility of inferior Officers is no doubt a source of great comfort and security to the Government at Peking, who, if any of their measures fail in success, punish their own instruments, to shew them up as guilty to the nation. It is a system which admirably suits a weak and despotic government.

The *Hurkaru* complains of the irregularity of the transmission of the Canton Press, for which we cannot account, as care is taken always to forward the paper by the first despatch after publication.

We hear it stated that Lord Auckland does not approve of the present mode of remitting the India tribute by way of China, chiefy on account of the consequent irregularity of calls made on the Bengal treasury. The first Officer in Bengal discountenancing the operations of the Finance Committee, makes us hope that it will soon cease, and that the China trade will no longer suffer from being meddled with by the Company; but that left to it's own resources, it will assume a more healthy tone than it has enjoyed during the two last seasons.

A fire broke out in the suburbs of Canton on the morning of Thursday last at about 3 o'clock, but it's progress was happily arrested ere it had spread very wide. It began near a street chiefly occupied by money dealers, and has destroyed about 13 houses, of which several were of considerable extent. We hear that a good many drugs, among which a large quantity of Ginseng, have been burnt.

There are now in the Consoo-house 6 Japanese sailors, who were shipwrecked on the China coast. They state that on reaching the land they were attacked by the natives, severely beaten, and some of their comrades killed. Their intention is to go from here to Chapoo in the province of Chekeang to embark for their own country. Several of our sinologues have conversed with them by means of writing, the Japanese using, with but slight deviation, the written character of the Chinese, though their spoken language is quite unintelligible to them. There met, when shewn the drawing of a European ship, immediately recognized it for a dutch ship such as were in the habit of visiting Nangasaki.

We give several extracts from the latest English papers we have seen. The contraction of discount by the Bank of England, and by other capitalists seems to have had the effect of lowering prices of most articles, and it was feared that a reaction, in consequence of the great quantity of fictitious capital created by rail-road speculation and foreign loans, would prove disastrous to the money market.

## EXTRACT FROM THE CHINESE.

*Translated for the Canton Press.*

*( Continued from our last. )*

Some days after Tsao-Tsao invited several Gentlemen to dine with him. While they were drinking their entrance cups Chotse walked into the room in a pair of wooden boots and placed himself at the head of the table.

The guests were exceedingly disgusted at this impudent conduct, and were expressing themselves to that effect to their host, when Cho tse turning to him, said "My lord you seem very happy with all these fine gentlemen eating and drinking. You have every thing that is procurable at your table; the best of wines, the choicest viands; but are you satisfied? Is there nothing else you could wish for?"

Tsao-Tsao thought a moment and then said "I certainly should like some dragon's liver to make a stew; but I am sorry you cannot procure any."

Cho-tse answered "nothing is easier; bring me pencils and ink."—When they had brought the pencils &c. he drew the outline of the form of a dragon on the wall and sprinkled some wine on it. In a few moments a real dragon was raised out of the wall and he immediately plucked forth its liver and presented it to Tsao-Tsao who instead of thanking him, accused him of having had the liver concealed about his person.

Upon this Cho-tse addressed the guests who were astonished at what they saw in this manner. "You all know, gentlemen, that rain having been denied so long, verdure is all destroyed; but name any flower you like and I will immediately procure it for you."

They immediately named the Camelia Japonica as the flower they most wished for.

Cho-tse ordered the servants to bring into the room a large empty flower pot which he placed in the centre and half filled with water.

In a short time, to the utter amazement of Tsao-Tsao and his guests, a beautiful flower sprung up in the pot.

When they had recovered themselves they found Cho-tse had vanished. Tsao-Tsao exclaimed. "So dangerous a man ought not to be allowed to go at large; let the Captain of the guard take three hundred of the "iron armour Battalion" and pursue him....."

*( To be Continued. )*

## *SHIPPING INTELLIGENCE.*

ARRIVED — *La Grange*, Jarro, from the Sandwich Islands. *Morrison*, Ingersoll, from Liverpool Oct. 31st. Brit. *Trinculo*, Rea, from Liverpool. *Ruby*, Warren, from Calcutta Dec. 30th. *Waterwitch*, Reynell, from Calcutta, January 22d

SAILED or DESPATCHED — Brit. *Prince Regent*, Biles, for London. Amer. *Rome*, Jenks, for Java. *La Grange*, Snow, for Manila. Brit. *Fanny*, Sheriff for Singapore. Amer. *Virginia*, Mac Michael, for Java. Brit. *Brilliant*, Rogerson, for Manila. Amer *Hope*, Norman, for Manila. Brit. *Syed Khan*, ——, for Bombay.

PASSENGER — Per *Syed Khan*, Mr. Wm. Haylett.

The *Sir Herbert Compton* is under despatch for Singapore and Bombay. The *Polonais* and *Cecilia* bound here put back to Singapore. The *Ardaseer* had, we perceive, struck on "a shoal not laid down in any chart" somewhere about Bintang point, and was repairing at Singapore. The *Motichand Amichund* had passed Singapore for this. The *Pascoa* was still lying embedded in mud, and would cost a large sum, (say $11,000) to float her again into deep water.

Part of the Cargo of the *Victory* has come over from Manila in the Spanish vessel *La Trinidad*. She will probably be condemned.

The *Emily Taylor* was inserted as sailed in our last No. This was a mistake, she is at Whampoa.

The *Rob Roy* and *Comajee Family* were to follow the *Waterwitch* for this from Calcutta in two days.

The *Lord Lowther*, *Asia*, *Inglis* and others are loading for Great Britain.

LATEST DATES from ENGLAND 31st October ₱ *Morrison*. UNITED STATES 14th Oct. ₱ *Samson*. CALCUTTA, 12th January ₱ *Water Witch*. SINGAPORE, February 6th ₱ *ship*. LUZ 10th December ₱ *Delight*. MANILA 9th February. BOMBAY, 3rd January via Bengal.

VESSELS EXPECTED.—From the SOUTH, *Cecilia*, *Polonais*, *Gallarion*, BOMBAY, *Sarah Barry*, *Falcon*, *Psyche*, *Cassador*. JAVA, *Mercury*, *Ann*. SYDNEY, *Moffatt*, *Lady Kennaway*. CALCUTTA, *Sir C. Malcolm*, *Comajee Family*, *Sir Ry*. LONDON, *Pleiades*. MANILA, *Don Antigon*. SINGAPORE, *Cornwallis*, *Ardaseer*, *John Fleming*, *Good Success*, *Motichand Amichund*, *Governor Phillips*, *Ternate*.

The Local Insurance Offices grant Policies payable in London, Calcutta and Bombay, or in Canton.

### WHAMPOA PORT CHARGES, &c.

1st class ves. measg. 1600 cubits & upwards pay 0.7574756 of a Tl. per cubit.
2nd „ „ „ 1200 do. & under 1600 „ „ „
3rd „ „ under 1200 do. 0.5067341 „ „

N B. The cubit is 14¼ inches: measurement is taken on each entry of the vessel with cargo (except Rice) and is from the Foremast to the Mizen mast, or tiller head in Brigs; and across at the main mast; these are multiplied together for the above products—The largest class pay from $ 43.6 to $ 1330; 2d class from $ 370 to $ 370; 3rd class from $ 3700 and under. The Comsha or Present Fee is paid by all vessels 160 Taels or $ 2225. Linguists fee $ 175½ and Compradore's fee $ 50. Also Pilotage $ 60, inwards and outwards the same. On French and other Foreign vessels they are slightly varied. Riv'eaden ships are charged only about $ 1300 in lieu of measurement &c.

## COMMERCIAL REMARKS.

### IMPORTS.

COTTON MANUFACTURES.—Brown Longcloths are the only articles that continue in steady and a favorable demand.

COTTON YARN.—has been a little more enquired for, but the offers are by no means encouraging, and the lower numbers are still most required.

WOOLLENS.—There appeared some chance of improvement from the favorable accounts from the interior, but one or two considerable parcels of both Longells and Spanish Stripes, having been thrown into the market, have checked any advance, and the demand continues very languid.

RICE.—continues depressed.

METALS.—are rather declining.

TEIN.—are in brisk demand.

COTTON.—Some sales since our last at low rates evince a decided decline in price, and our highest quotations could not be obtained, except for really fine quality, and the expected arrival from both Bengal and Bombay render sales very difficult, the chinese holders being eager to run off their own purchases.

OPIUM.—For the last few days the market has been more quiet, as, from the silence of the authorities, parties begin to be less sanguine of the legalization, although sufficient mystery still hangs over their proceedings to give rise to speculation. The deliveries, as will be seen above, are good for the past month; but there are at present no sales to be effected to any extent at our quotations, either of Bengal or Malwa Opium.

### EXPORTS.

RAW SILK.—No Canton Silk is in the market, and in Tsatlee and Taysaam we have no transactions to report. Our quotations for the latter must therefore be considered quite nominal.

SILK MANUFACTURES.—There has been a brisk demand for many articles, particularly white Pongees, for the English market, and they have consequently improved in price. But few ready made goods remain in the market.

TEA.—Our quotations for *black teas* in particular will be found considerably lower than before; they are now procurable at these prices, but there are very few good teas of any kind in the market. Our higher quotations may therefore be considered as quite nominal. The total exports this season up to the 1st of this month amounted of black teas to 22,264,267 lbs, and of green 6,954,264 total only 29,216,332 lbs. or about 14 millions less than were shipped last year in the same period.

# THE CANTON PRESS.

VOL. 2d No. 21. CANTON, SATURDAY, MARCH, 11th, 1837. No. 79

## SPAIN.

WHILE the Queen Regent, in the palace of La Granja, at St. Ildefonso, was lulled into something like security by the easy suppression of the riots at Madrid on the night of the 3rd of August, and by General Quesada's assurances, that he would answer for the future tranquillity of that capital, and the fidelity of the regular troops, a sudden insurrection burst around, and overwhelmed her and her authority in the course of a single night. An insurrection composed of worse elements is scarcely upon record.

On the 12th of August, at eight o'clock in the evening, (the favourite hour of late for such purposes) the regiment of provincial militia, doing duty at St. Ildefonso, broke from their barracks with the cries of "Long live the Constitution!" "Long live Isabella II!" and proceeded in arms towards the palace, singing Riego's hymn, 'Trazala Perros,' and other revolutionary songs. The soldiers of the 4th regiment of the infantry of the Royal Guards, on whom the Queen placed great confidence, no sooner saw the revolted militia arrive at the palace than they joined them ready armed. The officers, however, without a single exception, remained true to their duty, and some squadrons of the cavalry of the Guards, stationed there, would take no part in the movement.

On the approach of the rabble soldiery the strong gates of the palace were closed, and from within, the Commandant-General, Count de San Roman, and other superior officers, endeavoured to reason with and calm the men. They were not listened to, and the insurgents soon added to their former cries—"Death to San Roman—to Quesada—to all traitors!"

M. de Rayneval, the French ambassador, who was confined to his house by a dangerous illness, which proved mortal a few days after, caused himself to be supported to the square before the palace, where Mr. Villiers, the English minister, and one or two other diplomatic gentlemen had already arrived, and were exerting themselves to still the storm, and save the Queen from outrage. On hearing some of the men clamouring for their arrears of pay, Mr. Villiers took it upon himself to assure them that they should receive it within two hours, if they would only retire to their quarters. But it was very evident the mutineers had extremer objects in view, and were prepared for mischief. Many of them were drunk, and they generally assured the foreign ministers that they were not met there for the paltry matter of a few dollars a-piece, but to change the Government, and establish liberty. M. de Rayneval and Mr. Villiers then asked to speak with their officers, on which, laughing in their faces, they told them they had no officers—that they had taken this affair into their own hands, and had appointed their corporals and sergeants to lead them. Finally, the Ministers begged to be admitted into the palace where they might act as mediators with her Majesty, but this was insolently and obstinately refused; and as oaths and threats against them now proceeded from all around them, they were obliged to retire.

The insurgents succeeded in forcing a small posterngate which, fortunately, did not give access to the interior of the palace; seeing this, they proceeded to break down the principal gate—musket-shots were fired—and then they began to swear they would bring up artillery, and lay the palace low, and massacre all within it, if the Queen did not instantly accept the Constitution of 1812. After holding out for some hours, with great firmness of mind, seeing no hope of succour from her friends, the Queen Regent proposed that twelve soldiers should be admitted to her presence. The insurgents agreed to this proposition, and appointed a fanatic corporal to head the deputation. On being admitted, the Queen asked what they wished, and why they, upon whom she relied for protection, threatened the safety of their infant Queen and of herself. The man replied they wanted liberty, and the Constitution of 1812. Her Majesty endeavoured to make them feel that they did not understand the nature of their demand; and they readily enough avowed that they did not know much about the Constitution of 1812, but as they had been told it was excellent—that it would better their condition, and lower the price of tobacco and salt, and sundry necessaries, and as it had been proclaimed at Malaga, and Cadiz, and Seville, and Cordova,—they would have it. An officer with the Queen represented to them that the Constitution of 1812 called their enemy Don Carlos to the throne, to the exclusion of their queen, his niece—and this, we believe, is the case, inasmuch as the alteration of the Salic law of succession, which now excludes Don Carlos, was not contemplated or included in the terms of that Constitution. To this somewhat startling representation the drunken orators replied—"As for Don Carlos, we will not have him—he is a despot; and as for the two Queen's what matters it though the Constitution do reject them—we will have them, and will certainly support them."

The singular conference had now lasted a long time, and the insurgents without, irritated by delay, began to exclaim that there was treachey—that their comrades were murdered within the palace, and as the bloody Quesada might come up with troops from Madrid, it was necessary to bring matters to a conclusion at once. At the mention of Quesada's name, some of the insurgents were observed to sneak away, but they had nothing to fear, nor had the Queen anything to hope from the unfortunate General. At last, at two hours after midnight, stunned by the shouts of a ferocious soldiery, and moved by the tears and entreaties of all around her, the Queen yielded, and took the oath to the Constitution tendered her by the twelve revolted privates. Some accounts, however, state that she did not even then take the oath, and that all that could be obtained from her, in the face of so much danger, was her signature to a paper, authorizing General San Roman to allow the soldiers to swear to the Constitution of 1812 until the Cortes assemble. Except as it regards that helpless woman's courage (a virtue to which she certainly is not deficient) it is of small consequence whether she swore that night, or the next morning, or the day after. The oath, whenever taken, was extorted by brute force—with the knife at the throat. At the moment of crisis the only Member of the Cabinet at St. Ildefonso was the Minister of Grace and Justice.

Having achieved this signal victory, the soldiers gradually retired to their barracks, and at five o'clock in the morning all was quite at La Granja and St. Ildefonso. When the news of these transactions reached Madrid at an early hour of the 13th of August, the whole garrison was put under arms, loaded cannon were pointed in all directions, and the troops kept ready to fire at the first signal or first sign of revolt.

In our last Retrospect we mentioned the confidence of the Minister, Isturitz, and Queen's general, Quesada, but it soon appeared that such confidence was ill-founded, and that the troops were not to be depended upon. It was in vain they represented that the affair at St. Ildefonso was a military insurrection contrary to all law, and that the Queen was kept under restraint by a faction which would extract from her whatever orders or regulations they chose; the soldiers had been taught to believe that the movement had been sanctioned by the whole nation,—that the Queen was still a free agent,—and that her name and signature were entitled to more respect than ever. Reports and printed papers were circulated among the troops and lower orders of citizens, stating that her Majesty disapproved of all the tyrannical measures adopted by Quesada, who was a traitor to her cause. At this juncture, too, intelligence arrived that the Constitution of 1812 had been proclaimed in Carthagena, Alicant, Valencia, and other places. Although the countenances of the troops gave them little encouragement, Quesada and Isturitz persisted through the whole of the 13th and 14th, during which latter day a small body of cuirassiers, which adhered to them, killed a few rioters; but, on the following morning, a royal decree, dated the preceding day at St. Ildefonso, and purporting that the Queen ordered the immediate proclamation of the Constitution of 1812, was posted up in Madrid, where it produced all the effect that was desired. This decree was soon followed by several others, one of which dismissed the Isturitz Ministry, and named an ultra-liberal Cabinet. Quesada and Isturitz then began to think of providing for their personal safety, but they did not leave Madrid until several frightful deeds of violence had been performed, and it was made quite evident that scarcely a soldier, whether of the garrison or national guard, would pull a trigger in their defence. Quesada was seized on the 15th, and most barbarously murdered at a place only two or three miles from Madrid. Isturitz, using better speed, gained the frontiers of Portugal, and traversing that country in disguise, reached Lisbon and embarked for England, where he now is in safety. Galiano, Rivas, and other members of the displaced Cabinet, for whose heads the mob were shouting, either escaped in disguise or took to secure hiding places in the city.

We have just seen, in a Bayonne paper, that Quesada's eldest son, who was in France, shot himself on learning his father's death. The organs of the movement party, like the Robespierres and Marats of old, say that the fabric of liberty must be cemented by blood; and they will have blood enough, for the "Montagne" is now in the ascendancy.

The 'Madrid Gazette' of the 15th published the following decrees in form:—

"The Constitution of 1812 is proclaimed until the meeting of the Cortes, which will decide upon the institution that are to be given to Spain.

"M. Calatrava (a furious ultra-liberal) is appointed President of the Council; M. Ferrer, Minister of Finance; M. la Cuadra, Minister of the Interior; General Seoane succeeds General Quesada; General Rodil is appointed Commandant of the Guard and Inspector of the Nacionales, &c.

"The state of siege is raised, and the National Guard of Madrid is re-organized."

To these decrees was added the reviving intelligence that the Constitution of 1812 had just been proclaimed at Santander and St. Sebastian.

On the afternoon of the 15th, whilst the mob were rejoicing at the savage murder of Quesada, General Seaone, his successor, rode through Madrid attended by a numerous staff, all shouting "Viva la Constitucion!" Soon after Seaone published two addresses, one to the inhabitants of Madrid, recommending tranquillity and good order on the *glorious day* of the reestablishment of the true Constitution; and the other to the soldiers and National Guards, stating that the recent act of the Queen-Regent had closed an "abyss" which threatened to swallow up the whole nation, and recommending that strict discipline which became them as soldiers and patriots. The mob wanted to wreak their vengeance on Quesada's house, widow and family, but in this they were prevented. At night the church bells were rung in triumph, and there was a general illumination. It is said that in the midst of all this blaze of lamps and torches, the house of the British embassy was enveloped in darkness—that the mob were much offended thereat; but that the omission was attributed by some merely to the absence of the Minister, Mr. Villiers, who was still at St. Ildefonso.

In the course of the following day, Calatrava addressed a circular letter to the foreign ministers, informing them that her Majesty had been graciously pleased to appoint him Premier and Minister of Foreign Affairs, in consequence of which they must henceforward transact business with him. To this letter, it appears, not a single answer was sent, nor can we see how one could be expected. Those diplomatists had been accredited by their governments to the Queen-Regent reigning under the Estatuto Real, and not under the Constitution of 1812. They could not acknowledge an extreme revolution without express orders to that effect from their respective courts.

In the mean time the Regent and the infant Queen were close prisoners at La Granja, and exposed to the grossest insults; for the soldiery who had made the revolution there were afraid of trusting the party that had set them in motion, and thought not only their reward but their safety dependent on keeping possession of the royal persons. Mendez Vigo, the newly-appointed Minister of War, was obliged to descend to a long parley, and to prayers and entreaties with the common soldiers, in order to induce them to liberate the Regent and allow her to go to Madrid where her presence was indispensable. With difficulty the men gave their consent; but they soon changed their minds, and when Vigo returned to remove her Majesty he found they had doubled their sentinels, guarded every avenue to the palace and garden, and closed all the gates. In the late fete of the palace they had put a guard in the apartment of the Infant Queen, to prevent her being secretly carried off, and they now denied admittance to Mendez Vigo, and to all others save common soldiers like themselves; for by this time they doubted the faith of their non-commissioned officers and even refused to obey Sergeant Garcia, the head of the plot, who had gone into the palace with the deputation of twelve, and been their spokesman on that occasion.

The terrified court party then endeavoured to obtain from their masters a free passage to Madrid for Mendez Vigo, in order that he might carry the royal despatches organizing a new government which had been appointed according to their wishes. This they refused to grant unless a deputation of their own body accompanied Vigo, and the despatches and decree were previously read to them; and when the Minister of War attempted to drive off in his carriage he was stopped by levelled muskets and bayonets, and carried back with great abuse. The Queen Regent was obliged to comply. At a late hour the soldiers were admitted into her apartments (many of them being again intoxicated), the decrees were read to them and submitted to their inspection, and after a long debate they consented that Mendez Vigo should go to Madrid, accompanied by Garcia, five other non-commissioned officers, a musician of the band of the provincial militia, and twenty privates. This was on the night of the 15th, during a part of which the soldiers amused themselves by seizing all the letters and despatches that arrived at St. Ildefonso. The letters addressed to the Queen were read aloud by a sergeant, and a *gentleman* of the body-guard, and are said to have occasioned much merriment in the barracks. The next morning they sent a part of the foreign diplomatic despatches, which we suppose they had not been able to understand, to the house of the English Minister,—the covers having been previously torn off and some of the despatches altogether destroyed. After suffering a series of the grossest insults, the Queen Regent contrived to requisite these heroes to a march to Madrid, where they were to be received in triumph. On the morning of the 18th of August they entered the capital by the Puerta del Sol, amidst the cheers of the multitude, and headed by General the Marquis Rodil, at whose right hand rode, proud and glorious, Sergeant Garcia, the "Liberator." After marching through the streets to the terror of the quiet inhabitants, and invoking death on all the late Ministry, as well as on Toreno and many others of their predecessors, they repaired to a banquet prepared for them by some of the National Guards, at which their patriotism was still further inflamed by copious draughts of wine and ardent spirits, which were supplied to them with a profusion that looked as if miscief were preconcerted. Drinking, generally speaking, is not the vice of the nation, but a drunken Spaniard is always a dangerous character. From all accounts it appears that these fellows had been kept in a state of sobriety for five or six days: the cups and toasts at Madrid completed the confusion and madness of their brains, and when the patriotic banquet was over, they sallied forth to insult and beat all such persons as did not look like true Liberals. Their chief spite was directed against the 3rd regiment of the guards, which, in the midst of a general anarchy, had maintained something like discipline, and a respect for their superior officers. A private of the 3rd was struck with a sabre by one of the sergeants from La Granja, and returned the compliment by running the sergeant through with his bayonet. A few of the soldier's comrades ran up to his assistance, but they were overpowered by numbers, and obliged to retreat to their barracks after two of them had been killed. The men of the 4th regiment of the Guards, the provincials and nacionales, then attacked the barracks, which were vigorously defended by the 3rd, who, maintaining a galling fire, killed and wounded a good many of their assailants, and forced them to retire. Seaone, the new Captain-General and Commander of Madrid, hearing this frightful *tapage*, beat to arms, and marched with an imposing force to the barracks of the 3rd, who readily laid down their arms at his command, conceiving that his authority would protect them from any further attack. But the drunken heroes of La Granja did not so understand it, for they presently reappeared with three cannons, which, aided by the mob, they had forcibly seized in the artillery barracks, and which they now pointed against the barracks of the 3rd, who again ran to their arms. Seaone in the same breath ordered the 3rd to cease their resistance and the guns to be fired upon them. This conduct is intelligible enough. The new commander owes his post to the movements at La Granja, and there would have been danger to himself in resisting the provincials, the nacionales, and the men who formed by far the stronger party in this conflict. After several cannon shot had taken effect and killed and wounded a one of the 3rd, the Colonel of that regiment ordered his men to give up a hopeless struggle. They piled arms, threw their colours out of a window in token of surrender, and then the Captain-General ordered the firing of the artillery to cease. The victors rushed into the barracks and plundered the magazines of fire-arms, sabres, accoutrements, and everything the contained. During the night the marauders sold most of these articles publicly in the streets of Madrid. On the following morning some of the officers of the 3rd, and a few of the mutinous 4th, sent in their resignations, finding it incompatible with their character as men of honour to continue in a service where they were over-ruled and insulted by a lawless mob, or by their own men. We are disgusted with these details, but it is only by giving them that we can convey an idea of the thoroughly disorganized state of the Spanish capital.—*Companion to the Newspaper for October.*

## EXTRACTS.

JOHN SMITH.—A gentleman whose name has come out in the Albany newspapers, giving his number and protests against the numerous applications that are made to him for the payment of bills due from others of the same name. He says, need is sent to him from the market that he never bought; eggs that he never laid; nor is any money due—and sundry other inconveniences, that he cannot bear. Sensible that his name has become a name, he refuses upon his number; and means to be distinguished, that he no forth it shall form a part of his style and title. Since the number he changed, his distinction is at an end, and he resorts again to his doubtful ownership of that family of names whose name is *legion*.

It is stated that the model of a locomotive, is exhibited in London, which will move on a rail road without steam at the rate of one hundred miles an hour!

After this we may expect some machine to be soon erected, by which a man may arrive in Baltimore *before* he leaves Washington.—*Washington Sun.*

The Hon. Henry Clay lately had a marvellous escape from death. He was riding on horseback in one of his fields, surveying his cattle, when a furious bull, maddened from some cause or other, rushed towards him, and plunging his horns with tremendous force into the horse on which Mr. Clay was seated, killed the poor animal on the spot. The distinguished rider was thrown to the distance of several feet from his horse, and though somewhat hurt by the fall, escaped without material injury. His deliverance was truly miraculous; and deserves as much to be called the effect of Divine interposition, as did the failure of Lawrence's pistol at Washington, when he attempted to lodge a bullet in the thorax of the President,—upon which the Globe commented with such religious awe.—*Phila. Gaz.*

## SOCIETY FOR THE DIFFUSION OF USEFUL KNOWLEDGE.

10th the March, 1837.—The second annual meeting of the Society for the diffusion of useful knowledge having taken place this day, at No. 2 American Hong, Mr. Jardine, as President, took the chair.

The Report of the Committee for the past year was then read.

Mr. Bridgman made a few remarks on the encouragement which the society may derive from the fact that, whereas a few years since, the number of foreigners engaged in the study of Chinese in this part of the world did not exceed five or six, their number is now greatly increased and still increasing.

On the motion of the Rev. Dr. Parker seconded by Mr. Williams, it was,

Resolved.—That the Report just read be accepted, and printed under the direction of the Committee.

On the motion of Mr. Inglis, seconded by Mr. Green, the following appointment of officers for the ensuing year was made.

| | |
|---|---|
| Mr. Jardine, | President. |
| Mr. Bell | Treasurer. |
| Mr. Kino. | |
| Mr. Lindsay. | |
| Revd. Mr. Parker, M. D. | |

The Secretaries the Revd. E. C. Bridgman, and Mr. J. R. Morrison, being requested to continue their services as before.

The report of the Committee of which we are enabled to give only a short extract, was to the following effect.

It set out with saying that if any of the members of this society expected to hear an account of great and speedy results already attained, they would be disappointed. The work which the Society had imposed on itself, was one of time, and if any effects had yet been made to effect some good, they had been feeble, when compared with the work before them.

The society derived great encouragement from a view of the civilization in the west and in India; particularly seeing how knowledge was diffusing itself over the latter country, where only fifty years ago the number of Europeans who possessed even a knowledge of any of the languages spoken in the East, was but small, and smaller still that of Indians who had any wish to acquire the English language But now we see natives of England and India uniting together in the business of life, and the knowledge of Europe diffusing itself by means of the native schools. With this example before us, why should we despair of doing great good in China, even during the few years that the present members of the Society may be joined in the work, nor why should not their immediate followers already be able to perceive that the Chinese Empire has advanced by knowledge some steps to give it additional political importance?

The present ignorance of the Chinese ought to be to us an incentive to greater exertion rather than discouragement, and however great comparatively the advances may be, which in this empire have been made in the useful arts, we need only look to the great improvements in arts and advance in science so lately made in Europe, to convince us that but little of it's light has hitherto penetrated into China. We might become the means, by introducing the improvements of European science to economize the time and means of this industrious people, and though we may, by superior knowledge, have surpassed them in the manufacture of articles, once peculiarly their own, such as silk and porcelaine, may we not, by mixing more freely with the intelligent Chinese, again derive from them practical knowledge and advantage?

We have seen that a Chinese carried the art of making prussian blue from England to his own country, on which he thereby conferred great benefit, almost all the wearing apparel of the poorer classes being died with this material. If now for instance we were to teach them the chemical solvent of Indigo, they would be able to use the Indian product from which the want of that knowledge at present precludes them, and they would do so in preference to their own Indigo which is of an inferior quality.

Many are the difficulties with which the Committee has had to contend, and these have been of two kinds, the one in it's nature temporary, the other of a more permanent character. The first is the unfriendly and jealous conduct of the Chinese Government, which renders it extremely difficult to print and publish any Chinese works in China; this has been obviated by getting such publications printed in Singapore, where Mr. Moor has readily and zealously undertaken to superintend their progress through the Press, and has also promised to make arrangements for the sale of the Society's publications. The second, and more formidable, difficulty is the want of a sufficient number of writers in the Chinese language, those who are conversant with it in China having in general too little leisure to give much attention to the wants of the society Hitherto the only assistance the society has derived has been from three Gentlemen, but it is hoped that there being several Gentlemen in the straits of Malacca who have attained the language, they will lend their aid to the society.

Entertaining a hope that this aid will be given, the Committee has drawn up a plan of operations, sketching the outlines of what it regards as most demanding attention, and invites contributions on the following heads: HISTORY including BIOGRAPHY, GEOGRAPHY including TRAVELS NATURAL HISTORY. MEDICINE. MECHANICS and MECHANICAL ARTS. NATURAL PHILOSOPHY. NATURAL THEOLOGY. BELLES LETTRES.

Here followed a more special outline of the subdivisions of these different heads, which, as exceeding our limits, we omit. The report then went on to say that the first work of the society, a general view of universal history, in three Chinese volumes, had been completed, and was in course of publication, and that a history of the United States was also being prepared. The delay in the completion of the Geography had retarded the publication of a map of the world as mentioned in last year's report. Of Mr. Gutzlaff's Chinese magazine 1000 copies were in the hands of the Society's agents in Singapore for publication in the straits, and the edition of that work has for the future been undertaken by the Society, which invites contributions to it.

Mention was made of the progress the Rev. Mr Dyer was making in Malacca in the preparation of moveable metallic chinese types.

The funds in the hands of the Society's treasurer amounted to $ 1253-48.—

These are, we believe the more prominent points of the report read to the meeting yesterday, and we wish not to leave the subject without soliciting the sympathies of our readers in behalf of an establishment, which promises in the course of time to effect much good, and which is being conducted by gentlemen whose long residence in this country and knowledge of the Chinese language, render peculiarly fitted for their office.

It may not be out of place here to mention that an annual subscription of ten Dollars entitles the subscriber to become a member.

## COMPANY'S FINANCE COMMITTEE, IN CHINA.

We have at different times adverted to this establishment, pointing out it's undue interference with the China trade, and shall now again offer a few observations on the same subject, one of so much importance to our trade, and which, ever since the establishment of the Free Trade to China, has weighed heavily on those concerned in it.

It was with pleasure that we heard it stated that Lord Auckland was averse to the continuance of the Company's Finance Committee in China, not however on account of this establishment interfering with the trading community but because the Bengal treasury finds itself inconvenienced by the uncertain mode in which, through the different channels, the India Revenue is at present drawn to England. But we do not in this instance quarrel with the motives; so long as our object is obtained, it matters not much whether consideration for the general utility and welfare, or for the convenience of the Government alone, effect the change We only hope that since the Bengal Government joins it's complaints of the Company's finance operations to those of the public, the obnoxious establishment may soon cease to exist.

We shall now recapitulate the disadvantages to which the Company's Finance operations in China have subjected the China trade.

1st. They have raised the prices of exports from China.

2nd. They have lowered the value of imports from Great Britain, it being by far the easier mode for the speculator to obtain funds for his operations, by taking the Companys advance, in most instances to be repaid after his adventure has been realized, than to purchase manufactures in England, and be out of pocket for their value 15 or 18 months.

3rd. They have lowered the prices for China Produce at home, by inducing too great a quantity be to thrust on the market.

4th. They have prevented the merchant profitably to follow his calling, he not being able to compete with so powerful a body as the Bengal Government.

That the Company's advances on China Produce must have raised it's price, is easily understood, when it is considered how many speculators the facility of obtaining funds brought into the market, who under other circumstances would not have possessed the means of entering into competition with other capitalists, thereby increasing the demand for produce far beyond what would have been required, had the trade not been in this manner fomented by the quantity of capital thrown into it, and by the comparative facility with which it was obtainable.

As a proof of this we may state that at the end of last year, till when the Company's treasury was open for advances, the prices of Congous, Souchong kind, were 33½ a 38 Taels per Pecul, and that now the same tea is quoted at 22 a 26 Taels, or about 33 per Cent less, and this decline in price is we believe chiefly attributable to the ceasing of the Company's advances, though we will admit that other causes may have likewise contributed is some measure to depreciate teas. One of them is the receipt of unfavorable accounts of the market in England; but the accounts received before the end of the year were any thing but encouraging, and yet prices rose to full fifty per Cent beyond the former Company's prices, apparently only stimulated by the facility of obtaining the necessary money from the Company. But why, it will be asked, should speculators enter on operations which are likely to yield a loss instead of the expected profit; here again we see the baneful effect of attaining the means of speculation with too much facility; the speculator has made up his mind to try his good luck, and frequently lays down his stake, be circumstances ever so unfavorable, probably in the hope, that by his peculiarly good management, and choosing such qualities, for which the consumer must have a predilection, he will avert from himself, the fate which threatens all others in the same pursuit. How far this has been the case with shippers of teas remains yet to be seen; we fear that with too many, confidence of that kind, created or at least fostered by the easy command of capital, will turn out to have been delusive.

If therefore the Company's advances have brought into the market too much competition by which prices of exports were raised beyond the probability of giving a profitable return for the Capital invested, this same competition has had the contrary effect in the British market, where, to enable the importer to pay the bills he has given to the Company, falling due generally within less than six months after the arrival of the goods that are security for them, he, knowing his neighbour to be circumstanced in the same manner, presses forward for sale, in the hope of realizing before too large quantities be thrown on the market and before, in consequence, the prices be too much reduced. This every body seems to have done and be doing, or we would not have received accounts of such low sales as have actually taken place lately, nor would we see advertised for sale by public auction a hundred thousand chests or more at once.

It may be said, that the speculators, being losers by their first adventures, will not follow up a bad trade, and that then the public, if the same system of Company's advances at a lower exchange than rules in the market, continues, will be gainers by obtaining the means of purchasing at a comparatively lower rate than private individuals would be able to afford We have already shown the tendency the company's advances have had in raising prices, and the Teas, had the British market been willing to take them at cost prices would have come much dearer to the consumer, than they would have been without the Finance Committee's interference. Hitherto the only gainers by this system have been the Company and the Chinese, but the latter to a much greater degree even than the former But let us now take into consideration in what way the exchange will probably be affected, when no longer interfered with by the Company.

Some time ago we calculated that the Company's exchange transactions in China made them gainers of more than £ 90,000 per annum, all which profit, if the trade were a remunerating one, would be paid from the pocket of the consumer. Now we believe, that if the Company's establishment were removed, competition between individual merchants would be sufficient to provide the funds necessary for the purchase of Tea and Silk at more moderate rates, than what the company has hitherto done. The Finance Committee's exchange, during the last season was 55½ d. per dollar, the silver value of a dollar, taking the ounce of silver to be worth 4s. 10d., about it's present market price, would not exceed 50½ d. or with charges, the dollar exported from London to China would not cost more than 52½ d. But it is not necessary that dollars should make the circuitous route of London to be brought here; means will be found to bring them direct from the westcoast of America, and in that case their cost would probably not exceed 49 d. From this it will be seen that if the importation of dollars be at all necessary, they can be laid down here at considerably less, even allowing a fair profit on the transaction, than what the Company gave them at. But it will be asked, why, if the Company made so large a profit on it's exchange operations, did not other merchants do the same? Why allow the Company to be the sole participator of these advantages? To this we answer that it cannot be expected that the private merchant should enter into competition with a body possessed of means so incalculably superior to his own, which body can, with to them comparatively trifling sacrifice so lower the exchange as to forego all advantage for a season in order to drive away all competition, and the merchants' speculation would consequently be a very unsafe one. The case is different when the merchant has only fellow merchants to contend with; there he stands on even ground, nor need the public fear that any profit he may derive from exchange operations in China will continue to be for any length of time greater than a just remuneration for his risk and outlay; too much capital exists without profitable return to make us apprensive on this head.

But it is not probable, that after exchange operations shall once have been regularly established by private merchants in Canton, any importations of dollars will be required, since the imports of merchandize into China exceed the exports very considerably. We have no exact tables to go upon, but a rough guess makes us estimate this excess at at least 4 millions of dollars, which must now be exported from the country in silver and gold. It would therefore appear that exchange operations, being once fairly set afoot, there would be no necessity, as the relative value of Imports and Exports at present stands, for importation of dollars, and this would only be resorted to in case the value of dollars here should be raised too much beyond their silver price, compared to other coins in other countries.

We hope we have proved by the above, that though the Company's Finance Committee has interfered with the China trade to the great detriment of those engaged in it, the consumer has not been a gainer by it's operations, and that both importer and consumer would probably be in a better position, were the trade abandoned to the enterprise of merchants alone

It is true that India must remit to England annually a sum exceeding three Millions Sterling, and must find means for the remittance, but we do not see that these means can only be found by resorting to China, particularly since lately East India Sugar has been allowed to be imported for consumption on the same terms as that of the Westindies and that very soon no doubt large quantities of it will be shipped to England, which may serve as security for the remittance of the India Revenue. Great Britain by means of these three millions derives an immense benefit from India; let England render this remittance as little burthensome to India as possible; let the Bengal Government advance this money for the exportation of Sugar; let them foment therewith their own productions; why should they, to the detriment of their own country, benefit the Chinese and give them much higher prices for their produce, than they would, without this Bengal Government's advances, receive?

That with this new branch of industry in India, and with what the Company would collect in England for Bills on Bengal the whole sum required, would easily be made up, we have no doubt. We are certain that every merchant in China ardently wishes "MAY THE CHINA FINANCE COMMITTEE BE SPEEDILY REMOVED."

---

We have made a rather long extract from the *Companion to the News-paper* for October, regarding Spain, which will however, we hope, be read with interest, as giving a succinct account of the occurences in Madrid, and as serving to explain how it is that Don Carlos' party is not only maintaining it's ground, but gaining advantages, which, at no remote period, threaten to subvert that miserable government of the Queen, which may any day be annihilated by a few drunken soldiers. Despotism is preferable to such a state of anarchy, and we almost wish to see Don Carlos in Madrid to put an end to the atrocities daily committed there. Spain in it's present state closely resembles the most unsettled of the Spanish South American Republics, and we much fear it will be long ere that country will be restored to quiet and rational liberty.

---

The Hong-merchants *Hing-tai* and *Tung-shing*, who were retained in the city about a month ago, have not yet been liberated, and their alleged offence is still being investigated. We hear the cause of their arrest to have been that some gold and sycee silver had been found on board a Cochinchinese vessel outward bound, when passing the Bogue. The Junk was stopped, and the two Hong-merchants above named were despatched from Canton to look into this matter. Their report has probably been unsatisfactory, and the offence committed, namely smuggling of sycee silver, being one against which the authorities are at present more than usually on the alert, will subject these merchants, if they are any ways implicated, to severe punishment or sacrifices. We sincerely hope that the example made of Aming may for the present have satisfied the law, and that milder punishment may be adopted for any that may be found guilty of the same crime hereafter.

---

We perceive from the Macasta Imperial that the Viceroy has again, under date of 28th February, issued an edict against ships anchoring at Cunsing-moon. It is, we suppose not intended for any thing more than what similar documents have been before, and we therefore do not give a translation. The Viceroy expresses his surprise that in spite of his reiterated prohibitions, ships still continue to anchor at Cum-sing-moon contrary to all law; he doubts that it is only for safety that ships resort to Cum-sing-moon, since they have begun this practice only within the last 13 years; he says that the ships go there only for the purposes of smuggling, since, if that were not the case they might go to Whampoa; he has therefore ordered the Admiral to issue orders to all the naval commanders to fortify the different stations with artillery. That foreigners may not unwittingly incur the danger of being attacked by these squadrons, this new prohibition is to be made known, since the Governor does not wish to punish with death foreigners who, not knowing the law, transgress them. But should the foreigners persist in their evil courses, and continue to misuse good for evil; should they continue not to appreciate the Viceroy's sincere and just intentions; should they continue to be so wrong headed, as to persist in transgressing the laws; then must they be considered as without the pale of the Emperor's mercy; they then become infractors of his and his lieutenant's laws, and may be compared to savages whose crime death does not even expiate; nothing then remains but to attack them with fire and sword until they shall be totally annihilated. Those foreigners coming from afar to smuggle, have nobody's interest at heart but their own; but violating the laws of the great empire, is like throwing away their property and even their lives; but how can this be prevented? Let them reflect, and have a care."

---

We omitted to notice in our last paper that the apprehensions excited about 15 months ago in Singapore, of the Bengal Government intending to levy duties at that port have been now completely allayed. The Singapore community being threatened with a measure that promised materially to injure the trade of that Settlement, addressed petitions to the Houses of Parliament on the subject, through Lord Glenelg and others, and the former wrote the following very satisfactory letter to Mr. Johnston of Singapore, which we recopy from the *Free Press*.

ALEXANDER JOHNSTON Esq.

*Singapore,*

SIR,

I beg to acknowledge the receipt of two copies of the Petition which you have been pleased to confide to my care. I feel honored by the trust of this Petition, which, cordially concurring in its purport, I have been gratified in presenting. I am happy to inform you that the measure which it deprecates will find no countenance from the Home authorities.

I have the honor to be,

Sir

Your most Obedient Servant,

GLENELG.
